Usry is running for re-election despite the bribery indictment and says he feels ''very confident.'' The mayor is accused of accepting money from a businessman seeking city approval for running electric carts for tourists on Atlantic City's boardwalk.

The businessman was working undercover for state police.

Usry, president of the National Conference of Black Mayors, is one of 14 Atlantic City officials or businessmen charged in several racketeering and influence-peddling schemes. Authorities say the cases indicate that the city is- in their words- ''up for sale.''

#90026u3409 01/26/1990 ~United Press International

(JAN. 26) UPI - The French government is condemning the state of seige and media censorship imposed by Haiti's military leader, Prosper Avril. And, France is suspending all economic aidMillion dollars a year- to Haiti until the crackdown is lifted.

Avril was expected to lift the state of siege today but did NOT appear on television for a scheduled speech this morning. There was NO explanation for the delay. Diplomatic sources yesterday said they believed the state of siege would be lifted today.

Avril attended the funeral of a powerful army colonel today whose assassination last week led to the declaration of a state of siege. Avril said he was taking steps to prevent the spread of what he termed ''terrorism.''

The military ruler assumed power in 1988 following a coup. He has promised to hold a series of elections beginning in April but political experts say recent events may disrupt the election schedule.

The United States is threatening to cut off aid and has joined France in condemning the state of siege.

In its latest revision, the World Book Encyclopedia has produced sorrow for the citizens of Schenectady.

Space-saving editing decisions have done more than relegate to the back pages of history the New York city that serves as the birthplace of T-V- the editing decisions have removed entirely reference to the city.

At least in the annals provided by World Book. While the 1990 edition of the Encyclopedia Brittanica has room to remind readers of the existence of Schenectady, World Book has replaced references with passages about a Canadian architect, a Viennese composer and a Dutch painter.

When asked to spill their feelings when told they'd been neglected by World Book, Schenectady politicians expressed disbelief bordering on urban despair.

Said one city councilman- it's a ''shame and disgrace.''

A World Book spokeswoman says the deletions in the ''S'' section are merely part of the cycle of addition and subtraction.

She has a point if you consider the danger of excess.

#90026u3619 01/26/1990 ~United Press International

(JAN. 26) UPI - Romania's Vice President Dimitru Mazilu resigned today, saying ''Stalinist practices and methods persist'' in the interim government of the National Salvation Front. The resignation came hours after Romanian leader Ion Iliescu rejected calls that he step down. The official Romanian news agency quoted Iliescu as saying that attempts to undermine his government ''spell great danger for the country's fate.''

President Bush addressed the U-S Conference of Mayors today and offered to forge a new partnership that- quote- ''realizes that as mayors, you are on the front line in the war against urban problems.''

Vice President Quayle headed to Latin America today, carrying messages from President Bush for leaders still perturbed of the U-S invasion of Panama. Quayle said he hopes his reception ''is a good one.''

Aviation experts say investigators must determine what role the fuel level played in last night's crash of Avianca Flight 52. There are conflicting reports that say the plane was very low on fuel or the pilot dumped fuel before crashing.

Former Panamanian ruler General Noriega has asked a federal judge in Miami to declare him a prisoner of war and transfer him to a neutral country. Noriega is appearing in court for a bond hearing. There has been NO ruling on his request.

-30- 1481
#90026u3767 01/26/1990 ~United Press International
(JAN. 26) UPI - Romanian Vice President Dimitru Mazilu has resigned. The vice president stepped down today, saying- in his words- ''Stalinist practices and methods persist'' in the interim government of the National Salvation Front. Mazilu resigned hours after President Ion Iliescu rejected calls for his government's resignation.

Soviet Defense Minster Dmitry Yazov says Azerbaijani nationalists have 40-thousand men carrying arms and intend to take control of the troubled region. But, Yazov says Soviet troops are crushing the militant political leadership of the Moslem nationalists. The Soviet minister says 80 leaders of the Azerbaijani Popular Front have been arrested and their offices searched.

Attorneys for deposed Panamanian dictator Manuel Noriega resorted to the 1949 Geneva Convention in an attempt to gain their client's freedom today. But the novel tactic in U-S District Judge William Hoeveler's Miami courtroom failed to gain Noriega his liberty. Hoeveler responded to defense demands that Noriega should either be ''repatriated or released'' by saying he had NO jurisdiction to rule on whether Noriega should be classified a prisoner of war.

President Bush says the new U-S-Panamanian relationship coupled with the Latin American country's co-operation in anti-drug efforts convinces him to extend financial aid in the aftermath of the U-S invasion. In a letter to Congress, Bush says supplying money to the government of President Guillermo Endara is vital to American interests.

A Mississippi man faces accusations of trying to pickle the porkers. A Madison County investigator says Lyndon Myers is being held without bond after allegedly trying to get his neighbor's hogs drunk by feeding them whiskey and wine. Myers is charged with trespassing, malicious mischief and three counts of simple assault.

-30- 2015
#90026u4059 01/26/1990 ~United Press International
(JAN. 26) UPI - The vice president of Romania resigned today, saying ''Stalinist practices'' still determine what happens in that country. Vice President Dimitru Mazilu said accusations continue to be made on the basis of secret files, and the government still controls who the news media attack. The resignation came shortly after Romanian leader Ion Iliescu refused demands for the resignation of his government.

In Miami, a federal judge today refused to consider a request from Panamanian General Manuel Noriega that he be declared a prisoner of war

and transferred to a neutral country, where he would be either ''repatriated or released.'' U-S District Judge William Hoeveler said he did NOT have jurisdiction to deal with the prisoner of war issue. The judge did rule that Noriega will NOT be freed on bond.

Residents of Northern Europe and Britain are recovering from a storm with hurricane-force winds that has left at least 92 people dead. Yesterday's tempest ripped roofs of buildings and swept cars off the road in 100-mile-an-hour windsin England. The storm also claimed lives in the Netherlands, Belgium, France and West Germany. The system is still alive and heading for the Soviet Union, but forecasters expect it to weaken today.

Contrasting signs in government economic reports today. The Commerce Department says the Gross National Product inched up only one-half percent in the fourth quarter of 1989. That's the slowest quarterly economic growth in almost four years. But orders for durable goods rose a healthy two and one-half percent. The head of the president's Council of Economic Advisers says he expects slower growth to continue early this year.

-30- 1855

#90026u4078 01/26/1990 ~United Press International

(JAN. 26) UPI - Authorities say one of the survivors of last night's crash of a Colombian jetliner was trying to smuggle cocaine into the United States in four rubber packets hidden inside his rectum. A hospital spokesman says the passenger suffered a fractured leg and- in his words- ''terrible'' abdominal injuries. The spokesman says the packets were discovered just as surgeons were preparing to operate. Doctors say they expect the man to live.

Federal health officials say the flu is spreading at epidemic proportions. The national Centers for Disease Control say the flu killed more than 11-hundred people last week alone. The disease accounted for almost eight percent of all deaths in the country last week. It's the worst flu outbreak in seven years. The Northeast and Midwest seem particularly hard hit.

For the third time in two months, a ship has run aground in Alaska. The Coast Guard reports that one of its own vessels hit bottom in the Wrangell Narrows off Alaska's southeastern coast last night. Coast Guard officials say the 180-foot cutter appears to be out of danger today. A spokesman says that at one point, 15 feet of water filled the ship's main hold. None of the vessel's 55 crewmen was injured and NO fuel was spilled.

According to a federal judge in New York City, panhandling is a form of free speech protected by the Constitution. U-S District Judge Leonard Sand today overturned a ban on begging in the New York City subway system.

Quoting the judge- ''The simple request for money... canNOT but remind the passer-by that people in the city live in poverty and often lack the essentials for survival.''

-30- 1814
#90026u4391 01/26/1990 ~United Press International
(JAN. 26) UPI - Name, rank, and serial number. That's all defense attorneys would say in Miami today in response to drug charges against ousted Panamanian leader Manuel Noriega. They claim Noriega is a prisoner of war under the Geneva Convention and should be sent to a neutral country. A federal judge revoked Noriega's bond and said he had NO jurisdiction to decide the P-O-W claim. Defense attorneys assert an international panel should decide.

Officials in Pawtucket, Rhode Island, say a teen-age girl was killed today when she was either hit by an Amtrak passenger train or jumped from a railroad bridge trying to avoid being hit by it. Investigators say the 14-year-old girl and a 16-year-old companion were walking along the bridge when the train, headed for Boston, approached. The companion managed to avoid being hit by jumping out of the way.

President Bush says his new budget seeks an additional 500-Million dollars for the Head Start pre-school program. The extra money would allow up to 180-thousand additional four-year-olds to enroll in the highly regarded program. Head Start is designed to help children make the transition from home to school and emphasizes parental involvement. Officials say this would be the biggest expansion yet for Head Start.

Jewish and Roman Catholic leaders in southern California have released a document that questions the role of the Catholic church in the rise of Hitler. The document notes a 1933 agreement meant to protect the church's rights in the face of German nationalism. But today's statement... released at a religious convention in Anaheim... says the agreement merely silenced the Vatican's opposition.

#90026u4422 01/26/1990 ~United Press International

(JAN. 26) UPI - The Soviet defense minister say government troops are gaining on Azerbaijani nationalists trying to assume control over the troubled southern region. Defense Minister Dmitry Yazov says 80 leaders of the Azerbaijani Popular Front have been arrested and their offices searched. Members of the Front's military arm say they're going underground to carry on their illegal struggle for power.

Another example of the waning popularity of communism in Eastern Europe. Poland's Communist Party leader says the party will dissolve itself tomorrow after 42 years of existence. The communist official says the party will reform as a new western style left-wing party. The scheduled dissolution of the party follows the same steps taken by the Hungarian and Romanian parties.

Romania's vice president resigned today in protest of secret government maneuverings. Vice President Dimitru Mazilu said the use of security files and the press to ruin careers reminds him of practices under Stalin. But the rest of the government is resisting daily calls for resignations from hundreds of protesters in Bucharest. Opposition groups are angry the interim rulers have decided to run in spring elections.

Humane society members are picketing Bootleggers bar in Lansing, Michigan,

for promoting wrestling between bar patrons and a trained bear named Ceaser. Capital Area Humane Society members say the wrestling matches are NOT a good idea for the bear and expressed concern the animal would be destroyed if he attacked anyone. The bear's trainer says the bear has never attacked anyone and the wrestling is closely monitored.

#90026u4548 01/26/1990 ~United Press International

(JAN. 26) UPI - The latest news... from a plane crash in New York to a plane's retirement in California, from the turmoil in Azerbaijani to a papal visit in Africa... U-P-I has details and developments from across the nation and around the world.

A federal judge in Miami today refused to rule on claims that former Panamanian leader Manuel Noriega is a prisoner of war.

U-S District Judge William Hoeveler said he does NOT have jurisdiction over the issue. The judge denied bond for Noriega.

Defense attorneys refused to take part in the bond hearing, claiming Noriega is a P-O-W under the Geneva Convention. The attorneys say an international panel should decide the matter. They say Noriega should be transferred to a neutral country to be sent home or released.

The government said it had frozen about 20-Million dollars of Noriega's assets and claimed that the money was only part of the former strongman's wealth.

Prosecutors claimed that Noriega's 17-year-old daughter deposited one-Million dollars in a Panamanian bank one day in September of last year. They said drug trafficking is the only explanation for such cash flow.

The painful process of identifying the victims of last night's crash of a Colombian jetliner has begun. A Red Cross spokeswoman says the first of the families have made an identification. She adds- ''It's a very slow process.''

As families begin to mourn and survivors embark on the road to recovery, officials are trying to determine what caused the Boeing 707 slam into a heavily wooded area on Cove Neck, Long Island, last night.

67 people died and 88 others were injured when Avianca Flight 052 crashed while trying to make its second landing approach into Kennedy International Airport in heavy fog.

Investigators say they're trying to figure out if the plane's fuel level

contributed to the crash. There was NO fire at the crash site, which has led to speculations that the plane simply ran out of fuel or the pilot dumped the fuel before the jet crashed.

Authorities say one critically injured passenger apparently was trying to smuggle cocaine into the United States. Four rubber packets of cocaine were found hidden in his rectum as surgeons prepared to operate.

The flight originated in Bogota, Colombia, and made a stop in Medellin.

#90026u4594 01/26/1990 ~United Press International

(JAN. 26) UPI - Pope John Paul began the first full day of a tour through five destitute African countries today by preaching in the Cape Verde Islands.

He told 30-thousand Atlantic islanders NOT to ''be imprisoned by the myth of economic progress.''

The pope spoke in Portugese to the throng in pouring rain at a sports stadium in the city of Mindelo on Sao Vicente Island.

The rain was the first since October in the archipelago where agriculture is a main sources of revenue. The Portuguese news agency said many islanders saw the rain as a ''sign of blessing.''

The pontiff later celebrated a solemn open air mass before an estimated 90-thousand people in Cidade Da Praia, capital of the mainly Roman Catholic islands.

The pope's objective is to bring comfort and draw attention to some of the poorest countries in the world. The average annual income in the area is around 200 dollars.

The national Centers for Disease Control in Atlanta report several states are being especially hard-hit by the flu this winter. Experts say the disease accounted for more than seven-and-a-half percent of the 15-thousand-and-90 deaths reported nationwide last week.

C-D-C viral disease expert Walter Gunn says- quote- ''This qualifies as an epidemic and confirms our earlier concerns that this would be a worse-than-average year. The C-D-C says 18 states have reported widespread flu outbreaks in counties that account for more than half of their entire population.

States seriously affected by the flu outbreak include, Massachusetts, New York, Wisconsin, and Arizona.

17 other states are reporting less-serious ''regional'' outbreaks. These include Ohio, Iowa, Kentucky, and Pennsylvania. The C-D-C says Indiana and New Jersey report NO flu activity.

Gunn advises those with heart and lung disorders to get shots. In his words- ''There's still time. It only takes two weeks to build up your immunity.''

-30- 2107

#90026u4603 01/26/1990 ~United Press International

(JAN. 26) UPI - A federal judge in New York City today ruled that panhandling is a form of speech protected by the Constitution. In an unprecedented ruling, U-S District Judge Leonard Sand overturned a ban on begging in the New York City subway system.

The judge noted- ''The simple request for money... cannot but remind the passer-by that people in the city live in poverty and often lack the essentials for survival.'' Two homeless men brought the class action suit against the Transit Authority... the agency that operates the city's subways and implemented the crackdown on beggers last fall. Attorneys for the homeless men hailed the decision.

Douglas Lasdon, one of the plaintiffs and the executive director of the Legal Action Center for the Homeless said- quote- ''It reaffirms the principle that in this country you cannot solve a social problem by silencing poor people.''

It is unclear what effect today's ruling will have on 25 other states that ban begging.

Admirers of the S-R-71 ''Blackbird'' spy plane gathered at Beale Air Force Base in California today for its official retirement.

The ceremony some 100 miles northeast of San Francisco included a supersonic high altitude flyover and short aerial program by the world's fastest and highest-flying jet.

President Bush signed a defense appropriation bill in November that eliminated funding for the plane.

The Air Force asked for the action. Officials argued that it cost too much to operate the aircraft and that satellites now can do a better job of aerial reconnaissance.

Lockheed built 30 S-R-71's during the 1960's and '70's. Nine or more of the sleek black needle-nosed planes were believed to have been working.

The ''Blackbird'' can fly faster than a rifle bullet, and once flew from New York to London in less than two hours.

The planes will be put on display at museums around the country.

-30- 2078

#90026u4702 01/26/1990 ~United Press International

(JAN. 26) UPI - Former Panamanian leader Manuel Noriega had an unsuccessful day in court today. A Miami judge said he did NOT have the jurisdiction to declare Noriega a prisoner of war and transfer him to a neutral country. The judge also denied Noriega bond.

Investigators on New York's Long Island are trying to determine the role of Avianca Flight 052's fuel level in the Colombian plane's crash in dense fog last night.

They're looking to see whether malfunctioning or misinterpreted gauges caused the crash which killed at least 67 of the 158 people believed to be aboard the aircraft.

Only hours after Romanian leader Ion Iliescu rejected calls for the resignation of his government, the nation's vice president handed in his resignation. Dimitru Mazilu says he's quitting to protest the ''Stalinist practices'' of the National Salvation Front government.

Soviet Defense Minister Dmitry Yazov says Azerbaijani nationalists have 40-thousand armed men fighting to take control of the republic. But Yazov says Soviet troops are crushing the nationalists' militant political leadership.

A third straight day of anti-Serbian protests in Yugoslavia's Kosovo province turned ugly today when ethnic Albanians fired at police. Thousands of demonstrators took to the streets demanding more autonomy.

A 15-year-old Newhall, California, boy may spend the next 10 years of his life in the custody of the California Youth Authority, where he was sentenced today for molesting and strangling a seven-year-old girl. The girl's body was found stuffed behind the boy's waterbed.

-30- 1757

#90026u4712 01/26/1990 ~United Press International

(JAN. 26) UPI - Poland's Communist Party will formally dissolve itself tomorrow and reform as a new western style left-wing party. It's leader says the Communist Party is becoming ''a closed chapter of history'' after 42 years of existence.

A U-N official says a treaty signed by 59 nations today will help improve the welfare of Millions of children around the world. The U-N Convention on the Rights of the Child upholds basic freedoms for children and guarantees health care, education and protection from exploitation.

The government says a slowdown in the personal spending of American consumers helped raise the nation's economic growth to a sluggish one-half of one percent annual rate for the fourth quarter of 1989. The five-point-two-BILLION-dollar increase is the smallest in nearly four years.

The Energy Department is embarking on a six-year mission to improve U-S energy efficiency. The department says it'll spend 336-Million dollars to help industries develop renewable energy sources such as solar power.

Washington, D-C's, interim mayor is calling for a probe into alleged drug use and distribution among city government workers. Interim mayor Carol Thompson promises to make public everything uncovered in the investigation.

A 27-year veteran of Congress is stepping down. Democratic California Representative Gus Hawkins says he'll retire from Congress at the end of this year. The 82-year-old Hawkins was the first African-American congressman from California.

-30- 1664

#90026u4809 01/26/1990 ~United Press International

(JAN. 26) UPI - Investigators are trying to determine whether malfunctioning or misinterpreted fuel gauges caused the crash of a Colombian jetliner in dense fog on Long Island. At least 72 people died when Avianca Flight 052 crashed last night. Rescue workers say there was NO evidence the plane caught fire after crashing, adding to questions about its fuel level. But investigators say there were more than 13-hundred gallons of fuel left in the plane's tanks.

In Miami, a federal judge today refused to consider ousted Panamanian General Noriega's request to be declared a prisoner of war and transferred to a neutral country. U-S District Judge William Hoeveler said he did NOT have authority over that issue. He also refused to set bail for Noriega after hearing only from federal prosecutors when Noriega's attorneys refused to participate in the hearing.

Lawyers for two co-defendants in Noriega's drug-trafficking trial say they now have a better chance of getting separate trials since the deposed dictator's lawyers filed a motion today declaring Noriega a prisoner of war. Richard Sharpstein, the attorney for Brian Davidow, says he and many other defense attorneys are ready to proceed with their cases, with or

without Noriega.

A 15-year-old boy was sentenced in Los Angeles today to be held by the California Youth Authority for molesting and strangling a seven-year-old girl. The maximum sentence means Curtis Dean Cooper can be held until age 25. The victim's mother told the court the sentence is NOT enough to make up for the loss of her daughter. The girl was found stuffed behind Cooper's waterbed. Police said Cooper was a ''recent acquaintance'' of the victim.

-30- 1861
#90026u4821 01/26/1990 ~United Press International
(JAN. 26) UPI - Czechoslovakian Interior Minstry forces beefed up regular police patrols today amid rumors of planned coup attempt. The plot allegedly involves the secret police, the recently dissolved Communist Party security force and hardline communist elements. Interior Minister Richard Sacher earlier called the rumors ''totally unfounded'', but later appeared on nationwide television to reassure the public. Sacher says steps were taken to- quote- ''ensure the security and peace of citizens.''

Representatives of 59 nations signed the U-N Convention on the Rights of the Child in New York today. The Convention upholds freedom of thought and religion for children. It also guarantees them health care, education, and protection against military recruitment before age 15. The Convention will be binding on all nations after 20 countries have ratified the signing.

A snowstorm in the mountains of the Pacific Northwest gave a much-needed lift to the ski industry today. Up to 15 inches of snow fell over the Cascade Mountains in Oregon and Washington, with more on the way. A winter storm warning was posted for the mountain range. Area ski resorts previously had barely enough snow to cover major trails. In the Midwest, most folks aren't so happy about a storm yesterday that left behind nearly a foot of snow.

A Japanese businessman has paid two-point-one-Million dollars for the most expensive contemporary portrait of a living person, Michael Jackson. A spokesman for the singer says the painting, titled ''The Book,'' depicts Jackson holding an unidentified book that has greatly influenced his life. But the title of the book remains a secret. Jackson and the artist, Australian painter Brett-Livingstone Strong, unveiled the painting in Beverly Hills today.

SEATTLE (JAN. 28) BUSINESS WIRE - Horizon Air will fly more jets from its Boise, Portland, Spokane and Seattle hubs, increase flights in Montana including new service to Bozeman, and add other flights to its schedule starting Feb. 25.

The addition of a third 65-passenger Fokker F-28 jet to its fleet will allow Horizon to offer:

-- All jet service on its five westbound flights between Boise and Portland and jets on four of five flights eastbound.

-- All jet service on its three round trips between Boise and Seattle, in addition to sister company Alaska Airlines' two round trip jets.

-- Five jet flights each way on its Spokane-Seattle Shuttle plus four turbo prop flights westbound and three eastbound. Alaska operates three westbound and four eastbound jets between the two cities.

-- Three new jet flights on its every half-hour Shuttle between Portland and Seattle.

Horizon will start new service from its seventh Montana city, Bozeman, with three flights to Spokane and two to Billings. Also offered will be new direct service three times daily between Billings and Great Falls, and increased flights between other Montana cities as follows:

-- A fifth round trip between Great Falls and Spokane.

-- A fifth round trip between Billings and Helena.

-- A fourth round trip between Billings and Kalispell.

-- A new late evening flight from Billings to Missoula.

Elsewhere on its route system, Horizon will:

-- Replace an 18-seat Metro III turbo prop with a 37-seat Dash 8 on non-stops from Seattle to Eugene at 8:10 a.m. and Eugene to Portland at 9:55 a.m.

-- Add a new 6:55 a.m. Eugene to Portland flight.

-- Change from one-stop to non-stop the late night flight from Portland to North Bend/Coos Bay.

Horizon Air serves 33 cities throughout five Northwest states and British Columbia. Horizon and Alaska Airlines are wholly owned subsidiaries of Alaska Air Group Inc.

PROVO, UT (JAN. 29) BUSINESS WIRE - Novell Inc. (NASDAQ:NOVL), developer of NetWare systems software products, Monday introduced NetWare Remote Management Facility software, the first product to allow network managers full control of remote NetWare 386 servers from a centralized location.

Novell's Remote Management Facility lets customers install, upgrade, maintain and backup distributed NetWare 386 servers from remote workstations. The product includes distributed server console software, which allows desktop PCs to execute console commands through the NetWare internet facility or through asynchronous connections.

Using Novell's Remote Management Facility, network administrators can:

- Remotely configure, upgrade and troubleshoot NetWare 386 servers -- administrators perform routine NetWare network functions from a centralized network management installation, whether in the same building or another part of the world.

- Remotely monitor NetWare 386 servers -- administrators retrieve networked user information, disk and LAN statistics (including all LAN traffic), system module data, file-locking activity, files in use, memory usage statistics and server utilization.

- Remotely manage server functions, including mounting and dismounting of volumes, maintaining uninterruptable power supply status, resetting routines, removing DOS, loading disk and LAN drivers, managing name space support, and managing the transaction tracking system.

- Remotely perform backup and restore functions in single or

multiple-server environments from shared backup devices.

- Remotely view and copy files into and out of DOS partitions while running NetWare.

Novell's Remote Management Facility lists for $1,995 and will be available through Novell distributors and resellers in the second quarter.

Novell Inc. is the leading independent provider of open, high-performance systems software products. The company's NetWare network operating system has become a standard for personal computer-based local area networks.

Novell had revenue of $422 million for fiscal 1989.

TUSTIN, CA (JAN. 29) BUSINESS WIRE - CMS Enhancements Inc. (NYSE:CME) Monday announced that Tarek Ayoub has resigned as vice president of sales of the company in order to pursue other interests.

Jim Farooquee, president and chief executive officer, said: ''Tarek Ayoub has made considerable contributions to the growth of CMS during his years with us, and his service will indeed be missed.'' Farooquee added: ''Mr. Ayoub's duties will be handled by Ken Shrimplin, the company's director of marketing.''

Shrimplin has been director of marketing at CMS for the past 10 months and has been in the computer industry for 22 years, including positions with McDonald Douglas Corp., Systems Design Associates and, most recently, as an executive consultant. Farooquee added: ''This move will serve to consolidate and better coordinate the sales and marketing efforts of CMS.''

Ayoub said: ''I have greatly appreciated the opportunity to be associated with CMS Enhancements since its inception, but I have made the personal decision to move on to other endeavors.''

CMS Enhancements Inc. is a producer and global distributor of mass storage devices and accessories for most major personal and laptop computers. The company markets its products through dealers and distributors in over 60 countries worldwide.

#90029b0013 01/29/1990 ~Business Wire

HAMILTON, Ohio (JAN. 29) BUSINESS WIRE - Ohio Casualty Corp. recorded net income of $4.74 per share for the year 1989 compared with $5.88 per share in 1988.

Net income includes realized investment losses of 73 cents per share in 1989 and 65 cents per share in 1988.

Consolidated assets totalled $3.1 billion at Dec. 31, 1989, up from $2.9 billion a year ago. Investments in securities amounted to $2.4 billion and had an estimated fair market value of $2.5 billion at the end of 1989. Investments in taxable high yield and private placement securities of approximately one hundred different issuers have an aggregate carrying value, determined in accordance with generally accepted accounting principles, of $700 million. This amount includes $180 million of nonrated securities at Dec. 31, 1989. The current estimated fair market value of such high yield and private placement securities is approximately $655 million.

Fourth quarter net income was 31 cents per share including realized investment losses of 82 cents per share. For the fourth quarter of 1988, net income was $1.97 per share including realized investment losses of 28 cents per share.

The combined loss and expense ratio was 103.7 percent in 1989 compared with 100.8 percent in 1988. Weather related losses for 1989 amounted to $24.7 million including $9.5 million of losses from Hurricane Hugo. Such losses added 1.8 points to the 1989 combined ratio. The fourth quarter combined ratio was 106.8 percent, compared with 100.3 percent in 1988.

Net property and casualty investment income for 1989, excluding realized investment losses, was $187.7 million, $8.76 per share, up from $169.8 million, $7.79 per share, in 1988. This represents a 12.5 percent increase in investment income per share.

Gross premiums and related income for the corporation for 1989 was $1,424.6 million, a 1.6 percent increase from the $1,402.3 million reported for 1988. Net property and casualty written premiums were $1,377.6 million, an increase of 1.8 percent over 1988. Life insurance premium income for 1989 was $15.2 million compared with $13.7 million in 1988, an increase of 10.7 percent. Life insurance operations contributed 13 cents per share to 1989 consolidated net income compared with 32 cents in 1988, including realized investment losses of 24 cents and $0.00 per share in 1989 and 1988, respectively.

Adoption of Financial Accounting Standard 97 in the first quarter 1989 had

no material effect on consolidated net income or financial position.

Shareholders' equity on Dec. 31, 1989 was $775 million compared with $718.5 million a year ago. In 1989, the corporation purchased 692,000 shares of its common stock in open market transactions for $33.2 million. In the prior year 545,200 shares were purchased for $18.1 million. These purchases were part of the stock repurchase program previously announced by the corporation.

#90029b0016 01/29/1990 ~Business Wire
NATICK, Mass. (JAN.29) BUSINESS WIRE - Prime Computer Inc. Monday announced two powerful additions to its 50 Series family of superminicomputers - the 6450 and 6650 systems - which increase the performance range of the firm's flagship line by up to 29 percent in multi-user database applications.

The company also announced aggressive incentives for the new systems and price reductions for its 6150 system.

''The 6450 and 6650 systems continue Prime's longstanding tradition of offering customers faster, more powerful processing with superior multi-user performance,'' said Barry N. Bycoff, vice president of marketing for the Prime Minicomputer Business Unit. ''Coupled with our pricing incentives, these new machines offer customers improved performance and an easy, more cost-effective growth path within the 50 Series.''

Both the uni-processor 6450 and dual processor 6650 systems are based on very large-scale integration (VLSI) emitter-coupled logic (ECL) components - technology pioneered by Prime in 1983. VLSI ECL components have fewer parts than previous technologies, which makes them more reliable. They are also extremely compact, offering powerful performance without taking up valuable floor space, and require less air cooling due to advanced packaging.

The 6450 and 6650 systems support from 15 to 29 percent more simultaneous users while sustaining high-speed performance. They are of particular value to companies whose networked environments require increasing numbers of users and more intensive computing strength for large database management applications, such as Prime INFORMATION, ORACLE and MIDASPLUS software. The 6450 and 6650 Systems

The 6450 and 6650 systems, available immediately, support up to a total of 512 directly connected users and a maximum of 960 users within an Ethernet network. A basic system package includes two 817MB disks with a controller and PRIMOS, the company's proprietary operating system. A 6450 basic system package, containing a four-board 6450 uni-processor and 32MB of memory, is $470,845; a 6650 basic system package, containing an eight-board 6650 dual-processor and 64MB of memory is $772,845.

Higher level system packages including 64MB of memory, six 817MB disks with three controllers, 32 asynchronous lines with two peripheral cabinets are available for the 6450 at $607,347 and for the 6650 at $877,347. Both systems support up to 32 disk drives and up to eight intelligent disk controllers. The I/O chassis contain 22 slots and support up to two tape controllers, 512 asynchronous and eight synchronous lines. The systems support up to 32MB to 128MB of main memory and up to 26.1GB of mass storage.

The 6450 and 6650 systems are housed in two-bay cabinets. Computer room-installable and compact, they occupy less than 13 square feet of floor space. Since the same external cabinet is used for all 6000 Series systems, in-cabinet upgrades can be performed within hours. By adding a second Central Processing Unit (CPU) to the system cabinet, companies can upgrade a 6450 system to a 6650 system and increase performance by as much as 62 percent.

In addition, since all 50 Series computers are hardware and software compatible, customers can expand their systems by networking any 50 Series member to their existing 6450 or 6650 system as computing needs grow.

IRVINE, CA (JAN. 29) BUSINESS WIRE - Diceon Electronics Inc. (NASDAQ/NMS:DICN) Monday announced that L. Ronald Hoover, senior vice president, was appointed president and chief operating officer reporting to Roland G. Matthews, who remains chief executive officer and becomes chairman of the board.

Hoover came to Diceon Electronics on Aug. 1, 1989, from AMP Inc., where he spent 10 years in various manufacturing and engineering positions including vice president of Signal Transmission Products Group for three years.

Peter Jonas becomes vice chairman and will continue as executive vice president and chief financial officer. Michael Shimada has been appointed vice president of finance and will remain as controller. Shimada joined Diceon Electronics in 1981 and has assumed increasing financial responsibilities.

Joseph T. Phillips was named vice president of engineering. Phillips joined Diceon Electronics in 1984 and served as vice president of Quality Assurance for the past six years.

Diceon Electronics Inc. is one of the country's leading manufacturers of both complex and high-technology multilayer circuit boards and backpanels. Customers include original equipment manufacturers of computer, telecommunication and instrumentation systems.

BOSTON (JAN. 29) BUSINESS WIRE - Phoenix-based America West Airlines (NASDAQ: AWAL, PSE: AWA) announced that the carrier will begin new service at Boston Logan Airport beginning March 15, 1990.

The airline will offer two daily round trip flights from Boston, one to each of the carrier's hubs in Phoenix and Las Vegas. America West will utilize the ultra-modern Boeing 757 aircraft, offering dual class service and a state-of-the-art entertainment system.

Mark Coleman, senior vice president of sales and product development made the announcement at a press conference Monday, saying, "We are very pleased to have the opportunity to provide air transportation to and from Boston."

He continued, "There is a tremendous demand for improved access to the West and we will make every effort to meet the needs of the traveling public. Our operation at Phoenix and Las Vegas will offer convenient connections throughout the West, to cities such as Tucson, Los Angeles, Orange County, San Diego, Long Beach, and Ontario."

America West's flights from Boston will depart at 7:40 a.m. and 7:25 p.m.,

arriving at 11:15 a.m. and 10:15 p.m. in Phoenix and Las Vegas, respectively. The return flights will depart Phoenix at noon and Las Vegas at 11:05 p.m., arriving in Boston at 6:40 p.m. and 6:55 a.m., respectively.

America West will offer introductory fares to Phoenix of $218 round trip and $189 one-way, as well as introductory fares to Las Vegas of $208 round trip and $179 one-way. Travel on all introductory fares must be completed by April 15, 1990. Other restrictions apply. For more information on America West's fares and schedules, contact a travel agent or the America West Reservations center at 1-800-247-5692.

"The Boeing 757 is a superb aircraft," Coleman stated. "Besides being one of the world's most fuel efficient airplanes, it meets all requirements for noise sensitive airports," he added.

Coleman noted that America West's aircraft offers seating for 190 passengers, including 14 in first class. "In addition to the state-of-the-art inflight entertainment system, we offer complimentary cocktails, spacious seating, large overhead storage, free copies of The Wall Street Journal, and USA Today, full interline connections, and much more," he said.

"America West's employees are shareholders and we believe the pride of employee-ownership is reflected in the quality service we provide," Coleman concluded.

#90029b0040 01/29/1990 ~Business Wire

STOCKHOLM, Sweden (JAN. 29) BUSINESS WIRE - Ericsson has received a letter of intent from Televerket, the Swedish Telecom, to be the main supplier of the new digital mobile telephone system GSM.

The first delivery will take place in the latter half of 1991. Contract negotiations will be finalized during spring 1990.

GSM is the name of the pan-European mobile telephone system which has been agreed upon as the standard for all of Europe, and which will be introduced during 1991. GSM will make it possible to use the same mobile telephone wherever you are in Europe.

Ericsson already has agreements with the United Kingdom, France, Switzerland, Spain and Italy to supply GSM systems.

Ericsson is one of the world's leading telecommunications companies. This position is based on leading edge technology, advanced systems know-how,

international experience and the ability to meet specific customer requirements.

Ericsson is also a leading supplier of electronic defense systems. The company invested an amount equal to 11 percent of sales in research and development in 1988. Ericsson has 65,000 employees and operations in 80 countries. Sales in 1988 amounted to SEK 31 billion.

#90029b0066 01/29/1990 ~Business Wire

FULLERTON, Calif. (JAN. 29) BUSINESS WIRE - Beckman Instruments Inc. (NYSE:BEC), Monday reported sales of $199.7 million, and net income of $10.4 million or 36 cents per share, for the fourth quarter ended Dec. 31, 1989.

Sales were virtually flat with the $199.1 million reported in the similar period a year ago, while net income was down slightly from $11.2 million, or 39 cents per share (38 cents on a pro forma basis).

For the full 1989 fiscal year Beckman's sales were $785.9 million, a 2 percent increase over the prior year. Net income for 1989 was $41.9 million, or $1.47 per share. That represents a slight decrease from the $42.5 million, or $1.49 per share, that was reported for 1988 but an increase from the pro forma earnings per share of $1.46.

Beckman became fully independent from SmithKline Beckman Corp. in July 1989. The pro forma figures which were shown in the company's June 20 prospectus take into consideration certain expenses that were borne by SmithKline during 1988, which would otherwise have lowered Beckman's reported earnings for that period.

For the fiscal year, Beckman's operating income before research and development expenses increased to nearly 20 percent of sales. This allowed the company to increase its research and development investment by $8.4 million - 14 percent greater than in 1988 and still record a $1.1 million increase in operating income.

However, pretax income decreased $1.9 million, to $72.3 million, due to higher interest expenses in 1989. This was the result of debt incurred during the recapitalization of the company in preparation for the spin-off from SmithKline Beckman. The debt-to-capital ratio remained essentially constant during the year and was 28.5 percent on Dec. 31, 1989.

RENO, NV (JAN. 29) BUSINESS WIRE - International Game Technology (OTC:IGAM) reported first quarter gains of 60 percent in revenues, 71 percent in income from continuing operations and 75 percent in income per share, as compared to the like period last year.

The company announced Dec. 31, 1989 quarterly revenues of $47,629,000, compared to revenues of $29,715,000 for the corresponding quarter ended Dec. 31, 1988. The company also reported income from continuing operations of $4,166,000, or 56 cents per share, for the Dec. 1989 quarter. This compares to income from continuing operations of $2,441,000 or 32 cents per share, for the corresponding period ended Dec. 31, 1988.

The company's gain in revenues were the result of increases in all of the company's operations and subsidiary operations. Exceptionally strong gains were recognized in the sale of gaming products in Nevada and the increased revenue from Casino Management Services (CMS), a wholly owned subsidiary involved in the management and operation of four gaming properties.

Effective Jan. 1, CMS discontinued its lease of the Mizpah Hotel/Casino in Tonopah, Nev., and completed the purchase and commenced operations at the El Capitan, a hotel/casino in Hawthorne, Nev.

Increased revenue and operating income gains were also recognized from Electronic Data Technologies, a 45 percent-owned subsidiary of the company.

During the five-month period ended Dec. 1989, the company repurchased 508,000 shares of its common stock. The board of directors has authorized the repurchase of up to 10 percent, or approximately 750,000 shares of the company's common stock.

International Game Technology is a world leader in the design, development and manufacture of microprocessor-based gaming products and gaming monitoring systems.

CALGARY, ALBERTA (JAN. 29) BUSINESS WIRE - Homer L. Spencer Jr., chief executive officer of ORS Corp. (NASDAQ:ORSC), Monday announced that ORS's operating affiliate, EOR International Inc., has received a commitment from Canada Northwest Energy (CNW) to install its electromagnetic oil well stimulation process on 11 CNW wells in the Canadian provinces of Alberta and Saskatchewan during the spring of this year.

Spencer indicated that CNW is the operator and owner, with others, in several wells currently utilizing the company's EM process in the Lloydminster heavy oil region of Alberta and Saskatchewan. Typical results to date have been sustained increases in oil production by a factor of three, along with significant decreases in percentage of associated water production, he said.

Spencer also reported that Pan Canadian Petroleum, an active and major owner of heavy oil resources in Canada, is planning to install the company's EM process on two additional wells in the Frog Lake Field of Alberta this spring.

ORS Corp.'s operating affiliate, EOR International Inc., markets services and systems for electromagnetic stimulation of oil and gas wells from its head office in Calgary.

LOS ANGELES (JAN. 29) BUSINESS WIRE - Security Pacific Merchant Bank Monday announced the completion of a $400 million receivables sale for Panhandle Eastern Corp., the largest integrated natural gas transmission system in the country.

Security Pacific Merchant Bank arranged the transaction which included the purchase of standard trade receivables (gas, storage and transportation) and the periodic purchase of related present and future demand charges by Pacific Receivables Trust, a special purpose trust organized to purchase eligible receivables and issue commercial paper.

Security Pacific Merchant Bank had previously arranged a $280 million sale of five-year FERC Order 500 term receivables for Panhandle Eastern Corp.

The four subsidiaries of Panhandle Eastern operate an interconnected 27,500-mile pipeline system that delivers natural gas to markets throughout the Midwest, Middle Atlantic and Northeast states.

Security Pacific Merchant Bank is responsible for the U.S. and international corporate and institutional activities of Security Pacific National Bank (SPNB). SPNB is the principal subsidiary of Security Pacific Corp., the fourth largest bank holding company in the United States, with assets of more than $84 billion.

#90029b0112 01/29/1990 ~Business Wire

PALO ALTO, CA (JAN. 29) BUSINESS WIRE - Coherent, Inc. (NASDAQ: COHR) today released results for its first fiscal quarter ended December 30, 1989 as follows:

Three Months Ended	December 30, 1989	December 31, 1988
(In thousands except per share)		
Sales	$45,787	$48,203
Income before income taxes	2,302	4,560
Net income	1,090	2,053
Net income per share	.12	.23
Average common and common equivalent shares outstanding	9,371	8,860

The Company attributed the sales decrease of $2,416,000, or five percent, to both the June 1989 sale of the Company's industrial Yag Marker subsidiary and order shortfall in the Company's industrial segment.

The decrease in net income per share from $.23 to $.12 was primarily attributable to a one time pretax gain of $2,000,000 recognized in the corresponding prior year period and the aforementioned sales shortfall. Operating expenses were basically flat between the two periods.

Coherent, Inc. is the world leader in the design, manufacture, and marketing of lasers for science, medicine, and industry. Please direct any questions to Robert J. Quillinan, Vice President and Chief Financial Officer at (415) 852-8268.

SANTA CLARA, CA (JAN. 29) BUSINESS WIRE - Intel Corp. appointed five vice presidents in its operating groups, the company announced Monday.

Andy Bryant was named a vice president of Intel's Systems Group. Bryant, 39, is director of finance. He joined Intel in 1981 as controller for the Commercial Memory Systems Operation at the Arizona site.

In 1982, he became systems group controller, and was promoted to director of finance in 1987. He holds a B.A. in economics from the University of Missouri and an M.B.A. in finance from the University of Kansas.

Ken Fine, 47, was appointed vice president of the Embedded Controller and Memory Group. He is general manager of Intel's Chandler Microcomputer/ASIC Division (CMAD). He came to Intel in 1978 as engineering manager of Peripheral Components. In 1982, he was promoted to general manager of the Microprocessor Division. He became general maanger of the Cellular Products Operation in February, 1988.

In June of that same year, he was promoted to his current position. Fine received his B.S., M.S. and Ph.D. degrees, all in mathematics, from the University of Illinois.

Dov Frohman was named vice president of the Microcomputer Components Group. Frohman, 50, is general manager of Intel Israel. He joined Intel in 1969, where he developed the world's first EPROM (erasable programmable read-only memory) products.

In 1973, he established the Intel Design Center in Haifa, Israel. Frohman became general manager of Intel's Israel operations in 1981. He holds a B.S. in electrical engineering from the Israel Institute of Technology and an M.S. and Ph.D. in electrical engineering and computer science from the University of California at Berkeley. In 1982 he received the IEEE Jack

Morton Award for meritorious achievement in the field of solid state devices and was appointed an IEEE fellow.

William Howe, 35, was appointed vice president of the Sales and Marketing Group. Howe, president of Intel Japan, joined Intel in July, 1979 as a customer marketing engineer in the Memory Products Division. In 1981, Howe moved to Europe to assume the job of regional customer marketing manager. In Europe, he held the positions of marketing development manager and Marketing Manager. Howe became marketing manager for Intel Japan in 1985 and was promoted to his current position in 1988.

Intel manufactures microcomputer components, modules and systems.

LOS ANGELES (JAN. 29) BUSINESS WIRE - Hilton Hotels Corp. debuts it first brand image advertising campaign in nearly six years with a pledge to provide the highest quality and service in the lodging industry.

After spending more than a billion dollars in the last two years on extensive renovation and expansion worldwide, the campaign -- jointly funded by Hilton Hotels Corp. and the separately owned Hilton International chain -- will highlight the ''look, feel and taste'' of Hilton.

Created by McCann-Erickson/Los Angeles, the $7 million campaign is the first phase of a comprehensive program to leverage the strength of the Hilton brand name. The ads, which capture the rich heritage and tradition of the company, feature landmark Hilton properties around the world.

Television will be the driving force of the campaign, themed ''Hilton. It's All In The Name,'' with spot ads breaking Jan. 31 in New York, Los Angeles and Chicago. Cable television will also be used for broad national coverage. In addition, other broadcast sponsorship opportunities are being explored.

Print placements will supplement the broadcast coverage and will begin Feb. 3. In print, Hilton will target readers of Business Week, Forbes, Fortune, Newsweek, Time, The Economist, Sport Illustrated, U.S. News & World Report and Travel Weekly. The campaign will be concentrated in the first and fourth quarters of this year.

Hilton Hotels Corp. has recently upgraded and renovated most of its flagship properties including the elegant Waldorf-Astoria, the Chicago Hilton & Towers, the Fontainebleau Hilton on Miami Beach and the Hilton Hawaiian Village.

Key images in the campaign will include elements of these properties as well as the regilded antique lobby clock at the Waldorf-Astoria; the geometrically designed courtyard at the Los Angeles Hilton; the slimline, futuristic Nagoya Hilton in Japan; and the beautifully lit Towers Dome at the San Francisco Hilton.

Hilton Hotels Corp., with headquarters in Beverly Hills, is a publicly traded company with assets in excess of $3 billion. The company is involved in a range of hospitality businesses including domestic and international properties, franchising, gaming, and hotel planning and

development. Hilton has more than 270 hotels and inns with 97,000 rooms in 219 U.S. cities.

Hilton International, owned by Britain's Ladbroke Group PLC, operates 142 properties in 47 countries throughout the world. Ladbroke is a leisure and entertainment company.

#90029b0155 01/29/1990 ~Business Wire

SAN FRANCISCO (JAN. 29) BUSINESS WIRE - First Republic Bancorp Inc. Monday reported a 16 percent increase in earnings for the year ended Dec. 31, 1989.

For 1989, First Republic Bancorp Inc. reported net income of $1,110,000, compared to $960,000 in 1988. Earnings per share were 33 cents in 1989, compared to 30 cents a year ago.

Total interest income increased to $46,049,000 in 1989 from $25,949,000 in 1988. Net interest income was $8,752,000 in 1989, up from $5,651,000 last year. The 1989 net income was reduced by costs of $473,000, recorded in the fourth quarter, related to the San Francisco earthquake, and net losses on investment securities of $1,128,000 incurred throughout the year.

Net income in the fourth quarter of 1989 was $351,000 after pretax earthquake related costs of $473,000, compared to net income of $389,000

in the fourth quarter of 1988. For the quarter, per share earnings were 10 cents in 1989 vs. 12 cents in 1988.

The company originated $99 million of loans in the fourth quarter and a total of $323 million during 1989. In 1988, loan originations were $93 million in the fourth quarter and $344 million for the year. The portfolio of real estate loans sold to and serviced for secondary market investors was $426 million at Dec. 31, 1989, vs. $401 million at Dec. 31, 1988.

Total assets of First Republic Bancorp Inc. were $519 million at Dec. 31, 1989. Substantially, all of the company's $409 million loan portfolio consists of adjustable rate, first trust deed, California real estate secured loans.

As of Dec. 31, 1989, less than $100,000 of the company's $470 million loan and investment portfolios were over 60 days delinquent; the company owned no foreclosed real estate, and there were no loan losses incurred during 1989.

The company continues to maintain a strong capital base. At Dec. 31, 1989 total tangible capital resources, including long-term subordinated debentures and shareholders' equity, were $49,273,000 representing 9.5 percent of total assets.

First Republic Bancorp Inc. functions as a mortgage banker and direct lender through its California-chartered industrial bank subsidiaries, First Republic Thrift & Loan (San Francisco and Los Angeles) and First Republic Thrift & Loan of San Diego. The deposits of both subsidiaries are FDIC insured.

#90029b0157 01/29/1990 ~Business Wire

PHOENIX (JAN. 29) BUSINESS WIRE - Del Webb Corp. (NYSE:WBB) Monday announced net income for 1989 of $7,597,000, or 62 cents per share, compared to a net loss of $14,949,000, or $1.73 per share, in 1988.

Philip J. Dion, chairman and chief executive officer, attributed Webb's first annual profit since 1986 to an increase of 76 percent in home closings at Webb's active adult communities in Arizona and Nevada in 1989 vs. 1988. Sun City Las Vegas, Webb's newest community, accounted for 46 percent of the 1,392 total home closings in 1989.

The backlog of home sales as Webb entered 1990 was 900, valued at approximately $120 million, up 42 percent from last year's backlog of 636

home sales valued at $80 million.

For the fourth quarter, Webb reported net income of $6,502,000 or 64 cents per share, on revenues of $84 million, compared to a loss of $15,263,000, or $1.67 per share on revenues of $35.2 million in 1988's fourth quarter.

Consolidated revenues for 1989 totaled $189.5 million, vs. $106.9 million in 1988. Dion said that 1989 results included a fourth quarter provision of $2 million for discountinued Arizona commercial real estate operations.

Dion said that Webb had completed the difficult restructuring of its operations, begun in March 1988, with Jan. 10, 1990 closing of the sale of the company's remaining leisure operation, the High Sierra Hotel/Casino in Lake Tahoe.

''All of our efforts are now directed solely at our community development activities, including those presently underway and those we are planning for in the future,'' he said.

Webb is presently in escrow on more than 1,500 acres in a prime Southern California location where the company will plan and develop another active adult community. ''We will shortly have a formal announcement relative to this newest project and are hopeful we will be able to begin development on it in 1991,'' Dion said.

Dion said Webb is also pursuing the acquisition of additional land in Northern California near Sacramento. ''We know from our research that the demand for an active adult community in this area is extremely strong. Accordingly, we are actively looking at several sites.''

The company noted that Webb already has a long-term option to buy approximately 1,200 acres in an urban reserve area of Roseville, located near Sacramento. The company said that the land under option is an excellent investment, but that the timetable on the project has been delayed because the Roseville City Council does not favor development in the urban reserve area at this time.

Dion said that 1989 earnings were achieved despite the prolonged real estate downturn which has occurred in Arizona in the last two years.

''Despite the deteriorating market, we were pleased with the success of our real estate efforts, particularly at Sun City West which had 620 closings, an increase of 7 percent over 1988.''

''Webb enters 1990 in excellent condition,'' said Dion. ''The backlog of homes sold but not yet closed is at a higher level than I can remember and new models at our developments are selling well. We fully expect that our 1990 earnings will surpass 1989 results.''

OAKLAND, CA (JAN. 29) BUSINESS WIRE - American President Companies Ltd. (NYSE:APS) Monday announced that its board of directors elected John M. Lillie a director.

Currently a general partner of Sequoia Associates, a Menlo Park, Calif.-based venture capital firm, Lillie is also the chairman of the board of Pacific Fruit Growers-Packers Inc.

During his career and prior to joining Sequoia Associates in 1989, Lillie, 52, served in a number of executive capacities, culminating in the position of chairman of the board and chief executive officer of Lucky Stores Inc. He also served as president and chief executive officer of Leslie Salt Co. prior to joining Lucky Stores in 1979.

An active member of the community, Lillie was the recipient of Stanford University's Graduate School of Business Ernest C. Arbuckle Award in 1989 and the Boy Scouts of America Good Scout Award in 1988. He holds a Bachelor's of Science Degree in Industrial Engineering, a Master's of Science Degree in Industrial Engineering and a Master's of Business Administration, all from Stanford University.

Chairman W.B. Seaton welcomed Lillie to the company's board of directors and said that his extensive and varied experience adds further depth to the company's board of directors.

In other business, the board declared a regular quarterly dividend on the company's common stock of 15 cents per share. The dividend is payable Feb. 28 to stockholders of record Feb. 15.

The board also declared a regular quarterly dividend on the company's Series C Cumulative Convertible Preferred Stock in the amount of $1.125 per share, payable March 15 to stockholders of record March 1.

TEMPE, AZ (JAN. 29) BUSINESS WIRE - MicroAge Inc. (NASDAQ:MICA) Monday announced the signing of the 170th IBM-authorized Industry Remarketer to the MicroAge Computer Centers Inc. IBM IR Program.

During the quarter ended Dec. 31, 1989, a record 137 IBM IRs were brought into the MicroAge program. Under this IBM-approved program, IRs may purchase IBM products from MicroAge while capitalizing on MicroAge's value-added approach to the PC marketplace.

MicroAge Computer Centers Inc. President William Keiper said, ''The success of this program is based on MicroAge's ability to deliver an excellent service level to IBM-authorized IRs enabling them to better compete in today's marketplace. Through this program, MicroAge provides the resources necessary for IRs to reduce their current investment in inventory, while providing excellent access to the IBM products they require. We anticipate that participation in this program will increase throughout 1990.''

This innovative IBM-authorized Industry Remarketer program offers IRs the ability to purchase IBM products from MicroAge provided that each unit sold includes an approved vertical-market software application. In addition, the IRs agree to market the systems to only one specific vertical-market catagory. MicroAge was one of four reseller organizations selected by IBM to offer this program to independent IBM PC-IRs. Since then, MicroAge has taken a leadership position in attracting top-quality IBM IRs to the MicroAge program.

MicroAge Inc. is a leading franchisor of full-service microcomputer sales locations as well as a marketer and distributor of microcomputer systems. The company markets products and services to businesses through its Network of over 540 locations worldwide. Of these 540 locations, 139 IRs and 41 new locations were added during the first quarter.

LOS ANGELES (JAN. 29) BUSINESS WIRE - Jeff H. Reynolds, chairman of California Pacific International Holdings Co. Pte Ltd. and of Weatherby Investments Inc. (OTC), disclosed in a statement Monday that California Pacific had entered into a letter of intent with Locke Rich Minerals Ltd. (VSE:LKM) providing for the sale of certain oil and gas properties located in the central United States to Locke Rich in exchange for capital stock

of Locke Rich minerals.

Reynolds stated that the agreement involves approximately 13,000 gross acres of leasehold properties, possessing more than 50 existing wells and associated equipment. Previous engineering and geological reviews have determined that the estimated proved reserves of the properties are in excess of 50,000 MMCFs and 2.5 million BBLs. Reynolds stated that the transaction was valued in excess of $40 million (U.S.).

Reynolds indicated that a definitive agreement was expected to be entered into within two weeks.

California Pacific International Holdings Co. Pte Ltd. is a privately held conglomerate based in Singapore and controlled by U.S. financier Jeff H. Reynolds. California Pacific has been actively undertaking acquisitions in North America, Asia and Australia. California Pacific's operations in the United States are generally managed through its subsidiary, Weatherby Investments Inc.

DURANGO, COL (JAN. 29) BUSINESS WIRE - James C. Sheppard, president of Centennial Savings Bank F.S.B., announced that it had acquired certain assets and assumed the deposit liabilities of Modern Federal Savings and Loan Associates, Grand Junction, Colo., from the Resolution Trust Corp.

(RTC) as of the close of business Jan. 26, 1990.

Modern Federal Savings and Loan Association offices in Grand Junction and Montrose will open Monday as branches of the Durango-based Centennial Savings Bank. All Modern Federal customers can expect business as usual, despite the name change.

The two offices will be added to the Centennial Savings Bank network of five existing offices located in Durango, Cortez, Pagosa Springs, Dolores and the Grand Junction office located at 499 28 1/4 Road.

Prior to the acquisition of Modern Federal Savings, Centennial Savings Bank had total assets of $109 million. The acquisition will increase the total assets of Centennial Savings Bank to approximately $180 million and the total deposits to approximately $163 million.

The common stock of Centennial Savings Bank is traded on the National Association of Securities Dealers National Market System under the symbol CNSB.

LONG BEACH, CA (JAN. 29) BUSINESS WIRE - McDonnell Douglas Monday announced that Federal Express Corp. has exercised three options for the MD-11 freighter version and has added another eight options to its previous orders for the tri-jet.

Federal Express now holds a total of eight firm orders and 11 options.

The new firm orders are scheduled to be delivered in 1992. When made firm, the additional eight options would be scheduled for delivery in 1994 and 1995.

Federal Express, based in Memphis, Tenn., was a launch customer for the MD-11 in 1986. It originally held firm orders for two MD-11s plus one option. The first two MD-11s built will be delivered to Federal Express after they complete part of the flight test program this year. Federal Express will receive its first MD-11 in 1991.

The express carrier will use the new MD-11 jetliners on its international routes. Federal Express also owns and operates 24 DC-10 freighters.

To date, total orders and other commitments for the MD-11 are 340 from 30

customers.

FREMONT, CA (JAN. 29) BUSINESS WIRE - Power Spectra Inc. (OTC:PWSP) Monday announced revenues of $3,701,625 for its year ended Dec. 31, 1989, a 255 percent increase over revenues of $1,042,930 for the year ended Dec. 31, 1988.

Net income for the current year was $155,665, or 2 cents per share, as compared with a net loss of $972,414, or 11 cents per share, in the prior year.

Revenues for the fourth quarter ended Dec. 31, 1989, were $932,725, or a 71 percent increase over revenues of $546,084, for the like period last year.

The net loss for the period was $89,103, or 1 cent per share, as compared with a net loss of $75,259, or 1 cent per share, in the last year's fourth quarter.

As previously stated in the SEC Form 10-Q as of Sept. 29, 1989, increased spending in research and development accounted for the small fourth-quarter loss.

Power Spectra also announces the addition of Terry Harper as vice president of operations, reporting to Donald C. Wright, president and chief executive officer. Harper's background includes extensive prior general management experience with manufacturing companies in the defense electronics and microwave industries, including Avantek, Litton Industries Watkins-Johnson and GTE Government Systems.

Harper will be responsible for designing and implementing the manufacturing plan to transition Power Spectra from a development stage to a manufacturing company.

Power Spectra Inc. is a development-stage company engaged in the research and development of semiconductor-switching devices and high-voltage pulse generators for commercial and military applications.

HINSDALE, IL (JAN. 29) BUSINESS WIRE - MPI Investment Management, a registered investment advisor, began purchasing the stock of IBM Corp. Monday for its portfolios.

''Last year IBM's stock traded over $130 and we have been buying the stock around $97,'' said Glenn C. Hirt, managing partner. ''With the market up over 30 percent last year and IBM still down 25 percent from its 1988 high it appears to be a good value.''

MPI specializes in large capitalization blue chip securities, identifying those big name stocks that have been out of favor for a period of time, yet begin showing significant improvement in market perception. Market perception is a proprietary evaluation process that MPI utilizes for purposes of stock selection.

Founded in 1986 on a unique, proprietary style, MPI is an equity oriented investment manager that seeks consistent, superior risk-adjusted returns. The firm's investment approach begins with a universe of 120 large capitalization investment grade stocks known as the MPI 120.

Although MPI is in the early stages of growth, its long-term annualized performance for the period of January 1981 through September 1989 was 23 percent, compared to 16.2 percent for the S&P 500 during the same period.

LOS ANGELES (JAN. 30) BUSINESS WIRE - A news release issued by Dow Jones on Monday, Jan. 29, appears to have given the impression to some observers that it was reporting on a MAXXAM Inc. news release that attempted to give an explanation for the fall in the price of MAXXAM's common stock on that date.

MAXXAM did not issue any such release. Contrary to the implications of the Dow Jones release, MAXXAM's stock is not related to the stock of Executive Life in any way and there is no valid reason to link the two. MAXXAM does not know why its stock price fell, and MAXXAM sees no legitimate basis for the activity as suggested by the release.

SAN DIEGO (JAN. 30) BUSINESS WIRE - Cipher Data Products Inc. (NASDAQ/NMS:CIFR) announced that Monday afternoon the U.S. District Court for the Southern District of California denied Archive Corp.'s motion for a preliminary injunction requiring Cipher to redeem the rights outstanding under its amended share purchase rights plan.

The court ruled that Archive had not established a likelihood that it would succeed on the merits of its claims.

As previously announced, in connection with its unanimous decision to recommend rejection of Archive's unsolicited $7.50 cash tender offer as inadequate, excessively conditional and not in the best interests of Cipher or its stockholders, the Cipher board decided not to redeem the share purchase rights and approved amendments to the rights plan to enhance the protection it affords to stockholders, including provisions designed to prevent Archive from acquiring Cipher without prior resolution of the pending litigation in which Cipher is claiming infringement of two of its significant U.S. patents.

In connection with the court's decision, Gary E. Liebl, Cipher's chairman, president and chief executive officer, said: ''We are very pleased that the judge has ruled in our favor regarding our shareholder rights plan. The ruling gives us the time to continue exploring a range of other possibilities designed to benefit our stockholders.''

As previously announced, the Cipher board has directed The First Boston Corp. to continue to explore possible alternative transactions that would be designed to reflect the long-term value of Cipher's shares.

Non-public information has been furnished to several third parties (as well as Archive) under confidentiality/standstill agreements and preliminary discussions are taking place, although there is no assurance that any transaction will be proposed or consummated.

Cipher's separate motions to dismiss Archive's complaint and to restrain Archive's pending tender offer were denied at the same hearing.

MOUNTAIN VIEW, CA (JAN. 29) BUSINESS WIRE - Adobe Systems Inc. (NASDAQ:ADBE) Monday announced a new version of Adobe Type Manager (ATM).

The upgrade, Version 1.2, provides improved character spacing, bolding and performance, support for Bitstream fonts and a new application for printing banners.

The upgrade is free to all registered Adobe Type Manager customers and begins shipping the first week of February 1990. In addition, registered ATM customers can also receive any Adobe Type Library font for only $39 (plus $7.50 shipping and handling). Registered ATM customers will automatically receive ordering information for the upgrade and special font offer.

Prior to Version 1.2, customers using applications that do not support fractional widths (such as Microsoft Word 4.0) may have encountered spacing inaccuracies both on screen and on their ImageWriter documents. Now, when printing documents, the upgrade provides clear, properly spaced printouts. It also allows users to more easily distinguish bold characters on screen at small point sizes.

Another significant benefit of the new version is support for Bitstream Type 1 PostScript fonts. With the upgrade, most non-Adobe Type 1 font customers can now use ATM transparently with any font they choose.

With Version 1.2, customers will also recognize improved performance when using large point sizes. In addition, Adobe has also included a new program for printing banners on ImageWriter printers. Customers simply select the banner program, type in the desired words for their banner and select print.

The upgrade supports all of the most popular Macintosh software program and is transparent to users. The product requires a Macintosh Plus, SE, SE/30, II, IIx, IIcx, IIci, or Portable with one megabyte of RAM and supports System 6.0.2 or later.

In addition to any PostScript language printer from Adobe, the product also supports the ImageWriter family, LaserWriter II SC, Hewlett-Packard DeskWriter or PaintJet, Kodak Diconix M150 Plus and most other QuickDraw devices.

Adobe Type Set packages support the entire Macintosh computer family with at least one megabyte of RAM. In addition to any PostScript language printer from Adobe, using ATM, the packages can also be used with the ImageWriter, ImageWriter II, ImageWriter LQ, LaserWriter II SC, Hewlett-Packard DeskWriter, Kodak Diconix M 150 Plus and most other QuickDraw output devices.

SAN JOSE, CA (JAN. 29) BUSINESS WIRE - Businessland Canada Ltd. and IBM Canada Ltd. have formed a joint venture company to acquire GE Computer Services Canada (GECS), a division of General Electric Canada Inc.

Businessland Canada will be the majority owner of this new business with IBM Canada holding a minority equity position.

The acquisition gives Businessland national service coverage in Canada, allowing the reseller to sign customer service contracts in the U.S. and Canada that will be honored throughout North America. It also expands the geographical coverage of Businessland Canada Ltd. by adding sales offices in Vancouver, Calgary and Montreal.

GECS is a leading Canadian company that has been providing sales, leasing and service to the computer marketplace for over 15 years. In recent years, GECS has been an Industry Remarketer of IBM personal computers and PS/2's as well as Wyse terminals and workstations. Their expertise in the service business has been demonstrated by quality service to a wide range of customers.

GECS hardware marketing will be integrated into Businessland Canada Ltd., and the hardware leasing division will become part of IBM Canada Leasing. The purchase is subject to fulfillment of the closing conditions contained in the purchase agreements.

General Electric Canada Inc., a wholly owned subsidiary of the General Electric Co., operates 13 businesses in Canada providing products and services to customers in Canada, the U.S. and other countries around the world.

IBM Canada Ltd. is a wholly owned subsidiary of the IBM World Trade Corp. The company's operations are primarily in the field of information-handling products, equipment and services. IBM's products include information processing products and systems, program products, communications systems, workstations, typewriters and related supplies and services.

Businessland Canada Ltd. is a subsidiary of Businessland Inc. an international leader in the distribution, integration and support of microcomputer and workstation systems for business. The company integrates products from selected manufacturers to create systems tailored to specific customer needs and provides the high level service and support to maximize their productivity.

LOUISVILLE, CO (JAN. 29) BUSINESS WIRE - Television Technology Corp. Monday announced that Byron W. and Julie L. St. Clair have reacquired from William J. Kitchen approximately 40 percent of the outstanding stock of Television Technology which Kitchen had purchased from the St. Clairs in 1988.

In connection with the sale of the stock, Kitchen has resigned as president and chief executive officer and as director of the company. Dr. St. Clair will resume active management of the company.

As a result of the transaction, Dr. and Mrs. St. Clair now own approximately 57 percent of the outstanding shares of the company. Mr. and Mrs. Kitchen will retain options granted to them in 1986 to acquire approximately 1,666,000 shares of the company's stock and in connection with his resignation the options have been extended for three years.

Founded in 1967 by Dr. St. Clair, TTC designs, manufactures and markets the widest range of television and radio broadcast transmitter products in America, including Low Power Television (LPTV) transmitters and translators, UHF High Power television transmitters, AM and FM radio transmitters and other supplementary products and accessories.

TTC produces over 50 percent of all the LPTV transmitters sold in the United States.

WASHINGTON D.C.(JAN. 29) BUSINESS WIRE - Microsoft Corp. Monday announced that it will supply the personal computer operating environment and productivity software for the Air Force Desktop III contract that was recently awarded to Unisys Corp.

According to the Request for Proposal (RFP) for the Desktop III contract, this award encompasses approximately 250,000 personal computers, with 200,000 of them running MS-DOS, the Microsoft Windows graphical operating environment and a suite of applications based on the Microsoft Windows environment. In the RFP the estimated total value of the contract is stated as $730 million, with the software portion of the award

representing a potential revenue to Microsoft of more than $25 million over the next four years.

''With this contract representing 200,000 Windows-based personal computers this Desktop III award is the biggest single win for Microsoft Windows and Windows-based applications,'' said Bill Gates, Microsoft chairman. ''The Microsoft Windows graphical user interface brings new productivity to users everywhere, and we are excited to see the government select these products.''

The Desktop III contract is the most recent contract award in which Microsoft will supply applications products on government contracts. Other recent awards include the NASA secretarial workstation contract and the FAA/OATS contract. For each of these awards, Microsoft, as a supplier to the prime contractor, provides a variety of software packages for MS-DOS-based or Macintosh computers.

Microsoft applications, particularly its Windows-based applications, have been selected in several federal contracts and are steadily gaining market share in the federal government market segment. The Microsoft Windows interface is consistent with other graphical interfaces, including the OS/2 Presentation Manager and OSF MOTIF, which may be used by government offices.

The offices of Microsoft Federal Systems are located in Chevy Chase, Md. The staff of 30 works with a large variety of hardware manufacturers and systems integrators to provide the highest-quality personal computer solutions to meet the needs of government software users.

Microsoft Corp. (NASDAQ: MSFT) develops, markets and supports a wide range of software for business and professional use, including operating systems languages and application programs, as well as books, hardware and CD-ROM products for the microcomputer marketplace.

#90029b0627 01/29/1990 ~Business Wire

SAN JOSE, Calif.(JAN. 29) BUSINESS WIRE - SEEQ Technology Inc. (NASDAQ:SEEQ) announced that revenues for the first fiscal quarter ended Dec. 31, 1989, were $12.3 million with a net loss of $1.1 million, or 8 cents per share, (12.9 million shares).

This compares to revenues of $14.5 million and net income of $1.1 million, or 9 cents per share, for the like quarter of the prior fiscal year. However, the current quarter results were a substantial improvement over

the prior quarter results of $10.1 million in revenues and a loss of $2.4 million, or 19 cents per share.

J. Daniel McCranie, chairman and chief executive officer, said: ''The product revenue increase and reduction in losses from the previous quarter were primarily the result of increased Ethernet and Flash memory sales.

''Commodity EEPROM product sales remained soft throughout the quarter, and competitive pricing pressures in the commodity EEPROM product will continue to depress both revenues and earnings for the immediate future.

''In order to improve margins on these commodity EEPROM products, we have entered into a long term agreement with Philips Components - Signetics to provide high volume and low cost foundry capacity for the high density commodity EEPROMs. In addition, Signetics will provide alternate source and foundry services for our Flash memory family. Significant EEPROM product from this relationship should be available in the second half of fiscal 1990.

''To further improve gross margins, we have implemented aggressive cost reduction programs and have made selective reductions in certain operations.

''Significant increases in revenue and margin, however, can best be obtained by the introduction of new, feature intensive products. To that end, we have begun sampling a new high performance 256K CMOS EEPROM with read speeds as low as 70 nanoseconds. This leadership product has no peer in the marketplace. We expect revenue shipments of this product during our March ending quarter.

''In the area of local area networks, we signed a technology agreement with Crystal Semiconductor Corp., exchanging Crystal's circuit design and our CMOS process technology for the development and manufacture of a new generation CMOS Ethernet chip set.

''We also introduced the first Flash 512K EEPROM to meet Military Standard 883 and to service the growing demand for Flash memories in Military Avionics and Weapons Systems.

''Our financial condition remains strong and we are continuing our emphasis on cash management, overall cost reduction and yield improvement.

''In summary, the semiconductor industry in general is soft and our revenue and earnings from the older product lines are showing the signs of this softness. Our future success will be measured by a combination of the continued cost reductions of our existing products as well as the successful introduction and marketing of our new product families. We remain confident that we can achieve both goals.''

SEEQ Technology Inc. is a leading designer and manufacturer of electrically erasable programmable read-only memories, Flash EEPROMs, military UVEPROMS and Ethernet data communication products.

SEEQ Technology is located in San Jose.

SUNNYVALE, CA (JAN. 29) BUSINESS WIRE - MASS Microsystems (NASDAQ:MMIC) Monday announced Howard Johnston has joined the company as director, European sales, and will report to Robert Sherwood, vice president of sales.

Johnston will have responsibility for managing European distribution of the company's ColorSpace line of videographics boards and DataPak line of removable storage subsystems for Apple Macintosh computers. He will also manage the company's European larger accounts.

Before joining MASS Microsystems, Johnston was director, international sales, for Genoa Systems. Prior to that, Johnston held senior international sales and marketing management positions with Quadram Corp. and the Georgia Department of Industry and Trade.

Johnston has a master's degree in international economics from Johns Hopkins School of Advanced International Studies specializing in international trade and finance. He holds a bachelor's degree in German and Spanish from Georgia State University where he graduated Cum Laude.

MASS Microsystems manufactures the DataPak line of 45Mb removable cartridge storage systems and ColorSpace videographics boards for the Apple Macintosh line of personal computers. MASS Microsystems is a publicly traded company, distributing its products worldwide.

#90029b0632 01/29/1990 ~Business Wire

BELLEVUE, Wash.(JAN. 29) BUSINESS WIRE - Charles M. Pigott, chairman and chief executive officer of PACCAR Inc, announced Monday the following results for the fourth quarter and full year 1989:

PACCAR Inc
(in thousands except per share amounts)

	Three Months Ended		Full Year Ended	
	12/31/89	12/31/88	12/31/89	12/31/88
Manufacturing net sales	$ 812,648	$ 842,192	$3,331,050	$3,112,196
Financial services interest income and other	49,111	42,393	191,852	155,238
Net income	$ 98,871 (a)	46,366	241,920 (a)	175,808
Net income iper share	$ 2.83	$ 1.30	$ 6.90	$ 4.90 T

(a) Includes $52.4 million after-tax gain from sale of a division and a fleet of railcars.

Annual sales and net income for 1989 set new PACCAR records. Sales were up by 7 percent and net income increased by over 37 percent. U.S. market share improved, placing PACCAR as the largest U.S. manufacturer of heavy-duty trucks according to figures through November.

Net income exceeded last year's record level even without the inclusion of net gains from the previously announced sale of Wagner Mining Equipment Co. division and the sale of a fleet of railcars. Sales for fourth quarter were 3.5 percent lower than the prior year. Without the gains from asset disposals, fourth quarter net income was comparable to 1988.

PACCAR began 1989 with immense truck order backlogs. Demand for new trucks dropped significantly for the entire industry in the third and fourth quarters, but PACCAR's backlogs were sufficient to sustain near capacity production for the entire year. However, reflecting the lower demand, downward production adjustments are anticipated.

PACCAR's automotive parts sales exceeded $200 million for the first time.

The financial services companies experienced moderate growth in their loan and lease portfolios for 1989.

#90029b0633 01/29/1990 ~Business Wire

NEW YORK (JAN. 29) BUSINESS WIRE - First New York Business Bank Corp. (NASDAQ: FNYB), the holding company of First New York Bank for Business, Monday reported net income of $3,445,000, or $0.92 per common share, for the year ended December 31, 1989. This represented an increase of 37.1 percent from the Company's 1988 earnings of $2,512,000, or $0.67 per share.

For the fourth quarter of 1989, First New York earned $620,000 or $0.17 per share, compared with $692,000 or $0.18 per share, for the same period of 1988.

The fourth quarter comparison reflected an increase in the provision for possible loan losses, which the Bank said was a response to the growth of its loan portfolio and general economic conditions in its lending market.

"Commensurate with the growth of our loan portfolio and a conservative approach to the local lending environment, First New York increased its provision for possible loan losses during 1989. We are pleased that our strong earnings stream allowed us to take this prudent measure," stated Martin A. Simon, Chairman and Chief Executive Officer.

The provision for possible loan losses was $4,035,000 for 1989, compared with $1,856,000 in 1988. For the fourth quarter of 1989, the provision was $1,687,000, up from $550,000 in the same 1988 period.

At December 31, 1989, the ratio of non-accrual loans to total loans was 0.85 percent, and continues to be well below the average for the banking industry, Mr. Simon noted.

"First New York continued to pursue its strategy of lending to sound middle-market businesses in the metropolitan area in 1989," Mr. Simon added. "This produced another year of quality asset growth, and resulted in increased net interest income and other operating income."

Net loans were $530,765,000 at December 31, 1989, increasing 24.9 percent during the year. First New York's deposits rose 14.2 percent during 1989, to total $633,074,000.

Total assets grew 15.1 percent in 1989, ending the year at a record $695,917,000. Stockholders' equity stood at $42,099,000 at the end of 1989, and was equivalent to $11.24 per share or 6.0 percent of total assets. The Bank's total regulatory capital ratio at December 31, 1989, was 8.04 percent, up from 6.93 percent at the end of 1988.

Net interest income before provision for loan losses was $23,585,000 for 1989, rising 44.7 percent from the 1988 figure. For the fourth quarter of 1989, net interest income was $6,094,000, or 19.4 percent above the prior year. Other income, primarily banking fees and charges, was $2,347,000 for the year 1989 and $771,000 for the fourth quarter, advancing 103 percent and 129 percent, respectively.

#90029b0639 01/29/1990 ~Business Wire

LOS ANGELES (JAN. 29) BUSINESS WIRE - L.A. Gear Inc. (NYSE:LA) announced Monday that net income for the fourth quarter of fiscal 1989, ended Nov. 30, 1989, increased to $11,619,000, or 58 cents per share, compared to $6,255,000, or 36 cents per share, for the comparable period last year, an increase in net income of 86 percent.

Net sales for the fourth quarter were also sharply higher, at $166,351,000 compared to $63,861,000 for the fourth quarter of last fiscal year, an increase of 160 percent.

These fourth quarter results brought fiscal 1989's net income to a record level of $55,059,000, or $3.01 per share, compared to $22,030,000, or $1.29 per share, for fiscal 1988, an increase in net income of 150 percent. Net sales for fiscal 1989 increased to $617,080,000, as against $223,713,000 for fiscal 1988, an increase of 176 percent.

All per share results reflect a two-for-one split of the company's common stock on Sept. 25, 1989. Per share results for fiscal 1988 are based upon 17,110,000 weighted average shares outstanding, for fiscal year 1989 are based upon 18,308,000 weighted average shares outstanding, and for the fourth quarter of fiscal 1989 are based on 19,886,000 weighted average shares outstanding.

Robert Y. Greenberg, the company's chairman and president said: ''As our tremendous growth in sales and earnings indicates, during 1989 we continued to demonstrate the ability to maintain our position as the most dynamic growth company in our industry. We look forward to fiscal 1990 to being another year of significant growth for L.A. Gear.

''Indicative of this trend, net sales for December 1989 and Jnauary 1990, the first two months of our current fiscal quarter which will end on Feb. 28, 1990, are more than double those of the comparable period of fiscal 1989. Additionally, exciting new styles of footwear, including our new Michael Jackson line, will be introduced in February at our biggest annual trade show, the Super Show in Atlanta.''

L.A. Gear Inc. designs and markets a complete line of performance fashion footwear for men, women and children and related apparel products and accessories.

PLANO, TX (JAN. 29) BUSINESS WIRE - Tandem Telecommunications Systems Inc., a wholly owned subsidiary of Tandem Computers Inc. (NYSE:TDM), Monday announced its TTSI-NET family of products; the first available complete solution for telephone service providers that offer advanced Intelligent Network services for the telecommunications industry, such as 800 applications or Line Information Database.

Deregulation of the telephone industry has made these services critical to the future success of the telephone companies.

The TTSI-NET family includes the TSCP-1000 Service Control Point, the TSMS-1000 Service Management System and the TSCE-1000 Service Creation Environment.

Deployed in 1988 by US Sprint, the TSCP-1000 is the first service control point capable of handling the extremely high volume transaction load required in an Intelligent Network.

This major inter-exchange carrier's TSCPs currently run up to 400 transactions per second using an authorization code application and execute multiple applications in US Sprint's Signaling System 7 (SS7) fiber optic digital network.

The rapid changes, competitive market and diversity of advanced service opportunities require that these new services be quickly developed and implemented. The TTSI-NET TSCE-1000, an application development tool especially designed for the telecommunications market, meets these needs by substantially reducing the time and human resources required to develop service applications.

TTSI's strategic application partners, ACI Telecom and Logica Data Architects Inc., are utilizing the TSCE to rapidly bring new solutions to market.

The TTSI-NET TSMS-1000 provides generic management services for Intelligent Network applications. As the first service management system to provide an online as well as batch ability to manage information, it will enable telco's telephone customers to directly monitor and make online changes with automatic updates across a distributed network.

CUPERTINO, CA (JAN. 29) BUSINESS WIRE - John Sculley, chairman and chief executive officer of Apple Computer, Inc., Monday promoted Michael H. Spindler, previously president, Apple Europe, to the new position of chief operating officer (C.O.O.) and executive vice president.

Sculley said the promotion of Spindler to C.O.O. will help Apple better coordinate business operations while streamlining day-to-day activities. The following business functions will report to Spindler: Apple USA, Apple Pacific, Apple Europe, Worldwide Product Marketing and Worldwide Manufacturing. Spindler will report directly to Sculley.

Separately, Allan Z. Loren announced his resignation from the position of president, Apple USA, effective immediately.

''Spindler brings operational strength, strategic excellence and international acumen to the new C.O.O. position,'' Sculley said. ''These skills are aligned with the challenges Apple faces in the coming decade: leveraging and streamlining our worldwide resources while ensuring consistency in all of our sales and marketing efforts.''

Spindler, 47, has directed Apples European business unit since 1988, overseeing all European sales, marketing and headquarter activities. Before that, Spindler contributed to the significant revenue growth of Apples operations outside the U.S. as vice president, Sales and Marketing Apple International. Spindler, a ten-year Apple veteran, joined the company in 1980.

In addition to Spindler, the following Apple executives continue to report to John Sculley in their respective positions: Jean-Louis Gasse, senior vice president and president, Apple Products; Albert A. Eisenstat, senior vice president and secretary; Joseph A. Graziano, senior vice president and chief financial officer; and Kevin J. Sullivan, senior vice president, Human Resources.

Apple Europe expects to announce a replacement for Spindler shortly. Until a replacement for Loren is hired, Spindler will be acting president, Apple USA.

#90029b0662 01/29/1990 ~Business Wire

SOLANA BEACH, Calif. (JAN. 29) BUSINESS WIRE - Chart House Enterprises Inc. Monday announced record revenues and income for the fourth quarter ended Dec. 31, 1989. Revenues grew 7 percent to $32.1 million as compared to pro forma 1988 revenues of $30 million.

Net income rose to $564,000 (7 cents per share) as compared to a pro forma 1988 loss of $8,000. The pro forma 1988 amounts exclude the operations of Luther's Bar-B-Q restaurants for the year as well as the gain on the sale of Luther's Bar-B-Q Inc. in Dec. 1988.

Revenues for the year ended Dec. 31, 1989, increased 9 percent to $139.6 million as compared to 1988 pro forma revenues of $128.5 million. Income before extraordinary items rose 55 percent to $4.6 million (76 cents per share) compared to pro forma 1988 income of $3 million (59 cents per share).

Net income reflects a one time extraordinary prepayment penalty paid in connection with the early retirement of high coupon, fixed-rate debt from the proceeds of the company's initial public offering in Sept. 1989. This extraordinary item reduced 1989 net income by $1.5 million (25 cents per share).

Net income for 1988 includes the operations of Luther's, the gain from the sale of Luther's and a discount on an early retirement of debt, which increased 1988 net income by $2.7 million (53 cents per share). Net income for 1989 was $3 million (51 cents per share) compared with 1988 net income of $5.6 million ($1.12 per share).

Chart House Enterprises Inc. operates 75 restaurants, including 60 Chart House, one Peohe's and 14 Paradise Bakery restaurants. The company's Chart House restaurants are located in 17 states, Puerto Rico and the U.S. Virgin Islands; Peohe's is located in California; and the company's Paradise Bakery restaurants are located in California, Hawaii and Texas. #90029b0663 01/29/1990 ~Business Wire

LAGUNA HILLS, CA (JAN. 29) BUSINESS WIRE - Community Psychiatric Centers (NYSE/BSE/MSE/PSE:CMY) Monday announced its financial results from continuing operations for the fiscal year ended Nov. 30, 1989.

Earnings per share from Community Psychiatric Centers' continuing operations (exclusive of the spun-off VIVRA businesses) for the fiscal year 1989 were $1.56 compared with $1.27 for the prior year, a 22.8 percent increase.

Total revenues and net earnings from continuing operations and average shares outstanding for fiscal year were $330,724,000, $71,961,000 and 46,251,000, respectively, compared with $273,268,000, $58,531,000 and 46,077,000 for the prior year.

For the fourth quarter of fiscal year 1989, earnings per share from continuing operations were 36 cents compared with 30 cents for the fourth quarter of fiscal year 1988, a 20.0 percent increase.

Total revenues and net earnings from continuing operations and average shares outstanding for the fourth quarter of 1989 were $80,115,000, $16,450,000 and 46,337,000 compared with $72,327,000, $13,845,000 and 46,205,000 for the fourth quarter of 1988.

(It should be carefully noted that the foregoing numbers are comparisons of CMY'S continuing operations only and therefore are exclusive of the dialysis and home health divisions that were spun off to VIVRA Inc. on Sept. 1, 1989.

Several recent analytic reviews pertaining to CMY's performance have been misleading due to a failure to adjust last year's reported earnings and projected 1989 earnings to reflect said spinoff.

As an example, one report very unfavorably compared the then estimated 1989 earnings at $1.55 per share versus a 1988 earnings per share of $1.54 obviously failing to take the spinoff into account. As stated above, the correct 1989 versus 1988 comparisons should be $1.56 versus $1.27.)

Community Psychiatric Centers continues to operate its chain of acute psychiatric hospitals located in the United States and the United Kingdom.

SAN DIEGO (JAN. 29) BUSINESS WIRE - Mitek Systems Inc. (NASDAQ:MITK) announced that Falcon Microsystems of Landover, Md., will market an extensive line of Mitek TEMPEST products through the General Services Administration (GSA) schedule.

Under the terms of the agreement, Falcon will offer Mitek TEMPEST products in the next GSA Schedule C, the U.S. government's official purchasing catalog for personal computing products. Falcon will also offer Mitek

products in competitive bidding situations.

Products listed on the GSA schedule are Apple Macintosh IIx (Model 650T), QMS PostScript Laser Printer (Model 130T) and Hewlett-Packard Laser Printers (Models 120T and 125T).

''Many of the largest contracts in government require adherence to the TEMPEST standard,'' said Ken Hansen, Falcon vice president of marketing. ''Falcon will not only market Mitek's TEMPEST Macintosh, but will also network, install, support, service and provide training on these vital systems.''

Falcon Microsystems is the leading supplier of Macintosh-based integrated systems to the U.S. government. The firm specializes in Macintosh-based microcomputer solutions for government users. With headquarters in Landover, Falcon offers nationwide service and support facilities such as complete training, installation, maintenance, application development and network systems integration services.

Mitek Systems Inc., with headquarters in San Diego and sales and support offices located in Arlington, Va., designs, tests and manufactures TEMPEST accredited computer products including personal computers, laser printers, multiplexers and digital facsimile machines.

A publicly held corporation, the firm provides products for use by government agencies, contractors and others who collect, produce and disseminate sensitive information. The company distributes products through resellers in Canada, Europe and Australia.

Mitek recently announced an increase in sales for fiscal year ended September 1989 of more than 70 percent over fiscal 1988 and profits that were the highest in its corporate history.

#90029b0700 01/29/1990 ~Business Wire

SALT LAKE CITY (JAN. 29) BUSINESS WIRE - EFI Electronics Corp. (NASDAQ/NMS:EFIC) Monday announced results for the third quarter and nine months ended December 29, 1989.

Revenues for the third quarter of fiscal 1990 were $2,209,695 up from $2,201,326 in the same period last year. Net income was $66,744 or $.02 per share versus $257,546 or $.08 per share in the comparable prior year period.

Revenues for the first nine months of fiscal 1990 increased to $7,163,024 from $6,409,771 in the same period one year earlier. Net income was $637,212 or $.20 per share compared to $982,625 or $.30 per share in the first nine months of fiscal 1989.

Earnings per share have been adjusted to reflect the Company's one-for-three reverse stock split which became effective July 28, 1989.

Scott Nelson, President and CEO, commented, ''EFI's decision to increase spending to automate manufacturing and lower the cost of goods, together with significantly increased expenditures in research and development, resulted in lower net income in the first nine months of fiscal 1990 compared to the same period last year.

''In addition, the first nine months of last year are not comparable to this year because of first time stocking orders from Leviton Manufacturing Company which occurred in the first nine months of last year.

''At the beginning of fiscal 1990, we made a commitment to EFI's long-term growth. We have substantially increased our research and development efforts to expand EFI's product line in order to capitalize on new market opportunities. Our automation effort has made considerable progress with the recent installation of a state-of-the-art flexible assembler into our manufacturing process. We believe that these financial commitments will position EFI to achieve sustained growth over the long-term, however, they may have a short-term negative impact. We should begin to realize some of the benefits of automated manufacturing and additional product development in the next two to three quarters.''

Nelson continued, ''We have signed a new distribution agreement with Sharp Electronics. EFI's surge suppression products will be offered through the Sharp dealer network to their copier and cash register customers.

''We are encouraged by our non-Leviton sales which have increased 21 percent over the same period last year. We are particularly encouraged by sales to the business machine market, the medical market and the retail computer market. We believe that for the fourth quarter, total sales will increase modestly, resulting in an annual sales increase of approximately 8-10 percent for all of fiscal 1990, compared to fiscal 1989.

''EFI's balance sheet remains strong with over $963,000 in cash and no long-term debt. The current ratio is approximately 5:1,'' concluded Mr. Nelson.

Founded in 1979, EFI Electronics Corporation markets power surge and transient suppression equipment in the U.S. and Canada. The Company's products are designed to protect computer, telecommunications, and microprocessor-based medical and industrial equipment in a wide range of applications. -0- T

WALTHAM, MA (JAN. 29) BUSINESS WIRE - IPL Systems Inc. Monday announced the appointment of West and East Coast sales directors; Steve Kayatta is director of West Coast sales and G. Phillip Koutz will serve as director of East Coast sales.

In their respective roles, Kayatta will be responsible for IPL's sales in Western North America and Kountz will handle sales in Eastern North America. Both directors will report to Robert Berg, IPL's vice president of North American sales.

Kayatta and Kountz have held various sales positions and have successfully worked with midrange system distributors for several years.

Prior to joining IPL, Kayatta was manager of domestic and European OEM sales with Delphax Systems in Randolph, Massachusetts. Before moving to Delphax, Kayatta held numerous sales and sales management positions with Decision Data, Digital Communications Associates, and IBM.

Before joining IPL, Kountz was manager of OEM sales and marketing for Avatar Technologies in Hopkinton, Massachusetts. He has also logged several years of sales experience in high technology. Prior to joining Avatar, Kountz was a senior sales and marketing manager with Memorex. Previously, he was Eastern regional sales manager for International Computer Limited.

IPL Systems Inc. designs, manufactures and markets IBM-compatible tape drive subsystems and memory products for IBM Systems/3X, 43XX, 9370, S/370 30XX, and AS/400 computers. The company was founded in 1973 and its headquarters are located at 360 Second Ave., Waltham, MA 02154 (617) 890-6620.

IPL Systems Inc. stock is quoted on the NASDAQ national market system and traded in the OTC market under the symbol IPLSA.

LONDON (JAN. 29) BUSINESS WIRE - Tomkins PLC (NASDAQ:TOMKY), the international industrial management company, Monday reported that holders of over 90 percent of its 9.25 percent convertible unsecured loan stock have exercised their rights to convert their holdings into Tomkins' ordinary shares.

The recently announced 35 percent increase in the interim dividend, continuing Tomkins' progressive dividend policy, makes the gross ordinary share dividend income 17.9 percent greater than the gross interest receivable from an equivalent amount of the loan stock.

In accordance with the conditions of the offering, Tomkins said it intends to convert and cancel the outstanding loan stock. Notices will be issued to remaining stockholders.

Following conversion of the 3,018,238 million pounds of loan stock currently outstanding, (approximately $5 million at current exchange rates) the number of Tomkins' ordinary shares in issue will total 128,430,936.

The Tomkins group comprises a broad range of low-risk technology companies. Its U.S. interests include Smith & Wesson Corporation, Springfield, Mass., manufacturer of handguns, handcuffs and the Identi)Kit system and The Murray Ohio Manufacturing Company, Brentwood, Tenn., one of the leading U.S. producers of power lawnmowers and bicycles. Listed on the London Stock Exchange, Tomkins shares also trade on the NASDAQ National Market System under the symbol TOMKY.

DALLAS (JAN. 29) BUSINESS WIRE - Atmos Energy Corp. (NYSE:ATO) announced Monday that an independent management audit of its Western Kentucky Gas Co. has found the company to be a well-managed, efficient utility and one of the lowest cost providers of natural gas service in Kentucky.

The audit was ordered by the Kentucky Public Service Commission under its regulations which require all utilities deriving $100 million or more in 1983 gross revenues to undergo such a review. Schumaker & Co., an independent auditing firm from Ann Arbor, Michigan, conducted the audit.

The report also found that Western Kentucky Gas had the lowest number of customer inquiries, per thousand, of any major utility in Kentucky. ''The audit findings confirm Atmos Energy's and its operating divisions' commitment to provide our service areas with the best possible service at the lowest possible cost,'' said Charles Vaughan, chairman and chief executive officer of Atmos.

Western Kentucky Gas is an operating division of Atmos Energy Corp. serving 150,000 natural gas customers in central and western Kentucky. Atmos Energy, headquartered in Dallas, Texas, provides natural gas service to more than one-half million customers in Texas, Louisiana and Kentucky through its Energas, Trans Louisiana Gas, and Western Kentucky Gas divisions.

#90029b0762 01/29/1990 ~Business Wire

HAWTHORNE, N.Y. (JAN. 29) BUSINESS WIRE - Peoples Westchester Savings Bank (NASDAQ:PWSB) Monday reported 1989 earnings of $10.09 million, or $1.90 per share, vs. earnings of $14.90 million, or $2.81 per share, for 1988.

Tax loss carryforwards contributed $340,000, or six cents per share, to the 1988 amount.

Net income for the three months ended Dec. 31, 1989 was $3.07 million, or 58 cents per share, vs. $5.89 million, or $1.11 per share, for the comparabe year-ago quarter.

Earnings per share calculations for the prior year periods have been adjusted to reflect a five percent common stock dividend declared on Oct. 17, 1989.

Chairman, President, and Chief Executive Officer William F. Olson attributed the 1989 earnings decline to increased overhead expenses and an increase in the bank's provision for loan losses.

Addressing the issue of overhead expense, Olson commented that ''One of the bank's greated assets is our extensive branch network which, along with our operating systems, was the focus of major improvements throughout 1989. These improvements, now nearly complete, had led to a higher level of expenses, but have also resulted in more efficient service to our customers.

''At the same time, we are pleased to report that the bank's implementation of a stringent cost containment plan early in Ausgust has resulted in a decline in other expense for the fourth quarter of the year.''

Other expense dropped from $10.08 million for the three months ended Sept. 30, 1989 to $9.79 million for the three months ended Dec. 31, 1989.

''Despite the pressure placed on margins by an increased cost of funds,'' continued Olson, ''modest loan growth enabled the bank to maintain a comparable level of net interest income from 1988 to 1989.''

1989 net interest income was $51.63 million compared with $51.70 million reported in 1988.

Peoples Westchester is an FDIC-insured, New York State-chartered community bank meeting the financial needs of those who live and work in Westchester

County through a network of 27 Westchester-based offices.

#90029b0766 01/29/1990 ~Business Wire

TINTON FALLS, NJ (JAN. 29) BUSINESS WIRE - Concurrent Computer Corp. Monday announced financial results for its second quarter ended Dec. 31, 1989.

The company, which previously announced it would take a one-time charge for restructuring costs of $3 million, or 16 cents per share in its second quarter, reported today a quarterly net loss of $2.2 million, or 12 cents per share on net sales of $89 million.

The company indicated it would have reported a profit if not for the one-time charge. The results represent a substantial improvement over a net loss of $14.8 million, or 83 cents per share on net sales of $90.7 million in the second quarter of the prior year.

In addition to the restructuring charge, the current quarterly loss included non-cash purchase accounting adjustments of $3.1 million, or 17 cents per share, vs. $15.5 million, or 87 cents per share in the prior year.

The company reported its second quarter incoming orders improved over its first quarter ended Sept. 30, 1989, and it has made progress in resolving issues that delayed shipments of its new proprietary computer systems in recent quarters.

The one-time charge is a result of a restructuring, announced earlier this month, which the company said was a continuing cost improvement process that began with the merger of Concurrent and MASSCOMP over a year ago.

In announcing the action, Concurrent said it reduced its infrastructure ''to be a leaner, more flexible organization with fewer levels of management and a more concentrated focus on the customer.''

The resultant cost savings are estimated to be approximately $12 million annually and will be reflected in the company's results beginning in the next quarter.

Commenting on the company's results, James K. Sims, chairman, president and chief executive officer, said, ''I am pleased with the continued improvement in the operating profit of the company.

Concurrent Computer Corp. is the leading supplier of high-performance, real-time computer systems worldwide. With systems ranging in price from $10,000 to more than $1 million, the company is focused on the real-time simulation, measurement and control, C4I and transaction processing markets.

#90029b0769 01/29/1990 ~Business Wire

GRENADA, MS (JAN. 29) BUSINESS WIRE - Robert E. Kennington II, chairman of the board and chief executive officer of Grenada Sunburst System Corp., (NADSAQ:GSSC) the parent company for Sunburst Bank, Mississippi, and Sunburst Bank, Louisiana, announced a first quarter cash dividend of 15 cents per share following the quarterly meeting of the company's board of directors.

Chairman Kennington said that the dividend is payable on April 2, 1990, to shareholders of record on March 15, 1990.

The company reported 1989 fourth quarter earnings of $2.7 million compared with earnings of $3.1 million for the like period in 1988. Continued pressure on the banks' interest spread caused primarily by relatively high short term interest rates was the major factor contributing to the lower level of earnings in the fourth quarter of 1989.

Earnings for the year ended Dec. 31, 1989, were $6.1 million compared with $12.3 million for 1988. The decrease in annual earnings resulted primarily from a previously announced increase in the provision for loan losses of $6 million over the 1988 provision and a shrinking interest spread during 1989.

Also, $1 million in losses were incurred on the sale of certain investment portfolio securities as a planned strategy to manage interest rate sensitivity.

The company's latest franchise expansion, Sunburst Bank, Louisiana, acquired in May 1988, contributed $3.8 million to the 1989 earnings of the company.

Deposits of the Louisiana subsidiary were $269 million at Dec. 31, 1989, an increase of 21.4 percent over the $221 million deposit level at year end 1988. Gross loans increased $18 million during 1989 to $104 million, exclusive of credit card receivables which were sold in 1989.

Gross loans for the company were $1 billion at Dec. 31, 1989, an increase of $101 million or 10.9 percent over year end 1988. Deposits were $1.5 billion at Dec. 31, 1989, reflecting an increase of $109 million or 7.7 percent over 1988. The company ended the year with total assets of $1.7 billion.

FORT WORTH, Texas (JAN. 29) BUSINESS WIRE - William E. Greenwood, Burlington Northern Railroad's (BN) executive vice president for marketing and sales, has been promoted to chief operating officer, effective Feb. 15.

John Q. Anderson, 38, a principal in McKinsey & Company Inc., Los Angeles, an international management-consulting firm, has been appointed to succeed Greenwood.

BN President and Chief Executive Officer Gerald Grinstein said, ''Bill Greenwood has 26 years of experience in all aspects of Burlington Northern Railroad's business. This promotion will continue BN's focus on the marketing opportunities and operational challenges of the 1990s. Bill's job now will be to build the highest quality into all of our customer services.

''John Anderson brings excellent credentials in strategic marketing and business development to BN and he will provide leadership in shaping our marketing programs for the 1990s. In looking for Bill Greenwood's successor, we specifically wanted somebody with John's wide experience helping other industries adapt to significant competitive change''.

Grinstein, who previously also held the title of chief operating officer, said the following departments will report to Greenwood: Operations, Marketing and Sales, Information Systems Services and Freight Equipment. All other departments will continue to report to Grinstein.

Greenwood, 51, has headed the railroad's Marketing and Sales Department since 1985. He previously held a variety of operating and marketing positions including trainmaster, terminal superintendent, division superintendent, corporate planning director and vice president, intermodal business. He is a graduate of Marquette University.

Anderson has worked with a wide variety of industries since joining McKinsey & Company in 1977. He is a graduate of Stanford University and Harvard Business School.

NEW YORK (JAN. 29) BUSINESS WIRE - MTV: MUSIC TELEVISION has entered into an agreement to sell and distribute ''MTV News'' with Westwood One Radio Networks through their syndication network.

Beginning in March, the ''MTV News'' show will air Monday - Friday, once in the morning, followed by an updated version in the afternoon. It will air on AOR and CHR stations nationally and be two-and-a-half minutes long.

The ''MTV News'' show will be written and reported by Kurt Loder. Kurt is the host of MTV's ''Week in Rock'' and ''News at Night,'' and is one of the most well-respected music news journalists around.

''MTV News has established itself as a leading authority on music and pop culture news,'' said Harriet Seitler, senior vice president, Marketing, MTV: MUSIC TELEVISION. ''Radio is a perfect medium for people to seek-out MTV for that news and information. By translating MTV to a radio environment, we can continue to serve our existing audience, while expanding MTV news as a source to listeners who might not have MTV.''

The ''MTV News'' show will have 60 seconds of ad time available for an advertiser to become involved with the program.

''The dynamic combination of Westwood One and MTV, two broadcasting giants who reach millions of people everyday, creates unique programming opportunities,'' said Thom Ferro, executive vice president and general manager, Westwood One Radio Networks.

''MTV is the last word in entertainment news and Westwood One is pleased to provide our listeners with ''MTV News'' for current music industry news and information on a daily basis.''

MTV: MUSIC TELEVISION, a division of Viacom International Inc., is a registered trademark of MTV Networks. MTV NETWORKS owns and operates three cable television networks -- MTV: MUSIC TELEVISION, NICKELODEON/NICK AT NITE, and VH-1, all of which are registered trademarks of MTV NETWORKS.

Westwood One is America's largest producer of radio programming and the nation's second largest radio network. Westwood One's award-winning News, Talk, Sports and Entertainment programming is heard on more than 6,000 radio stations around the world.

#90029b0829 01/29/1990 ~Business Wire
ST. PETERSBURG, FL (JAN. 29) BUSINESS WIRE - Florida Federal Savings Bank a 56-year-old institution with $4.7 billion of assets and a network of 88 branch and loan production offices throughout Florida, Monday held its annual shareholders' meeting in downtown St. Petersburg.

Chief Executive Officer John W. Sapanski briefly reviewed significant external developments affecting the company since the previous annual meeting. These were: the advent of higher short-term interest rates, the persistence of widespread adverse publicity about the savings industry, the passage of FIRREA, and the prolonged lack of resolution on the student loan issue.

Among the examples he cited was a reduction in operating expense from $123 million for the year ended June 30, 1988 to an annualized level of $94 million at Dec. 31, 1989. He noted that the company had done a good job of controlling its cost of funds in a period when short-term interest rates were high.

Also, groundwork preparations for a system-wide conversion to an integrated, more efficient computer system were completed. In January 1990, he added, a pilot branch was converted to the new system.

In matters beyond the control of management--such as the student loan problem--Florida Federal continues its best efforts to effect a reasonable

resolution, Sapanski said. ''The trial date resulting from the indictment on the student loan matter is a couple of weeks off. Our attorneys are having discussions at the highest levels of the Justice Department--both the civil and criminal divisions.

In view of the sensitivity of these discussions, we have been advised that it would be imprudent to comment further. So that's all I can tell you. But the good news is that they are meeting and the discussions are serious '' he said.

Included in Sapanski's 18-month overview was an announcement of financial results for the first half of the company's current fiscal year (which ends June 30). For this six-month period (July-December 1989), Florida Federal reported a loss of $17.6 million--a $4.3 million improvement over the $21.9 million loss for the comparable six-month period (July-December 1988) of the previous fiscal year.

The chief executive officer said that the reduced loss was mainly attributable to a decline in operating expense and to decreases in losses and carrying costs on nonperforming assets.

BOCA RATON, FL (JAN. 29) BUSINESS WIRE - Siemens Information Systems Inc. Monday announed that the SATURN PBX has met compatibility standards for use with AT&T's ISDN Primary Rate Interface (PRI).

The AT&T PRI certification is an element of Siemens ISDN networking package for SATURN systems, which also includes the Siemens CorNet networking protocol. CorNet is Siemens Primaray Rate D Channel Layer 3 protocol for PBXs and provides interconnection with other ISDN PBXs and the public ISDN network.

The testing for Primary Rate compatibility was conducted at the AT&T test facility in Washington. AT&T declared Siemens SATURN PBX to be in compliance with PRI test standards in November.

According to Bauer, SATURN users will be able to take advantage of AT&T PRI features such as calling number identification and call-by-call service selection, which provides improved trunking efficiency when using available services.

AT&T services that work with PRI and are now available to SATURN users include MEGACOM and MEGACOM 800, ACCUNET Switched Digital Services (ASDS),

and Software Defined Network (SDN).

Used in conjunction with CorNet, these features will provide SATURN users with powerful integrated voice and high speed data communication, in both private and public network applications.

The Siemens SATURN PBX is distributed by Tel Plus Communications Inc., a Siemens Company, and the nationwide network of Siemens Gold Seal Dealers.

Siemens Information Systems Inc. and Tel Plus Communications Inc., a Siemens Company are a part of the Siemens USA group of companies which had 1988 sales of $3.1 billion, employing 29,000 people in more than 400 sales and service locations and 47 manufacturing facilities.

Siemens, the world's 14th largest industrial corporation according to Fortune magazine, has been installing ISDN systems since 1985 is the world's leading provider of private communications systems.

#90029b0837 01/29/1990 ~Business Wire

WHITE PLAINS, NY (JAN. 29) BUSINESS WIRE - IBM Monday announced that its ImagePlus MVS/ESA System will soon be in full operation in the records control area at Bank of Boston, the 14th largest banking company in the United States.

ImagePlus is IBM's document management system that will help customers, like Bank of Boston, who process large amounts of paper, reduce costs and improve service to their customers. Image processing is a technology that allows businesses to electronically capture, store, process and retrieve documents -- including letters, drawings and even photographs -- on a computer.

The introduction of image processing at Bank of Boston puts the bank at the forefront of technology used to increase the efficiency and productivity of back office operations.

Initially, Bank of Boston will use IBM's ImagePlus MVS/ESA System in the records control area, where it will manage the bank's authorities files.

IBM's ImagePlus manages electronic ''folders'' of image documents, distributes these folders to the appropriate site or person, controls their indexing and storage, and through system software, integrates image

documents with other information processing applications.

The end result for Bank of Boston and other ImagePlus customers is sharp, clear electronic ''pictures'' that appear on the display screen in seconds rather than the hours or days it may have taken to retrieve the original document.

Bank of Boston is a New England-based multi-bank holding company with total assets of $37 billion. Together with its affiliates in Maine, Connecticut, Rhode Island, and Vermont, Bank of Boston provides a broad range of financial services to individual, corporate, institutional and governmental customers as well as to other banks.

PROVIDENCE, RI (JAN. 29) BUSINESS WIRE - The Federal Communications Commission on Jan. 26, 1990, approved the transfer of four broadcast licenses held by Outlet Communications and or subsidiary companies to Chase Communications Inc. and/or its affiliates.

The stations involved are WATL-TV, Atlanta, WXIN-TV, Indianapolis, and WTOP-AM and WASH-FM, Washington. Outlet and Chase signed a letter of Intent in September 1989 and a Definitive Sales Agreement in December 1989. The transaction is valued at $120 million. With FCC approval, the sale is expected to consummate in mid-March of this year.

Outlet Communications, a group broadcaster, will continue to own and operate two television stations, WJAR-TV, Providence, R.I., and WCMH-TV, Columbus, Ohio. Chase Communications Inc. of Hartford, Conn., is a private company engaged in a variety of broadcast activity. First Boston Corp. has been authorized by Outlet to talk with other broadcast organizations in its role as advisor to the company.

BRISTOL, CT (JAN. 29) BUSINESS WIRE - Eagle Financial Corp. (Amex:EAG) Monday reported net income of $968,000 or 36 cents per share, for the first quarter of fiscal 1990.

This compares to net income of $1,020,000, or 38 cents per share, for the comparable quarter in fiscal 1989.

The fiscal quarter ended Dec. 31, 1988 included net gains on sales of investment securities of $152,000. There were no such gains or losses

reported in the fiscal quarter ended Dec. 31, 1989.

Net interest income increased 10 percent to $3.5 million for the first quarter of fiscal 1990. Net interest income for the first quarter in fiscal 1989 was $3.2 million.

On Dec. 15, 1989, Eagle Financial Corp. announced the execution of a definitive merger agreement with Webster Financial Corp. (NASDAQ:WBST) of Westbury, Conn. The proposed ''merger of equals,'' which is subject to regulatory approval and the approval of Eagle and Webster shareholders, would involve a tax free stock-for-stock exchange in which each outstanding share of Eagle would be converted into .95 share of the merged holding company and each outstanding share of Webster would remain outstanding and represent one share of the merged holding company.

Webster reported $710 million in assets at Dec. 31, 1989 and is the holding company for the ten-office First Federal Savings and Loan Association of Waterbury. More detailed information about the proposed merger will be included in a joint proxy statement/prospectus that is expected to be distributed to all shareholders of Eagle and Webster in February, 1990.

Eagle, which had $472 million in assets at Dec. 31, 1989, is the holding company for the four-office Bristol Federal Savings Bank of Bristol, Conn. and the five office First Federal Savings and Loan Association of Torrington, Conn.

ASHLAND, KY (JAN. 29) BUSINESS WIRE - Addington Resources Inc. (NASDAQ: ADDR) has completed the sale of its gold mining subsidiary, Addwest Gold Inc., to Canyon Resources Corp. of Golden, Colo.

In exchange for all the outstanding stock in Addwest Gold, Canyon paid Addington $29,010,000 in cash, 1,470,000 shares of Canyon stock, together with warrants to purchase 367,500 shares of Canyon stock at $3.50 per share through Dec. 31, 1994.

Addington also received a 2 percent net smelter return royalty from operations at the Briggs mining property in California when production exceeds 400,000 ounces.

The transaction, completed last Friday, resulted in a $20 million pre-tax gain for the Kentucky-based coal mining concern, Addington Resources President Larry Addington said.

''The sale of Addwest Gold fulfills our strategy of focusing more fully on developing our core businesses in coal mining and sanitary landfill operations,'' Addington said.

Assets included in the sale include Addwest Gold's 60 percent ownership of the gold-producing Kendall Mine in Montana, a gold deposit in California and options to purchase additional mineral-producing property in Montana.

Addington originally granted an option to sell the gold mining subsidiary last August. It was assigned to Canyon in September, and the Colorado company exercised the option on the expiration date.

Addington Resources mines coal in Kentucky, West Virginia and Ohio, and is engaged in sanitary landfill development, material-moving contracting and highway construction operations. Its stock is traded on the NASDAQ National Market System under the symbol ADDR.

WOOSTER, OH (JAN. 29) BUSINESS WIRE - FirstFederal Financial Services Corp, the parent company of First Federal Savings and Loan Association of Wooster, announced net earnings of $416,000, or 40 cents per share, for the fourth quarter of 1989 as compared to $566,000, or 54 cents per share, for the quarter ended Dec. 31, 1988.

For the year ended Dec. 31, 1989, FirstFederal reported net earnings of $1,630,000, or $1.55 per share, compared with $2,206,000, or $2.10 per share, for the year of 1988.

Shareholders' equity at Dec. 31, 1989, was $24.8 million or 7.8 percent of total assets.

FirstFederal's assets at year end 1989 were $318 million. The 1,049,392 shares of common stock of the corporation are traded on the NASDAQ National Market System under the symbol ''FFSW.''

First Federal Savings and Loan Association operates eight offices in the north central Ohio counties of Wayne, Ashland, Medina and Richland.

#90029b0892 01/29/1990 ~Business Wire

ATLANTA (JAN. 29) BUSINESS WIRE - Patrick H. Thomas, chairman, president and chief executive officer of First Financial Management Corp. (NASDAQ:FFMC) Monday announced the company achieved record revenues and earnings for 1989.

For the year ended Dec. 31, 1989, net revenues increased 56 percent to $667 million compared with $428 million in the prior year. Net income for the year was up 65 percent to $56.8 million from $34.5 million in 1988.

Primary earnings per share increased 33 percent to $2.29 from $1.72, and fully-diluted earnings per share were up 27 percent to $2.15 from $1.69.

Net revenues for the fourth quarter of 1989 increased 63 percent to $229 million up from $140 million in the fourth quarter of 1988. Net income for the quarter was up 74 percent to $20.1 million compared with $11.6 million for the same period last year.

Primary earnings per share for the quarter were 75 cents vs 56 cents for 1988, an increase of 34 percent, and fully-diluted earnings per share were 69 cents vs 52 cents, up 33 percent.

Results for 1988 and 1989 have been restated to include MicroBilt on a pooling of interests basis. MicroBilt, which was not merged until Dec. 15 1989, had a dilutive effect of approximately 10 cents on fully diluted earnings per share in 1989 and no effect on 1988 earnings per share. Earnings per share calculations also are adjusted for the 5 percent stock dividend paid in July 1989.

For 1989, Georgia Federal Bank FSB, acquired in May 1989, contributed $92 million in net revenues and $7.2 million in net income to the twelve months, and $39.8 million in net revenues and $3.1 million in net income to quarterly results, respectively. Net income contributed by Georgia Federal is calculated after allocated after-tax carrying costs of $9 million for the year and $3.8 million for the quarter.

FFMC is an information services company which offers a broad range of data processing and related services to a large and diverse customer base.

FFMC is one of the major suppliers of financial data processing services to banks, thrifts, credit unions and mortgage services, a leader in data imaging, micrographics, electronic data base services, and health and pharmaceutical claims processing, and one of the largest merchant credit card processors in the country.

FFMC also owns Georgia Federal Bank, FSB, the largest thrift institution based in Georgia, First Family Financial Services, a major regional consumer finance company, and MicroBilt, a leading producer of custom data communications and information processing systems.

In addition, FFMC is a member of 41 ATM interchange systems across the United States. Its common stock is currently traded on the National Market System under the NASDAQ symbol FFMC. Its debentures are quoted through NASDAQ under the symbol FFMCG.

#90029c0080 01/29/1990 ~Comtex
WASHINGTON (JAN. 29) COMTEX - Northeast Bancorp filed a Form 8-K with the NASD announcing that due to the widespread decline of the New England economy, Northeast increased the provision for possible loan losses by $58 million in the four quarter. Northeast's charge-offs grew to $39 million during this period as well.

As a result of these fourth quarter adjustments, Northeast reports earnings of $632,000, or $0.08 per share, for the year ended Dec. 31, 1989 vs. earning $34.64 million, or $4.39 per share, in 1988.

#90029c0084 01/29/1990 ~Comtex
WASHINGTON (JAN. 29) COMTEX - The 10-Q report filed at the NASD shows International Design Group Inc. lost $60,043, or $0.00 per share, on no revenues for the quarter ended Nov. 30, 1989.

This compares with a loss of $256,540 ($176,578 loss from discontinued operations), or $0.00 per share, on no revenues for the same period in 1988.

-30- 497
#90029c0085 01/29/1990 ~Comtex
WASHINGTON (JAN. 29) COMTEX - International Design Group Inc. filed a Form 10-Q with the NASD announcing a settlement was reached on Jan 2. 1990 between Regina Kravitz, Regina Kravitz Design Studio Inc. and the company.

Pursuant to the settlement agreement, International Design received and retired 5 million shares of its common stock owned by Ms. Kravtiz, Ms. Kravitz renounced her rights to an additional 2.5 million shares under

dispute related to incentive clauses in the 1987 stock purchase agreement, and Ms. Kravtitz renounced any other claims against International Design.

International Design paid Ms. Kravitz $55,000, relinquished any rights the company had to the Regina Kravitz trademark, and gave to Ms. Kravitz its 50% shareholding in Regina Kravitz Design Studio Inc.

TOKYO (JAN. 29) - Japan's Sony Corp. said Monday it was raising 400

billion yen (2.8 billion dollars) from two bond issues to pay for its purchase of Columbia Pictures Entertainment Inc. and Guber-Peters Entertainment Inc.

The two issues comprise 300 billion yen (2.1 billion dollars) in 12-year convertible bonds and 100 billion yen (690 million dollars) in bonds with warrants. Both issues are unsecured and are being made in the domestic market.

The Japanese unit of the U.S. rating agency, Moody's Investors Service Inc., assigned an "A-3" rating to the convertible issue.

"Sony faces a number of significant risks associated with rapidly-changing technology, global economic conditions and highly competitive markets," it said. But it added that the company's high level of debt was likely to decline to more traditional levels in the medium term.

The convertible bonds, maturing in 2005, carry an interest rate of 1.4 per cent while the warrant issue due in 1994 offers 0.3 percent, Sony said.

Both offerings are being issued at par and both are being undewritten by a syndicate led by Japan's four leading securities. Agents are Mitsui Bank Ltd., Industrial Bank of Japan Ltd. and Bank of Tokyo Ltd.

Sony acquired Columbia Pictures for 3.4 billion dollars in October last year and spent an additional 200 million dollars in buying the film production company operated by "Batman" producers Peter Guber and Jon Peters.

The purchase of Columbia, which has triggered an emotional flap about foreign investment in the United States, was the biggest Japanese takeover of a U.S. company.

It followed Sony's acquisition of CBS Records Inc. in 1988 for two billion dollars.

-30- 1896

#90029d3640 01/29/1990 ~French/German News Agency

FRANKFURT, West Germany (JAN. 29) - Deutsche Bank, West Germany's leading private bank, said Monday it had opened offices in six towns in East Germany.

Each office was staffed by between three and five specialists who would advise East Germany on the West German banking system and carry out studies for western clients on the possibilities of cooperation wih East German industry, Deutsche Bank said in a statement in Frankfurt.

The Deutsche Bank had moved less swiftly than its West German competitors who had rushed to set up in East Germany after the opening of the Berlin Wall in November.

Its specialists had argued that there was little point in setting up offices in East Germany until the law there had been changed to authorize western-style banking activity.

"We are not interested in opening what would simply be representative offices," a bank spokesman said.

"What we want to do is to open real branches able to operate as such as soon as possible."

The Deutsche Bank's main rival, Dresdner Bank, has opened several representative offices in East Germany in the past two months, including one in Dresden, where it was founded.

The six new Deutsche Bank offices are in Rostock, Magdeburg, Erfurt, Dresden and Karl-Marx-Stadt. Its West Berlin branch will handle the areas of Potsdam, Frankfurt on the Oder and East Berlin.

#90029d3740 01/29/1990 ~French/German News Agency

TOKYO (JAN. 29) - Japan's Pioneer Electronic Corp. said Monday it planned to raise at least 61.7 billion yen (425 million dollars) next month from a share issue mainly targetted at European investors.

The public offering, managed by Nomura International Plc, a British unit of Normura Securities Co. Ltd., involves 12 million shares and will expand the company's capital by eight per cent to 163 million shares.

Pioneer said the issue price would be 97 percent of the closing price of its shares in Tokyo on February 6 but not less than 5,143 yen (35.47 dollars). If the price were below that, the offering would be suspended.

The company's shares closed Monday at 6,050 yen (41.72 dollars).

-30- 893

#90029d4190 01/29/1990 ~French/German News Agency

LONDON (JAN. 29) - British recruitment giant Blue Arrow said Monday it planned to move its headquarters to the United States, becoming an American quoted company, and to change its name to Manpower.

The announcement coincided with the company's annual results, which saw shareholders deprived of a final dividend because of 33 million pounds (55 million dollars) of provisions against various assets.

Pre-tax profits for the year to end October 1989 were 13.3 per cent down on the previous year at 65.1 million pounds (109.3 million dollars).

Turnover was 1.63 billion pounds (2.74 billion dollars), up from 1.39 billion pounds (2.33 dollars) the previous year.

There was no final dividend to match the 1.2 pence per share payment in 1988, and earnings per share were down to 5.5 pence against 6.8 the previous year.

In 1987 under the chairmanship of Tony Berry, Blue Arrow took over the much bigger U.S. operation Manpower, sparking off one of the biggest financial scandals the City of London has seen.

The rights issue aimed at financing the takeover coincided with the October 1987 world stock market crash. It was a flop, and underwriters County NatWest Securities ended up in court after being left with a stakeholding it did not want.

Former Manpower chief Mitchell Fromstein took over from Mr. Berry last year amid acrimonious accusations of mis-management and unwise investment.

Mr. Fromstein said the decision to change the name to Manpower and to seek shareholder approval for re-incorporation in the United States was taken in the light of the fact that the division represented by his old company accounts for almost 80 per cent of the group's operating profits.

In addition, 65 per cent of Blue Arrow share capital is held by U.S. investors.

Analysts in London said the move would save on the dual costs incurred by having the company quoted in London.

On the London stock market at mid-session on Monday Blue Arrow shares were down two pence on Friday's close at 88 pence in an otherwise firm market.

#90029d4340 01/29/1990 ~French/German News Agency
TOKYO (JAN. 29) - Leading Japanese computer maker Fujitsu Ltd. and Isuzu Motors Ltd. are to set up a joint venture to cooperate with U.S. auto giant General Motors Corp. to develop automotive electronic products, a Fujitsu official said Monday.

The venture, to begin in April, will be capitalized at one billion yen (about seven million dollars), and will initially be controlled 51 per cent by Fujitsu and the remainder by Isuzu, the official said.

The new firm's relationship with General Motors will be negotiated after its founding on April 2, he said.

The venture will be based in Kawasaki south of here and will develop, manufacture and market electronic systems to improve security and communications in vehicles and to reduce pollution, the official said.

#90029p0013 01/29/1990 ~PR Newswire
TORONTO (JAN. 28) PR NEWSWIRE - MIU Automation Corporation, a Texas Corporation, announced today that on Friday it filed a patent infringement lawsuit against International Business Machines Corporation (IBM) in the United States Federal Court in Los Angeles, California. MIU Automation Corporation is a wholly-owned subsidiary of MIU Industries Limited, a publicly-owned Canadian company.

MIU's complaint alleges that IBM infringed on a patent owned by MIU for technology which it developed and uses in a sophisticated personal computer security system which it manufactures and sells under the trademark INTRA-LOCK.

The lawsuit claims that IBM has recently began to offer, for sale, an IBM personal security product which incorporates the essential elements of MIU's patented technology.

MIU's complaint asks for a preliminary injunction stepping IBM from selling or shipping the announced IBM product, and asks for unspecified damages. MIU says that potential lost sales for their security products over the seventeen years of its patent could reach $40 billion.

MIU's filing states that extensive technical information on the patented INTRA-LOCK technology was supplied to IBM in relation to discussions of a contemplated joint marketing venture between MIU and IBM. However, MIU's complaint claims that in September 1989, IBM suddenly withdrew from communications with MIU and a few months later independently announced a

rival product incorporating MIU's technology.

A spokesman of MIU said ''We have spent many thousands of man-hours and invested millions of dollars on developing a great new product, so we now have no choice but to take decisive steps to protect our technology to the fullest extent allowed by the law.''

INTRA-LOCK is a multi-faceted PC data security solution incorporating access control, full audit trail capability, Master/User key operation, and encryption. The system consists of a printed circuit board, software, and physical/electronic security key with an EEPROM. The electronic key controls access to PC use, the encryption process and the audit trail.

INTRA-LOCK product's are now available for IBM PC, XT, and AT models and compatibles, Toshiba and Zenith PC's, and the PS/2 micro-channel. Encrypted communications in network and mainframe applications are also available.

MIU INTRA-LOCK products are already being used by a number of major financial institutions in Canada and the United States, and are now under evaluation by several government agencies and corporations.

MIU's head office is located in Markham, Ontario, a suburb of Toronto. Other patents on the MIU INTRA-LOCK products are being sought in the United States and Canada and will also be sought in other foreign countries.

#90029p0023 01/29/1990 ~PR Newswire

HAYWARD, CA (JAN. 29) PR NEWSWIRE - In a dramatic departure from its twenty-year history, Qantel Corporation, Inc. (NYSE: BQC) today announced the introduction of a new line of applications software and hardware products that will run on the UNIX operating system.

Previously, Qantel provided only its own proprietary minicomputer systems and business applications software written in QICBASIC.

Karl Niemuller, the new president and chief executive officer of Qantel, said, "The new line of applications software and hardware products places us in the heart of the rapidly growing market for business computing systems that run on the UNIX operating system."

He added, "We have been planning and preparing for this moment for nearly a year. Qantel's new line of products will enable us to continue

providing the best business automation solutions for our customers, regardless of changes in computing technology in the years to come."

The company's new software package, QEST(TM), is written in PROGRESS, a fourth-generation language that utilizes relational database technology.

Since 1969, Qantel has developed and refined a family of multi-user minicomputers and software tailored to the specific requirements of business applications in the United States and abroad. The company's systems are designed to process transactions on line and are popular in small- and medium-sized businesses because of their ease of use, reliability, high performance and competitive pricing structure.

Qantel Corporation provides customized interactive computer systems, with application programs tailored to industries such as manufacturing, hotels and retailing. Qantel also provides programs to the health care, insurance and distribution industries through its network of value added dealers. Qantel products are also marketed through wholly owned subsidiaries in Australia and Canada and to independent foreign distributors in 15 countries.

An additional statement by Niemuller follows: Statement by Karl Niemuller, President and CEO of Quantel Corporation "Qantel's new software package is written in PROGRESS, a fourth- generation language that utilizes relational database technology. PROGRESS has many similarities to features now incorporated in our own development language and data dictionary.

"We followed that path to make it easy for our dealers to modify the software. We also found that PROGRESS runs on over 140 platforms.

"The basic hardware in Qantel's new system is provided by Wyse Technologies. We've spent the last twenty years learning how to squeeze maximum performance from our systems. We are applying that accumulated knowledge to our new product line in order to get peak performance for the types of business applications we will target."

NEW YORK (JAN. 29) PR NEWSWIRE - Bloomberg Financial Markets and Comtex Scientific Corporation today announced that the Comtex OmniNews news service will be available on thousands of Bloomberg terminals serving institutional and professional investors and brokerage houses here and abroad.

Bloomberg Financial Markets provides analytical and news services to more than 8,000 terminals installed on the "buy" and "sell" sides of securities trading in almost every country with significant capital markets or money management activities. Its clients include more than two dozen central banks, and it is the sole source of daily prices of all U.S. Treasury securities published in newspapers around the country.

Compiled from an unparalleled group of internationally respected sources, OmniNews combines real-time coverage of corporate news and SEC filing information with the international, political, economic and market developments that can affect business.

"Institutional investors account for more than 80 percent of global securities trading and we provide our customers with a fast and convenient facility for retrieving all the information they need to make investment decisions. Comtex will provide additional valuable information to help assess the significance of market movements," said Michael Bloomberg, president of Bloomberg Financial Markets.

Bloomberg Financial Markets was established in 1981 as a technical service for bond traders, but has since expanded to cover a broad spectrum of equities, commodities, fixed income and currency trading. In addition to Comtex, the Bloomberg news files include PR Newswire, The Associated Press, Dow Jones News Service, and NIKKEI of Japan. Bloomberg also provides its customers with 13D and 13F information, fundamental company data from Toyo Keizai, Inc., Market Guide, Defaulted Bonds Data, Worldscope, and Zacks Investment Research. Optional services include Stone & McCarthy Market Focus, Applied Municipal Network, Oxford Analytica and Birinyi Associates Equity Addition.

Established in 1980 and based in Stamford, Conn., Comtex Scientific Corporation (NASDAQ: CMTX) is a valued-added integrator and electronic distributor of news retrieval products for the financial, corporate and consumer markets. Drawing upon more than ten major worldwide newswires as well as the SEC and its own Washington bureau, Comtex' integrated real-time news services reach more than 1 million users worldwide.

SAN DIEGO (JAN. 29) PR NEWSWIRE - Burnham Pacific Properties (AMEX: BPP), a San Diego-based equity real estate investment trust (REIT), has applied for listing its common stock on the New York Stock Exchange.

It is anticipated that the stock will begin trading on the Big Board in mid-February 1990 under the symbol BPP. Until that date, the stock will continue to trade on the American Stock Exchange under the same symbol.

Louis J. Garday, president of Burnham Pacific noted that, "Listing on the New York Stock Exchange is an important milestone in our 27-year history. Our stockholders will benefit from the New York Stock Exchange Listing's higher profile, which should enhance the company's visibility to the financial press and to individual and institutional investors nationally as well as throughout the world."

This announcement for New York Stock Exchange Listing follows an earlier announcement this week of earnings for 1989. The company's revenues increased 56 percent over 1988 amounts of $13.1 million to $20.4 million for 1989 and net income rose 517 percent over 1988 net income of $1 million to $6.1 million for 1989. The 1989 net income figures included a one time capital gain of $2.6 million resulting from the sale and exchange of one of the company's shopping centers.

Burnham Pacific Properties owns 19 Southern California real estate properties and is affiliated with John Burnham and Co., a 99-year-old, San Diego-based commercial real estate, insurance and mortgage banking firm.

CONTACT: Louis J. Garday or Nina Galloway, 619-236-1555, both of Burnham Pacific Properties Inc.

PORTLAND, OR (JAN. 29) PR NEWSWIRE - Fabricland Inc. (NASDAQ-NMS: FBRC) today reported second quarter net earnings of $1,448,000, or 45 cents per share, for the three months ended Dec. 31, 1989. The earnings for the second quarter of fiscal 1989 were $1,289,000, or 40 cents per share. Second quarter sales were $23,657,000 in fiscal 1990 compared with $21,418,000 last year and represented a 10.5 percent increase.

Earnings for the six months ended Dec. 31, 1989, were $2,094,000, or 65 cents per share, compared to $1,845,000, or 57 cents per share, for the same period last year. Sales for the six months ended Dec. 31, 1989, were $42,611,000, compared with $37,598,000 in the prior year and represented a 13.3 percent increase.

The per share results for all periods presented are based on the shares outstanding after the 20 percent stock dividend of 536,161 shares, which were issued in January 1990.

Tony J. Bosboom, president, said that the improved performance in the current year was due to store-for-store sales increases, the opening of

additional stores in the last year and the gain on sale of real estate.

Bosboom also said that in the second quarter the company had 74 stores this year compared with 70 stores in the second quarter last year. Through the second quarter, the company has remodeled 11 stores and opened three stores. Five additional stores are expected to be opened this fiscal year plus two relocations and several remodels.

Bosboom also indicated that the company's merchandising program along with its service, and remodeling and expansion plans are expected to make fiscal 1990 another exciting year.

FABRICLAND INC.
SUMMARY OF OPERATIONS
(Unaudited)

MOUNTAIN VIEW, CA (JAN. 29) PR NEWSWIRE - Silicon Graphics Inc. (NASDAQ: SGIC) today announced the IRIS 4D/85GT mid-range graphics superworkstation. The 4D/85GT sells for $49,900 and represents a 28 percent price decrease over the same level of performance on similar Silicon Graphics products.

The 4D/85GT workstation is fully binary compatible with all members of the Silicon Graphics product family and provides the lowest cost entry point capable of upgrade into the GTX graphics family. Standard disk drives and tape units are easily removable in order to meet military and commercial secure data storage requirements. The 4D/85GT provides the highest graphics performance per dollar of any workstation available. The 4D/85GT is rated at 13 MIPS, 1.5 MFLOP, 55,000 sustained polygons per second and includes a new expanded VME backplane. The 4D/85GT is available for

immediate shipment.

According to Edward McCracken, president and chief executive officer, "Our GT/GTX graphics products have established themselves as clear leaders in high-end graphics applications. Our goal in introducing the 4D/85GT is to significantly broaden this applications base by providing a low cost entry point to this level of graphics performance."

Thomas Jermoluk, Silicon Grahics' vice president and general manager of Advanced Systems Division adds, "The 4D/85GT is a powerful platform for the application developer because of the expanded 6 slot VME backplane, removable disk and tape units, and easy upgrade path. Initial acceptance of the product by third party developers has exceeded our expectations."

Silicon Graphics Inc. is the leading manufacturer of high performance workstations and computing systems for three dimensional applications. These workstations are used by engineers, scientists and creative professionals in the design, analysis, manufacture and simulation of three dimensional products and services. The company's stock trades on the National Market System under the NASDAQ symbol SGIC. Silicon Graphics has applied for listing on the New York Stock Exchange and is expected to begin trading of its common stock on the Big Board in early February.

GAINESVILLE, FL (JAN. 29) PR NEWSWIRE - Phoenix Advanced Technololgy (NASDAQ: PATI) and its subsidiary Nutri-Products, Inc. (NASDAQ: GOGO), today announced that Nutri-Products fiscal year 1989 sales ending Dec. 31, 1989 were $696,352 an increase of 245 percent over fiscal year 1988.

Nutri-Products, Inc. makes and markets Go!, the low-fat, high-protein energy drink, invented by Dr. J. Robert Cade, the inventor of Gatorade (A).

"Sales of Go! by the case increased dramatically every quarter. During the 1st quarter we sold almost 3,000 cases and by the fourth quarter of 1989 we sold in excess of 27,000 cases," said Arnold Zimmerman, president of Nutri-Products.

The roll-out of Go! began in March of 1989 in Northern Florida, and it has since expanded to include most of Florida, Georgia, South Carolina and Alabama.

Go! is carried in major grocery store chains such as Publix, Winn-Dixie and Kash n' Karry.

Go! is sold in 8 ounce tetra-paks and is available in vanilla, chocolate and strawberry. The company has also announced plans to begin using a newly designed package within 90 days.

Nutri-Products, Inc. is 71 percent owned by Phoenix Advanced Technology, Inc., a Gainesville-based company which works with state universities to commercialize medical breakthroughs.

(A) -- Gatorade is a registered trademark of Stokely Van Camp, Inc., a subsidiary of the Quaker Oats Co. Nutri-Products, Inc. is not affiliated with either Stokely Van Camp, Inc. or with the Quaker Oats Co.

#90029p0031 01/29/1990 ~PR Newswire

WASHINGTON (JAN. 29) PR NEWSWIRE - The Food and Drug Administration today approved the drug fluconzole as an alternative for two serious, AIDS-related fungal infections - one of which is a life-threatening type of meningitis.

The new drug was approved for treating cryptococcal meningitis, an inflammation of the brain and nervous system that often affects people with AIDS. The drug was also approved for treating candidiasis, a fungal infection that is most often manifested by sores in the mouth and throat, and which is estimated to afflict 80 to 90 percent of people at advanced stages of infection with the AIDS virus.

Treatments already exist for these infections but their use is limited by side effects or other factors. For example, the drug amphotericin B usually is effective in treating an initial episode of cryptococcal meningitis. This conventional therapy can result in serious adverse reactions including impairment of kidney function, and suppression of bone marrow, as well as less serious side-effects such as fever and nausea. A significant proportion of treated patients relapse within a matter of months and require maintenance therapy for the rest of their lives.

Lifetime treatment with fluconazole is also recommended for AIDS patients with cryptococcal meningitis who have relapsed, but these patients would likely experience fewer side-effects than those receiving chronic treatment with amphotericin B.

Health and Human Services Secretary Louis W. Sullivan, M.D., said, "Fluconazole offers an effective alternative treatment for people with AIDS, cancer and other diseases whose weakened immune systems make them

susceptible to cryptococcal meningitis or candidiasis."

HHS Assistant Secretary for Health James Mason, M.D., Dr.P.H., said fluconazole is the latest in a series of approved therapies that may help improve the quality of life for people with AIDS.

Two studies comparing fluconazole to amphotericin B for cryptococcal meningitis showed that fluconazole provided comparable efficacy to the drug ketoconazole. Similar results were obtained in trials comparing fluconazole with the drug clotrimazole in the treatment of candidiasis in people with AIDS and people with cancer.

Although the drug appears to be well tolerated by most patients, it has been associated with abdominal discomfort and nausea. Less commonly, it has been associated with signs of liver damage. In rare instances, fluconazole has been linked to severe skin rashes and fatal hepatic necrosis, a form of liver failure.

The drug will be marketed in both a tablet and intravenous form under the trade name Diflucan, by its manufacturer, Pfizer Inc., of New York.

LAS VEGAS, NEV (JAN. 29) PR NEWSWIRE - Powered by a strong performance at its new ammonium perchlorate facility, American Pacific Corp. (NASDAQ: APFC, PSE: APFP) recorded sharply higher revenues and earnings in the

first quarter ended Dec. 31, 1989.

Net income for the quarter increased to $2,002,000, equal to 38 cents per share on 5,127,000 averages shares outstanding. Revenues for the quarter climbed to $15,654,000. Prior year results are not directly comparable since the company was operating in a start-up mode for the first 10 months of fiscal 1989. The net loss for last year's first quarter was $343,000, equal to nine cents per share, on revenues of $1,356,000.

Fred D. Gibson Jr., chairman, president and chief executive officer, said: "The quarter benefited from three full months of production at our new chemical facility in Iron County, Utah, which commenced initial production last July. Those operations, conducted through our Western Electrochemical Co. (WECCO) subsidiary, have come on stream smoothly and efficiently. Production at Iron County is now at an annualized level of 22.8 million pounds of ammonium perchlorate.

"We continue to press forward with the active development of all three of our business segments -- chemical, pollution abatement systems and real estate development. In chemicals, we are striving to broaden our activities by pursuing new product opportunities in high demand areas. In pollution abatement systems, we were successful in winning a $2.1 million award for an odor control system in the Middle East, and we have other significant new business prospects for this important application.

"Our real estate team is actively pursuing development opportunities at our 460-acre Gibson Business Park in Henderson in the booming Las Vegas Valley. We are also moving forward with the development of a new office and commercial complex there to be anchored by the construction of the company's new corporate headquarters."

Gibson concluded: "As the year progresses, we look forward to further significant progress in the development of our business."

American Pacific Corp., through its WECCO subsidiary, is one of two U.S. suppliers of ammonium perchlorate, the oxidizing agent used in all solid rocket propellants that are essential to America's space and defense programs. Through other subsidiaries, the company is also engaged in the production of systems for pollution company and waste water treatment as well as commercial and industrial real estate development.

#90029p0036 01/29/1990 ~PR Newswire

LOS GATOS, CA (JAN. 29) PR NEWSWIRE - Caere Corp. announced today the shipping of OmniPage(TM) 2.1, OmniDraft(TM), OmniProof(TM) and

OmniSpell(TM) for the Apple Macintosh II and SE/30 computers.

OmniDraft, OmniProof and OmniSpell are part of Caere's new family of add-on products, which extends the power and performance of its flagship product OmniPage, a page recognition software package.

OmniPage 2.1 includes the ability to edit within the "Transitional Editor" feature while retaining word processing formats, and the ability to handle documents saved in the compressed Tagged-Image File Format (TIFF). It also has special hooks required to run the new add-on products from the OmniPage menu. Dot-Matrix Flexibility

OmniDraft allows OmniPage to recognize draft-mode dot-matrix text, including that produced on low-resolution nine-pin printers, such as those from Apple, Epson and Panasonic. In effect, OmniDraft "connects the dots" that make up low resolution text characters, and allows Omnipage's AnyFont(TM) routines to recognize the text. Text can range in size from 8 points to 72 points, come in single- or multiple-column format or in portrait or landscape orientation.

OmniProof compares two Macintosh word processing files and identifies all of the changes, such as insertions, deletions, replacements and rearranged text, that have been made since the original file was created. The "Comparison Window" gives users a side-by-side view of the documents, highlighting changes clearly and allowing further changes to be made.

The "Composite Document" feature merges old text with new changes, creating one document in which all revisions are indicated. The "Composite Summary" feature automatically generates a list of all changes made to both documents, noting the location of the changes, and providing a brief description of each change.

OmniSpell is a spell checker that -- in addition to correcting typing errors -- is specially tuned to correct errors common to Optical Character Recognition. For example, it is designed to suggest words to replace those that are unrecognizable because of shape-related problems, such as distinguishing between a 5 and an S.

OmniSpell contains a 100,000-word American English dictionary as well as a legal and a medical dictionary. It also has optional dictionaries for 11 European languages and allows users to create custom dictionaries for special projects or for a single document.

The suggested retail price for the Macintosh version of OmniPage 2.1 is $795. OmniPage 2.1 is a free upgrade for all registered owners of OmniPage 2.0. Registered owners of OmniPage 1.0 and OmniPage 1.1 may purchase the upgrade for $150. The suggested retail price for OmniDraft and OmniSpell is $100. The suggested retail price for OmniProof is $150.

#90029p0037 01/29/1990 ~PR Newswire

PALO ALTO, CA (JAN. 29) PR NEWSWIRE - Southwall Technologies Inc. (NASDAQ: SWTX) today reported net income of $76,000 or 1 cent per share, on revenues of $3,337,000 for the quarter ended Dec. 31, 1989. This compares with a net loss of $1,818,000, or 30 cents per share on revenues of $3,025,000 for the like period a year ago.

For the year, revenues were $14,322,000, up 19 percent from $12,041,000 in 1988. The net income of $508,000, or 8 cents per share in 1989 compares with a net loss of $3,358,000, or 57 cents per share in 1988.

"While our fourth quarter results were better than a year ago," said Bruce J. Alexander, president and chief executive officer, "they were not as strong as anticipated because of an inability to obtain quality substrate for the company's Etch-A-Flex(R) product. The problem with our vendor has been resolved and we are now manufacturing this flexible circuit base material. We will resume shipping it during the first quarter. Approximately $500,000 of anticipated fourth quarter 1989 sales are now planned for the first quarter of 1990."

The overall improved results for the fourth quarter and the year, Alexander said, were due to increased demand for the company's architectural window films and electronics products, as well as increased manufacturing productivity.

"We saw a particular increase during the second half of the year in sales of electronics materials to our aerospace customers," Alexander noted. "While pleased with the recent strength of aerospace sales, we do not anticipate such revenues returning to the levels attained in 1986 and 1987 when aerospace products and research contracts comprised a significant portion of total revenues.

"In the future, as in 1989, the company expects most of its revenues to be generated from sales of its commercial products."

Southwall Technologies Inc. designs and produces thin film coatings that selectively absorb, reflect or conduct certain types of electromagnetic radiation. Southwall products are sold into the architectural, automotive and electronics markets.

#90029p0039 01/29/1990 ~PR Newswire
NEW YORK (JAN. 29) PR NEWSWIRE - Colgate-Palmolive today announced an agreement to purchase Canada's leading bleach and fabric softener businesses from Bristol-Myers Squibb Company for US$172 million. These businesses will be known as The Javex Manufacturing Company, Inc. and The Javex Marketing Company, Inc.

Reuben Mark, Colgate's chairman, president and chief executive officer, stated, "This is part of Colgate's strategy to be a major global participant in the profitable bleach category. Even before this acquisition, we were the largest marketer of household bleach outside North America, mainly through acquisition of the Cotelle and Klorin bleach businesses in Europe, as well as introduction of our own brands in selected world markets. In addition, our position is strengthened by our partnership with The Clorox Company in Mexico and Pacific markets."

The acquisition of the Javex Companies will almost double the revenue base of Colgate-Palmolive in Canada and expand its portfolio of strong brand names to which it can apply its global marketing strength and packaging technology. The Javex Companies have sales of approximately Cdn.$100 million and six plants across the country. The Javex brand leads the market in Canada in both chlorine and non-chlorine bleach. In addition, the Fleecy brand is the country's number one liquid fabric softener.

Completion of the purchase is subject to the receipt of Canadian government approvals and certain other terms and conditions.

Colgate-Palmolive Company (NYSE: CL), with worldwide sales of $5 billion, is the seller of the Number One toothpaste in the world, Colgate. In addition, the company sells bleach in 15 countries, and fabric softeners in 32 countries. Colgate's well-known brand names include Colgate, Palmolive, Ajax, Irish Spring, Fab, Arctic Power, ABC, Hill's Science Diet and Hill's Prescription Diet.

#90029p0040 01/29/1990 ~PR Newswire
NEW YORK (JAN. 26) PR NEWSWIRE - CrossLand Savings, FSB (NYSE: CRL) and Coast-To-Coast Financial Corporation, a savings and loan holding company which is affiliated with the Pritzker family of Chicago and the Dworman interests of New York, announced that they had entered into a letter of intent, subject to the negotiation of a definitive written agreement,

providing for a cash capital infusion into CrossLand of $150 million by Coast-To-Coast and a plan of recapitalization by CrossLand.

Coast-To-Coast, in exchange for its $150 million capital infusion, would own 85 percent of CrossLand common stock following consummation of the transaction. Under the recapitalization plan, CrossLand's common and preferred stockholders, in exchange for their shares, would own, following consummation of the transaction, in the aggregate, 15 percent of CrossLand common stock and 100 percent of a new series of non- cumulative perpetual preferred stock of CrossLand with an aggregate liquidation preference of $225 million. The exchange ratios in the recapitalization have not yet been determined.

The proposed terms of the new non-cumulative perpetual preferred stock include an initial annual dividend rate (calculated on the basis of $225 million liquidation preference value) of 8.89 percent, increasing annually to 14.44 percent over a six-year period, and contain optional and mandatory call features. The call price would be equal to $200 million for the first 36 months, increasing to $225 million after 60 months, plus an amount equal to the aggregate earned and unpaid dividends from and after the date of issue. The optional call may occur at any time; the mandatory call would be triggered in the event that Coast-To-Coast ceases to own at least 50 percent of the outstanding common stock of CrossLand. Dividends on the non-cumulative perpetual preferred stock are only payable if earned after the date of the issuance of such stock. If CrossLand fails to pay the full amount of earned dividends when it is lawfully permissible to do so, then the holders of the non-cumulative perpetual preferred stock, as a penalty for such failure, shall be entitled to receive, for every $10 million of such earned but unpaid dividends, an aggregate number of shares of CrossLand's common stock equal to 1 percent of CrossLand's then- outstanding common stock on a fully diluted basis.

CrossLand and Coast-To-Coast have agreed, subject to Cost-To-Coast's due diligence, to negotiate and enter into a definitive agreement with respect to the proposed transaction on or before March 31, 1990. CrossLand has further agreed that under certain circumstances it will make a termination payment to Coast-To-Coast if the proposed transaction is not consummated.

The transaction will be conditioned upon, among other things, obtaining the approval of CrossLand's shareholders, obtaining all regulatory approvals, there being no material adverse change in CrossLand, there not being enacted or proposed any new materially burdensome laws or regulations applicable to CrossLand or Coast-To-Coast.

If the transaction contemplated by the letter of intent had been consummated as of Dec. 31, 1989, CrossLand said it believes that it would have met all of the regulatory capital ratios applicable to it.

NEW YORK (JAN. 29) PR NEWSWIRE - Bear Stearns & Co. Inc., has been selected as the exclusive marketing agent for Foster Mortgage Corporation located in Fort Worth, Texas. Foster Mortgage is a wholly owned subsidiary of Benjamin Franklin Federal Savings Association, which is currently under the conservatorship of the Federal Deposit Insurance Corporation as managing agent for the Resolution Trust Corporation.

Foster Mortgage was founded in 1922 and has grown through retail and wholesale production as well as the purchase of mortgage companies and mortgage servicing portfolios. Currently these well developed production sources are dormant, although personnel and facilities are in place for all but retail production.

The company has an efficient mortgage servicing operation which supports approximately $8.2 billion of geographically dispersed servicing done for others. The portfolio is well balanced with 30 percent GNMA, 28 percent FHLMC, 25 percent FNMA. The remainder is being done for its parent and other private investors.

Details on the company will be made available to a limited group of qualified purchasers through a confidential offering memorandum available from Dale Kurland, managing director at Bear Stearns, 212-272-3361.

SUNNYVALE, CA (JAN. 29) PR NEWSWIRE - Weitek Corp. (NASDAQ: WWTK) today announced that it has incorporated a wholly-owned subsidiary in Japan called Nippon Weitek K.K. This subsidiary is the next step in Weitek's long term commitment to the Japanese market. Stephen L. Domenik, corporate vice president and president of Nippon Weitek K.K., has significant experience in the Japanese market and is fluent in Japanese.

Weitek established a sales office in Japan in 1987 in order to better serve its Japanese customer base and to assist C. Itoh Techno Science, Weitek's exclusive distributor in Japan. Weitek has since formed marketing and engineering teams in Japan to define and develop Weitek products for the Japanese market. Products currently supported By Nippon Weitek K.K. and C. Itoh Techno Science include PostScript page printer processors, PC and workstation floating-point (FP) coprocessors,

workstation graphics FP processors and supercomputing FP processors.

"It is my observation that the Japanese customer expects more from the Japanese supplier," said Arthur J. Collmeyer, president of Weitek.

"With our incorporation in Japan, we're demonstrating to our Japanese customers that we are committed to their standard of performance. Steve Domenik will build the organization and infrastructure essential to meeting this commitment."

Weitek is the leading supplier of high-performance numeric processing solutions. The company's VLSI circuits and development tools power a broad range of computer systems, from minisupercomputers and engineering workstations to desktop computers and page printers.

SUNNYVALE, CA (JAN. 29) PR NEWSWIRE - Weitek (NASDAQ: WWTK) today announced that Stephen L. Domenik, president of Nippon Weitek K.K., a wholly-owned subsidiary in Japan, was promoted to corporate vice president of Weitek, and George W. Smith has been hired as vice president of North American Sales.

Steve Domenik is a 17-year veteran of the electronics industry. He began his career at Intel, where he held a variety of engineering and marketing management positions. He later became president of two high technology companies, Identronix, an electronics manufacturing company, and then Adaq Corp., a software company. Domenik has significant experience in the Japanese market and is fluent in Japanese. He earned a master of science degree in Electrical Engineering and a bachelor of science degree in Physics, both at the University of California at Berkeley.

George Smith joined Weitek from NEC, where he was vice president of sales. While he was there, NEC's sales more than doubled to roughly $650 million between 1987 and 1989; before that, as NEC's director of distribution sales, he helped the company double its revenues in the distribution channel. Smith was also at Intel for eight years, where he served in a variety of sales positions including regional manager Asia Pacific sales and distribution sales manager. He holds a bachelor of arts degree in Economics from the College of William and Mary.

"I'm delighted to have two such strong players join the Weitek team," said Robert Derby, senior vice president at Weitek. "They both are proven winners, and should really contribute to our future growth."

Weitek is the leading supplier of high-performance numeric processing solutions. The company's VLSI circuits and development tools power a broad range of computer systems, from minisupercomputers and engineering workstations to desktop computers and page printers.

ARLINGTON, VA (JAN. 29) PR NEWSWIRE - Bell Atlantic Corporation (NYSE: BEL) today announced the retirement of Samuel C. Ford, executive vice president - Bell Atlantic Network Services Inc., to be effective April 1, 1990.

The corporation also announced the election of John F. Gamba as his replacement, also effective April 1.

Ford, age 61, began his career at New Jersey Bell in 1954 following his service as an officer in the U.S. Army Signal Corps. He served in various assignments in New Jersey as well as AT&T Headquarters before being named New Jersey Bell's general manager for its northern area in 1968. In 1971 he was appointed director of labor relations, followed by assignments as vice president - staff in 1976 and vice president - business marketing in 1978. From 1980 to 1984, he was rates and regulatory vice president of New Jersey Bell.

Ford served as vice president - external affairs of Bell Atlantic Network Services Inc., responsible for regulatory and congressional activities from 1984 to 1985. In 1986, Ford was named executive vice president of Bell Atlantic Network Services Inc. -- the position he holds today -- where he is responsible for providing services to the Bell Atlantic operating telephone companies in the areas of marketing, technology planning, operations and engineering, data processing, directory services, operator services, pay phone services and administrative services.

Gamba, age 51, began his career in 1961 in the operations department at Bell of Pennsylvania. Following two years military service he returned to Bell of Pennsylvania where he held a variety of assignments in the engineering, services and operations departments. After a two- year assignment in the customer services department at AT&T Headquarters, Gamba returned to Bell of Pennsylvania in 1977 as division operations manager - customer services.

Gamba was named division manager - business services for Bell of Pennsylvania's eastern region in 1981 and held assignments in the external affairs department before being named Bell of Pennsylvania's assistant vice president for operations in 1984. Gamba was named vice president of

information systems for Bell Atlantic in 1986. In April 1988 he became vice president and chief financial officer for the Chesapeake and Potomac Telephone Companies, the position he currently holds.

In his new position as executive vice president of Bell Atlantic Network Services Inc., Gamba will assume the responsibilities currently held by Ford.

Bell Atlantic is the parent of New Jersey Bell, Bell of Pennsylvania, Diamond State Telephone serving Delaware, and the Chesapeake and Potomac Telephone Companies serving Maryland, Virginia, West Virginia and Washington, D.C.

MIAMI (JAN. 29) PR NEWSWIRE - Carnival Cruise Lines (AMEX: CCL) has finalized a previously announced agreement with Masa-Yards to complete construction of its cruise ship Ecstasy. The total cost of the Ecstasy when completed by Masa will be approximately $275 million, with delivery scheduled for April 1991. Masa has taken over operations of the bankrupt Wartsila Marine in Helsinki, Finland, where the vessel was being built.

Carnival also announced that its first vessel being built there, the Fantasy, was completed by Masa and departed Helsinki as previously scheduled on Saturday, Jan. 27. The Fantasy will arrive to a gala welcome in Miami on Feb. 10, where a 100-boat flotilla will greet the vessel offshore and escort her into the port. Following a series of pre-inaugural events and activities, the Fantasy will begin her regular schedule of three- and four-day cruises to the Bahamas on March 2.

Carnival is the world's largest cruise line based on number of passengers carried. Together with Holland America Cruises and Windstar Sail Cruises, it currently operates 14 ships in Alaska, the Caribbean, South Pacific and the Mediterranean. The company also operates Carnival's Crystal Palace Resort & Casino, a 1,550-room property in Nassau, The Bahamas. Through its Westours subsidiary, a major tour operator in Alaska, the company operates five luxury dayboats, 240 tour buses, eight private domed rail cars and, under the Westmark Hotels division, 18 hotels in Alaska and the Canadian Yukon.

The Ecstasy will be a sister ship to the 2,600-passenger, 70,000-gross-registered-ton Fantasy. In addition, negotiations are underway with a number of shipyards for construction of a third 2,600-passenger vessel for the Carnival fleet. Carnival also recently contracted to construct three more ships for Holland America Cruises which

are scheduled for delivery in 1992, 1993 and 1994.

RICHMOND, VA (JAN. 29) PR NEWSWIRE - One of the nation's largest food companies is making a significant packaging change for its juice products to recyclable, all-aluminum cans.

Campbell Soup Company (NYSE: CPB) and Reynolds Metals Company (NYSE: RLM), a major producer of aluminum beverage cans, today jointly announced a long-term supply agreement in which Reynolds will eventually supply all Campbell's juice cans.

The agreement includes Campbell's Tomato Juice, "V8", "Spicy V8" and Juice Bowl brands in both 5.5-ounce and 11.5-ounce can sizes. Reynolds patented Stay-on-Tab ends will also replace former tape tab ends on Campbell's juice cans.

"The same advantages which have made the aluminum beverage can the consumer-preferred container in the beer and soft drink markets are also applicable to non-carbonated beverages," said Jeremiah J. Sheehan, vice president and general manager of the Reynolds Can Division.

Continued aluminum can downgauging, new alloy development, higher can line speeds and a proven national recycling network are resulting in greater cost efficiency to all beverage producers, he said.

In order to meet Campbell's requirements, Reynolds will add capabilities to three existing can manufacturing operations, while utilizing additional capacity gained through an ongoing modernization program.

The primary aluminum producer, based in Richmond, Va., operates 10 aluminum can manufacturing plants and two can end-making facilities in the United States. Reynolds also pioneered consumer aluminum recycling and

since 1980 has recycled more aluminum cans than it produces.

SAN FRANCISCO (JAN 29) PR NEWSWIRE - BF Enterprises, Inc. (NASDAQ: BFEN) today announced that the Pasco County, Fla. Board of County Commissioners has issued Development Orders, which are now final, approving the company's plans for the development of its Trout Creek project in suburban Tampa.

The development orders amended the existing Development of Regional Impact and Master Planned Unit Development for Trout Creek, and included provisions that will allow the company to continue with development even if there should be a building moratorium for other projects in the surrounding area.

Trout Creek is a 1,700 acre parcel located approximately 20 miles northeast of Tampa which will be developed primarily for entry-level housing. The project is zoned for a maximum of 3,300 single family houses 1,200 multi-family residential units and includes approximately 60 acres zoned commercial.

Detailed site planning and engineering is currently underway. Assuming a favorable Tampa housing market, the company expects that its real estate subsidiaries will begin actual development of the Trout Creek property in the fourth quarter of this year. Sales of residential lots to homebuilders would then begin in the first quarter of 1991. It is anticipated that prices for completed homes will be in the range of $80,000 to $125,000, targeted for the first time home buyer. BF Enterprises, Inc., a publicly held company headquartered in San Francisco, is a real estate and financial services company with various assets, including the Trout Creek property described above.

SAGINAW, MI (JAN. 29) PR NEWSWIRE - World-renowned ELF(R) Racing Fuels gained immediate U.S. distribution under an exclusive agreement with Polar Molecular Corporation (NASDAQ: PMCX), it was announced today. ELF's high-tech gasoline and diesel fuels will be formulated with DurAlt(R) Fuel

Conditioner (FC), Polar's unique, patented combustion- improving fuel additive. Polar will market ELF's fuels through their fuel distributor network for both two- and four-stroke auto, truck, marine, and motorcycle markets.

"ELF is the leading supplier of racing fuel for Formula 1 automobile racing teams, with two recent world championships," according to Jean-Claude Fayard, chief of service, High Technology Fuel, ELF France. "ELF is the official provider of special fuel for Honda, Suzuki, and Yamaha world championship two-cycle motorcycle race teams, and we supply 80 percent of the world championship four-cycle needs."

"We are very excited about the future of ELF Racing Fuel with DurAlt FC in the U.S. high-performance market," said Mark L. Nelson, president and chief executive officer of Polar Molecular Corporation.

"DurAlt FC provides dramatic reductions in Octane Requirement Increase, a major and growing concern of refiners and automotive manufacturers. Adding DurAlt FC to ELF's racing products is a major milestone toward worldwide industry acceptance of our unique formulas for better performance and lower exhaust emissions."

"We are proud to represent ELF France as their exclusive U.S. racing fuel distributor," Nelson continued. "ELF is a major factor in the world racing community; we are pleased to join with them to make ELF a household name in the U.S."

BIRMINGHAM, AL (JAN. 29) PR NEWSWIRE - Matthew L. Gold, chairman and chief executive officer Precision Standard Inc. (NASDAQ: PCSN) confirmed today that the United States Air Force had announced that the company's Pemco Aeroplex subsidiary had been awarded a contract for the maintenance of the KC-135 aircraft.

Gold indicated that the contract is expected to run for as long as five years and involve the maintenance of as many as 184 aircraft. Gold said that the first year value of the contract was approximately $6 million and that the current estimate for the total value of the contract, if fully funded, was over $100 million. Prior to this announcement, the company's funded backlog has stood at $116 million as of Dec. 31, 1989, he said.

Gold said: "As new owners and managers, we are gratified by the strong vote of confidence which the Air Force has displayed through the award of

this contract." Pemco's predecessor company, Hayes International, had serviced nearly 2,000 of the KC-135 aircraft over a 15-year period prior to loss of the contract in 1986.

Precision Standard, with facilities in Alabama, California, Colorado and Florida and offices in Denver, Boston and London, performs maintenance and modification of aircraft for the U.S. government and foreign and domestic commercial customers and manufactures aircraft cargo systems, aerial targets for military customers, precision springs and components, and rocket vehicles and control systems.

#90029p0084 01/29/1990 ~PR Newswire

ROCKVILLE, MD (JAN. 29) PR NEWSWIRE - GE Information Services (GEIS), the recognized leader in Electronic Data Interchange (EDI) network services, has announced the availability of the EPS-EXPRESS Service option for use in initiating electronic payments through the GEIS' worldwide EDI network, the EDI-EXPRESS System.

Now, GEIS' EDI-EXPRESS System clients have the ability to initiate electronic payments to their vendors.

Key advantages of the EPS-EXPRESS Service option include:

- Quick startup of electronic payment instruction at low cost using standard EDI and banking transactions.

- Electronic transmission for speed and reliability with less re-keying and no more lost or stolen checks.

Using the EPS-EXPRESS Service option, a payor sends an ANSI 820 transaction (remittance advice/payment order) to the GEIS EDI network. The transaction is delivered to the vendor's network mailbox, so that the vendor gets the remittance information for its receivables application.

In addition, the EPS-EXPRESS Service generates an ACH bank transaction instruction called a CCD (Cash Concentration or Disbursement credit) from the ANSI 820 data and delivers it to the mailbox of the payor's bank. The CCD instructs the payor's bank to transfer funds to the vendor on the date specified.

The EPS-EXPRESS Service option uses the standard EDI-EXPRESS System document pricing: 20 cents for a 300 character transaction transmitted during peak hours; 25 percent less during off-peak hours.

For further information in the U.S. on GEIS' EDI network services and its electronic payments option, please call 1-800-EDI-KNOW (1-800-334-5669) or contact your local GE Information Services sales representative.

GE Information Services, a division of General Electric Company, USA, is headquartered in Rockville, Md. It offers a wide range of value-added services for network-based business applications, systems integration and software development services, and network management services.

#90029p0086 01/29/1990 ~PR Newswire

WAYNE, NJ (JAN. 29) PR NEWSWIRE - Lederle Laboratories and Ross Laboratories today announced an agreement to co-market Lederle's newest oral antibiotic, SUPRAX(R) cefixime.

The combined force of both companies' medical representatives will call on physicians to provide them with medical information about SUPRAX.

Introduced in July 1989, SUPRAX is the first oral antibiotic that can be taken once a day to treat middle ear infections (otitis media) and bronchitis. SUPRAX, the first oral third generation cephalosporin, is also used in the treatment of throat, tonsil and urinary tract infections. Its broad range of antibacterial activity coupled with the convenience of its once-a-day dosage have made SUPRAX on of the most useful antibiotics ever launched.

Edward V. Fritzky, vice president of Lederle, said the co-marketing effort was initiated to meet the need expressed by physicians for more information about SUPRAX. "We have already received more than 10,000 inquiries about SUPRAX from health care professionals," Fritzky said.

"We're delighted to begin this partnership with Lederle for SUPRAX," said Charlie Himes, vice president, marketing and sales, of Ross. "SUPRAX represents an important contribution to the management of pediatric infectious disease. This co-promotion arrangement is an opportunity for Ross to expand its service support to pediatricians and family physicians and affirms Ross' intent to remain a helpful ally to health care professionals," he said.

Ross, a division of Abbott Laboratories (NYSE: ABT), is a worldwide leader in the research, development, manufacture and marketing of nutritional and pharmaceutical products for children and adults. Abbott Laboratories provides pharmaceutical, diagnostic, nutritional and hospital products worldwide.

Lederle Laboratories, a division of American Cyanamid Company (NYSE: ACY), is a research-intensive organization that manufactures and markets a broad range of products including ethical pharmaceuticals, vaccines, generics and vitamins/nutritionals worldwide.

NEW YORK (JAN. 29) PR NEWSWIRE - Jon Farbman, president of Drillstar Corporation (NASDAQ: DRIL), today announced that the company has signed a letter of intent to acquire American Distributors Group, Inc.

Under the terms of the proposed agreement, Drillstar will acquire American Distributors Group through a tax-free exchange of common stock at a rate of exchange to be determined by the respective boards of directors of each company and their financial advisors. It is expected that the acquisition will be completed by Feb. 28, 1990.

American Distributors Group, Inc., based in Pompano Beach, Fla., is a food distribution company and presently distributes Continental Baking Company's Hostess Cake and Wonder Bread products in the South Florida market, one of the nation's fastest growing areas.

American Distributors Group is presently negotiating the acquisition of additional food distribution companies, and the letter of intent provides for Drillstar Corporation to provide technical and financial assistance for these acquisitions.

In making the announcement, Farbman said, "The proposed acquisition represents a very important step in our company's development. While American Distributors Group, Inc. will benefit from Drillstar's financial and marketing strengths, American Distributors Group provides our company with a new avenue of growth due to the preeminent market positions enjoyed by Wonder Bread and the Hostess Cake line. We will grow this business through the addition of other prominent food products and by expansion into Northern Florida and throughout the Southeast."

Drillstar Corporation manufactures, distributes and markets special purpose shoes for marching bands and drum and bugle corps throughout the U.S. and Canada. Recently the company signed DEG Japan Co. to distribute its products in Japan.

CONTACT: Jon Farbman, president of Drillstar Corporation, 212-496-6222, or John De Nigris, of John De Nigris Associates, 212-532-5159.

#90029p0093 01/29/1990 ~PR Newswire

ATLANTA (JAN. 29) PR NEWSWIRE - The Coca-Cola Company (NYSE: KO) announced today that it will establish a second global advertising agency system to handle its worldwide diet Coca-Cola account.

Lintas International will begin assuming responsibility as the worldwide diet Coca-Cola agency in 1990. The agency currently handles the diet Coca-Cola account in the U.S. and Canada. Outside North America, diet Coca-Cola has been serviced by McCann-Erickson since its international introduction in 1983. Both agencies are part of the Interpublic Group of Companies.

"The tremendous international growth of diet Coca-Cola has created both the need and the opportunity to develop a second global agency system," said John W. Georgas, executive vice president of The Coca-Cola Company. "Diet Coca-Cola has enjoyed explosive volume growth around the world, with annual growth of more than 38 percent in each of the last three years. Diet Coca-Cola, or Coca-Cola light as it is known in some countries, is now available in more than 80 countries.

"A second agency system will help us capitalize upon this growth and position us best to manage our international advertising needs as our global business continues to expand in the decade ahead."

Lintas will assume its new responsibilities for diet Coca-Cola in a phased manner, beginning with the worldwide creative assignment. The local office transition will begin with European Community Countries in 1990, with other international markets to be completed after 1990. McCann-Erickson will continue to manage the media buying function.

"McCann-Erickson has done a superlative job with diet Coca-Cola advertising," said Mr. Georgas. "Our 1990 international diet Coca-Cola advertising from McCann is just the latest example of how creative and effective the agency has been. But our expectations for the needs of our business in the future have led us to make this change."

NEW YORK (JAN. 29) PR NEWSWIRE - Mobil Corporation (NYSE: MOB) said today it plans to build a 600,000-tons-per-year chemical aromatics complex in Singapore and upgrade its fuels refinery there to supply the new plant.

Mobil said it has signed an engineering agreement with UOP Inc. for the design of the aromatics complex and is evaluating bids for detailed engineering, procurement and construction. The project would be completed in early 1993, the company said.

Allen E. Murray, Mobil chairman and chief executive officer, said the aromatics complex will produce 300,000 tons per year of paraxylene, 175,000 tons per year of benzene and smaller volumes of orthoxylene and aromatic solvents. Conversion of benzene to cyclohexane is also being considered.

The upgrading of the 230,000-barrels-a-day fuels refinery at Jurong, Singapore also will increase gasoline production by 8,000 barrels a day and help meet the growing gasoline demand in the region.

The new fuels process units will include a 38,000-barrels-a-day continuous catalytic reformer, associated naphtha pretreater facilities, and a gas plant.

The target markets for the aromatics will be in East Asia and Southeast Asia where demand for aromatics has been growing at 5 to 10 percent a year.

End-use markets for the aromatics include polyester, nylon and polystyrene.

Mobil Petrochemical International (MPI), a Mobil Chemical Company subsidiary, markets petrochemicals in the Far East and will market the aromatics production from Jurong. The Jurong plant is operated by Mobil Singapore Pte. Limited.

WESTWOOD, MA (JAN. 29) PR NEWSWIRE - LTX Corporation (NASDAQ: LTXX) and Sumitomo Metal Industries, Ltd. (SMI) announced today that they have signed a letter of intent to form a joint venture to manufacture, sell and support the linear and digital product lines of LTX in Japan.

Under this agreement, the joint venture would be owned 50.5 percent by LTX and 49.5 percent by SMI. LTX plans to license its test technology to the joint venture.

SMI would initially invest $12 million into the joint venture. Also as part of this agreement, SMI would invest an additional $12 million into LTX Corporation through a combination of common stock and convertible debentures. A formal definitive agreement is expected to be signed in a few months.

The formation of this joint venture together with SMI's investment in LTX Corporation will result in SMI's entrance into the semiconductor test business. The joint venture partners believe that this combination will improve the penetration of the significant market in Japan for LTX test systems, particularily in the digital VLSI area.

LTX Corporation is a leader in the design, manufacture and marketing of computer-controlled equipment for testing linear, digital and mixed signal devices. Headquartered in Westwood, Mass., LTX has worldwide sales and service facilities to support its customer base.

Sumitomo Metal Industries, Ltd. is a diversified, multinational corporation with business activities in iron, steel, nonferrous metals and new materials as well as electronics, semiconductor equipment (including chemical vapor deposition and etching systems) and information services.

Headquartered in Osaka, Japan, SMI had sales of approximately $8.0 billion in fiscal year 1988 ended on March 31, 1989, and has approximately 100 subsidiaries and affiliates throughout the world.

HIGHLAND PARK, MI (JAN. 29) PR NEWSWIR - Chrysler Corporation (NYSE: C) announced today an extension of its popular incentive program through Feb. 28 and enhancements that include the addition of more car and pickup truck models and a $50 test drive program.

Chrysler Chairman Lee Iacocca revealed the program extension Sunday in a 60-second commercial that aired in CBS' Super Bowl pre-game show and then during the first half of the football game itself. The same special commercial aired during the Senior Skins broadcast on NBC.

"Chrysler had its best January sales in history, so we're extending our Guaranteed Rebate program through Feb. 28," Iacocca said.

The test drive program is designed to get consumers to drive Chrysler's vehicles in comparison against competitive models. Chrysler will pay the test drivers $50 when they buy or lease any vehicle they tested -- Chrysler or not.

As announced in December, the incentive program guarantees that if the incentive on the eligible 1990 vehicle purchased or leased is increased during the period Feb. 1 through Sept. 30, 1990, the buyer may apply for the difference.

The 1990 vehicles added to the Jan. 28 through Feb. 28 rebate schedule and the amount of the rebate are:

$2,000: all Dodge Ramcharger models. $1,500: Dodge Monaco ES and full-size Ram Van conversion models, with a specific level of van conversion package.

$1,000: Plymouth Horizon, Dodge Omni, Chrysler LeBaron sedan, Dodge Monaco LE, Dakota S, two- and four-wheel-drive diesel pickup, full-size Ram Van and Ram Wagon models, all Comanche models and Grand Wagoneer.

$500: Wrangler. Special low annual percentage (APR) financing is avaialble as an alternative to the Guaranteed Rebates. The low APRs are: 6.9 percent for one to 24 months, 7.9 percent for 25 to 36 months and 9.9 percent for 37 to 60 months.

Guaranteed rebates on other 1990 models remain unchanged, except those

offered on Chrysler's industry-leading minivan models -- Dodge Caravan, Plymouth Voyager and Chrysler Town & Country. The guaranteed rebates on the minivans end Wednesday, Jan. 31.

In other rebate action, Chrysler added 1990 import models to an existing non-guaranteed incentive program.

The 1990 import vehicles added and the amount of the incentive are: $1,000: Dodge and Plymouth Colt GL and GT models and Eagle Summit. $750: Dodge and Plymouth Colt base model, all Dodge and Plymouth Colt wagon models, and all Dodge and Plymouth Vista models.

DETROIT (JAN. 29) PR NEWSWIRE - Federal Screw Works (OTC: FSCR) reported sales for the second quarter and six-month period ended Dec. 31, 1989, of $15,118,000 and $29,871,000, respectively.

These figures represent reductions of 19 percent and 14 percent from the record sales reported for the second quarter and six-month period ended Dec. 31, 1988.

Net earnings for the second quarter and six-month period ended Dec. 31, 1989, were $515,000 and $1,060,000, or $.43 a share, and $.89 a share, respectively, compared to net earnings of $620,000 and $1,225,000, or $.51 a share, and $1.01 a share, respectively, for the comparable periods ended Dec. 31, 1988.

The automobile production schedules of the company's principal customers were reduced substantially in the second quarter compared to the same quarter one year ago, which resulted in the company's reduced sales for the quarter.

For the company's third quarter (January-March 1990), these customers have announced automobile production schedules representing a somewhat greater reduction from the third quarter one year ago.

A $.10 per share dividend was paid Jan. 2, 1990, to shareholders of record Dec. 14, 1989.

JACKSON, MI (JAN. 29) PR NEWSWIRE - Patrick Petroleum Company (NYSE: PPC) today announced the successful completion of the Smith 1-21 field extension oil well located on Patrick's Tonset prospect in Burke County, N.D.

During the 24-hour test, the well flowed 740 barrels of oil and 128 barrels of water from perforations in the Rival zone of the Mississippian Mission Canyon formation, at intervals between 7,232 and 7,286 feet, using a 32/64 inch choke. Flowing tubing pressure at the end of the test period was 170 pounds per square inch. Total depth of the well is 7,400 feet, and the well has an estimated 52 feet of net pay.

Patrick Petroleum Company, operator of the Smith 1-21, has an undivided 25-percent working interest in the well and its 960-acre prospect, on which it anticipates additional drilling. Patrick's partners in the well include Newport Exploration, the A.M. Froh Co., Inc. and other individuals.

Commenting on the test, Patrick Petroleum President U.E. (Pat) Patrick, stated, "This outstanding lower-risk discovery is significant for our company. The reserves and production should contribute substantially to our current levels," he added. " A similar well operated by another company about a mile away, has produced over 400,000 barrels."

Mr. Patrick continued, "This successful well clearly illustrates the strong potential of our significant leasehold position established in this region in the past three years. We have acquired interests in some 127,000 gross undeveloped acres (87,000 net) in the Williston Basin, primarily concentrated in the northwestern portion of North Dakota. While we are pursuing a breakthrough in the very high potential Winnipegosis oil play there, we have other shallower zones, such as the Rival, which offer extremely attractive targets," Mr. Patrick concluded.

SHELTON, CT (JAN. 29) PR NEWSWIRE - Data Switch Corporation (NASDAQ: DASW) today announced the Universe, a new distributed matrix switch platform that goes beyond traditional switching capabilities to include:

- Unlimited distance and metropolitan-area separation between front-end processors and modems;

- T-1 circuit switching, intelligent T-1 multiplexing, and digital access and cross connect (DACS) capabilities;

- Central network management with NetView interface and host terminal control;

- Enhanced Redundancy System that facilitates disaster recovery applications.

Data Switch also introduced the Liberator, which can incorporate other vendors' older installed matrix switches in the Universe architecture.

In making the announcements, Michael Fitzpatrick, senior vice president and general manager of the Data Communications Systems Division, said: "The new Universe was designed of the Data Communications Systems Division said: "The new Universe was designed to optimize configuration flexibility in today's complex networks. It substantially reduces expensive cable runs, helps resolve physical layout problems, and provides true distributed connectivity within a building or campus, or even between unmanned remote sites.

"The Universe can also play an important role in a company's disaster recovery plans with the Enhanced Redundancy System (ERS)," Fitzpatrick added. "ERS provides an 'insurance policy' against major outages by allowing all local and remote switch cabinets to be transferred to redundant central cabinets in a secure location in the event of catastrophic damage, such as fire, water, or sabotage."

The Liberator can complement the Universe, Fitzpatrick explained. "Many companies today have large investments in smaller switches that cannot accommodate network growth and are not even upwardly compatible with the particular vendor's latest architecture. Consequently, they must trade in their equipment and purchase entirely new switching systems, which is costly and disrupts network operations. The Liberator is a relatively inexpensive migration vehicle, enabling customers to add value to their existing equipment by integrating their small switches into a powerful distributed switch architecture."

Non-distributed switches supported by the Liberator include the IBM Model 3728; the Bytex Autoswitch 240 and 480 and the Unity 10 and 30; and the Dynatech CTM series.

Universe, which will be available in April 1990, and Liberator, which will be available in the third quarter, are priced at approximately $320 per port.

WINSTON-SALEM, N.C. (JAN. 29) PR NEWSWIRE - The Bowman Gray School of Medicine has agreed to purchase Piedmont Plaza, the former corporate headquarters of Piedmont Aviation, from the USAir Group (NYSE: U).

The 7.6-acre tract, which includes two buildings and parking facilities, is flanked by First and Miller Streets at the Five Points intersection in Winston-Salem.

One Piedmont Plaza, the building that had been the Piedmont Aviation headquarters, contains 171,000 square feet of space. Most of that space is vacant at present.

Plans call for that space to be used by the Medical Center for administrative and academic offices and for certain support services. The Medical Center plans to begin occupying the building about mid-March.

Two Piedmont Plaza, which contains 133,000 square feet of space, is virtually 100 percent leased. The Medical Center plans to continue those lease arrangements. No tenant will be displaced, a Medical Center spokesman said.

The Medical Center expects the acquisition of the property to relieve what has become a critical shortage of office and parking space on the Hawthorne Road campus, resulting from the center's rapid growth. The Bowman Gray/Baptist Hospital Medical Center has become Forsyth County's second leading employer with 7,200 employees.

The Medical Center already has been using some of the spaces in the parking facility at Piedmont Plaza and shuttling employees to the Medical Center. The Piedmont Plaza parking deck contains 839 parking spaces. There is surface parking spaces for an additional 275 cars.

Two Piedmont Plaza, the original seven-story building, was known as the First Center Building when it was opened in 1972.

In 1975, McLean Trucking Co. bought the First Center Building and in 1978 constructed the twin building as its corporate headquarters. The property was bought in 1983 by a partnership of local businessmen.

In 1986, Piedmont Aviation leased the McLean building and then bought the entire complex in 1987.

After the USAir Group took over Piedmont Airlines and merged the two companies last August, it was determined that the buildings no longer fit into USAir's staffing plans.

HARVEY, IL (JAN. 29) PR NEWSWIRE - Bliss & Laughlin Industries Inc. (NASDAQ: BLIS) said today it has signed a definitive agreement with Stelco Inc., one of Canada's leading steelmakers.

Terms of the agreement call for Stelco to acquire 1,559,759 newly issued shares of Bliss & Laughlin Industries' common stock and for Bliss & Laughlin Industries to acquire the assets of Stelco's Canadian Drawn Steel Company, a major Canadian cold finished steel bar producer.

Gregory H. Parker, president and chief executive officer, said the combination of the company's operating subsidiary, Bliss & Laughlin Steel Company, with Canadian Drawn Steel Company will provide many advantages. "Synergies and economies of scale should result in increased revenues and profitability and the acquisition of the unencumbered assets of Canadian Drawn together with the infusion of more than $6.3 million in cash will significantly strengthen our balance sheet."

Pursuant to the agreement, Stelco will pay $18.7 million in cash, or $12 per share, for the 1,559,759 Bliss & Laughlin Industries' common shares and Bliss & Laughlin will pay $12.4 million in cash for the assets of Canadian Drawn Steel Company.

The shares to be issued to Stelco will be approximately 39.3 percent of the then outstanding Bliss & Laughlin Industries common stock, the same approximate percentage which will then be owned by the company's management and their families.

Parker said the company intends to use the $6.3 million of net cash realized in the Stelco transaction to reduce its outstanding bank debt.

The agreement provides for Stelco representation on the company's board of directors, reciprocal rights of first refusal with respect to the sale or transfer of Bliss & Laughlin Industries' shares, customary non-complete agreements and certain standstill agreements regarding an increase in the relative percentage ownership interest of Stelco and Bliss & Laughlin Industries' management shareholders.

The agreement is subject to, among other conditions, the approval of the transaction by Bliss & Laughlin Industries' shareholders at its next annual meeting.

Headquartered in Harvey, Ill., Bliss & Laughlin Industries Inc. is a manufacturer of cold finished steel bars, producing the widest range of grades, sizes and shapes in the industry. Its common shares are traded on the NASDAQ National Market System.

CONTACT: George W. Fleck, VP & CFO of Bliss & Laughlin Industries Inc., 312-264-1800, or Liz Howells, VP of Doremus & Company, 312-321-1377, for Bliss & Laughlin.

#90029p0126 01/29/1990 ~PR Newswire

SCARBOROUGH, MAINE (JAN. 29) PR NEWSWIRE - A program to recycle polyethylene grocery bags has begun in all Sun Foods Supermarkets. The supermarkets are believed to be the first in the country to offer their customers plastic shopping bags made from up to 50 percent recycled polyethylene, according to Hugh G. Farrington, president and chief operating officer of Hannaford Bros. Co., which operates Sun Foods.

Consumers can participate in the recycling program by depositing clean, used plastic shopping bags from Sun Foods or any retailer, in collection bins which are provided at the front of each Sun Foods store.

"By depositing the bags in the bins, the public is helping to reduce the amount of solid waste going into landfills," Farrington explained.

"Our customers have asked us to provide environmentally sound alternatives " Farrington added. "This total program for plastic bag recycling is a step toward reducing solid waste."

Farrington said the stores will continue to offer recycled bags indefinitely and that the plastic bag collection program is intended to encourage and support local recycling efforts.

The process used in the recycling of plastics bags involves shipment to a plastic recycling facility where the bags are sorted, and under very high temperature and pressure, converted into polyethylene pellets. The pellets are used in the manufacture of new bags containing from 6 percent to 50 percent recycled low density polyethylene. Bags manufactured using this process can be repeatedly recycled.

Farrington said plastic bag recycling is the latest in a series of environmentally oriented steps taken by the company. Others include:

- The introduction of reusable cloth diapers as an alternative to disposable paper and plastic diapers;

- A recycling program for in-store cardboard in virtually all of its stores and warehouses;

- Establishing an office paper recycling program at the company's General Office.

Hannaford Bros. Co. operates 79 supermarkets in Maine, New Hampshire, Vermont, Massachusetts and New York. The bag recycling program is available in all stores.

CHARLOTTE, NC (JAN. 29) PR NEWSWIRE - First Union Corporation (NYSE: FTU) today completed its acquisition of Florida National Banks of Florida, Inc.

"We are delighted to begin a new decade with an expanded branch bank network in Florida," said Billy Walker, Chairman and CEO of First Union National Bank of Florida.

The merger agreement calls for First Union to pay $27.125 per share in cash for one-half of the outstanding shares of Florida National common stock and to issue 0.5425 shares of a new series of First Union preferred stock per share for the remaining shares. At the time of the closing for the acquisition, there were approximately 26.6 million shares of Florida National common stock outstanding.

Based on the election process applicable to the merger, holders of Florida National who effectively elected cash for their shares will receive cash for 53.24 percent of their shares and preferred stock for the remaining 46.76 percent. All stockholders effectively electing preferred stock and all stockholders expressing no preference or failing to make effective elections will receive preferred stock for their shares.

First Union will pay approximately $361 million in cash for 50 percent of the Florida National shares and issue approximately 7.2 million shares of preferred stock for the remaining shares. First Union will also pay Chemical Banking Corporation $100 million for certain warrants to purchase shares of Florida National common stock held by Chemical.

The shares of preferred stock are listed as FTUpr on the New York Stock Exchange.

First Union Corporation reported assets of $32.1 billion as of December 31 1989, and operates banking offices in North and South Carolina, Georgia, Tennessee and Florida.

AUSTIN, TX (JAN. 29) PR NEWSWIRE - Scientific Measurement Systems, Inc. (NASDAQ: SCMS) (SMS) President Larry Secrest announced today the sale of an advanced x-ray tomography system to Pratt and Whitney Canada, a major international engine manufacturer.

The contract price for the advanced ultra-high speed x-ray inspection system was in excess of $700,000.

SMS considers the inspection of aircraft engine parts to be a major application of its advanced technology.

According to Secrest, "The aircraft engine inspection market is potentially one of our largest. The sale of this system, combined with the earlier sale to the United States Air Force and a leading Japanese aerospace company (IHI) suggests that x-ray Computed Tomography (CT) is rapidly becoming the preferred technology for inspection of aircraft engine parts and subassemblies." Secrest added his belief that SMS x-ray tomography would contribute directly to improving aircraft engine dependability by providing a more thorough inspection capability during engine development, production, and maintenance.

The most recent sales announced by SMS were a $1,700,000 contract for two ultra-high speed (Realtime) x-ray inspection systems for the U.S. Government and a $2 million CT system contract with IHI, a leading Japanese industrial firm. Previously, SMS has announced orders from an impressive list of customers including the NASA Kennedy Space Center, General Motors, Martin Marietta, the Rocketdyne Division of Rockwell International Corporation, Bethlehem Steel Corporation, British Petroleum-America, the U.S. Air Force, U.S. Navy and another U.S.

government organization.

STERLING, VA (JAN. 29) PR NEWSWIRE - Radiation Systems, Inc. (NASDAQ-NMS: RADS) today reported net income of $1,312,000 (24 cents per share) on sales of $17.4 million for the three months ended Dec. 31, 1989.

For the same period in the prior year, net income was $1,176,000 (22 cents per share) on sales of $14.1 million. For the six months ended Dec. 31, 1989, sales and net income were up 37 percent and 27 percent, respectively over the same period in 1988. Net income was $2,156,000 (40 cents per share) on sales of $31.4 million, as compared with $1,703,000 (33 cents per share) on sales of $23 million for the corresponding period last year.

Total backlog of unfilled orders on Dec. 31, 1989, was $126.8 million, compared to a backlog of $135.9 million on Sept. 30, 1989, and $85 million on Dec. 31, 1988.

Richard E. Thomas, chairman and chief executive officer of Radiation Systems, said that he was pleased with the performance in the first half of the year and looks forward to continued growth in the second half augmented by the sales from the Channel One program, which began the installation phase in January 1990.

Radiation Systems, Inc. designs, manufactures and installs a broad range of antenna systems for radar, air traffic control, tactical military, satellite earth stations, terrestrial microwave and other specialized uses throughout the world.

#90029p0139 01/29/1990 ~PR Newswire

GOLDEN, COL (JAN. 29) PR NEWSWIRE - Canyon Resources Corp. (NASDAQ: CYNR) a Colorado-based mining company, today announced that it has completed the purchase of Addwest Gold Inc., a wholly owned subsidiary of Addington Resources Inc. (NASDAQ: ADDR) for $33 million plus a 2 percent royalty on gold production in excess of 400,000 ounces from the Briggs property in California.

To finance the acquisition and certain capital requirements of the Addwest properties, Canyon raised funds through both the sale of common stock and warrants in a private placement and from proceeds of a gold loan. Bankers Trust Co., the New York merchant bank, acted as sole financial advisor for the acquisition, lead placement agent for the private placement, and provided the gold loan.

A total of $29,237,000 in private placement financing was achieved by Canyon through the sale of 11,694,926 shares of 1 cent par value common stock and warrants to purchase 2,923,731 shares of 1 cent par value common stock. The common stock shares were sold at $2.50 per share with attached warrants to purchase additional shares at $3.50 per share, exercisable for five years. The shares and warrants were purchased by institutional investors in the U.S., Canada and Europe. The company will proceed immediately with preparation of a registration statement for the securities sold in the private placement and will file the statement with the SEC within the next 90 days.

In addition to the capital raised in the private placement, a $15,269,000 gold loan facility was provided to Canyon by Bankers Trust. The facility includes a direct loan of 32,123 ounces of gold ($13.4 million) and a $1,869,000 letter of credit to support a reclamation bond for the Kendall Mine in Montana. Bankers Trust also provided a facility to support a gold-price hedging program. The loan facility is secured by the

recoverable gold and operations of the Kendall Mine and other gold properties of the company.

With the Addwest acquisition, Canyon now owns 100 percent of the operating Kendall Mine in Montana which is expected to produce 39,000 ounces of gold in 1990, and 45,000 ounces in 1991 and annually thereafter through the life of the mine. The company's properties are estimated to contain more than 1.7 million ounces of gold. Upon completion of mine permitting and development of the Addwest properties (Briggs and Seven-Up Pete) and the Beartrack deposit in Idaho (previously discovered by Canyon and currently joint-ventured with Meridian Minerals), Canyon expects that its gold production could increase from 12,000 ounces in 1989 to more than 150,000 ounces by 1992.

#90029p0141 01/29/1990 ~PR Newswire

HERNDON, VA (JAN. 29) PR NEWSWIRE - EDS today announced that it has signed a five-year, $10 million contract with the U.S. Department of Agriculture to provide total program management services for the Cotton Inventory Management System (CIMS).

The contract is with USDA's Agricultural Stabilization and Conservation Service (ASCS) and calls for a one-year initial agreement with four one-year options. EDS (Electronic Data Systems Corp.) is the incumbent contractor.

ASCS is the largest agency within Agriculture and provides commodity loans on a number of products through 2,700 offices nationwide. In 1988, ASCS made over $2.5 billion in price support loans on 11.2 million bales of cotton.

EDS will continue to provide document preparation, data entry, warehouse receipt handling, problem resolution, loan research and special project support. Under CIMS, EDS will also make storage payments to warehouses, monitor cotton cooperative loan activities and conduct sales and settlement of government-owned cotton.

"EDS has provided high-quality service, cost management and flexible responses to ASCS' changing requirements since 1982," said Robert McCashin group executive of EDS' Federal Government Group. "We look forward to continuing support of Agriculture for this and other programs."

EDS, based in Dallas, is the leader in providing technology-based solutions for management and movement of data, voice and image information. EDS' stock is traded on the New York Stock Exchange under

the symbol GME. With customers in all 50 states and 27 countries around the world, EDS reported revenues of $4.8 billion in 1988.

#90029p0142 01/29/1990 ~PR Newswire

ROCHESTER, NY (JAN. 29) PR NEWSWIRE - Bausch & Lomb (NYSE: BOL) reported today revenues, operating earnings and net earnings all reached record levels during the fourth quarter ended Dec. 30, 1989. Sales increased 16 percent to $306.4 million compared to $264.3 million a year ago.

Operating earnings rose 15 percent to $61.4 million versus $53.3 million, and net earnings advanced to $34.4 million or $1.13 per share, increase of 19 percent and 16 percent over the $28.9 million or $.97 per share earned in the 1988 fourth quarter. For the full year 1989, Bausch & Lomb's revenues totaled a record $1,220 million, 25 percent above the 1988 amount of $978.3 million. Operating earnings for the year rose 24 percent to $231.3 million versus $186.2 million. Net earnings for 1989 totaled $114.4 million, 17 percent above the year-earlier result of $97.9 million, while earnings per share increased 16 percent to $3.78 versus $3.27.

In Bausch & Lomb's healthcare segment, revenues for the 1989 fourth quarter rose 13 percent or $23.8 million over 1988 to $207.6 million versus $183.8 million. Healthcare segment sales for the year in total increased $144.2 million or 23 percent to $779.6 million compared to $635.5 million.

Operating earnings for Bausch & Lomb's healthcare segment totaled $136.2 million, 8 percent above the prior-year figure of $126.1 million. Higher earnings from lens care products, biomedical products, foreign sales of contact lenses, and the company's new oral care business more than offset the effects of significantly increased spending and unfavorable market conditions in Bausch & Lomb's domestic pharmaceutical and soft contact lens businesses.

Sales for Bausch & Lomb's optics segment rose 23 percent in the 1989 fourth quarter, reaching $98.8 million versus $80.5 million in 1988. Optics segment revenues for all of 1989 reached $440.7 million, a gain of 29 percent over the 1988 amount of $342.8 million. Demand for the company's sunglasses remained very strong throughout 1989 in both foreign and domestic markets, with worldwide sunglass sales rising more than 35 percent for the year in total. The favorable revenue comparisons in the optics segment also stemmed from excellent sales for optical thin film coating services, which enjoyed brisk demand in all four quarters of 1989.

Operating earnings for the optics segment in total increased 58 percent in 1989 to $95.1 million, compared to the prior-year amount of $60.0 million.

This outstanding progress was stimulated by the rapid sales growth attained in the sunglass and thin film coating businesses.

METAIRIE, LA (JAN. 29) PR NEWSWIRE - Renewable Earth Products - a joint venture of Chemfix Technologies Inc. (CTI) (NASDAQ: CFIX) and Air & Water Technologies Corp. (AWT) (AMEX: AWT) - has been awarded a 30-month contract by the Water Pollution Control Authority of the City of New Haven to treat the sludge generated by the Authority's municipal wastewater treatment plant.

The contract, valued at $6.25 million, calls for the local venture, Renewable Earth Products of Connecticut, to process dewatered sludge using the patented Chemfix(R) process. The treated sludge, converted into an environmentally safe, stable, claylike material, will be used as cover material at the City of New Haven's landfill.

The joint venture was formed in September 1989.

Chemfix Technologies Inc. is an environmental services company that provides analysis and treatment of hazardous and nonhazardous waste material for industry and government. The Chemfix(R) process chemically fixates and solidifies sewage sludges, oil and gas waste, and other types of sludge, thereby converting them into reusable environmentally safe solid, claylike materials.

Air & Water Technologies Corp. - through its business units Metcalf & Eddy Companies Inc. (NASDAQ: METC), Research Contrell Inc., and Residuals Management Co. - provides a broad range of environmental services for water resources management, air pollution control, and the disposal and reuse of waste by-products through development of inert and environmentally sound products.

ST PETERSBURG, FL (JAN. 29) PR NEWSWIRE - Security Tag Systems, Inc. (NASDAQ: STAG) today announced increased sales and profits in the company's operating results for the third quarter and first nine months of fiscal year 1990. Sales revenues increased for the sixth consecutive quarter, and are significantly ahead of last year's comparable figures.

Sales and profits for the quarter increased slightly over last quarter, despite the traditionally lower end-of-year activity in the retail sector.

"The company's growth is accelerating," stated Carter W. Clarke, Jr, president and chief executive officer of Security Tag Systems, adding, "Our increasing sales momentum is a direct result of expanded market activity in Europe, and the growing success of our domestic sales force. It is noteworthy that our increased sales over the last two quarters were accompanied by profits. This is the trend we intend to maintain.

"These results demonstrate once again that our expanding product line and superior technology permit us to gain increasing market share, both here and abroad. We continue to prove ourselves as the performance leader in the electronic detection industry."

Security Tag Systems, Inc. develops, manufactures and markets electronic detection systems for retail, business, industrial and military markets.

#90029p0154 01/29/1990 ~PR Newswire

EAST AURORA, NY (JAN. 29) PR NEWSWIRE - Acme Electric Corporation (NYSE: ACE) today reported that earnings from operations rose to $851,000 in the second quarter ended Dec. 29, 1989, a 13 percent increase in earnings over the same period last year. Net income in the same 13 weeks last year was $752,000.

Earnings per share increased to 18 cents in the second quarter of fiscal 1990, compared to 16 cents in the same quarter last year. This is the fifth consecutive period in which the company has reported improved earnings.

The increase in earnings was realized despite a small decline in sales to $22,685,000 in the second quarter, compared to $22,794,000 last year.

For the 26-week period ended Dec. 29, 1989, earnings from operations rose to $1,583,000 or 34 cents per share, compared to $1,457,000 or 32 cents per share for the first six months of last year. The company, last year, had reported an additional 10 cents per share for non- recurring income resulting from a change in accounting principle for income taxes.

Sales for the first half of fiscal 1990 were $42,863,000, compared to $43,586,000 for the same 26-week period last year.

Acme Electric President G. Wayne Hawk, said that weakness in specific

markets had slowed sales in the last six months. A slowdown in the construction area had resulted in slower growth for the company's dry-type transformers, while confusion in defense budgeting has delayed funding contracts and slowed the company's aerospace sales. However, our OEM electronics should strengthen through the second half and offset weakness in other areas.

Hawk remained confident that "earnings for the full fiscal year will meet planned targets and exceed last year's earnings, and sales also will increase over fiscal 1989."

Acme Electric also announced that the board of directors, meeting on Jan. 26, declared a cash dividend of eight cents per share payable March 5, 1990, to shareholders of record on Feb. 7, 1990.

Founded in 1917, Acme Electric Corporation designs and manufactures power conversion equipment for electronic and electrical systems for industrial, commercial, residential and aerospace application. Corporate headquarters are in East Aurora, with operations in Cuba, N.Y., Lumberton, N.C., Salt Lake City and West Jordan, Utah, and Tempe, Ariz.

HOUSTON (JAN. 29) PR NEWSWIRE - Union Texas Petroleum Holdings, Inc. (NYSE: UTH) today announced an oil and gas discovery in the Badin area of southeastern Pakistan by its subsidiary, Union Texas Pakistan, Inc. Union Texas Pakistan, with a 30 percent interest, serves as operator of a joint venture which includes Occidental Petroleum Corporation, also with a 30 percent interest, and Oil and Gas Development Corporation, a Pakistani government-owned company, with a 40 percent interest.

Located 106 miles east of Karachi, the Rind No. 1 well was tested at a daily rate of 1.1 million cubic feet of gas and 60 barrels of oil on a 16/64-inch choke with 1,142 pounds-per-square-inch flowing tubing pressure from a zone in the Lower Goru formation between 3,096 feet and 3,099 feet.

The Union Texas venture has been involved in oil and gas activities in Pakistan since 1977. The venture currently produces about 18,500 barrels of oil and 84 million cubic feet of gas daily.

One of the nation's largest independent producers, Houston-based Union Texas Petroleum Holdings, Inc. explores for and produces oil and gas in the United States and overseas and has petrochemicals and natural gas processing interests.

#90029p0158 01/29/1990 ~PR Newswire

TINTON FALLS, NJ (JAN. 29) PR NEWSWIRE - Concurrent Computer Corporation (NASDAQ: CCUR) today announced financial results for its second quarter ended Dec. 31, 1989.

The company, which previously announced it would take a one-time charge for restructuring costs of $3 million, or 16 cents per share in its second quarter, reported today a quarterly net loss of $2.2 million or 12 cents per share on net sales of $89.0 million.

The company indicated it would have reported a profit if not for the one-time charge. The results represent a substantial improvement over a net loss of $14.8 million, or 83 cents per share on net sales of $90.7 million in the second quarter of the prior year.

In addition to the restructuring charge, the current quarterly loss included non-cash purchase accounting adjustments of $3.1 million, or 17 cents per share, versus $15.5 million, or 87 cents per share in the prior year. The company reported its second quarter incoming orders improved over its first quarter ended Sept. 30, 1989, and it has made progress in resolving issues that delayed shipments of its new proprietary computer systems in recent quarters.

The one-time charge is a result of a restructuring, announced earlier this month, which the company said was a continuing cost improvement process that began with the merger of Concurrent and MASSCOMP over a year ago.

In announcing the action, Concurrent said it reduced its infrastructure "to be a leaner, more flexible organization with fewer levels of management and a more concentrated focus on the customer." The resultant cost savings are estimated to be approximately 12.0 million annually and will be reflected in the company's results beginning in the next quarter.

Commenting on the company's results, James K. Sims, chairman, president and chief executive officer, said, "I am pleased with the continued improvement in the operating profit of the company. Our internal operating profitability ratio, which excludes the one-time restructuring charge and non-cash purchase accounting adjustments, places us among the best performers in the industry.

"We have reduced our internal costs consistent with the present uncertain market and positioned ourselves to provide our customers in the real-time

marketplace with the best solutions for their applications. With the internal structure we have in place today, we can react quickly to changes in the industry while pursuing reasonable long-term growth."

The company reported a net loss of $3.9 million, or 21 cents per share, for the first six months compared with a net loss of $15.2 million, or 92 cents per share, for the prior year. Net sales for the six months ended Dec. 31, 1989 were $176.0 million compared with $109.4 million for the prior year. First quarter results of former Concurrent are not included in the prior year.

Concurrent also announced it has concluded previously disclosed negotiations and has signed a definitive agreement to sell for $18.0 million and lease back its building in Westford, Mass. The agreement, however, is subject to the buyer's obtaining financing and certain other conditions.

Concurrent Computer Corporation is the leading supplier of high-performance, real-time computer systems worldwide. With systems ranging in price from $10,000 to more than $1 million, the company is focused on the real-time simulation, measurement and control, C4I and transaction processing markets. Its common stock (CCUR) is traded on the NASDAQ National Market System.

HOUSTON (JAN. 29) PR NEWSWIRE - Enron Corp. (NYSE: ENE) announced today that it has taken a significant step forward in its participation in the world's largest gas-fired, combined heat and power (CHP) project. The company has signed a letter of intent for a long-term gas supply and transportation arrangements to fuel the $1 billion power project in the United Kingdom.

Enron and ICI Chemicals and Polymers Limited announced in late 1989 that they were investigating the construction of a gas-fired independent power project in Northeast England. Enron proposes to design, construct and operate a station of up to 1750 megawatts at ICI's Wilton Works plant near Redcar, on Teesside. ICI would purchase electricity and steam for its chemical manufacturing operations from the proposed power station, and the balance would be sold to the United Kingdom electricity market.

Enron and ICI have signed letters of intent for the gas supply and transportation with the Amoco/Gas Council Group whose members include Amoco (U.K.) Exploration Company, an affiliate of Amoco Corporation asoperator, the Gas Council, Amerada Hess Limited, and North Sea Inc. The long-term arrangement will provide for up to 300 million cubic feet of natural gas per day to be delivered from the North Sea to the proposed power station at Teesside.

The gas would come from the development of two new fields, Everest and Lomond, in the Central Graben area of the North Sea. Gas would be piped to Teesside via a new pipeline system called CATS, the Central Area Transmission System. Participants in the joint venture formed to develop and own the CATS system are the same as those in the Amoco/Gas Council Group.

The proposed CATS gas pipeline system is a 36-inch diameter line with a peak capacity of 1.4 billion cubic feet per day. The system would be initiated by the development of Everest and Lomond but would be designed to allow significant transportation of gas from other fields yet to be developed in the Central North Sea.

Enron Corp., America's leading natural gas company with approximately $8.7 billion in assets, operates the nation's largest natural gas transmission system, markets natural gas, gas liquids, crude oil and refined products nationally and worldwide, owns 84 percent of Enron Oil & Gas Company, one of the country's largest independent (non-integrated) natural gas production companies, and also is one of the largest independent producers of electricity in the United States, with extensive experience in combined heat and power installations.

#90029p0160 01/29/1990 ~PR Newswire

DETROIT (JAN. 29) PR NEWSWIRE - MCN Corporation Chairman Alfred R. Glancy III announced today that MCN's principal subsidiary, Michigan Consolidated Gas Company (MichCon), has reached a tentative settlement with all parties to its rate case filed in September 1989.

According to Glancy, "We are very pleased with the settlement. It incorporates most of the incentive provisions MichCon had proposed, contains the right components for the company to remain competitive, and allows it to earn a reasonable return."

Glancy noted that the settlement includes an Operating Incentive Plan under which MichCon expects to be able to adjust rates annually to recover the major portion of inflation-related increases in operation and maintenance costs. The plan allows the company more timely recovery of these costs and at the same time provides an incentive to maintain operating costs below the inflation rate. The settlement also eliminates a refund mechanism on most of MichCon's sales and transportation services.

The tentative settlement permits MichCon to recover its expected higher uncollectible gas costs. It also gives the company the ability to increase or decrease rates if its return on common equity falls outside a specified range. As a part of the agreement, MichCon will make a one-time refund in the amount of $7 million to ratepayers by June 1990.

The settlement will be in effect through 1993. MichCon and the other parties to its rate case are in the process of drafting a settlement agreement which must be approved by the Michigan Public Service Commission before it is implemented.

Regarding the impact of this settlement, Glancy stated, "The agreement gives MichCon both a stability and certainty of rates for the next four years. We believe the settlement to be fair to MichCon and its customers."

MCN Corporation (NYSE: MCN) is the holding company for Michigan Consolidated Gas Company, a natural gas distribution, transmission and storage company serving more than 1 million customers in 440 communities throughout Michigan, and for MCN Investment Corporation which owns subsidiaries involved in international data processing, natural gas technology and energy services.

NEW YORK (JAN. 29) PR NEWSWIRE - Clemente Global Growth Fund, Inc. (NYSE: CLM) announced that Federal District Judge John F. Keenan has denied the motion of Grace Global Acquisition Partners to vacate the preliminary injunction blocking their tender offer for the fund's shares.

Lilia Clemente, chairman of the fund, declared, "The Judge's latest decision again confirms our position that the tender offer is illegal under the federal securities laws. We are pleased with this outcome and the fact that fewer and fewer of our shareholders see any reason whatsoever to support the tender offer." The fund intends to pursue the litigation and remains confident that a permanent injunction against the tender offer will ultimately be granted.

For the year ended Dec. 31, 1989, the fund's net asset value increased by 36.2 percent, against an increase of 19.2 percent in the fund's benchmark index. As of Jan. 25, 1990, the fund's net asset value was $11.47. The fund's board of directors at its regular quarterly meeting on Jan. 24, 1990 expressed its firm support for fund management and noted the outstanding performance of the fund during 1989.

Clemente Global Growth Fund, Inc., a closed-end fund, seeks long-term capital appreciation through investment in equity securities of small and medium-sized companies located throughout the world. The fund's orientation is global and its investment targets are emerging companies and emerging markets.

LOS ANGELES (JAN. 29) PR NEWSWIRE - National Mercantile Bancorp (NASDAQ:

MBLA), the holding company for Mercantile National Bank, today reported net income for the year ended Dec. 31, 1989, of $3.5 million, a 28 percent increase over 1988. Net income for the fourth quarter of 1989 was $845,000, a decrease of 7 percent from the fourth quarter of 1988. On a per-share basis, National Mercantile Bancorp earned $1.34 for the year and $.32 for the fourth quarter, compared to $1.11 and $.39, respectively, for the corresponding 1988 periods. Per-share figures for 1989 and 1988 reflect an increase in the number of common shares and common share equivalents outstanding resulting from a five-for-four stock split in June 1989.

Further reflecting the company's rate of growth, net interest income rose by 30 percent over the year ended Dec. 31, 1988, and 13 percent over the fourth quarter of 1988.

Net loans increased 37 percent to $230 million, while asset quality remained excellent, Tomich said. Total deposits advanced to $332 million at Dec. 31, 1989, compared with $296 million at Dec. 31, 1988, a 12 percent improvement.

Total assets reached $389 million at Dec. 31, 1989, representing a 15 percent gain from the $339 million reported at Dec. 31, 1988. National Mercantile Bancorp's primary capital ratio as of Dec. 31, 1989, was 7.24 percent. Return on average equity equaled 15 percent, and return on average assets exceeded 1 percent.

Mercantile National Bank, member FDIC, is an independent commercial bank located in Century City, Calif. THe bank offers a wide range of financial services including special services geared to middle market companies, the entertainment industry, real estate community, professionals, high net worth individuals, and the escrow and title industries.

PHILADELPHIA (JAN. 29) PR NEWSWIRE - AT&T (NYSE: T) today announced that Colonial Penn Group has awarded it a three-year, $15 million contract for network communications services.

The contract will include both inbound and outbound calling services at its four telemarketing centers.

"Colonial Penn is always interested in finding new ways to improve its communications links with its customers," said Steven Clevenger, Colonial

Penn's vice president of data operations. "Our business begins when a consumer calls Colonial Penn," he said. "High quality, dependable communications services are vital to our business."

Colonial Penn has more than 25 years experience in providing insurance products and services for people over 50. Today, it operates a sophisticated telemarketing, direct-mail and financial services operation, handling millions of transactions a year.

"We couldn't be happier that Colonial Penn chose AT&T," said Daniel R. Hesse, AT&T sales vice president. "This was a hotly contested sale and we're especially pleased that Colonial Penn recognizes AT&T's commitment to providing high value, reliable, quality services."

#90029p0175 01/29/1990 ~PR Newswire

SEATTLE (JAN. 29) PR NEWSWIRE - Alaska Air Group Inc. (NYSE, PSE: ALK) today reported that consolidated net income for the fourth quarter 1989 was $2.5 million, or 16 cents per share, down substantially from the $6.1 million, or 38 cents per share, earned in the 1988 quarter.

Operating revenues rose to $223.3 million, from $196.5 mil-lion a year ago. Operating income was $3.0 million, compared with $12.4 million for the fourth quarter 1988. The quarterly decline in profit was due to lower passenger fares and substantially higher fuel prices.

"After an outstanding performance during the first nine months of the year our fourth quarter results were disappointing," stated Bruce R. Kennedy, chairman and chief executive officer.

"Domestic discount fare promotions together with Alaska Airlines' expansion into the lower yield Mexican market caused the fourth quarter passenger yield to drop 8 percent below last year. At the same time, our fuel price increased 21 cents a gallon, accounting for $9 million of the total $14 million increase in fuel expense for the quarter," explained Kennedy.

"Mother Nature also provided the additional challenges of the Bay Area earthquake and the eruption of Alaska's Redoubt Volcano. Our employees responded in exemplary fashion to meet customer needs. However, revenues were diminished and extra operating costs incurred because of these extraordinary events. During the past quarter, we worked harder and carried more passengers, but our profit margins eroded," said Kennedy.

In spite of the difficult final quarter, the Company achieved record earnings for the full year 1989. Consolidated net income for 1989 was $42.9 million, or $2.51 per share, up from the $37.5 million, or $2.30 per share, earned last year. Operating revenues for 1989 were $916.5 million, up 13 percent over last year's $814.4 million. Operating income was $70.0 million, compared with the $70.5 million posted for 1988.

#90029p0180 01/29/1990 ~PR Newswire

NEW YORK (JAN. 29) PR NEWSWIRE - American Express and Maison de la France the promotional arm of the French Tourism Ministry, today announced a comprehensive initiative to meet the needs of France-bound Americans and build awareness of what France's 22 provinces have to offer.

More than 2.5 million Americans visited France in 1989, its bicentennial year, and U.S. tourism to France is expected to grow at eight percent a

year throughout the 1990s. However, the overwhelming majority -- 80 percent -- visit only Paris.

The Three-year program, which begins in February, includes:

-- A multi-million dollar print advertising campaign in the U.S. with the theme, "Discover the Country of France."

-- A telephone information service in the U.S. which provides detailed information about many aspects of travel to France and its provinces. The service, capable of handling half a million calls a year, will be staffed by specially-trained French tourism experts.

-- The creation of a "welcome network" throughout the French provinces, where bilingual personnel from local French authorities, restaurants, hotels, rental car companies, chambers of commerce and American Express travel offices will provide both local tourist information and emergency assistance.

-- A toll-free, bilingual telephone service in France which will direct American tourists to "welcome network" locations and answer basic questions on-the-spot.

In recognition of American Express' important role in French Tourism, Maison de la France named the American Express Card "The Official Card of Tourism in France." It is the first time a charge card has been so designated.

At the signing ceremony in New York, Olivier Stirn, French Minister of Tourism, and G. Richard Thoman, president and CEO of American Express International, praised the historic agreement, noting that both the traveler and the tourism industry benefit when private enterprise and government pool their expertise.

American Express Travel Related Services, Inc. is a family of travel, financial, insurance and communications businesses, and a wholly-owned subsidiary of the American Express Company (NYSE: AXP).

#90029p0184 01/29/1990 ~PR Newswire

WHITE PLAINS, NY (JAN. 29) PR NEWSWIRE - NYNEX Corporation (NYSE: NYN) announced today it will begin testing advanced "intelligent" network technology that will pave the way toward rapid creation of new network services to meet the changing needs of its telecommunications customers.

NYNEX will use network software developed by Tandem Telecommunications Systems, Inc., of Plano, Texas, a wholly-owned subsidiary of Tandem Computers, Inc. (NYSE: TDM). The software will run on a Tandem NonStop VLX computer to create new services on local switches at its Network Services Development Center in Manhattan.

"This test program reflects NYNEX's belief that customer demand in the future will require the ability to create and tailor services quickly to meet specific customer needs," said Joe Gansert, director- network planning, at the NYNEX Service Company. "It has taken quite a number of years to build an intelligent network architecture. Now we have the software available to realize some of the advantages of that architecture."

Gansert noted that the time lapse required for switch vendors to update switch generics in order to provide new services limits the ability of the telephone companies to respond to customer demand. The test program at NYNEX's development center will be a joint effort of NYNEX Science and Technology, NYNEX Service Company, New York Telephone and Tandem Telecommunications Systems.

"We've already worked with new service creation technology in a lab environment," Gansert said. "Now we will be applying it to real switches in a real world environment offered by the center."

The first phase of the test program is expected to last about six months and will assist NYNEX in planning for deployment of advanced intelligent network features throughout its network.

#90029p0190 01/29/1990 ~PR Newswire

HOUSTON (JAN. 29) PR NEWSWIRE - Iroquois Brands, Ltd. (AMEX: IBL) announced today the signing of an agreement with Sobel USA Inc., a subsidiary of Sobel B.V. of the Netherlands, wherein it was agreed that Iroquois would sell all of the issued and outstanding shares of Pharmacaps Inc. to Sobel for $9.0 million cash and an 8 percent royalty interest in Pharmacaps expanding generic drug business.

This royalty will apply to 12 products over a 10 year period.

The closing is expected to occur during February 1990.

Management is actively focusing Iroquois on expanding its interests in branded industrial products, primarily in the machinery and equipment area. In that regard, the company is in the process of divesting some of its businesses, as well as acquiring companies that would accelerate

corporate growth in branded industrial products markets. As a part of this philosophy, Iroquois sold its Schiff vitamins subsidiary in October of 1989.

As a result of Iroquois' growing strength in hydraulic equipment technology, particular corporate emphasis is centered on expanding Iroquois' hydraulics lines, which are seen as the base for its machinery and equipment future. On Dec. 5, 1989, Iroquois announced signing a letter of intent to acquire Racine Hydraulic Tools, Inc., a move which would dramatically strengthen the U.S. distribution network for its Panther International Ltd. hydraulic power packs subsidiary, while simultaneously expanding Racine's hydraulic tool business in the U.K. and in Europe.

Iroquois Brands, Ltd., is based in Houston with subsidiaries in the United States and the United Kingdom. The company business focuses on branded industrial products operating primarily in the machinery and equipment area. Other subsidiaries operate in the industrial and petroleum areas, primarily gasoline station/convenience stores in the United Kingdom.

Iroquois' common stock is listed for trading on the American Stock Exchange under the symbol "IBL".

#90029p0199 01/29/1990 ~PR Newswire

PHILADELPHIA (JAN. 29) PR NEWSWIRE - Directors of Philadelphia Electric Co. (NYSE: PE) today declared a dividend of 55 cents per share on the common stock for the first quarter of 1990, payable on March 30, to shareholders of record Feb. 21, 1990.

Common stock earnings for the year ended Dec. 31, 1989, were $2.36 per share or 3 cents per share over the earnings of 1988 when there were 3.7 percent fewer shares outstanding.

Joseph F. Paquette Jr., PE chairman and chief executive officer said, "This modest increase in earnings was due primarily to higher electric sales and lower penalties from the Peach Bottom shutdown and other fuel charges. These increases were partially offset by a first quarter charge against income from a negotiated settlement with the Internal Revenue Service concerning the Salem Unit No. 2 federal income tax benefit sale."

Total operating revenue for 1989, increased to $3.41 billion, approximately 5.5 percent over last year, as a result of both higher sales and increases in fuel adjustment revenues.

Total electric sales increased 1.4 percent in 1989 over 1988 due principally to the continuing economic growth in the economy of our service territory."

EAST HARTFORD, CT (JAN. 29) PR NEWSWIRE - Pratt & Whitney has presented financial awards to four employees spearheading development of an aggressive plan to minimize hazardous and industrial waste at the company.

They are Timothy J. Lorette of Colchester, supervisor of environmental programs management; John P. Zavodjancik of Colombia, senior manufacturing engineer; Joseph A. Muraca of Middletown, coordinator of P&W's Industrial Modernization Incentive Program; and Frederick Polhemus, Jr. of West Palm Beach, Fla., senior program manager, materials engineering at P&W's Government Engine Business.

As a result of the employee team's efforts, Pratt & Whitney received a $3.9 million contract from the U.S. Air Force to jointly fund a three-year program to identify methods of significantly reducing industrial waste.

The plan calls for minimizing or eliminating the use of hazardous materials required in production, reclaiming wastes generated during manufacturing and overhaul and repair operations and substituting non-toxic methods of treatment. It focuses on four waste categories: metal finishing wastes, water soluble machining fluids, chlorinated solvents and sludge from electro-chemical machining operations.

"This outstanding team recognized an opportunity to improve the way we do business based on both economic concerns and impact on the environment,

which we consider to be a top priority," David Bean, Pratt & Whitney's president of manufacturing, said. "The waste minimization initiative will not only dramatically cut our use and generation of hazardous materials, it will result in substantial savings in disposal and treatment costs.

"An important element in this plan includes technology transfer," Bean said. "Information on improvements on the way we produce our jet engines parts, alternative materials and reduced waste is shared with our vendor base and other manufacturers. This increases the aerospace industry's ability to reduce the impact of harmful chemicals on the environment."

This program will be fully implemented at Pratt & Whitney's manufacturing operations by 1992.

ATLANTA (JAN. 29) PR NEWSWIRE - KnowledgeWare Inc. (NASDAQ: KNOW), a leading developer of Computer-Aided Software Engineering (CASE) products today announced its financial results for the quarter Dec. 31, 1989, and that J. William Scruggs was elected to its board of directors on Jan. 26.

The company reported net income for the quarter ended Dec. 31, 1989, of $1,674,000, or $.14 per share. This compared to net income of $1,075,000 or $.13 per share for the same period a year ago. Revenues for the quarter were $14,310,000 up 131 percent from revenues of $6,202,000 for the corresponding period of 1988.

For the six months ended Dec. 31, 1989, net income totaled $3,705,000, or $.34 per share, compared to $1,376,000, or $.16 per share for the comparable period last year. Revenues for the six-month period were $27,064,000, compared to revenues of $10,298,000 for the six months ended Dec. 31, 1988.

"We attribute the increase in revenue to the acceptance of KnowledgeWare products in the marketplace," said Terry McGowan, president and chief operating officer of KnowledgeWare Inc. "This enthusiasm for our CASE technology is further collaborated by the fact that the company had shipped a cumulative total of 25,753 copies of our product as of the quarter ended Dec. 31, 1989 compared to 9,175 units at the end of the same period in 1988.

During the quarter ended Dec. 31, 1989, KnowledgeWare completed its initial public offering of 3,450,000 common shares. Three million shares were sold on the effective date of the offering, and the underwriters

subsequently exercised over-allotment options covering 450,000 shares, indicating a positive response from the investment community.

"We are especially pleased to report an increase in earnings per share in each of our first two quarters of fiscal 1990," said McGowan. "Our goal was to continue the earnings trend established before the initial public offering, in spite of the impact of a significant number of newly-issued shares and a substantially higher tax rate. We overcame both of these effects on earnings per share and achieved our goal."

KnowledgeWare further announced that retired IBM executive J. William Scruggs will serve on the KnowledgeWare board of directors as the designee of IBM, pursuant to an agreement entered into in August 1989 between the two companies.

ATLANTA (JAN. 29) PR NEWSWIRE - Georgia-Pacific Corp.'s (NYSE: GP) board of directors today amended the company's bylaws to increase the number serving on its board from 13 to 14 directors.

Clifton C. Garvin Jr., former chairman and chief executive officer of Exxon Corp., was elected by Georgia-Pacific's board to immediately fill the vacancy.

Garvin, who retired from Exxon Corp. in December 1986, also serves as a director of Citicorp and Citibank, N.A.; Johnson & Johnson; J.C. Penney Co., Inc.; PepsiCo, Inc.; Saudi Arabian Oil Co.; and TRW, Inc. Garvin will be among the board members nominated for re-election to a three-year term on the company's board to be voted on at Georgia-Pacific's annual shareholder meeting May 1.

In addition, the board declared a regular quarterly dividend on common stock of 40 cents per share payable March 12, to shareholders of record Feb. 16.

#90029p0215 01/29/1990 ~PR Newswire

LIVINGSTON, NJ (JAN. 29) PR NEWSWIRE - The Howard Savings Bank (NASDAQ: HWRD) today reported a loss of $85 million, or $5.94 per share, for the fourth quarter of 1989, compared to 1988 fourth quarter earnings of $15.5 million, or $1.07 per share.

The Howard's loss for the full year of 1989 was $66 million, or $4.61 per share, compared to net income of $35.1 million, or $2.43 per share, for 1988.

The Howard also announced that the board of directors declared a regular first quarter dividend of $.15 per share, payable Feb. 22, 1990 to shareholders of record at the close of business on Feb. 9, 1990.

The bank reported today that its loss for 1989 is due primarily to a fourth quarter addition to its allowance for possible loan losses because of deteriorating real estate markets.

On Dec. 12, 1989, the Howard projected a fourth quarter addition to the allowance for possible loan losses of approximately $70 million after an accelerated quarterly review of its loan portfolio. Upon completion of its end of the quarter review of the loan portfolio, the bank has determined to increase the addition to the allowance for possible loan losses by an additional $27 million in the fourth quarter of 1989. After this fourth quarter addition, the Bank's allowance for loan losses at year-end 1989 was $85 million compared with $11 million at year-end 1988.

Non-performing assets totalled $354 million at year-end 1989, of which

$324 million, or 91 percent, represented non-performing loans. This compares with $252 million in non-performing assets at the end of the third quarter of 1989, of which $218 million were non-performing loans.

The Howard remains in compliance with all applicable capital standards. The bank's primary capital ratio was 7.19 percent at year- end. The Howard had shareholders' equity of approximately $288 million, or about $20 per share, after the Bank's year-end loss.

The Howard's total assets of $5.1 billion at Dec. 31, 1989, were down 2 percent from $5.2 billion a year ago. Deposits were $4.6 billion, compared to $4.5 billion at the end of 1988.

NEWPORT BEACH, CA (JAN. 29) PR NEWSWIRE - Ford Aerospace and the government of Egypt have finalized a $220 million contract for Chaparral air-defense missiles and launchers.

The start of the program follows nearly a year of negotiations with the Egyptian government to iron out final details. The transaction already has been approved by the Defense Security Assistance Agency and the Congress.

The transaction involves not only Chaparral missiles and their mobile launchers, or Fire Units, but also a mobile surveillance radar system and an Identification Friend or Foe (IFF) system to distinguish hostile aircraft. The contract also includes spare parts, maintenance equipment and training services.

Ford Aerospace's Aeronutronic Division, located in Newport Beach, Calif., will be the prime contractor for the job. Six other U.S. companies will serve as subcontractors, including Sanders Associates, FMC, Texas Instruments, Kearfott Guidance & Navigation Corp, Whittaker Electronics and Harris Corp.

As the prime contractor, Ford Aerospace will be responsible for delivering the complete systems and successfully testing the equipment at a site in Egypt. The $220 million contract is the Aeronutronic Division's largest single dollar award ever for missile systems.

Ford Aerospace, a wholly owned subsidiary of Ford Motor Company (NYSE: F), is a leader in command, control, communications, and intelligence systems; tactical weapon systems; satellites and space systems; and professional and technical services. The corporation is headquartered in Newport Beach,

Calif. with major operations in California, Colorado, New Mexico, Ohio, Pennsylvania, Texas, and the Washington, D.C. metropolitan area.

RED BANK, NJ (JAN. 29) PR NEWSWIRE - The trustees of North European Oil Royalty Trust (NYSE: NET) announced today a quarterly distribution of 37 cents per unit, payable on Feb. 28, 1990 to holders of record Feb. 16, 1990.

John H. Van Kirk, managing trustee, noted that the distribution was 37 percent higher than the distribution made for the same quarter last year. The primary reason for the increase was a 34 percent improvement in the price received for gas sold and a small improvement for the conversion rate received for the mark. Volumes of gas marketed declined approximately 5 percent from the year ago period due to warmer weather conditions.

Van Kirk also reported that information distributed to unit owners had recommended a cost depletion percentage for 1989 tax reporting purposes of 10.446 percent. Unit owners may deduct for tax purposes, the above percentage of the adjusted cost of their units.

Distributions are made to unit owners of the trust from royalties received from oil and gas sales from royalty holdings in West Germany. The February distribution reflects royalties for sales during the last calendar quarter of 1989. The trust makes quarterly distributions to owners during February, May, August and November.

The annual meeting of unit holders will be held Feb. 14, 1990 at 2 p.m. at the University Club in New York City.

LIVONIA, MI (NOV. 29) PR NEWSWIRE - The Michigan Division of Kroger Food Stores unveiled plans today for a major educational program to give free IBM Personal System/2 computers with printers to area primary and secondary schools.

More than 2,000 Michigan primary and secondary schools will have the

opportunity to participate by saving Kroger register receipts for free IBM computers with printer from Kroger. There is no limit to the number of free IBM computers with printer a school can earn predicated on the requirement for register receipts being met. Earning for Learning will be in effect throughout the balance of the 1989-1990 school year.

Joel Greenisen, Michigan Division vice president of The Kroger Co., (NYSE: KR) commented, "We are working vigorously with over 2,000 primary and secondary schools, their parent-teacher organizations, school district staff, and our 54 Michigan Marketing Area Kroger stores to bring Earning for Learning about. It's a pleasure to see business, the community and schools interacting together to bring state-of-the-art technology into our schools at no cost. It is the responsibility of us all to provide every educational opportunity possible to prepare our children for tomorrow."

NEWTON, MA (JAN. 29) PR NEWSWIRE - Health and Rehabilitation Properties Trust (NYSE: HRP) today announced that it has made a mortgage investment of $29 million to Continuing Health Care Corp. II ("Continuing Health II"). Continuing Health II is the result of a merger of four presently existing separate corporations, each of which is affiliated with New MediCo Associates, Inc. of Boston, Mass. The New MediCo group of companies is one of the largest privately owned operators of health rehabilitation and skilled nursing facilities in the United States and had annual revenues last year of approximately $350 million.

This $29 million mortgage investment will be combined with existing mortgage investments by HRP totaling $27 million in two of the four corporations being combined to form Continuing Health II. The existing investment of $27 million and the new investment of $29 million are being combined to create one new mortgage loan of $56 million. The new loan will be due Jan. 31, 2005. The base interest on the loan will be 13

percent per annum for the first five years; and on the fifth and 10th anniversary dates, interest will be reset at the higher of (i) 13 percent or (ii) the five year Treasury Note Rate plus 4 percent per annum. In addition, Additional Interest will be payable to HRP equal to 3 percent of the increase in net patient revenues over Base Years' net patient revenues at the mortgaged facilities. Four million dollars of the mortgage investment was not presently funded but may be drawn within 36 months for capital improvements.

Simultaneously with the announcement of this investment, HRP announced that it had relocated its headquarter operations from Cambridge, Mass., to 400 Centre Street, Newton, Mass., effective Monday, Jan. 29, 1990.

HRP was orgainized in December 1986 to invest in health care related real estate. Since inception, HRP has increased its portfolio of health care real estate investments from approximately $63 million to over $225 million (including the investments announced today).

FORT WORTH, TX (JAN. 29) PR NEWSWIRE - Robert H. McLean, chairman of the board and president of Buffton Corp. (AMEX: BFX), announced today a net loss of $554,000, or 14 cents per share on revenues of $22,978,000 for its first quarter ended Dec. 31, 1989. For the same period last year, net income was $520,000, or 12 cents per share on revenues of $25,156,000.

In making the announcement, McLean stated, "Our earnings are being affected by the economic downturn in the northeast and southeast, as well as a seasonal slowdown in our PVC operations."

McLean further stated, "Our electronics businesses are being affected by a slowdown in the computer industry. We believe this softness will continue and possibly improve the beginning of our third quarter."

McLean further stated, "Because of the continuing poor market conditions in the PVC pipe and fittings industries and current softness affecting our electronics businesses, we are forecasting a loss for our second quarter. We do, however, see improvement in our earnings outlook after the second quarter."

McLean added, "We have implemented reductions in overhead at our corporate office, as well as at all of our operating subsidiaries. Production at our PVC pipe operations has been curtailed to reduce inventories and maximize cash flow."

Buffton Corp. is a diversified group of companies engaged in the manufacture of avionic, electronics, and plastic products. As previously announced, a Strategic Planning Committee of the board of directors has been appointed to evaluate certain business plan alternatives that may involve the sale of certain of these businesses.

TOWSON, MD. (JAN. 29) PR NEWSWIRE - The board of directors of the Black & Decker Corp. (NYSE: BDK) at its annual meeting today elected Nolan D. Archibald, president and chief executive officer of the corporation, to the additional position of chairman, succeeding Peter L. Scott.

Archibald had previously served as chairman from December 1986 until May 1989 when Black & Decker acquired Emhart Corp. Scott, formerly chairman of Emhart, was elected chairman of Black & Decker at that time. Scott had agreed to serve as chairman through the post-merger transition period, but had indicated that he would not stand for re-election thereafter. Scott remains a director of the corporation and a member of the board's executive commmittee.

Stephen F. Page, a 16-year Black & Decker veteran, was named executive vice president and chief financial officer, succeeding Achim Knust who had also been CFO at Emhart. Commenting on the change, Archibald said, "Achim Knust has been commuting from Emhart's Connecticut offices to Maryland to co-chair with Steve Page the transition of Emhart's corporate headquarters functions to Black & Decker. Having successfully completed that task, Achim and his family have elected to remain in Connecticut.

"Steve Page was most recently vice president-finance and treasurer. He has been responsible for our domestic and international financing programs, as well as our tax strategies and accounting functions. He is well respected and well known by our bankers and institutional investors and the securities analysts who follow Black & Decker. With that kind of experience, including his role in the Emhart transition, and his proven

ability, Steve is uniquely qualified to be our chief financial officer."

Two additional key financial posts were also filled. Thomas M. Schoewe, formerly vice president-business planning and analysis, was named vice president-finance with responsibility for the corporation's accounting and control functions as well as business planning and analysis. Michael S. Karsner, formerly vice president-corporate development, was named vice president and treasurer. In addition to his new responsibilities for banking relationships and cash, pension fund and risk management functions Karsner will continue to serve as head of corporate development until a successor is named.

The board also declared a regular cash dividend of 10 cents per share, payable on March 30, 1990, to stockholders of record on March 16.

Black & Decker is the world's leading marketer and manufacturer of power tools and other quality products used in and around the home and for commercial applications.

NEW YORK (JAN. 29) PR NEWSWIRE - Morgan Stanley Group Inc. (NYSE: MS)

announced today that Walter F. Loeb, the firm's senior retail analyst for the past 16 years, will retire on Jan. 31, and become a consultant to Morgan Stanley and other organizations.

Loeb, 65, has founded Loeb Associates, based in New York, to provide consulting services to the retailing industry and the financial community. He will also publish a "The Loeb Retail Letter," a newsletter reporting on and reviewing trends in the global and domestic retail industry.

Richard B. Fisher, president of Morgan Stanley Group Inc., stated: "We greatly appreciate what Walter has done for our efforts over the years and he will be missed for his integrity, energy, judgment and intellectual capacity. He was instrumental in helping us to accomplish what was a very important priority for us, which was to build and earn relationships with important retailing companies."

Loeb joined Morgan Stanley in 1974 and was named a vice president in 1980 and a principal in 1984. Previously, he had been a retailer for 20 years working for Macy's, May Department Stores and Allied Stores. He also served as a retail consultant for three years. He came to Wall Street in 1972 as a senior analyst for the Johnson Redbook Service.

A former president of the Merchandise Analyst Group, he has been named to the Institutional Investor All-America Research team for 14 years. He is also president of New York University's Washington Square College Alumni Association; former president of the New York University Finance Club; and vice chairman of New York University's Alumni Council. He is a member of the advisory board of the International Council of Shopping Centers.

Loeb was born in Germany and came to the United States in 1940. Following service with the United States Army in World War II, he received his BA degree from New York University.

CONTACT: Peter Roche of Morgan Stanley, 212-703-4057, or Walter Loeb of Loeb Associates (after Feb. 1), 212-536-4034.

BLOOMFIELD, CT (JAN. 29) PR NEWSWIRE - Kaman Corporation (NASDAQ/NMS: KAMNA) reports net earnings rose during the fourth quarter but declined for the year due to write downs and adjustments during the third quarter.

Fourth quarter 1989 net earnings were $5.5 million, or 30 cents per share primary, 28 cents per share fully diluted, up from $4.9 million or 27 cents per share primary, 26 cents per share fully diluted, in 1988. Revenues for the quarter were $204 million, compared to $191.7 million a year ago.

Net earnings for 1989 were $8.7 million, or 48 cents per share, compared to $25.3 million, or $1.42 per share primary, $1.31 per share fully diluted in 1988. The decline in net earnings was largely attributable to inventory write downs and adjustments during the third quarter within Kaman's industrial distribution business and profit adjustments and asset write downs within the company's diversified technologies business. Revenues for the year rose to $801.8 million, compared to $767.9 million in 1988.

The diversified technologies segment operating profit for 1989 was $28.9 million, down from $44.1 million in 1988. Sales were $405.5 million, compared to $411 million in 1988. Third quarter profit adjustments and write downs within the segment totaled $12.5 million.

The distribution segment operating profit for 1989 was $9.5 million, down from $18 million in 1988. Sales were $395.4 million, compared to $356.3 million a year ago. Third quarter inventory write downs and adjustments within the segment totaled $10 million.

Kaman Corp., headquartered in Bloomfield, Conn., is a highly diversified company with business activities in defense, industrial, and commercial markets. The company employs approximately 6,400 people in 200 locations in the U.S. and Canada.

DEARBORN, MI (JAN. 29) PR NEWSWIRE - The following statement may be attributed to John P. King, Parts and Service Engineering Office manager, Ford Parts and Service Division:

Ford Motor Company (NYSE: F) is notifying owners of a voluntary safety

recall involving approximately 116,000 1986-87 model Ford Aerostar vehicles equipped with captain's chairs.

Ford is asking owners to check the right front seat belt webbing where it passes over the seat back pivot for signs of abrasion or cuts or, if they prefer, to return their vehicles to dealers for inspection of the belts. Owners are being instructed to return their vehicles to dealers in all cases in which they observe damage to the belt webbing. Dealers will replace, at no charge to the vehicle's owner, belts showing signs of abrasion that could weaken the belt webbing.

In addition, owners will be mailed a protective covering for the seat belt webbing that can be installed by the owner in instances where no damage has occurred.

Of the vehicles affected, 106,693 are located in the United States, 9,105 are in Canada, and 332 are in export markets.

#90029p0267 01/29/1990 ~PR Newswire

ATLANTA (JAN. 29) PR NEWSWIRE - National Healthcare Inc. (NASDAQ: NHCI) said that it has divested subsidiaries or the assets of subsidiaries owning three rural hospitals and two nursing homes for approximately $200,000 cash and notes, including estimated working capital.

Facility-related debt on the three facilities approximated $5.5 million. NHCI said the cash proceeds from the divestitures will be retained by the company for working capital purposes.

The transactions included the sale of assets of Lamar Regional Hospital, Vernon, Ala. (70 beds) to Southern Health Corp. of Vernon Inc.; the sale of stock of National Healthcare of Hamilton Inc. which operates under lease Marion County General Hospital (57 beds) and Nursing Home (69 beds) in Hamilton, Ala. to Southern Health Corp. of Hamilton Inc.; and the merger of National Healthcare of Houston Inc. which owns Houston Community Hospital (84 beds) and Floy Dyer Manor nursing home (66 beds) in Houston, Miss. with MCE Merger Corp. The purchasers are subsidiaries or affiliates of MCE-Hospital Co., a private company based in Atlanta.

NHCI said the transactions are not expected to result in any material gain or loss.

National Healthcare Inc. provides healthcare services to communities through ownership and management of general acute care hospitals and related healthcare services.

#90029p0270 01/29/1990 ~PR Newswire

SEATTLE (JUNE 29) PR NEWSWIRE - Boeing Co. today reported sales and earnings for the 1989 fiscal year and fourth quarter.

Year ended:	1989	1988
Earnings per share (A)	$ 4.23(B)	$ 2.68
Sales - including other operating revenues (in billions)	$20.276	$16.962
Net earnings (millions)	$ 973(B)	$ 614

(A) The 1989 earnings per share calculation is based on 230,230,737 shares.

(B) Includes $298 million or $1.29 per share for the adoption of Financial Accounting Standard No.96.

Sales of $20.276 billion and earnings of $973 million or $4.23 per share for 1989 were reported by Frank Shrontz, Boeing (NYSE: BA) chairman and chief executive officer.

Net earnings for 1989 include $298 million or $1.29 per share attributable to the effect of adopting a change in accounting for income taxes. Reported figures for 1988 were sales of $16.962 billion and earnings of $614 million, or $2.68 per share.

Sales for the fourth quarter of 1989 were $4.847 billion with earnings of $77 million, or 34 cents per share, compared with 1988 fourth quarter sales of $4.872 billion and earnings of $174 million or 76 cents per share.

The 1988 data has been restated for the 1989 three-for-two stock split.

The 48-day strike by the International Association of Machinists and Aerospace Workers had a severe impact on fourth quarter sales and earnings and on the company's cash and short-term investment position at Dec. 31, 1989.

The strike caused significant delivery delays resulting in sales being approximately $2 billion less than projected. The reduced sales, higher than anticipated lump-sum wage payments and strike disruption costs contributed to a substantial reduction in fourth quarter operating earnings and interest income.

In the fourth quarter, the company adopted, retroactive to Jan. 1, 1989, the provisions of Statement of Financial Accounting Standards No. 96,

"Accounting for Income Taxes" (SFAS 96). Accordingly, the company has changed its method of computing income taxes from the deferred method used in prior years to the liability method prescribed by SFAS 96. The effect of adopting SFAS 96 increased 1989 earnings by $298 million or $1.29 per share.

Excluding the effect of the adoption of SFAS 96, the increase in net earnings for 1989 compared to 1988 is primarily due to increased sales volume and lower levels of research, development and other new business expenses relating to commercial aircraft and computing.

The above items were largely offset by substantial losses on certain U.S. Government developmental and production programs; the adverse effect of the 48 day machinists strike; increased research, development and other new business expense (particularly cost-share) relating to defense programs; lower other income; and a higher effective federal income tax rate. The decrease in 1989 fourth quarter net earnings compared to the same period of 1988 is primarily due to the same offsetting factors.

The technical, cost and schedule problems experienced in recent years on U.S. Government developmental and production programs intensified in 1989, resulting in an operating loss of $474 million for the company's defense and space business for the year. Substantial resources continue to be applied to resolving these problems and significant progress has been made.

SEATTLE (JAN. 29) PR NEWSWIRE - Airborne Freight Corp. (NYSE: ABF), which operates under the trade name Airborne Express, announced that it completed the sale of $40 million of non-voting 6.9 percent Cumulative Convertible Preferred Stock.

The issue was purchased by Mitsui & Co. Ltd. of Japan; Tonami Transportation Co., Ltd. of Japan; and by Mitsui & Co. (U.S.A.) Inc. Proceeds from the sale will be used by Airborne to repay existing debt and for general corporate purposes.

The sale of the shares to Mitsui and Tonami is part of an arrangement announced on December 6, 1989, that includes the creation of a joint venture in Japan between Airborne, Mitsui, and Tonami. Mitsui will also provide Airborne with a five-year commitment of up to $100 million for aircraft financing.

Airborne Express, based in Seattle, is the third-largest carrier in the U.S. air express market and also functions as an international air freight forwarder and courier, serving 45,000 communities in the United States and 183 countries worldwide.

The fastest-growing carrier in the air express industry, Airborne Express experienced shipment growth of 40 percent for the year ended December 31, 1989.

JACKSONVILLE, FL (JAN. 29) PR NEWSWIRE - First Union National Bank of Florida has entered into an agreement with First Sun Capital Corporation of Columbia, S.C., for First Sun Capital Corp. to purchase 13 branch offices of First Union. The 13 branches are located in the Jacksonville, Florida, area.

First Sun Capital Corp. owns Republic National Bank, a $320-million-asset financial institution based in Columbia, S.C. This sale will represent First Sun Capital Corp.'s initial entry into the Florida banking market. The new bank will rank sixth in market share of Jacksonville-area

commercial banks.

The 13 Florida branches, which are located in Duval, Nassau, St. Johns and Clay counties, will operate as a Florida state-chartered banking institution.

First Union is divesting the branches in accordance with the order issued December 22, 1989, by the Board of Governors of the Federal Reserve Board. In this order, the board approved First Union's acquisition of Florida National Bank of Florida, Inc. subject to First Union selling 13 offices with deposits of approximately $210.5 million within six months of the closing date of the merger.

The merger was consummated today. The branch divestiture transaction is expected to close during the second quarter of 1990. This is the second major transaction between First Union and First Sun Capital Corp. First Union sold First Sun Capital Corp. ten South Carolina offices in 1988.

Following the divestiture, First Union will continue to operate 40 branches in the four-county region and approximately 400 offices statewide.

First Sun Capital Corp. is purchasing the following branch offices: Fort Caroline, Deerwood, Mandarin, Argyle, and Jacksonville Beach in Duval County; Fernandina Beach, Hilliard, and Yulee in Nassau County; Hastings and St. Augustine South in St. Johns County; and Middleburg, Clay Plaza, and Park Avenue in Clay County.

First Union National Bank of Florida has established a customer hotline for customers with questions related to the merger and divestiture. They can call toll-free 1-800-735-2548 (in Jacksonville, call 361-2106) during regular business hours.

First Union National Bank of Florida is a principal subsidiary of Charlotte, N.C.-based First Union Corporation. First Union Corporation (NYSE: FTU) reported assets of $32.1 billion as of December 31, 1989, prior to the merger with Florida National Banks of Florida, Inc.

#90029p0296 01/29/1990 ~PR Newswire

PITTSBURGH (JAN. 29) PR NEWSWIRE - The USS division of USX Corp. (NYSE: X) has announced development of a new plate steel grade, designed primarily for applications in critical structural members of offshore drilling platforms.

The new plate grade, to be marketed under the trademark USS "O"-TEN steel, is processed on off-line direct quench-and-temper facilities. It was developed by USS in response to specifications adopted by the American Petroleum Institute (API) to meet the more demanding requirements of deeper, harsher conditions at offshore drilling and production sites.

While developed specifically for those API requirements, the new steel plate also has applications in other areas where these improved characteristics are required, USS said. Other potential applications include pressure vessels, penstocks, highly stressed components of heavy construction and transportation equipment, and fabricated plate girders and columns.

USS said prequalification welding evaluations confirmed that the new low-carbon API 2Y-50 steel meets all of the Petroleum Institute's requirements. It is fully competitive in properties and welding performance with API 2W-50 steels, which are processed on in-line direct quench equipment and are not available from any domestic producer.

The API specifications were published as part of an effort to reduce fabrication costs and improve weldment performance in offshore platforms where enhanced toughness and better weldability are important. The new steel grades are intended to replace the 50-ksi, API 2H steels which served for many years as the high-performance structural material for offshore platforms.

"Our ability to develop the quench and temper heat-treating method for USS "O"-TEN plate steel on existing plate facilities at Gary Works represents an important step by USS in response to the specific needs of key customers in the energy industry," said Thomas Usher, executive vice president-heavy products at USS.

"The availability of the new USS grade offers oil producers and platform fabricators a tougher plate with better welding characteristics, which is needed for today's deep water applications," Usher added. USS "O"-TEN plate steel is available through the USS plate sales organization.

ST. PETERSBURG, FL (JAN. 29) PR NEWSWIRE - Florida Progress Corporation (NYSE: FPC) released its 1989 earnings today. Richard Korpan, Executive Vice President and Chief Financial Officer reported the company's earnings per common share for 1989 were $3.67, as compared $3.52 in 1988. Improved operating results fromnon-utility operations were the primary reason for

the 4.3 percent increase in earnings.

Earnings per share for the fourth quarter of 1989 were $.58 as compared to $.67 in 1988. Although non-utility results were higher for the year, fourth quarter earnings were down due to the lower results from real estate development and building products.

Florida Power's fourth quarter earnings of $.57 per share were slightly below 1988. The fourth quarter last year included the one-time recognition of income of $.04 pershare for generating units being returned to service. Utility revenues were higher in the fourth quarter of 1989 due to unseasonably warm weather in October and November and extremely coldweather in December. This was offset by higher fuel and purchased power and increased maintenance expenses.

CHICAGO (JAN. 29) PR NEWSWIRE - Midway Airlines today announced that toll-free reservations and telemarketing telephone numbers have been established for customers making travel arrangements from Canada.

Two toll-free numbers have been established for general consumer use. The first, 1-800-621-5760, is open 24 hours daily. Another, 1-800-648-9626, is open from 6 a.m. to midnight Central Standard Time and is staffed by French-speaking reservations agents.

Additionally, a toll-free Canadian telemarketing number, 1-800-621-2668, is open weekdays from 7:30 a.m. to 7 p.m. CST. Midway's telemarketing department handles all group and convention bookings and provides expert assistance to travel agents.

Separately, Midway Airlines today announced introductory fares for service between Montreal and Philadelphia, which begins Feb. 15 with three daily round-trip flights. Introductory one-way fares for all coach seats will be Canadian $88 and U.S. $69. The introductory fares will be valid for travel between Feb. 15 and March 15.

Midway currently serves Canada with three daily round-trip flights between Toronto and Philadelphia. Canadian travelers can connect at Philadelphia International Airport with Midway flights to eight Florida cities.

Midway Airlines offers coast-to-coast service from its hubs at Chicago's Midway Airport and Philadelphia International Airport. Midway Airlines and its wholly owned subsidiary, the Midway Commuter, serve 60 destinations in the United States, Canada, U.S. Virgin Islands and the Bahamas.

CINCINNATI (JAN. 29) PR NEWSWIRE - COMAIR, Inc., the Cincinnati and Orlando based "Delta Connection" airline, will begin service between Greensboro and Cincinnati on March 2, 1990. Comair plans to operate two daily nonstop, round-trip flights between Greensboro and the Delta/Comair Cincinnati hub. The new flights will operate with Comair's cabin class Saab SF340 which features in-flight service for 33 passengers. Comair's new service will compliment Delta's flights which began on December 15, and will offer convenient connections through Cincinnati to destinations throughout the Midwest, the United States and the international cities of Toronto, London, Frankfurt and Paris (effective July 28).

Charles Curran, senior vice president of marketing noted, "We are very pleased to begin this service from Greensboro to Cincinnati. The new flights serving the communities of Greensboro/Highpoint and Winston-Salem, will be the second destination served by Comair in the state of North Carolina reflecting our growing presence in the Atlantic Coast region and our commitment to the development of our Cincinnati hub. We look forward to a long and mutually beneficial relationship."

CHICAGO (JAN. 29) PR NEWSWIRE - The Quaker Oats Co. (NYSE: OAT) was notified on Jan. 26 that the National Labor Relations Board has certified an employee election at the Golden Grain Division production facility at Bridgeview, Ill.

The vote was held on Friday, Jan. 12, at the request of employees.

Bridgeview plant employees had the opportunity to decide if they wanted to be represented by the Oil Chemical and Atomic Workers Union, the Independent Truckers' Union or to be union-free.

The voting results as certified by the NLRB were 72 percent in favor of

being union-free with the remaining votes split between the unions.

The Oil Chemical and Atomic Workers Union has represented the employees at Bridgeview for nearly 25 years. The Bridgeview plant produces Rice-A-Roni Noodle Roni and Savory Classics for the Golden Grain Division and employs 275 employees. Quaker acquired Golden Grain in 1983.

David Fuhs, plant manager at Bridgeview, said, "Employees have the right to be represented by a union by law, but they also have the right to be union-free. We're very pleased to be able to work directly with our employees without third-party involvement. We believe our success is and will be a result of working as a team. This vote of confidence will not be taken lightly. Our employees are very happy with the outcome and so are we."

Currently, Quaker has more than 40 manufacturing facilities throughout the U.S. with different unions representing employees at some plants and many facilities are union-free. Robert Montgomery, vice president human resources, U.S. Grocery Products Group, said, "We support the employees' right to choose, and we are very pleased for Bridgeview and our employees."

#90029p0313 01/29/1990 ~PR Newswire

AKRON, OH (JAN. 29) PR NEWSWIRE - Roadway Services, Inc. (NASDAQ: ROAD) reports revenue for the year ended Dec. 31, 1989 of $2,660,910,000, after audit, compared with revenue of $2,184,531,000 in 1988.

Net income for the year was $95,521,000, or $2.44 per share compared with net income of $80,239,000 or $2.00 per share in 1988.

For the 16 weeks constituting the company's fourth quarter, revenue was $858,192,000 compared with revenue of $741,600,000 in the fourth quarter of 1988. Net income for the quarter was $29,940,000, or $.77 per share, compared with net income of $31,793,000 or $.80 per share for the comparable period of 1988.

Results for 1989 include the operations of Viking Freight, Inc., acquired by the company near the end of the third quarter of 1988.

Fourth quarter tonnage for Roadway Express, the company's principal operating subsidiary, increased 7.6 percent over the previous year's quarter, consisting of increases of 8.0 percent in LTL tons, shipments weighing less than 10,000 pounds each, and 6.5 percent in truckload tons.

Roadway Express' fourth quarter earnings declined from last year. The operating margin was reduced to 3.7 percent from last year's 7.2 percent due to both cost and pricing pressures. Net freight rate levels were 0.6 percent below those of last year's fourth quarter, while fuel prices rose 35 percent and workers' compensation, other insurance costs and labor costs also increased.

A freight rate increase yielding approximately 4 percent took effect January 1. Fuel prices have eased slightly from their December peak (when they were up more than 70 percent) but remain much higher than a year ago.

"Improved results at Roadway Express will depend on satisfying customers, containing controllable costs and achieving adequate revenue yield," said Joseph M. Clapp, chairman of Roadway Services.

"Fuel costs also remain a concern," he said. Roadway Package System (RPS), the company's small package carrier, completed its first full year of profitability with significant revenue growth.

The regional transportation and special services group, consisting of Spartan Express, Viking Freight and Roberts Express, was led by Viking whose revenues and earnings for the quarter and the year were at an all time high. Roberts' revenue growth was modest, but earnings continued to advance. Spartan's operating loss narrowed slightly from last year's fourth quarter.

Revenue and earnings for the company's fourth quarter and the year ended December 31, 1989, with comparable figures for 1988, are as follows:

	Sixteen Weeks Ended (Fourth Quarter)	
	12/31/89	12/31/88
Revenue	$858,192,000	$741,600,000
Operating income	46,510,000	41,222,000

NEW YORK (JAN. 29) PR NEWSWIRE - BFS Bankorp, Inc. (NASDAQ: BFSI), the holding company for Bankers Federal Savings, FSB, today reported that net income for the first quarter ended Dec. 31, 1989 increased 6.3 percent to $762,000 or $.53 per share, as compared with net income of $717,000 or $.50 per share, in the prior year's comparable quarter.

Commenting on the results, James A. Randall, president and chief executive officer, noted: "We are pleased that we were able to increase our earnings in the quarter, despite a generally difficult banking and real estate environment. While most thrifts are losing deposits, the banks' grew $10.8 million during the quarter.

"We have experienced a further increase in the level of our loans delinquent 90 days or more, now at 2.92 percent of assets. While this resulting non-accrual of interest has had an adverse impact on our net interest margin and earnings, we continually review each of these individual loans to ensure that our current loan loss reserves are adequate."

During the quarter, mortgage originations decreased to $14.7 million as the bank further tightened its already conservative underwriting standards.

BFS Bankorp, Inc., the parent holding company of Bankers Federal Savings, FSB, is a SAIF-insured savings bank headquartered in New York City. The bank is a community-oriented financial institution serving Manhattan, Queens and Brooklyn through five branch offices. As of Dec. 31, 1989, the bank has total assets of $444.5 million, deposits of $333.4 million and stockholders' equity of $24.1 million.

HOUSTON (JAN. 29) PR NEWSWIRE - Continental Airlines today announced that members of its frequent flyer program, OnePass, will earn a free ticket for every two qualifying round-trips they take on Continental between Jan. 28 and April 6. Additional travel by OnePass members will earn them two free tickets for four round-trips, three free tickets for six round-trips, and four free tickets for eight round trips.

As a result, members of the OnePass frequent flyer program will earn free trips faster than members of any other program in the world. On other airlines, travelers have to fly more trips to get free tickets.

Continental also allows participants to exchange four free reward tickets for a pair of mainland U.S. first class tickets. Additionally, any OnePass member who earns four free tickets will be automatically enrolled as a Gold Elite member in 1991, qualifying for 125 percent bonus mileage on actual miles flown, confirmed upgrades with every 5,000 miles flown, and complimentary space-available upgrades.

Free ticket rewards are supplemental to the regular mileage that OnePass members earn on every trip, and which can be redeemed for even more free trips.

Free tickets will be automatically sent to qualifying members, eliminating the need to apply for the reward.

Qualifying travel includes most round trips in the mainland United States, Canada and Mexico that begin and end between Sunday and Friday of the same week, on tickets valued at $98 or more each way. Business class and first class travel to Hawaii, London, Paris, Japan, Australia and New Zealand also qualifies.

The free tickets may be used between Sept. 4 and Dec. 14, 1990. Free travel is permitted in the mainland United States or to select Mexico destinations. The tickets may be given to a friend or relative, but may not be sold or bartered. The free travel requires 14-day advance reservations and a Saturday stay. Travel is not available on peak travel dates around Thanksgiving (Nov. 16, 17, 21, 25 and 26) and seats may not be available on every flight.

DECATUR, GA (JAN. 29) PR NEWSWIRE - Orie E. Myers Jr., chairman of the board of Prime Bancshares Inc. (NASDAQ: PMBS) announced that Darrell D. Pittard was elected president and chief executive officer of the company and its subsidiary, DeKalb Federal Savings Bank effective March 31.

Pittard, an 18-year veteran of the Atlanta banking community, has served as DeKalb Federal's chief operating officer since August 1988. He succeeds William D. Hosford, whose retirement has been previously announced to take place on March 30. Hosford joined the savings bank in 1952 and has served as president and chief executive officer since 1973. Hosford and Pittard will both remain on the board of directors.

Prior to joining DeKalb Federal Savings Bank, Pittard was senior vice president at Bank South, where he was in charge of commercial banking and was formerly president and director of Heritage Bank. Upon his election, Pittard stated: "... Prime Bancshares is well positioned to compete in the 1990s. Throughout 1989 our efforts have been directed toward enhancing profitability, improving asset quality and increasing our market share. I believe that our financial strength combined with the experience and resourcefulness of our staff will enable us to take advantage of future opportunities. With total assets exceeding $519 million combined with our tangible capital-to-assets ratio of 6.4 percent at the end of 1989, we are among the nation's strongest financial institutions."

PHILADELPHIA (JAN. 29) PR NEWSWIRE - Inovex Industries Inc. (NASDAQ: IIIC) today announced that the preliminary work on its year-end audit indicates the need for a substantial one-time charge in a recently acquired subsidiary, in order to cover inventory and accounts receivable adjustments.

The president of the company stated, "It is too early to determine the amount involved. Most of the charges will be in the form of a pre-acquisition, prior period adjustment."

Inovex has been advised by its bank that, as a result of these adjustments the company is not currently in compliance with the terms of its original loan agreement. The company is currently working with the bank and others

regarding this matter.

Inovex also announced the appointment of a new chief financial officer for this subsidiary. His experience includes 20 years as the chief financial officer and subsequently chief operating officer of a subsidiary of a public company. He has instituted new financial controls and reporting procedures.

The president went on to say, "These corrective measures will allow the company to make decisions on a more realistic basis, and should have a positive effect on future earnings results."

#90029p0336 01/29/1990 ~PR Newswire

PHILADELPHIA (JAN. 29) PR NEWSWIRE - Energy project developer O'Brien Energy Systems (AMEX: OBS), today announced results for the second fiscal quarter and six months ended Dec. 31, 1989.

Revenues for both periods reached record levels, rising to $6,978,000 for the second quarter, from $6,171,000 for the same period last year, and reaching $18,255,000 for the six months versus $9,607,000 for the first half of fiscal 1989.

The company had a net loss of $480,000 or four cents per share for the second quarter versus net income of $6,000, or less than one cent per share for the same period last year.

For the six months there was a net loss of $111,000 or one cent per share compared to a net loss of $2,150,000 or 23 cents per share for the first half of fiscal 1989. Results for last year's six months include the first quarter cumulative effect of a change in accounting for development fees of $1,355,000 or 14 cents per share.

"The company does not expect losses during interim periods to be indicative of results for the full year," Joel D. Cooperman, vice president finance and chief financial officer, said. "The loss was moderated by the recognition of some development fees deferred last year, but did not include any revenues from O'Brien's Mazzaro landfill BioGas project in Pittsburgh which began delivering electricity to Duquesne Power and Light the first weeks in January.

"We are a project driven company that will generate rising revenues and earnings as our major wholly owned plants, now under construction, become operational. The first such facility, scheduled to begin operating this

May, is our 54MW ($29 million estimated annual revenues) Newark, N.J. plant," Cooperman concluded.

The company also announced that it is proceeding immediately with its planned convertible debenture offering. Vice president Bruce Levy said, "We have chosen to go forward with the offering despite the current stock price level, because we believe the benefits from use of proceeds will help us achieve many important objectives. Drexel Burnham Lambert will lead manage the offering."

#90029p0340 01/29/1990 ~PR Newswire

EATONTOWN, NJ (JAN. 29) PR NEWSWIRE - Syntrex Incorporated (NASDAQ-NMS: STRX) announced today that it has completed the acquisition of substantially all of the assets and liabilities of Lanier Business Systems a unit of Harris Corporation's (NYSE: HRS) Lanier Worldwide subsidiary.

Syntrex, which previously was represented in 17 cities, now has a field force of 550 networking sales, support and service representatives based in 40 cities nationwide and a total organization of 875 employees.

The Lanier unit has become the business systems division of Syntrex Incorporated. It will remain based in Atlanta. Bill Adams, who ran the Lanier unit, has been elected to serve as the new division's president.

The current Syntrex organization has become the network systems division of the company. Jim Bruno, Syntrex's president, will maintain that title and head up the network systems division, based in the company's Eatontown headquarters.

Adams and Bruno will report directly to Dan Sinnott, Syntrex's chairman and CEO.

The network systems division will focus on providing network consulting services, sales, and on-going training and support for networking platforms in the Fortune 2000, commercial business and services industry. It will also continue to design and manufacture its line of high-performance, fault tolerant network servers and workstations based on Intel 386 and 486 technologies that run its supported network operating systems platforms: NetWare, VINES, LAN Manager and UNIX.

The business systems division will use these network platforms to provide fully integrated networking solutions, including specialized applications, for its primary vertical markets, legal and government.

Each division will maintain and continue to support its current customer base and existing product lines.

The company's existing line of credit has been extended to January 1991, and will provide the working capital required by the combined organization in the near term. The company is currently seeking to arrange additional financing required to satisfy the anticipated working capital requirements of the combined organization beyond the near term.

"Analysts predict network solutions and systems integration will be a multi-billion dollar market in the 90's. In anticipation of the more complex networking requirements of the 90's, with networks spanning multiple locations, requiring integration of many network and client-server based applications and interconnecting to a variety of mini and mainframe hosts, Syntrex sought to expand its capabilities," said Sinnott, Syntrex's chairman.

"As a result of the acquisition we have expanded our distribution channel, doubled our number of trained networking professionals, can provide a wider range of services, and are clearly positioned to provide networking solutions on a nationwide basis."

#90029p0349 01/29/1990 ~PR Newswire
SEATTLE (JAN. 29) PR NEWSWIRE - Phoenix-based America West Airlines has ordered two 747-400s and taken options on two more, Boeing Commercial Airplane Group confirmed today.

The order, along with spares and training, is valued at approximately $280 million.

America West will use its new 747-400s to augment two 747-200s acquired in 1989 and two more 747-200s it plans to acquire from another airline later this year.

Don Monteath, America West senior vice president of operations, said the carrier has not selected engines for its 747-400s.

Michael Conway, the airline's president and chief operating officer, said acquisition of the 747-400s "is in keeping with our long term strategy of providing service throughout the Pacific Rim."

America West service to Hawaii began last year after the carrier obtained its 747-200s from KLM Royal Dutch Airlines.

To support its ambitious expansion, America West relies on an all-Boeing fleet consisting of 747s, 757s, 737s and de Havilland Dash 8 aircraft.

Conway noted that the America West Boeing fleet is one of the world's most modern with an average age of six years. He added that "the addition of these new 747-400s will enhance our operation dramatically."

The carrier -- which began service in August 1983 -- flies to 59 destinations in the United States and western Canada and is vying for Tokyo routes. Based on the airline's annual revenues, it has been recognized as a "major carrier" by the U.S. Department of Transportation.

Since its introduction, 246 of the -400s have been ordered by 26 customers. Forty-six of the -400s have been delivered since January 1989.

Today's announcement by America West brings to 968 the number of 747s ordered since the plane was introduced in April 1966.

STAMFORD, CT (JAN. 29) PR NEWSWIRE - Xerox Corporation (NYSE: XRX)

announced today it has elected to redeem all of its 10-5/8 percent notes, due 1993, on March 1, 1990, at a price equal to 100 percent of the principal amount totaling $100 million, plus accrued interest. The notes were issued in 1983.

The March 1 interest payment will be made in the usual manner, the company said, but on and after that date, interest will cease to accrue.

To receive payment, certificates for the notes must be surrendered to the trustee, Citibank, N.A., 111 Wall Street, 5th Floor, New York, N.Y., 10043 Attention Corporate Trust Services. Questions concerning the redemption should be directed to Citibank, N.A., customer services at 201-262-8644.

#90029p0356 01/29/1990 ~PR Newswire

HAUPPAUGE, N.Y. (JAN. 29) PR NEWSWIRE - Audiovox Corporation (AMEX: VOX) today announced net sales of $293,395,000 for the year ended Nov. 30, 1989 a decrease of 8.4 percent from fiscal 1988. The net loss for the 1989 fiscal year was $1,554,000 or 17 cents per share, compared to net earnings of $291,000 or 3 cents per share in fiscal 1988.

For the fourth quarter ended Nov. 30, 1989, net sales were $81,252,000, compared with $80,625,000 for the fourth quarter of 1988, an increase of $627,000 or 1 percent. The company posted a net loss for the quarter of $494,000, compared with a $1,754,000 net loss for the fourth quarter in 1988. The net loss of 5 cents per share for the fourth quarter in 1989, compares to a net loss of 19 cents per share for the fourth quarter in 1988.

Gross profit margins increased in the fourth quarter to 18 percent in 1989 from 16 percent in the fourth quarter in 1988. However, there was a general decline of gross margin by product lines from the third quarter level, principally as a result of increased competition and inventory reductions in anticipation of further branch and warehouse restructuring. Additionally, fourth quarter results were adversely impacted by an increased provision for bad debts in response to a softened retail economy.

John J. Shalam, president and chief executive officer, stated that "although the results for the fourth quarter and for fiscal 1989 were below our expectations, I am encouraged by the continuing trend and gradual improvements on a quarter-to-quarter basis, and expect this improvement to continue in 1990. We persevere in our work to restructure our distribution network and eliminate smaller regional branch and warehouse locations." Shalam continued that "the company has traditionally been unprofitable in the first quarter of its fiscal year,

however, despite the anticipated continued weakness in retail economy and new car sales, we believe the first quarter of 1990 will show improved operating results."

Audiovox Corporation produces and supplies a diverse line of automotive aftermarket products, including cellular telephones, automotive sound equipment, automotive accessories and cordless telephones.

FORTH WORTH, TX (JAN. 29) PR NEWSWIRE - Arch Petroleum Inc. (NASDAQ: ARCH) today announced net income of $1,500,000 (9 cents per common share) on revenues of $5,493,000 for the year ended Oct. 31, 1990, compared to net income of $330,000 (0 cents per common share) on revenues of $2,770,000 for fiscal 1988. Revenues climbed 98 percent during 1989 as compared to 1988, due primarily to increased oil and gas production.

Proved oil and gas reserves increased 139 percent to 9 million equivalent barrels at Oct. 31, 1989 from 3,769,000 equivalent barrels at Oct. 31, 1988.

Cash generated from operations before changes in working capital advanced 220 percent to $2,228,000 in fiscal 1989 from $697,000 in fiscal year 1988.

"We are pleased to report that this significant growth in earnings and cash flow occurred during a year when our efforts were focused on building the company's oil and gas reserve base for the future," said Larry Kalas Arch's president and chief executive officer.

PITTSBURGH (JAN. 29) PR NEWSWIRE - Allegheny International, Inc. (AI) (NYSE: AG) today announced it expects to have U.S. Bankruptcy Court approval within the next week to submit its latest plan of reorganization to creditors and shareholders for a vote. Acceptance of the plan, submitted to the court last month, would pave the way for the Pittsburgh-based consumer products company to emerge from chapter 11 protection during the first half of this calendar year.

AI said that it believes the plan will have broad constituent support and that it believes it can be confirmed shortly after voting would be completed in late March. The plan provides for the retention of all AI's consumer products businesses as a group.

In a related development, AI's board of directors said it had "concerns" about a Jan. 25, 1990 offer by Japonica Partners, a New York investment and advisory firm reportedly with no operating assets, to acquire AI. The board said it has questions concerning Japonica's ability to consummate the proposal and noted that it has directed AI's advisors to explore those concerns with Japonica prior to considering any matters regarding Japonica's proposal.

MINNEAPOLIS (JAN. 29) PR NEWSWIRE - Nash Finch Co. (NASDAQ: NAFC) today announced that it has completed its acquisition of Timberlake Grocery Co. of Macon.

Nash Finch had previously announced its intention to acquire all of the stock of the Macon, Georgia-based wholesale grocery company for cash. The amount of the purchase was not disclosed.

One of the largest wholesale grocery companies in Georgia, Timberlake supplies products to supermarkets, including a voluntary group of Red & White stores, and convenience stores throughout Georgia and northern

Florida from a 250,000-square- foot distribution center in Macon.

Harold B. Finch, Nash Finch chairman, said, "We are pleased to complete this acquisition; the Timberlake operation expands our presence in the Southeast, a key growth area for the company."

Timberlake will be operated as a wholly owned subsidiary of Nash Finch, which operates 17 other distribution centers, 12 of them located in the Midwest and five in North Carolina and Virginia. Present managers and employees of Timberlake will be retained.

Nash Finch is one of the largest food wholesalers in the country, supplying products to approximately 600 affiliated supermarkets and some 5,000 independent retailers in 24 states. The company also owns and operates supermarkets, warehouse stores and mass merchandise stores in 12 states and produce marketing subsidiaries in California.

DALLAS (JAN. 29) PR NEWSWIRE - Edisto Resources Corp. (AMEX: EDS) announced today that on Feb. 15, 1990 it would redeem 208,083 shares of its $2.60 Senior Cumulative Convertible Preferred Stock (ASE "EDS pr") for

Common Stock issued by Edisto. Certificates to be redeemed were selected by lot from registered holders as of Jan. 26, 1990. Holders of certificates selected for redemption will be notified by Edisto in early February. An aggregate of 275,281 shares of Common Stock will be issued to meet redemption obligations for this quarter. Cash will be paid in lieu of issuing fractional shares.

Mandatory quarterly redemptions of 208,083 Preferred Shares will occur on each May 15, Aug. 15, Nov. 15, and Feb. 15 and continue until May 15, 1992 when all Preferred Stock then outstanding will be redeemed. Preferred Stock may be redeemed, at the option of Edisto, in either Common Stock, cash or any combination thereof, at a price equal to $20 per share. Edisto will have 1,872,751 Preferred Shares outstanding following the Feb. 15, 1990 redemption.

James R. McNab Jr., chairman and CEO, said, "We elected to effect the redemption with Common Stock to maximize cash available for capital investments. We have already budgeted an aggressive 1990 capital expenditure program and are considering a number of additional exploration and development projects. Edisto expects to announce details on its budgeted operations in the Gulf of Mexico and for onshore projects within a few weeks."

Edisto Resources Corp. is a Dallas-based, Delaware corporation incorporated in 1970. As a result of a restructuring completed on Dec. 15 1989, former holders of Senior Cumulative Convertible Preferred Units of NRM Energy Co., L.P. became holders of the Senior Cumulative Convertible Preferred Stock of Edisto. Edisto's consolidated activities include the production of oil and gas, the exploration for, and development of, oil and gas reserves and the acquisition of oil and gas properties.

MINNEAPOLIS (JAN. 29) PR NEWSWIRE - Inter-Regional Financial Group Inc. (NYSE: IFG) announced that Fred R. Friswold today submitted his resignation as president and chief executive officer of its Dain Bosworth Incorporated subsidiary. Friswold plans to resign as member of the IFG board of directors at its Wednesday, Jan. 31 meeting.

Friswold, who joined Minneapolis-based Dain Bosworth in 1958 as a securities analyst, will leave the company after a 32-year career. He was appointed chief executive officer of the firm in 1988 following the death of Chairman and Chief Executive Officer Thomas Dale Jr.

"Fred's contributions to this company and its employees have been enormous " said Irving Weiser, IFG president and chief executive officer. "Over the past two years, he has guided Dain Bosworth through a difficult period for the firm and the securities industry. During the same two-year span, Dain Bosworth's return on equity has been in the top quartile of all regional securities firms and, under Fred's leadership, the company continued its string of 23 consecutive quarters of profitability."

Dain Bosworth's four executive vice presidents, Monte Anderson, Douglas Coleman, James Dlugosch and Patrick Rile, will continue to manage the firm's business and will report to Weiser until a new chief executive officer is named.

"Management of Dain Bosworth will be in extremely capable hands," said Friswold. "The 1990 strategic business plan is in place, and the combined 85 years of experience of the executive vice presidents will help the company move forward during this transitionary period."

IFG provides full-service securities and investment banking services in 20 states through its subsidiary firms Dain Bosworth and Rauscher Pierce Refsnes Inc., Dallas.

NEW YORK (JAN. 29) PR NEWSWIRE - BFS Bankorp, Inc. (NASDAQ: BFSI), the holding company for Bankers Federal Savings, FSB, today reported that net income for the first quarter ended Dec. 31, 1989 increased 6.3 percent to $762,000 or $.53 per share, as compared with net income of $717,000 or $.50 per share, in the prior year's comparable quarter.

Commenting on the results, James A. Randall, president and chief executive officer, noted: "We are pleased that we were able to increase our earnings in the quarter, despite a generally difficult banking and real estate environment. While most thrifts are losing deposits, the banks' grew $10.8 million during the quarter.

"We have experienced a further increase in the level of our loans delinquent 90 days or more, now at 2.92 percent of assets. While this resulting non-accrual of interest has had an adverse impact on our net interest margin and earnings, we continually review each of these individual loans to ensure that our current loan loss reserves are adequate."

During the quarter, mortgage originations decreased to $14.7 million as the bank further tightened its already conservative underwriting standards.

BFS Bankorp, Inc., the parent holding company of Bankers Federal Savings, FSB, is a SAIF-insured savings bank headquartered in New York City. The bank is a community-oriented financial institution serving Manhattan, Queens and Brooklyn through five branch offices. As of Dec. 31, 1989, the bank has total assets of $444.5 million, deposits of $333.4 million and stockholders' equity of $24.1 million.

#90029p0383 01/29/1990 ~PR Newswire

LOS ANGELES (JAN. 29) PR NEWSWIRE - Unocal Corp. (NYSE: UCL) today reported 1989 preliminary net earnings of $260 million, down from $480 million in 1988. Earnings per share, based on 234 million shares outstanding, were $1.11. Earnings per share in 1988 were $2.06. Both years included a number of one-time earnings events.

Richard J. Stegemeier, Unocal chairman, president and chief executive officer, said that after adjusting for the significant one-time events, 1989 earnings were up by 24 percent over the previous year. The gain reflected improved petroleum exploration and production earnings, including settlements of several natural gas contract disputes, which were partially offset by lower refining and marketing earnings.

The 1989 net earnings include a $98 million loss related to the sale of the Obed Mountain coal mine in Canada, a discontinued operation. In 1988, net earnings included a $456 million gain from the cumulative effect of a change in the accounting principle for income taxes.

The 1989 earnings from continuing operations include a $63 million gain on the sale of assets related to the formation of The UNO-VEN Company, a petroleum refining and marketing partnership in the Midwest, and a $41 million provision for the suspension of operations at the Beaumont (Texas) Refinery.

The 1988 earnings from continuing operations include aftertax charges of $341 million from the write-down of certain company assets and a $98 million gain from the sale of the company's headquarters property.

For the fourth quarter 1989, Unocal reported a preliminary net loss of $26 million, or a loss of 11 cents per share. Excluding the the loss from discontinued coal mining operations, earnings from continuing operations for the period were $66 million. This included the effects of the Beaumont Refinery suspension and the UNO-VEN joint venture.

In the fourth quarter 1988, earnings were $141 million, or 60 cents per share, and included the gain from the sale of the company's headquarters property.

On a company-wide basis, cash flow from operations and assets sales in 1989 totaled $1.83 billion, compared with $1.41 billion last year. The increase was due primarily to the formation of UNO-VEN and the sale of the Obed mine.

WOODBURY, NY (JAN. 29) PR NEWSWIRE - International Bankcard Corporation (NASDAQ: IBSCU, IBSC) has announced it has recently entered into the dynamic travel products and reservation processing business with the formation of two new wholly owned subsidiaries, A.M. Corporation and IBSC-Cortell, Inc. A.M.

Corporation has recently contracted to purchase the 60,000 member Celebrity Travel Club, while the other new company IBSCU-CORTELL will involve itself in travel product development and reservation processing.

Celebrity Travel Club is a dominant marketing force in the rapidly expanding time-share and resort development industry worldwide. Through its air-travel rebate and "mini vacation" packages, Celebrity Travel Club has been able to offer timeshare marketing companies and resort developers a much needed add-on incentive.

Robert Feuerzeig, chairman of International Bankcard Services Corporation stated that this enhancement to their credit card products is a natural

expansion and fits nicely with future projected programs.

"The synergy between credit cards and travel is well known," stated Feuerzeig. He added, "IBSC is following in the footsteps of companies like American Express and TWA, who have also have formed travel clubs to take advantage of their market and clients bases."

A.M. Corporation and its travel club will be earning revenue from membership fees that are obtained through renewals as well as the approximate 10,000 new members that join each year. The IBSC-CORTELL division will be headed by Raymond M. Cortell, highly respected within the travel industry as a pioneer in travel and tourism.

His 30 years of experience and expertise are expected to help IBSC-Cortell grow rapidly over the next few months. With this relationship, IBSC can now offer extremely attractive travel packages to its newly acquired travel members.

IBSC will also now have the capabilities of creating a private label MasterCard Credit Card Program with travel related programs to all its existing affinity groups.

International Bankcard Services Corporation has offices in New York and California.

NEWPORT BEACH, CA (JAN. 29) PR NEWSWIRE - Pacific Scientific Company (NYSE: PSX) Friday announced that the company is continuing in its stock repurchase plan, first announced in December 1987, to repurchase up to 275,000 shares of the company's common stock -- approximately 5 percent of all shares currently outstanding. To date, approximately 75,000 shares have been repurchased under this 1987 plan. The repurchased stock is available for general corporate purposes including acquisitions. Purchases of these shares will be made from time to time on the open market or in negotiated transactions.

The company expects to announce its 1989 results within the next few weeks. Edgar S. Brower, president and chief executive officer, stated that the company's order backlog at the end of 1989 was $98 million, equal to approximately half of expected 1990 sales. The current earnings outlook for 1990 is for continued improvement.

Pacific Scientific's core business is designing, manufacturing and

marketing technology based proprietary products for niche markets. The principal products are electric motors and controls; aircraft equipment, including fire suppression systems, electric generators and alternators; and electric instruments for industry and electric utilities.

MENLO PARK, CA (JAN. 29) PR NEWSWIRE - Consolidated Freightways Inc. (NYSE: CNF) announced today that 1989 net income for common shareholders was $12.0 million or 33 cents per share on record revenues of $3.8 billion.

The 1989 financial results compare with net earnings of $113.2 million or $3 per share in 1988 on revenues of $2.7 billion.

In the fourth quarter of 1989, the company reported a loss of $35.5 million, or $1.01 a share after paying a preferred dividend of $3.2 million. The loss includes a one-time acquisition write-off of $19.1 million in the company's air freight activities.

The fourth quarter results compare with net income of $40.3 million, or $1.07 a share in the fourth quarter of 1988. Revenues in the quarter were up 38.2 percent from a year ago to $991.3 million, reflecting the acquisition of Emery Worldwide and growth in the company's trucking components.

Full-year results include the adoption of the Statement of Financial Accounting Standards No. 96, which has the cumulative effect of an $11.3 million increase in earnings from a reduction in deferred taxes reflecting the lower statutory rates of the Tax Reform Act of 1986.

CF Motor Freight, the company's North American long-haul trucking subsidiary, completed 1989 with revenues of $2.0 billion, an increase of 8.7 percent from a year ago. Operating income was $107.9 million, a decrease of 9.4 percent from 1988.

For the quarter, CF Motor Freight had revenues of $495.3 million, an increase of 3 percent from the fourth quarter a year ago. Operating income was $15.2 million, a decrease of 55.8 percent from the fourth quarter in 1988.

Con-Way Transportation Services, which includes the company's five regional trucking companies and rail and ocean intermodal services, had record annual revenues of $558.5 million, an increase of 20.4 percent from a year ago. Operating income for Con-Way Transportation Services totaled $40.4 million, a 21 percent increase.

In the fourth quarter, Con-Way Transportation had revenues of $142.7 million, an increase of 14.4 percent from a year ago. Operating profits were $6.9 million, a decline of 26.6 percent from the fourth quarter levels a year ago.

The 1989 annual revenues for Emery Worldwide, which was acquired by the company on April 3 and merged with CF AirFreight, totaled $1.2 billion. Emery Worldwide reported an operating loss of $66.0 million, plus one-time acquisition costs for the year of $31.4 million related to facility closures and tariff consolidation problems from the former Purolator Courier, Emery Air Freight and CF AirFreight companies.

In the fourth quarter, Emery Worldwide had revenues of $353.4 million and an operating loss of $40.3 million, plus a one-time acquisition cost of $19.1 million from the tariff consolidations.

Consolidated Freightways Inc., is a diversified transportation company with businesses in long-haul trucking, regional overnight trucking, air freight and intermodal rail and ocean services. The company employs 40,000 people in 90 countries worldwide.

LOS ANGELES (JAN. 29) PR NEWSWIRE - Molycorp Inc., a Unocal (NYSE: UCL) company, and Sumitomo Metal Industries Ltd. (SMI) have established a joint venture company, Sumikin Molycorp Inc., to develop and market lanthanide and yttrium products (also known as rare earths) in Japan.

According to R. Gene Dewey and Yasuo Shingu, presidents of Molycorp and SMI, respectively, the joint venture will combine the expertise and resources of both companies to expand the lanthanide business in Japan where a high growth rate is forecast, especially in high technology fields such as electronics.

Lanthanides are widely used in a variety of industrial and electronic products, including permanent magnets, optical glass, catalytic converters for automobile exhaust emissions, refining catalysts and phosphors and face plate glass in color televisions. Yttrium is a promising material for use in superconductivity.

Sumikin Molycorp Inc., capitalized at $2 million and established officially Jan. 24 in Japan, holds exclusive rights to distribute and sell Molycorp lanthanide products in Japan. The company also will produce certain lanthanide products in Japan, based on technology developed and

licensed by Molycorp.

SMI holds 67 percent of the joint venture company and Molycorp, 33 percent.

Molycorp, the only integrated primary producer of lanthanides in the world also mines, processes and markets molybdenum and, through a 45-percent ownership in a company in Brazil, niobium. Established in 1920, it has headquarters in Los Angeles at the home office of its parent company, Unocal Corporation, which reported revenues of about $10 billion in 1988. Molycorp employs a work force of about 600.

SMI is one of the world's largest steel producers with annual sales of about $7 billion. Established in 1949, it employs about 21,000 people.

FORT WORTH, TX (JAN. 29) PR NEWSWIRE - The Western Company of North America (NYSE: WSN) announced today that it has extended to 5 p.m. New York City time on Feb. 1, 1990 the date by which it may accept for payment Series B Notes tendered in response to its previously announced Consent Solicitation and Offer to Purchase. As also previously announced, all holders of Series B Notes have tendered such Notes pursuant to Western's offer. Western has offered to purchase such Notes, which aggregate $115 million face amount, at $635 for each $1,000 of principal amount. The purpose of the extension is to provide the company time to consummate a contemplated offering of convertible subordinated debentures, the proceeds of which are intended to be used to consummate the tender offer. The offer was previously scheduled to expire Jan. 29, 1990. A registration statement covering the proposed convertible subordinated debenture offering was filed on Nov. 22, 1989 with the Securities and Exchange Commission.

The Western Company of North America provides pressure pumping services which include cementing, fracturing and acidizing, and offshore drilling internationally. Western's common stock is traded on the New York Stock Exchange. Symbol -- WSN.

PENNSAUKEN, N.J. (JAN. 29) PR NEWSWIRE - MEDIQ Inc. (AMEX: MED), a provider of healthcare and financial services, today reported first quarter results for the three months ended Dec. 31, 1989.

Revenues were $84,224,000 compared to $77,048,000 for the same period during fiscal 1989, an increase of 9 percent for the first quarter of fiscal 1990. Net income was $841,000 as compared to $1,584,000 or 4 cents per share vs. 7 cents per share.

Commenting on the results, Bernard J. Korman, president and chief executive officer of MEDIQ, noted that although reported revenues approximated the company's business plan, operating profit was adversely affected by off business plan performance at the company's mental health management, physical examination and optical subsidiaries. The company's financial services subsidiary, Copelco Financial Services Group Inc., medical equipment rental and pharmaceutical packaging companies continued to perform well.

MEDIQ Inc., whose shares (MED and MED.Pr) and debentures (MED.C) are traded on the American Stock Exchange, provides products and services to hospitals, nursing homes, healthcare professionals and consumers through its subsidiaries.

#90029p0415 01/29/1990 ~PR Newswire
PITTSBURGH (JAN. 29) PR NEWSWIRE - The USS division of USX Corp. (NYSE: X) has announced development of a new plate steel grade, designed primarily for applications in critical structural members of offshore drilling platforms.

The new plate grade, to be marketed under the trademark USS "O"-TEN steel, is processed on off-line direct quench-and-temper facilities. It was developed by USS in response to specifications adopted by the American Petroleum Institute (API) to meet the more demanding requirements of deeper, harsher conditions at offshore drilling and production sites.

While developed specifically for those API requirements, the new steel plate also has applications in other areas where these improved characteristics are required, USS said. Other potential applications include pressure vessels, penstocks, highly stressed components of heavy construction and transportation equipment, and fabricated plate girders and columns.

USS said prequalification welding evaluations confirmed that the new low-carbon API 2Y-50 steel meets all of the Petroleum Institute's requirements. It is fully competitive in properties and welding performance with API 2W-50 steels, which are processed on in-line direct quench equipment and are not available from any domestic producer.

The API specifications were published as part of an effort to reduce fabrication costs and improve weldment performance in offshore platforms where enhanced toughness and better weldability are important. The new steel grades are intended to replace the 50-ksi, API 2H steels which served for many years as the high-performance structural material for offshore platforms.

USS "O"-TEN plate steel is available through the USS plate sales organization.

CALGARY, ALBERTA (JAN. 29) PR NEWSWIRE - Gulf Canada Resources Limited (AMEX, Montreal: GOU) announced that it has filed a notice with the Toronto and Montreal stock exchanges to permit the company to make normal course purchases of its outstanding ordinary shares through the facilities of such stock exchanges.

Gulf Canada Resources has also filed notice of intention with Canadian securities regulatory authorities to permit it to repurchase its outstanding ordinary shares through the facilities of the American Stock Exchange in the United States.

The actual number of shares which may be purchased, and the timing of any purchases, will be determined by Gulf Canada Resources. The aggregate number of ordinary shares which may be purchased by Gulf Canada Resources through all the exchanges on which its ordinary shares are listed will not exceed 7,793,800 ordinary shares, representing approximately 5 per cent of the issued and outstanding ordinary shares. Purchases of ordinary shares on the Toronto and Montreal stock exchanges pursuant to the normal course issuer bid may commence on Feb. 1, 1990, and will terminate not later than Jan. 31, 1991.

Gulf Canada Resources has not purchased any ordinary shares under its normal course issuer bid that began on Feb. 1, 1989, and which ends on Jan. 31, 1990.

Gulf Canada Resources believes that the current market price of its ordinary shares does not adequately reflect the value of its business and

its future business prospects. As a result, Gulf Canada Resources believes that its outstanding ordinary shares represent an attractive investment and an appropriate and desirable use of its available funds.

#90029p0420 01/29/1990 ~PR Newswire

SAN JOSE, CA (JAN. 29) PR NEWSWIRE - Following successful completion of Channel International's tender offer for Wyse Technology (NYSE: WYS), Wyse announced today a new board of directors, as well as its executive officers.

The new board replaces the previous Wyse board of directors. Members of the new board are Morris Chang who, as previously announced, is chairman of the board and chief executive officer of Wyse; Nelson Chang, chairman of China Management Systems Corp.; Jeffrey Koo, chairman of China Trust Co. Ltd.; Matthew Miau, chairman of Mitac International Corp.; and Daniel Wu, who also was elected president of Wyse.

As previously announced, Bernard Tse, formerly chairman and chief executive officer of Wyse, is vice chairman of the new organization.

In announcing Wu's appointment, Morris Chang said, "We are pleased to have an executive with Daniel's strong business experience and management capabilities leading the day-to-day operations at Wyse. Daniel has particularly strong credentials in turnaround situations, which will help tremendously as we work to make Wyse an even stronger company than it is today."

Prior to joining Wyse, Wu was executive vice president of Grand Pacific Petrochemical, Taiwan's second largest petrochemical company. There he played a key role in taking an operation that had experienced several years of losses to profitability in a period of about a year. Earlier in his career, Wu worked in the United States for Mobil Corp. and Arco Chemical Co. over a period of 10 years. He holds an undergraduate degree in chemical engineering from the National Taiwan University and a doctorate in the same discipline from the University of Delaware.

"I am honored to be joining Wyse Technology," Wu said, "Over the months I have been able to observe the company, I have been very impressed with its people, products and distribution capabilities. Accordingly, there is a great deal of continuity in the executive staff I have named."

Reporting to Wu and continuing in their current roles are Dave Everett, senior vice president, Sales and Corporate Marketing; Howard Graham, senior vice president, Finance and Administration and chief financial

officer; Paul McIntire, senior vice president, Operations; Chuck Lejsek, president, Link Technologies; and Jim Sha, vice president, Advanced Systems.

New appointments are William Seymour, vice president, Personal Computer Products and Larry Lummis, acting vice president, Terminal Products. Previously Seymour had served as vice president, Corporate Operations and Lummis was acting head of the Personal Computer group.

Wyse Technology is a leading independent supplier of microprocessor-based products, which include terminals, IBM PC-compatible computers, monitors and multiuser systems. The company sells its products through customers that add value, such as distributors, value added resellers and original equipment manufacturers. Headquartered in San Jose, Wyse operates sales offices across the United States and in Canada, Australia, Hong Kong and Western Europe. The company employs about 2,800 people worldwide. Revenue for fiscal 1989 was $452.3 million.

#90029p0425 01/29/1990 ~PR Newswire

FAIR LAWN, N.J. (JAN. 29) PR NEWSWIRE - Warner Computer Systems, Inc. (NYSE: WCP) today announced sales and earnings for the fiscal year ended Oct. 31, 1989.

For the fiscal 1989, the company realized record sales of $26,620,000 compared to $22,121,000 for the preceding fiscal year, while income recorded in fiscal 1989 was $1,340,000 ($ .20 per share) compared to $1,933,000 ($.31 per share) in fiscal 1988 before the effect of a change in accounting principle recorded in fiscal 1988. The fiscal 1989 results also include a $1,043,000 charge to earnings ($.09 per share), which takes into account a potential inventory writedown due to the restructuring of the company's microcomputer division. Net income for fiscal 1989 was $1,340,000 ($.20 per share) compared with $2,433,000 ($.39 per share) in fiscal 1988, which included $.08 per share due to a change in accounting principle in fiscal 1988.

For the three months ended Oct. 31, 1989, the company's sales were $7,625,000 as compared to $5,456,000 for the same period last year, and the net loss for the three months ended Oct. 31, 1989 was ($238,000) (($.04) per share) as compared to net income of $492,000 ($.08 per share) for the same period last year. The net loss for the fourth quarter of fiscal 1989 includes a $1,043,000 charge to earnings ($.09 per share) as a result of restructuring of the company's microcomputer division.

Harvey Krieger, president and chairman of the board of directors of the company, stated that the restructuring of the microcomputer division, including the formation of a new wholly owned subsidiary, Microcorp, Inc., which has entered into contract with MicroAge Computer Centers, Inc. of Tempe, Ariz., will allow the company to significantly reduce its investment in inventory and related support costs. The affiliation with MicroAge will allow Microcorp to take advantage of its long-standing experience in microcomputer technology and excellent service reputation with major clients in the greater New York metropolitan area. It also provides Microcorp with the potential to obtain national service contracts with clients that have multiple geographic locations.

Warner is a New York Stock Exchange Company, providing administrative and data processing services to insurance companies; data bases to the financial community and investors, and sales and maintenance of microcomputers to business and professional users.

SAN ANTONIO (JAN. 29) PR NEWSWIRE - National Bancshares Corp. of Texas (NASDAQ: NBCTG) announced today that its board of directors had determined not to make on Feb. 1, 1990 the scheduled payment of interest on its $25 million, 10 percent Convertible Subordinated Debentures, due 2006.

On Jan. 18, 1990, NBC announced that it filed with the Securities and Exchange Commission a Registration Statement relating to a debt exchange offer pursuant to which each $1,000 principal amount of 10 percent Convertible Subordinated Debentures due 2006 would be exchanged for $1,000 principal amount of Increasing Rate Senior Subordinated Debentures due 2006 and 10 common stock purchase warrants. The debt exchange offer is part of a proposed recapitalization of NBC as announced previously on July 21, 1989. The offering will be made solely by means of a prospectus.

National Bancshares Corp. of Texas is a multi-bank holding company based in San Antonio with member banks located in San Antonio, Houston, Corpus Christi, Austin, the Rio Grande Valley and several other communities in Central and South Texas.

CLEARWATER, FL (JAN. 29) PR NEWSWIRE - Fortune Financial Group, Inc. (NASDAQ: FORF) announced today that the board of directors has approved the termination of a letter agreement dated Dec. 23, 1988 with The Dyson-Kissner-Moran Corporation ("DKM").

The letter agreement imposed restrictions for a 24-month period on purchases by DKM of Fortune Financial's voting securities and on certain other rights of DKM as a shareholder of Fortune Financial.

The letter agreement had been entered into in connection with the negotiation of a then proposed acquisition of Fortune Financial by DKM, which proposed acquisition was terminated by DKM in June 1989.

The purpose for terminating the letter agreement is to permit DKM to increase its beneficial ownership of Fortune Financial above 9.9 percent. Any such increase will require receipt by DKM of necessary regulatory approvals.

Fortune Financial said it has been advised by DKM that DKM is currently exploring the possibility of obtaining such regulatory approvals to increase its beneficial ownership to up to 20 percent of the outstanding Fortune Financial shares.

DKM beneficially owns 9.9 percent of the outstanding common stock of Fortune Financial. John A. Moran, DKM's chairman and chief executive officer, was recently elected as chairman and chief executive officer of Fortune Financial.

BALTIMORE, MD. (JAN. 29) PR NEWSWIRE - Westronix Inc.'s common stock has been included for quotation in the National Association of Securities Dealer's Automated Quotations System (NASDAQ) via a temporary exception from certain requirements. Westronix's NASDAQ symbol is WESXC.

As previously announced, on Dec. 1, 1989, Westronix completed its acquisition of Rosenbalm Aviation Inc. for approximately $55 million, and on Dec. 15, 1989, Westronix completed the sale of substantially all of the assets of its Salt Lake City facility. Westronix stated that its ultimate objective is to operate Rosenbalm Aviation as its sole business.

Rosenbalm Aviation is an aviation services company which operates and maintains cargo aircraft and provides related services for air freight forwarders. For the year ended Dec. 31, 1988, Rosenbalm reported sales and operating income of $46.9 million and $12.3 million, respectively.

During the first nine months ended Sept. 30, 1989, Rosenbalm reported sales and operating income of $42 million and $11.4 million versus comparable 1988 results of $33.6 million of sales and $9.8 million of operating income.

MEDFORD, MA (JAN. 29) PR NEWSWIRE - Regional Bancorp, Inc., (NASDAQ: REGB) announced today its consolidated net income for the quarter ended Dec. 31, 1989, was $582,000, or 21 cents per share, compared with $954,000 or 34 cents per share, for the same period in 1988.

Consolidated net income for the year ended Dec. 31, 1989, was $2,897,000, or $1.03 per share, compared with $4,196,000, or $1.33 per share, for the same period in 1988. Net interest income for 1989 was $14,948,000, compared with $14,527,000 for 1988.

Net income declined primarily as a result of securities losses of $614,000 for 1989 vs. securities gains of $292,000 for 1988, increased operating expenses and additions to the provision for possible loan losses in the third and fourth quarters of $294,000 and $271,000, respectively. Total loan loss reserve was $1,391,000 at Dec. 31, 1989, or 116 percent of non-performing loans. The aggregate principal amount of non-performing loans as of Dec. 31, 1989, was $1,200,000, or .30 percent of total loans outstanding on that date.

Stockholders' equity at Dec. 31, 1989, was $69,756,000, representing a book value of $26.36 per share, an increase from $25.60 per share book value at Dec. 31, 1988.

Regional Bancorp, Inc. is the holding company for Medford Savings Bank, a Massachusetts-chartered savings bank. The bank offers a wide variety of services to both business and retail customers throughout eastern Massachusetts, from seven retail banking locations north of Boston.

#90029p0432 01/29/1990 ~PR Newswire

LOS ANGELES (JAN. 29) PR NEWSWIRE - Unocal Corp. (NYSE: UCL) today said it has adopted a stockholder rights plan designed to protect the interests of its stockholders in the event of a takeover attempt.

Richard J. Stegemeier, Unocal chairman, president and chief executive officer, said, "We believe this rights plan is in the best interests of our shareholders. The plan enables our board of directors to carry out its duties to shareholders in the event of a hostile takeover proposal. This plan is very much like the several other plans adopted by companies in our industry.

"We know of no current takeover proposal affecting Unocal, but we believe it is a prudent course of action in view of the merger and acquisition environment."

Details of the plan will be mailed to stockholders in February. Under terms of the plan, one right will be distributed for each share of common stock held of record at the close of business on Feb. 12, 1990. The rights could be triggered in the event any person acquires 15 percent or more of the outstanding common stock of Unocal.

Each right (other than rights held by the 15 percent shareholder) will allow the holder to purchase units of a Unocal preferred stock having a market value equal to two times the exercise price.

If Unocal were to be merged into another corporation, each right (other than rights held by a 15 percent shareholder) would allow the holder to purchase shares of the acquiring corporation having a market value equal to two times the exercise price.

The rights expire on Jan. 29, 2000, and are subject to redemption by the board of directors at $0.01 per right at any time before the rights become exercisable.

DALLAS (JAN. 29) PR NEWSWIRE - The Texas Instruments (NYSE: TXN) Board of Directors elected William (Bill) S. Lee and William (Bill) B. Mitchell directors of the company, increasing the number of board members to 12.

Lee, 60, is chairman and chief executive officer of Duke Power Co., an electrical utilities company based in Charlotte, N.C. He joined Duke Power 35 years ago and has held his current position since 1982. Lee will join the TI Board March 1, subject to regulatory authorization.

Mitchell, 54, is an executive vice president of Texas Instruments and president of its Defense Systems & Electronics Group, a major supplier of military avionics and weapon systems. He also is responsible for TI's Information Technology Group, a supplier of integrated automation systems. Mitchell joined TI in 1961 and has been an executive vice president since 1987.

William S. Lee joined Duke Power as a junior designer in 1955 after serving in the U.S. Navy Civil Engineering Corp. Following several promotions within Duke Power's engineering department, he was named vice president of engineering in 1965 and a board member in 1968. He was

promoted to senior vice president of engineering and construction and joined the company's executive committee in 1971. He became executive vice president in 1976, president and chief operating officer in 1978, and chairman and chief executive officer in 1982.

From its founding in 1979 until March 1982, Lee was chairman of the board of the Institute of Nuclear Power Operations, an organization established by all the investor-, government- and cooperatively-owned nuclear utilities to evaluate and assist each of the United States' nuclear power plants in achieving safety excellence. He also was a catalyst in the founding of the World Association of Nuclear Operators in 1987, established to improve the safety and operating performance of nuclear plants throughout the world. Members include the United States, the Soviet Union and 29 other nations with nuclear facilities.

Lee also serves on the board of directors of J. P. Morgan & Co., Morgan Guaranty Trust Co. and the Liberty Corporation.

Mitchell joined TI in 1961 as a mechanical engineer for the Shrike missile program. He later participated in the design and development of a number of missile systems in the areas of advanced guidance, control and airframes. In 1968, he became program manager for the Bulldog missile guidance and control development.

Mitchell was a key member of the pre-award design and development team for the high-speed anti-radar missile (HARM), and in 1975 became missile development engineering manager. After being named HARM program manager in 1977, he guided the program through successful development and test and into full-scale production.

Mitchell was named manager of the Defense Suppression Division in 1981. In 1982 he was elected an assistant vice president of TI and vice president of the Equipment Group, now called the Defense Systems & Electronics Group (DSEG).

Mitchell was named president of DSEG in 1984, TI executive vice president in 1987, and in 1989 he assumed responsibility for the Information Technology Group after TI combined its computing, hardware and software capabilities into a single strategic business.

PITTSBURGH (JAN. 29) PR NEWSWIRE - In response to a 13-D filing made today, National Intergroup Inc. (NYSE: NII) stated that Centaur Partners and its principals, Abbey Butler and Melvyn Estrin, have nothing to add to

the existing restructuring program which the company has been actively pursuing for the past year.

This program, which has the unanimous approval of the board of directors, is proceeding according to schedule, and has involved the divestiture of the group's non-core assets and a refocusing of its efforts on its core distribution businesses. A number of decisive steps have already been taken toward this end, including the sale of its aluminum fabrication and extrusion businesses for more than $135 million. In addition, the company is moving toward a definitive agreement on the sale of the remaining aluminum division to Southwire Co. The company stated that significant progress has been made in discussions with NKK regarding the sale of the company's 50 percent interest in National Steel Corp.

With the additional benefits of a 50 percent headcount reduction at NII's Pittsburgh headquarters, a significantly strengthened balance sheet, together with a stronger performance at FoxMeyer, which is expected to report a strong increase in fiscal 1990 earnings, NII believes that this program will leave stockholders with an attractive, focused distribution company.

NII strongly believes that it would be detrimental to the interests of both the company and its shareholders to accelerate this restructuring program and may significantly delay the process.

#90029p0441 01/29/1990 ~PR Newswire

SAN DIEGO (JAN. 29) PR NEWSWIRE - Great American Bank, SSB, (NYSE: GTA) has announced that it intends to sell all or part of its real estate development subsidiary, Great American Development Co. (GADCo), by July 1, 1990.

"Under the Financial Institutions Reform, Recovery and Enforcement Act, savings institutions must over time deduct from their capital base loans and investment in real estate development and certain other subsidiaries when determining compliance with new capital rules. This makes it no longer feasible for Great American to serve as a lender to or investor in GADCo," said Roger K. Lindland, president and managing officer. "Our understanding is that this issue is facing most S&Ls with real estate development subsidiaries."

Lindland said the bank expects to realize a profit from the sale. Kenneth Leventhal & Co., a prominent firm specializing in real estate, has been retained to assist in establishing valuation benchmarks to be used in evaluating offers.

Up for sale is GADCo's position in 15 residential and 18 commercial joint ventures and direct development projects. The bulk of the projects are located in Southern California.

Lindland said the bank plans to form a holding company by mid-year, which requires both shareholder and regulatory approval. The plan is for the holding company to have a real estate development subsidiary with its own capital separate from the bank and to have certain GADCo assets transferred to the new entity. A request for regulatory approval of the transfer is included in the bank's application to form a holding company, but no assurances can be given that the approval will be obtained.

Real estate development has been a profitable business for Great American. In 1988 the company earned $26.1 million through this activity. September 1989 year-to-date results included profits of $48.4 million.

Lindland said Great American's capital plan contemplates only minimal earnings from real estate development beyond a projected gain on the bulk sale.

July 1 is the bank's target date since that is when the first deduction for its investment and loans in GADCo would be required.

Great American, headquartered in San Diego, is the nation's seventh largest publicly held savings institution with $16.2 billion in assets. It operates 214 retail offices in the Western United States, primarily in California

#90029p0446 01/29/1990 ~PR Newswire

DALLAS (JAN. 29) PR NEWSWIRE - Trammell Crow Real Estate Investors (NYSE: TCR) today declared a cash distribution to shareholders of $.175 per share for the fourth quarter of 1989 ended Dec. 31, 1989.

The dividend is payable Feb. 16, 1990 to shareholders of record on Feb. 9, 1990. It is estimated that the entire fourth quarter distribution will constitute a tax-free return of capital.

Distributable cash for the quarter ended Dec. 31, 1989 amounted to $1,891,000 or $.208 per share.

Distributable cash for the like period ended Dec. 31, 1988 amounted to $2,754,000 or $.304 per share. The decrease in distributable cash

resulted from the expiration of the Trust's developers' leases, a decline in rental rates, and the continued high cost of attracting and retaining quality tenants.

The Trust will determine the appropriate level of distributions for future quarters based on actual operating results, capital requirements, the effects of engaging in alternatives to maximize the value of an investment in the Trust, and other factors that the Trust Managers deem appropriate.

Gross leasing activity in 1989 totaled 1,262,000 square feet and resulted in an aggregate occupancey for the Trust's 19 properties of 92.4 percent as of Dec. 31, 1989. This represents an increase of approximately 5 percent over the occupancy at the beginning of the year. Of particular note, the aggregate occupancy of the four Houston properties increased by 18 percent to 94 percent and the aggregate occupancy of the four Dallas properties increased by 10 percent to 90 percent.

Trammell Crow Real Estate Investors is an equity real estate investment trust that has acquired from Trammell Crow Co. entities 19 commercial real estate projects, consisting of 18 industrial properties located in California, Florida, Maryland, Minnesota, North Carolina, Texas, Washington, and Wisconsin, and one retail mall located in Colorado.

The Trust's investment objective is to maximize the total return to its shareholders through the leasing, management, and eventual disposition of its industrial and retail properties.

BEAVERTON, OR (JAN. 29) PR NEWSWIRE - FPS Computing (NYSE, PSE: FLP) recently announced the appointment of Malcolm Padina as vice president of European Operations.

The company has been operating in Europe for over a decade, where it maintains direct sales and support offices. Padina, who will be based in the United Kingdom, joins FPS Computing after fifteen years with Prime Computers, where he most recently was a vice president for sales and services operations throughout the United Kingdom, Middle East and Africa.

"FPS Computing enjoys considerable success in European markets. We are very pleased to have a man of Malcolm's stature to head up and further expand our European operations," said Donald L. McDougall, FPS Computing vice president of marketing, sales and service. "His sales, service and management experience in the computer systems marketplace will further benefit our European customers."

Padina, who will report to McDougall, commented, "I am excited to be joining this established supplier of supercomputer systems. Recent sales of the Model 500EA UNIX supercomputer to CNR-Napoli in Italy and to the University of St. Andrews in Scotland have demonstrated the company's continued commitment to its European customers. I look forward to furthering their success."

FPS Computing designs, manufactures and markets high performance computing solutions for scientific, engineering and technical applications. The FPS Computing product line includes the Model 500EA UNIX Supercomputer Series, the Model 350 Visualization Supercomputer Series, the M64 Matrix Supercomputer Series, and the Model 5800 High-Performance Array Processor Series. Founded in 1970 as Floating Point Systems Inc., FPS Computing is headquartered in Beaverton.

WASHINGTON (JAN. 29) PR NEWSWIRE - The board of directors of Washington Bancorporation today named John M. Toups chairman and chief executive officer of Washington Bancorporation and The National Bank of Washington. Toups was also elected to be a member of the board.

Toups is former chairman and chief executive officer of Planning Research

Corporation, where he served in a variety of positions since 1970. Prior to his tenure at PRC, Toups was founder and chief executive officer of TEI a civil engineering company operating nationwide. Toups is currently a member of the boards of directors of Washington Gas Light Company, George Mason University Foundation, and the Greater Washington Research Center. He is also a past member of the board of directors of the Greater Washington Board of Trade.

The election of Toups comes as a result of a contingency plan which the WBC Board put in place in December 1989, in the event of the resignation of Luther H. Hodges Jr. Hodges resigned, effective Jan. 31, 1990. Toups will serve as chairman and chief executive officer until a nationwide search for that position is completed.

Thomas Boggs, chairman of the board's Human Resources Committee, commented that "we are pleased and gratified that someone of John Toups' stature and national reputation is able to assume the duties and responsibilities of chairman and chief executive officer."

In responding to his appointment, Toups said, "I am looking forward to working with the company's fine management team. We have a broad and distinguished customer base, with whom I am proud to be associated. And I am confident that, in the coming days, we will be able to achieve an orderly management transition which will prove to be beneficial to everyone."

LAFAYETTE, LA (JAN. 29) PR NEWSWIRE - Offshore Logistics Inc. (NASDAQ: OLOG), a leading supplier of aviation and marine transportation services, today announced that it had sold the M/V Highland Light to European investors.

The Highland Light is a 220-foot anchor handling vessel which has been employed in the North Sea. Offshore Logistics acquired the vessel in 1988 and has operated the vessel since that time.

With the recent sharp increase in values for used equipment, the company decided to sell the M/V Highland Light in accordance with its previously announced plans to either acquire or sell certain assets, taking anticipated cash flows and current market conditions into account.

In connection with this sale, the company will report a net gain of approximately $2.3 million ($.14 per share) during the quarter ending March 31. The company expects to reinvest the net cash proceeds of the

sale, approximately $5.6 million, into either marine or aviation equipment to serve its markets in the U.S. Gulf of Mexico or Southeast Asia.

The company reported net income of $4,171,000 ($.24 per share) for the first fiscal quarter ended Sept. 30, 1989, and will report second quarter earnings in early February.

SAN JOSE, CA (JAN. 29) PR NEWSWIRE - Altos Computer Systems (NASDAQ: ALTO) today announced that the Board of Directors has authorized the company to buy up to 2 million shares of its approximately 10.8 million common shares outstanding.

Richard Wood, vice president and chief financial officer for Altos, indicated that Altos plans to conduct the purchases from time to time, as the shares are available, at prices Altos considers attractive. Altos will buy the shares in the open market or in private transactions.

Dave Jackson, chairman of the board and chief executive officer, said, "In the current market environment, with Altos shares trading at their present levels, we believe that buying our stock is an appropriate investment for Altos and our shareholders."

Founded in 1977, Altos designs, manufactures and markets 32-bit networked multi-user solutions for distribution in 60 countries. More than 120,000 Altos systems have been installed worldwide. Fiscal 1989 sales for the company were $139.9 million. The company's stock is traded on the NASDAQ exchange, symbol ALTO.

LONDON (JAN. 29) UPI - Stock prices were higher in moderate trading at midday Monday on the London International stock exchange.

The Financial Times 100-stock index, which climbed 24.6 points Friday, was up 18.2 points to 2,332.7. The narrower top 30 industrial average was ahead 14.9 points to 1,866.4.

Volume amounted to around 210 million shares, compared with 285 million shares traded during the same period Friday.

Market watchers said the strong performance in Tokyo helped to boost investor enthusiasm, lifting prices higher.

Banking issues moved higher as investors were attracted to their strong yields. Barclays Bank gained ten cents to $8.96, National Westminister Bank added four cents to $6.05, Lloyds Bank gained 15 cents to $4.67 and Midland Bank added four cents to $6.05.

Among the some of the day's other active issues, Standard Charter added five cents to $9.77 amid speculation over a potential takeover bid.

BAA, the airport group, climbed 19 cents to $6.29 on speculation over the intentions of ADT Ltd., the Bermuda-based company that has increased its stake in BAA to 8.2 percent.

BY JAN A. ZVERINA

DETROIT (JAN. 29) UPI - General Motors, which is fielding its first ever front-drive minivans this year, has enhanced its rear-drive, mid-sized vans as well for 1990 with new models and new mechanicals.

Both the Chevrolet Astro and GMC Safari, introduced for 1985 to share in the success of Chrysler's front-drive minivans, can now be ordered with all-wheel-drive (AWD) to improve traction on wet or snowy roads.

The full-time system, developed for GM by Britain's FF Limited, adds nearly $2,000 to the price of a rear-drive Astro or Safari.

Also making its long awaited debut is the extended-length version of those vans, which adds nearly a foot to the standard model while keeping the wheelbase at 111 inches. It provides nearly 19 extra cubic feet of space, for a total cargo capacity of 152 cubic feet with the rear seats removed.

It also adds about $650 to the price of the regular length model.

Both new van models are in response to similar enhancements made by Ford to its Aerostar, also a mid-sized, rear-drive van.

Other changes to GM's Astro/Safari vans for 1990 include anti-lock brakes as standard and a restyled instrument panel with a larger glove box.

Like most light-duty trucks and vans, the Safari and Astro are offered in an astounding array of flavors, from empty ''tin can'' cargo haulers to sporty versions or posh cruisers that seat eight and can tow up to 6,000 pounds when properly equipped.

Base prices range from $12,157 for the cargo versions to over $22,000 for a fully equipped extended-length, AWD passenger model.

All Astro/Safari passenger vans are powered by GM's 4.3 liter 'Vortec' V6 engine with electronic fuel injection, coupled with a 4-speed automatic transmission with overdrive.

Two engine versions are offered: the standard issue delivers 150 horsepower at 4,000 rpm, while the high-output version, not offered on the AWD model, generates 175 hp at 4,600 rpm.

Intended for on-road use only, the AWD system operates at all times, with no gearshifts or driver switches. It divides engine power between the front and rear axles in a 35/65 split during normal driving. Under extreme conditions, however, a center differential transfers power to the axle with the better grip for maximum traction.

The AWD system weighs 323 pounds and requires a special subframe, as well as several suspension and brake parts borrowed from GM's full-sized and compact pickup trucks.

Two models were reviewed, a GMC Safari GT with rear-drive and a Safari SLE with all-wheel-drive.

The GT version cost $19,036 as tested, counting a $500 destination fee and about $5,900 worth of options like air conditioning ($736), 8-passenger seating ($396) and a GT package ($1,070) which adds cosmetics like black window trim and side louvers.

The Safari SLE cost $20,831, including a $2,304 package consisting of air conditioning, stereo, 7-passenger seating and countless other conveniences.

Inside, the new dashboard is better looking but little improved in ergonomics. The stereo controls are still a long reach, and the hockey

stick-shaped gauges for the oil, battery, temperature and fuel are still easily confused.

Also carried over because of the van's basic design are its front wheel housings that limit leg room for both the driver and front passenger.

As in earlier models, drivers may find these vans more truck-like both in ride and design than other minivans. The high step-up into the interior pays off in a better view of the road ahead, but rear vision is hampered by the split rear door design.

The base V6 engine, which delivers between 17 and 22 mpg in the rear-drive version, has adequate hauling power despite its tremendous roar under acceleration. Handling and braking on both models are well balanced under a wide range of conditions.

But driving the AWD model on some slick and snowy roads proved it to be far superior in traction and stability despite slightly lower fuel economy and a noticeable driveline hum.

Owners who do their own engine maintenance may want to think twice about the Astro/Safari. Items like the air filter can only be reached by first removing the lower dashboard console, some duct work, and an interior engine cover housing.

GM expects the majority of Astro/Safari sales will eventually be the extended length model. The AWD version is expected to account for about 12 percent of overall sales.

(For each car or truck written about in his weekly Roadtalk column, UPI Auto Writer Jan Zverina test drives the vehicle for one week, driving it between 250 and 500 miles on both city and rural roads.)

#90029u1177 01/29/1990 ~United Press International

TOKYO (JAN. 29) UPI - Mitsubishi Petrochemical Co. said Monday it will start building a large-capacity ethylene manufacturing plant at an estimated cost of $734 million.

The Tokyo-based company said construction of the facility with 450,000 tons capacity will start in the company's production base in Kashima east of Tokyo in July. The plant will start operations in the middle of 1992, the company said.

The company said Mitsubishi Chemical Industries Co., also a member of the giant Mitsubishi Group of companies, will shoulder about $138 million of the necessary cost.

The announcement came against the background of brisk demand for basic petrochemical materials amid sustained economic growth in Japan. The Japan Petrochemical Industries Association said Japan's production of ethylene in 1989 increased 10.8 percent over a year ago to a record 5.604 million tons.

Mitsubishi Petrochemical earlier announced that it has signed an agreement with Saudi Arabia to import 400,000 tons of liquefied petroleum gas this year for production of ethylene. The deal was estimated at about $84 million, the company said.

#90029u1179 01/29/1990 ~United Press International

NASHVILLE, TN (JAN. 30) UPI - Just about everybody who has ever watched Vince Gill perform thinks he's so talented that he can't help but reach major stardom in country music.

So why hasn't he?

The most reasonable answer is that Gill and the super song have not connected.

He's had several top 10 singles, including ''If It Weren't For Him,'' a duet with Rosanne Cash, ''Oklahoma Borderline, '' Cinderella,'' and ''Everybody's Sweetheart.''

But Gill's new album, ''When I Call Your Name,'' may provide what it takes to push the versatile singer-songwriter-guitarist to the top.

It is his first release from MCA after several years and three albums with RCA. He acknowledges that it is his most country LP.

Asked about leaving RCA, Gill replied:

''I was satisifed at RCA. I have no animosity toward them. They honestly did what they felt was right. My hat's off to them for as much effort as they put out. I'm not going to sit around here and bad rap them. That's not what it was about.''

Gill said he didn't know one way or the other whether he made the best music he could while at RCA.

''Sometimes I think yes and sometimes I think no. I was just maybe in the wrong hands. I really enjoyed my involvement with Richard Landis, the guy that produced the third album at RCA. I think he's a great producer.

''But I don't know if he was the right producer for me. It wasn't the perfect marriage. But I gained a great friend.''

He said when he got ready to start another album he told Landis he wasn't sure the two were ''the right team.''

The deciding factor above all was producer Tony Brown, who was at RCA when Gill arrived but left shortly afterwards for MCA.

''The chance to work with Tony Brown was something I always wanted to do. We kinda got started about the same time. It is critical to find the right producer and I've been fortunate enough that everybody has stuck with it and still believe in me enough to make records.

''The belief around here is that I just haven't found the right record yet. They say, 'We hear how good you are and what you do. I listen to the records and that's not what I hear.' It's just a matter of making the right record.

''It is difficult for me to get myself on the records because I do so many different things. I can take one way and go that way and I can take another and go that way. It's not hard for me to do that. But it's sometimes a curse. But this time we've got a little bit of everything in this project. We've got a duet with Reba (McEntire) and a bluegrass ballad with Patty Loveless. The record has some unique characters on it. And I'm real proud of it.

''It eventually comes to the point where you ask yourself what do you do best. What is your strongest suit. What moves the people most. You have to play your hole card.''

''When I Call Your Name,'' Gill said, ''is a simpler album. My voice is way out front. I'm countrier now than I've ever been on some of the records. I really like that. For a while I didn't know that that was what I wanted to do.

''But now, looking back, you learn things from what you've done the last four or five years. I'm finally learning the place I ought to be and enjoying it.''

One highlight of Gill's album is a duet with McEntire, called ''Oklahoma Swing.''

The first single, ''Never Alone,'' was a top-20 hit.

Besides McEntire and Loveless, Herb Pedersen of the Desert Rose Band, Kathie Baillie of Baillie and the Boys and Emmylou Harris also appear on the album.

Gill, who at one time was a member of Pure Prairie League, said Harris has been a strong influence on him.

''I heard Emmylou sing on a Linda Ronstadt album and I bought the album because of her. I obviously fell in love with Linda too. But then I thought Emmylou Harris was Dolly Parton using a fake name to sing on the record. I was 16 or 17 years old. I said, 'They can't put Dolly Parton's name on a Linda Ronstadt record.' After that I found Emmylou's first record in the store and I discovered there really was an Emmylou Harris.''

#90029u1198 01/29/1990 ~United Press International

ORLANDO, FL (JAN. 29) UPI - A jury awarded $1 million to a brother and sister who accused security guards at Walt Disney World of roughing them up and holding them illegally.

An attorney for Karl Wiggins, 29, of London and his sister, Sue Wiggins of Arlington, Texas, argued they were held against their will in a Disney security office.

Attorney Dale Morgan said Karl Wiggins was handcuffed and had his legs tied, and guards shoved Sue Wiggins against a wall, knocking her unconscious.

An Orange County circuit court jury on Friday awarded Karl Wiggins $600,000 and Sue Wiggins $400,000.

The incident happened Feb. 18, 1986, at EPCOT Center. A friend of the Wigginses, Thomas G. Harmon, started a fight with another park guest and knocked him unconscious.

Morgan said Harmon and the Wigginses agreed to go to the security office to tell their side of the story when guards refused to let them leave.

Orange County deputies were called to the scene. They said Karl Wiggins and Harmon became loud and began shoving and pushing guards inside the office.

Disney's security policy does not allow guards to detain guests without their consent.

None of the three was arrested.

Disney spokesman Charles Ridgeway said Disney was considering an appeal.

WILLISTON, SC (JAN. 29) UPI - Maytag Corp., which closed its 350-employee Admiral food freezer plant in Williston last fall, will bring back those employees and hire more when it moves the headquarters of its vending machine business to South Carolina, the company said Monday.

When it closed the Admiral plant, Maytag promised workers the company would restore their jobs when the plant reopened under the vending division. At the time, the company did not say exactly how many employees the new facility would require.

But Gerald Kamman, president of Maytag's Dixie-Narco vending machine subsidiary, told The News of Greenville that the company planned to hire a total of 600 workers in Williston over the next two years.

The division headquarters will move from Ranson, W.Va., to the South Carolina plant when an expansion at the facility is completed in June. Maytag is investing about $35 million to add 100,000 square feet of manufacturing space at the Williston plant. The project is welcome news in Barnwell County, which has one of the highest unemployment rates in South Carolina.

The shift of the headquarters to Williston will not affect production operations at Ranson or another Dixie-Narco plant in Eastlake, Ohio, the company said.

#90029u1688 01/29/1990 ~United Press International

ANCHORAGE, AK (JAN. 29) UPI - TV cameras filled the courthouse, reporters packed the courtroom, lawyers pitched last-minute motions, and prospective jurors filled out questionnaires as trial began Monday for fired Exxon Valdez skipper Joseph Hazelwood.

Hazelwood's lawyers made a last-ditch plea on technical legal grounds to have charges dismissed against their client before relinquishing his fate to a jury in a trial expected to end at about the one-year anniversary of the wreck of the Exxon Valdez, March 24, and the worst oil spill in U.S. history.

Superior Court Judge Karl Johnstone said he expected the case to last eight weeks - two weeks for jury selection and three weeks for each side to present its case.

Hazelwood, 43, of Huntington, N.Y. faces a maximum seven years and three months in jail and a $61,000 fine if convicted of criminal mischief, a felony, and three misdemeanors: operating the tanker while intoxicated, reckless endangerment, and negligent discharge of oil.

Network television crews positioned themselves in the courthouse lobby to catch the now-familiar visage of the bearded, bald and glum-looking Hazelwood strolling to court with his lawyers. Hazelwood, free on $50,000 bail, is represented by two New York lawyers and two Alaskan lawyers.

Monday's session began with Johnstone lecturing the media about rules for covering Alaska's most notorious high-profile criminal case, limiting the number of cameras in the courtroom at any one time and prohibiting cameras during jury selection.

To get a feel for the number of journalists converging on Anchorage to cover the trial, Johnstone asked for a show of hands to find out how many people in the nearly-full courtroom represented the media. Only a handful of non-media spectators were present and they included private investigators in the case, oil company note-takers, and court personnel, including extra security. Court administrator Al Szal said, "We have extra security because we expect crowds and it's more of a crowd control thing."

A pool of 90 prospective jurors was summoned to start the process of selecting 12 impartial citizens to consider whether Hazelwood, captain of the Exxon Valdez when it ran aground, is criminally responsible for what happened even though he was in his cabin and had turned over the ship to subordinate crew members.

Prospective jurors filled out background questionnaires Monday. Johnstone delayed jury selection questioning until Tuesday, and said, "I expect jury selection will take a fairly long time."

Prosecutors intend to prove Hazelwood was legally drunk and that his conduct created the situation that caused the wreck and that his actions to free the grounded ship from rocks only made matters worse. Defense lawyer Michael Chalos said alcohol played no part whatsoever in the wreck and Hazelwood is innocent.

The Exxon Valdez, loaded with 53 million gallons of Alaska crude at the Valdez oil terminal, had sailed about 25 miles from port on its way to Long Beach, Calif., when, during a detour around icebergs, it hit the well-known underwater rocks of Bligh Reef.

Nearly 11 million gallons of oil spilled into Prince William Sound and, when the oil industry was slow to respond to the spill, later spread across the sound and far into the Gulf of Alaska, coating almost 1,200 miles of shore with crude.

CHICAGO (JAN. 29) UPI - Nicor Inc. Monday reported fourth-quarter earnings of $46.3 million, or $1.55 a share, up 23 percent from $37.5 million, or $1.24 a share, in the year-ago quarter.

Fourth-quarter 1989 earnings included a $3.9 million after-tax gain from the sale in December of Nicor's offshore supply-boat business. Revenues for the quarter rose to $518.3 million from $463.9 million in the year-ago period.

For all of 1989, Nicor posted net earnings of $119.9 million, or $3.98 a share, up 13 percent from $106 million, or $3.48 a share, in 1988. Revenues for 1989 increased to $1.62 billion from $1.51 billion in 1988.

Nicor is a holding company whose principal business is Northern Illinois Gas, one of the nation's largest natural gas distribution companies. Nicor also is involved in oil and gas exploration and production, and in containerized shipping.

#90029u2225 01/29/1990 ~United Press International
TORONTO (JAN. 29) UPI - Toronto Sun Publishing Corp. reported Monday 1989 fourth-quarter earnings of $7.7 million, or 34 cents a share, up 22 percent from $6.3 million, or 28 cents a share, in the same quarter of 1988.

Fourth-quarter revenues were $76.2 million, up from $72.4 million in the year-ago period.

For fiscal 1989, the company reported earnings of $17.85 million, or 79 cents a share, down 7 percent from $19.1 million, or 86 cents a share, in 1988. Revenues for the year were $312.2 million, up from $270.6 million in the previous year.

Operating expenses in 1989 rose to $253.5 million from $208.7 million in 1988. The company did not explain the increase but start-up costs for two daily newspapers, the Ottawa Sun and the Financial Post, have often been cited as draining resources. Both newspapers were launched in 1988.

The Toronto-based communications company also publishes daily newspapers in Toronto, Calgary and Edmonton. In addition, it publishes shopper guides in Florida and operates a printing plant near Washington, D.C..

#90029u2410 01/29/1990 ~United Press International
DETROIT (JAN. 29) UPI - Production cuts recently posted by Chrysler Corp. will reduce the company's daily output by at least 14.2 percent, or the equivalent of about 300,000 vehicles a year, Ward's Automotive Reports estimated Monday.

The cuts, which do not include numerous temporary production halts to trim inventories, mean Chrysler will once again be building more trucks than cars at its North American assembly facilities, the weekly statistical

publication said.

Ward's estimated Chrysler now has the capacity to build 4,381 cars a day, and will reduce its output by 26 percent this spring to 3,243 cars daily as the manufacturer slows production at its Belvidere, Ill., and Newark, Del., plants in late March.

About 750 workers at each of those plants will be idled indefinitely March 26 because of the reduced output, Chrysler confirmed earlier this month. It also plans to permanently close its Jefferson Avenue plant in Detroit this Friday, idling another 1,700 workers.

Chrysler's capacity for light truck output will decline by 2 percent to 4,149 units a day in April, from 4,232 units currently, Ward's said. That decline is because of a reduction in output at its Jeep plant in Toledo.

That action will reduce Toledo's 5,300-person workforce by 724 workers in late March, as previously confirmed by Chrysler.

Chrysler's annual vehicle capacity is currently at about 2.1 million vehicles, not counting overtime. The cuts would lower vehicle output capacity to 1.8 million a year, Ward's said.

But it would not be the first time Chrysler's truck production topped its car production, a company spokesman said.

Production at the carmaker's North American plants during the 1989-model year was 1,016,857 cars and 1,131,117 trucks, vs. 1,162,003 cars and 1,041,636 trucks for the 1988-model year, company spokesman Alan Miller said.

Miller said earlier figures are not comparable because they do not include Jeep sales.

Chrysler acquired American Motors Corp. and its Jeep operations in August 1987.

NEW YORK (JAN. 29) UPI - New construction stayed level at $261 billion in 1989 for the third year in a row, with apartment and condominium construction nailing down a disappointing 8 percent decline, the F.W. Dodge survey reported Monday.

''Weakness in commercial and public construction was to be expected, but the failure of homebuilding to respond to lower mortgage rates in 1989's closing months was a disappointment,'' said George Christie, vice

president and chief economist for the F.W. Dodge division of McGraw-Hill.

''Homebuilding remains the 'best bet' for 1990,'' he said.

In the residential area, Dodge said 1989 contracting remained unchanged for one-family homes, but apartment-condo contruction showed an 8 percent decline.

The Dodge overall contract index, which uses 1982 as its 100 base, averaged 166 in 1989 and 1988 and registered 165 in 1987 ''establishing a three-year 'plateau' of uncommon stability for the normally volatile construction sector,'' the Dodge statement said.

For the year, non-residential building construction advanced 3 percent to a record $93 billion, residential fell 1 percent to $120.4 billion and non-building construction declined 1 percent $47.7 billion, the Dodge survey found.

The physical volume of non-residential work as measured in square feet of floor area, however, declined by 4 percent in 1989, it said.

December construction edged up 1 percent to an annualized rate of $251 billion, halting the steep slide of the two previous months, the survey showed.

Non-residential building contracting was up 4 percent over November and residential building gained 1 percent. Non-building construction declined 5 percent in December, Dodge said.

In the Northeast, a double-digit decline in residential construction brought total contracting down 3 percent in 1989, the Dodge survey reported.

The North Central region advanced 5 percent showing gains in non-residential, residential and non-building construction. The West rose 1 percent on a blend of more housing and less non-residential construction.

In the oil-rich South Central, which has had a steady decline for the past six years, new 1989 construction fell only 1 percent from the 1988 level. The South Atlantic area dipped 2 percent, its first decline since the early 1980s.

#90029u2487 01/29/1990 ~United Press International

DETROIT (JAN. 29) UPI - A spokeswoman for General Motors Corp.'s Pontiac division said Monday its Stinger multi-purpose vehicle program is still alive despite reports that the $300 million project has been killed.

The Stinger first was displayed at last year's North American International Auto Show in Detroit. Painted a fluorescent green, the multi-purpose vehicle is reminiscent of a beach buggy and drew a youthful crowd while on display.

''As far as we are concerned, it's still a go,'' Pontiac spokeswoman Shiela Main said. ''We're still on with it.''

Vehicle designers from Pontiac said during the 1990 auto show in Detroit this month that GM still was deciding questions related to manufacturing feasibility, market volume and where the all-wheel-drive vehicle might be built.

''The Stinger is still a very active program,'' Pontiac designer Terry Henline said during a Pontiac preview for the show, adding that the carmaker was looking for a way to run the program profitably at volumes of between 30,000 and 40,000 vehicles a year.

''That is still all part of the case study,'' Main said Monday, despite reports in recent weeks that GM has been shelving several new vehicle programs as part of an effort to trim its overall expenditures and reduce cost pressures.

It was reported Monday that the giant carmaker decided to delay replacement models for its Oldsmobile Toronado and Buick Riviera coupes by one year, until 1994. Earlier this year GM acknowledged that its next generation Corvette would be delayed by about two years to 1995.

If produced, the Stinger would be Pontiac's first sport utility vehicle and enter a market in which Japanese carmakers have been displaying their own such vehicles - possibly an indication of their intent in entering this growing segment.

The concept version of the Stinger, driven by automotive writers last October, is powered by a 16-valve four-cylinder engine. Its body is made of carbon fiber panels, and has removeable glass panels to transform it into an off-road vehicle similar to a dune buggy.

Notable features also include a pull-out radio, camper stove and even a reeled up hose to clean the interior.

If produced, the Stinger would not be Pontiac's first concept vehicle to enter production in a similar form.

In 1986, Pontiac displayed a concept minivan called the TransSport. It put a similarly styled van into production for the 1990-model year under the same name, along with versions marketed by GM's Chevrolet and Oldsmobile

divisions.

#90029u2606 01/29/1990 ~United Press International
ANALYSIS BY JOAN HANAUER

NEW YORK (JAN. 29) UPI - A dog that attacks vacuum cleaners and a man who stops an electric fan with his tongue - now those are Stupid Tricks.

Viewers will see both when ''Late Night with David Letterman'' goes prime time for its eighth anniversary special on Thursday, Feb. 1, 9:30-11 p.m. Eastern time.

The retrospective includes highlights of such guest visitors as Michael Keaton, Bill Murray and Teri Garr, and the ultimate music video with a laundry list of superstars from The Grateful Dead to Liberace.

For some, the best part of the retrospective will be the Stupid Pet Tricks and Stupid Human Tricks. Sue Hall Sheehan, who books Stupid Tricks, said in an interview that there will be two of each on the show.

The Pet Tricks will feature Air Major, a champion Frisbee catcher, who leaps off his owner's back and almost flies through the air.

''He's kind of a whippet and kind of a something else,'' Sheehan said.

The second pet trick involves a Boston terrier who attacks upright vacuum cleaners.

''Even when the vacuum was in a closet, he'd start jumping at the door,'' Sheehan said. ''Open the door and he'd tear right in there and drag it out by the rubber rim around the front. Then he'd bark at it and drag it around.

''We taped the show he was on twice, and in the second taping we couldn't get the dog off-stage. There was no way you could get that dog away from that vaccum. Even Dave tried to help. He grabbed the vacuum but before you knew it, that little Boston terrier had yanked it out of his hands.''

For Stupid People Tricks, there's the guy who stops an electric floor fan with his tongue, and the man in the industrial clothes dryer.

''Other people have called in clothes dryers and we turned them down because there's no beginning and no end to the trick, just going around and around,'' Sheehan said. ''That's what we told this man, but he called back and said he could change his shirt while going around in an industrial dryer. He's a terrific guy, he's in restaurant management.''

Sometimes viewers try out Stupid People Tricks at home, like the unmarried naked couple who decided to copy the student on the show who folded himself up in a folding couch. On the show, they cut to commercial and the audience didn't see how hard it was to get him out.

''Well, the couch folded up on them,'' Sheehan said, ''and the woman had to reach an arm out and dial 911. After the sheriff stopped laughing at her, he came to the rescue. But he had to break down the door and extricate them. As the sheriff said, 'I guess that's why they call them ''stupid'' tricks.'''

The rules are tougher for Pet Tricks.

''A Pet Trick,'' Sheehan said, ''can't be dangerous for the animal, and it has to be something the animal enjoys doing and does voluntarily.''

She turns down people who say their dogs can break-dance, for instance, then the owner spins the animal out on the floor.

''The things about Pet Tricks,'' she said, ''is that people can relate to them - whether they work or not. We had a cat we flew in from Pusan, Korea who eats with chopsticks. It went fine in rehearsal. But it's difficult to get cats to perform - outside smells and sounds bother them and they are very territorial.

''Once we got to the show itself, with the audience laughing, the cat just sat there with the chopsticks attached to its paws. Dave even tried putting food on the chopsticks. It just sat there.

''Then we went to a commercial and the band started playing. The cat jumped out of the owner's arms and hid. It took me the rest of the show to find that cat.''

Tennessee Williams' sultry one-act play, ''27 Wagons Full of Cotton,'' comes to life on cable's A&E network in a steamy version starring Lesley Ann Warren, Ray Sharkey and Peter Boyle.

The play, which was the basis for the movie ''Baby Doll,'' debuts Thursday Feb. 1 at 9 p.m. Eastern time.

It concerns the child-like sexy Flora, married to much older Jake (Boyle), who - although it is never actually said - has set fire to a cotton gin that has taken business away from him and other small cotton processors.

Along comes Silva (Sharkey), the mill superintendent, who in Jake's absence spends the bulk of the play seducing Flora in an act of revenge.

''I think the play actually works better on television because, although Williams calls it a comedy, on stage I never felt the comedy,'' said Don Scardino, who directed the TV play. ''Somehow on television you can get values into it I had never seen before.

''There's a quality of heat in this play and sensuality and lust and all that good stuff. You can do it very subtly on television because you can play in closeup. You can get that tension and attraction between people without having to hit the audience over the head with a hammer.''

Scardino, who also directs ''The Days and Nights of Molly Dodd,'' said he had never before directed Williams and was hoping for the chance.

''I think he's the most poetic of his generation of playwrights,'' Scardino said. ''There's a poetry and lyricism to his work that you don't anywhere else and an imagery that mirrors the emotional content of his plays.''

#90029u2607 01/29/1990 ~United Press International

SEATTLE (JAN. 29) UPI - America West Airlines has ordered two Boeing 747-400 jumbo jets and taken options on two more, the Boeing Co. said Monday.

The firm orders, including spares and training, are worth about $280 million, Boeing said.

America West, headquartered in Phoenix, Ariz., will use the new 747s to augment two 747-200s acquired last year and two more 747-200s that it plans to acquire from another airline later this year, Boeing said.

Michael Conway, the airline's president and chief operating officer, said the purchase of the new 747s ''is in keepig with our long-term strategy of providing service throughout the Pacific Rim.''

It was not announced when America West would take delivery of the planes.

#90029u2672 01/29/1990 ~United Press International

(JAN. 30) UPI - DIGEST:

Baseball

Milwaukee signed three players, including relief pitcher Chuck Crim, who led the American League in appearances last season. Crim, who appeared in 76 games, signed a two-year contract. The Brewers also signed pitcher Mike

Birkbeck and infielder Edgar Diaz to one-year contracts. ... The Seattle Mariners reached contract agreements with pitcher Scott Bankhead and catcher David Valle. ... The Minnesota Twins signed pitcher Rick Aguilera to a one-year contract. ... Texas outfielder Cecil Espy agreed to terms on a one-year contract with the Rangers. ... The New York Yankees named Arthur Richman as the club's senior vice president.

Basketball

Utah forward Karl Malone, who on Saturday became the 11th player in NBA history to score 60 points, was named the NBA's Player of the Week. Malone scored 61 points in Utah's 144-96 victory over Milwaukee.

College

Colorado defensive tackle Arthur Walker and a second man were arraigned in connection with the alleged sexual assault of a Nebraska student. Authorities say the two men are accused of sexually assaulting a woman in a hotel room early Saturday. Walker was in Lincoln reportedly along with Colorado running back J.J. Flannigan for a recruiting event. ... Florida State suspended basketball guard Tharom Mayes indefinitely from the team for an on-campus altercation with a campus employee. Athletic Director Bob Goin announced the suspension following an altercation between Mayes and a school employee Monday afternoon. ... Sophomore forward Milton Bell will transfer to the University of Richmond, Georgetown Coach John Thompson announced Monday. The 6-7, 210-pound Bell had played as a backup in 10 games this season, averaging 4.2 points and 1.9 rebounds. ... Jim Griffin of Oklahoma City University and Melissa Swartz of Salem-Teikyo (W.Va.) were the NAIA men's and women's basketball players of the week. ... Julie VonDielingen of Butler and Negele Knight of Dayton were named the women's and men's players of the week in the Midwestern Collegiate Conference.

Golf

The U.S. Golf Association and Karsten Manufacturing have reached an out-of-court settlement over the use of square-grooved clubs. The USGA agreed to lift a ban on current square-grooved clubs, while Karsten officials agreed to convert its plant to making V-grooved clubs by the end of March. Karsten is the maker of the Ping Eye-2, the most popular brand of square-grooved clubs.

Hockey

The Philadelphia Flyers announced defenseman Mark Howe will miss four to six weeks of action because of a lower-back problem. Howe has two bulging discs that cause intermittent nerve irritation. ... The Minnesota North Stars demoted defenseman Jayson More to their Kalamazoo affiliate. ... The New York Rangers and their fan club will present their fourth annual

Athletes Against Hunger food drive program before scheduled games Feb. 11 and 14 against Calgary and Pittsburgh. The program has produced some 14,000 pounds of food for New Yorkers.

Indoor Soccer

Baltimore forward Domenic Mobilio, whose four goals last week included two game-winners, was named Offensive Player of the Week in the Major Indoor Soccer League. Wichita defender Greg Willin was Defensive Player of the Week.

Media

''The National,'' the first sports daily in the United States, will appear on the New York, Los Angeles and Chicago newsstands Wednesday morning. The paper will offer coverage of major sports, including graphics and color photography.

Skiing

Austrian Helmut Hoeflehner captured his second men's World Cup downhill in four days and Steve Locher of Switzerland won the men's super giant slalom in Val d'Isere, France. It was the first time two men's races were run in one day, following the precedent set Saturday when the women's circuit completed a downhill and a super G in Italy. ... Matti Nykaenen of Finland winner of three gold medals at the 1988 Calgary Olympics, won the Finnish 90-meter Ski Jumping Championships in Helsinki. ... Swede Jan Boklov, the defending world ski jump champion, won the Swedish 90-meter title in Falun.

Tennis

Ivan Lendl, the No. 1 player in the world, became the leader in the $6 million Grand Slam Cup points race following his victory in the Australian Open. Lendl collected 600 points for his triumph over Stefan Edberg, who collected 450 points for second place. ... Lendl also was the first player to enter the $1 million 1990 Volvo International Tournament (Aug. 13-19), which was moved from Vermont to Yale University in New Haven, Conn. Lendl won the tournament in 1982 and 1986.

NEW YORK (JAN. 30) BUSINESS WIRE - Management Technologies Inc. (MTI), which develops and markets software for international banking, has agreed to acquire the Trade Service Systems (TSS) division of Warrington Financial Systems Inc. (WFS), Cambridge, Mass. by purchasing all outstanding WFS stock for $250,000.

TSS markets a Letter of Credit and collection system operating on IBM mainframes. Banks already using the TSS system include Chemical Bank, Canadian Imperial Bank, and Fidelity Bank.

''This is a significant addition to our ManTec system and will enhance our product line for IBM mainframes,'' said Barrington J. Fludgate, chairman of MTI. ''We already have commercial lending, wholesale DDA, funds transfer, foreign exchange, and money market. Now we have a whole system for regional banks.''

MTI will market the system through exisiting MTI offices in New York, London, Sydney and Toronto.

In a separate transaction, S.D. -Scicon, PLC, the parent of S.D. -Scicon Inc., has acquired 49,316 shares of MTI at $4.05 per share, for the sum of $200,000. In addition, it has agreed to purchase an additional 197,263 MTI shares for $800,000 by March 31, 1990.

Management Technologies trades on NASDAQ under the symbols MTCI for common stock and MTCIW for warrants.

COLUMBUS, GA (JAN. 30) BUSINESS WIRE - Carmike Cinemas Inc. (NASDAQ:CMIKA) today announced record results for both the fourth quarter

and year ended Dec. 31, 1989.

For the quarter ended Dec. 31, 1989, total revenues increased 25 percent to $23,498,000 from $18,774,000 for the quarter ended December 31, 1988. Operating income increased 62 percent to $3,152,000 from $1,944,000 in the same period last year. The company's net income increased approximately 200 percent to $944,000 or 18 cents per primary share compared to net income of $319,000 or 6 cents per primary share in the comparable quarter of last year.

For the twelve months ended December 31, 1989, total revenues increased 18 percent to $99,444,000 from $84,476,000 for the twelve months of 1988. Operating income increased 50 percent to $17,472,000 from $11,676,000 last year. For the twelve months of 1989, the company's net income increased 88 percent to $6,241,000 or $1.22 per primary share compared to net income of $3,320,000 or 66 cents per primary share during the same period last year.

Commenting on the results, President and Chief Executive Officer Michael Patrick, stated, ''This year's record earnings are attributable to our continued commitment to carefully monitor and manage overhead costs, combined with strong box office receipts during the year. The recent acquisition of the Consolidated Theatres chain has extended Carmike's market penetration into regions where the Company is the sole or dominant exhibitor.''

Carmike Cinemas is the sixth largest motion picture exhibitor in the United States, and is the leading exhibitor in the southern United States in terms of number of screens and theatres operated. The company operates 813 screens.

#90030b0026 01/30/1990 ~Business Wire

LOS ANGELES (JAN. 30) BUSINESS WIRE - Aura Systems Inc. (NASDAQ:AURA) has been issued patents in the United States, Japan, Canada, Europe, and Korea for applying its breakthrough electromagnetic technology to motor vehicle suspension systems, it was announced Tuesday by Harry Kurtzman, chairman and chief executive officer, Aura Systems Inc.

''According to a recent study by the University of Michigan, nearly one quarter of all automobiles worldwide will have electronically controlled suspension systems within the next five years,'' said Kurtzman. ''We are

pleased that Aura will play a major role in this evolutionary leap in automotive engineering.''

The company also announced the results of tests on a prototype electromagnetic automotive suspension device called the high force actuator (HFA). According to the results, Aura's HFA, which can generate 500 pounds of force per wheel with 100 Hz frequency, provides a practical, cost efficient supsension system that outperforms all other hydraulic or pneumatic-based suspension systems.

Aura's HFA electronically monitors vehicle wheel and body positions and vibration levels to instantaneously produce a bump-free ride in response to road conditions. The HFA requires only 30 amps of power - available through a conventional car alternator - which surpasses the operational specifications of leading automotive engineers for a lightweight, low-power, high-response suspension system.

In addition to using less power and weight, the HFA is quiet and requires no fluids, valves, pressure, lubrication, hoses and pumps.

Aura's electromagnetic technology has been used in other defense and commercial applications, including stabilized state-of-the-art reconnaissance and missile testing systems, fiber optic guided missile systems, and frictionless bearings, motors, compressors and pumps.

Founded in 1987, Aura Systems Inc. is the leader in magnetic suspension technology, electro-optical and scene projection hardware and advanced computing systems for the U.S. Government and numerous commercial industries worldwide. The company is headquartered in El Segundo, Calif.

SCOTTS VALLEY, CA (JAN. 30) BUSINESS WIRE - Borland International Inc. (NASDAQ:BORL) has announced a new Academic Edition of Paradox, its popular relational database software program.

The Academic Edition, which provides the full power of Paradox 3.0, is offered directly to the educational community at the substantially reduced price of $69.95.

''Paradox is becoming the database of choice in many corporations today,''

said Doug Antone, vice president of sales at Borland. ''With the Academic version, students can put the power of Paradox to use during their educational endeavors and continue using it when they enter the professional work force.''

According to a recent PC/Market Opinion survey by Techtel Corp., Paradox holds first place in positive opinion among relational database management system users. The program offers sophisticated database management capabilities for advanced users yet is easy enough for novices to learn and use immediately.

The Paradox Academic Edition is a fully functional product. Academic and Student Editions offered by other publishers provide an opportunity to experience a particular database management system interface, but these versions are often intentionally limited so they can no longer function as a full relational database product for any practical task.

The Paradox Academic Edition, available now, joins the low-price Paradox Academic LAN Pack and Academic Lab Pack, which bring the power of Paradox to networked and non-networked educational computer labs.

Borland has also developed three levels of Paradox training materials: Beginning Paradox, Using Paradox, and Applying Paradox. The training materials include student workbooks and instructor's manuals, both available at special educational prices.

Borland has been involved in the higher education market since it first offered its Turbo Pascal compiler in 1983.

Since then it has established itself as one of the leading providers of professional DOS language compilers and business applications to high schools, colleges and universities.

Borland International Inc. is a leading developer of high-performance software products.

Borland offers in its Professional Business Series some of the world's most widely used business applications such as Paradox, QUATTRO PRO, QUATTRO, SideKick Plus, Reflex and SideKick for Presentation Manager - the first application for IBM's OS/2 Presentation Manager.

Borland's Professional Language Series includes critically acclaimed developer's tools such as object-oriented Turbo Pascal, Turbo C and Turbo Assembler & Debugger.

SUNNYVALE, CA (JAN. 30) BUSINESS WIRE - Maxim Integrated Products reported record sales of $13,157,000 for the second quarter of fiscal 1990.

The net income of $1,806,000, or 14 cents per share, for the quarter marked the 15th consecutive increasingly profitable quarter for Maxim and represented a 40 percent gain over the $1,292,000, or 10 cents per share, of the like quarter in fiscal 1989. Return on equity for the quarter was 23.1 percent, up 1.7 percentage points from the 21.4 percent for the quarter ending Dec. 31, 1988.

For the six months of fiscal 1990 to date, earnings of $3,470,000, or 27 cents per share, are up 41 percent from earnings of $2,459,000, or 20 cents per share, of the prior fiscal year-to-date.

Maxim Integrated Products is a leading international supplier of quality analog products for applications that require real world signal processing.

#90030b0036 01/30/1990 ~Business Wire
DENVER (JAN. 30) BUSINESS WIRE - Crown Resources Corp. Tuesday announced reserves for the recently discovered Crown Jewel gold deposit (formerly called Buckhorn) on its 100 percent owned Buckhorn Mountain property in Okanogan County, Wash.

In-place uncut geologic ore reserves have been estimated at 8.3 million tons containing 842,000 ounces of gold at a grade of 0.102 oz./ton gold.

Proven and probable uncut open pit mineable reserves are estimated at 5.5 million tons containing 580,000 ounces of gold at a grade of 0.106 oz./ton gold and a waste-to-ore stripping ratio of 7.2 to 1.0.

These reserve estimates were provided to Crown by the independent engineering firm of James Askew Associates Inc., following their detailed study of all drilling information.

The reserves were calculated using a minimum composite cutoff of 15 feet grading 0.035 oz./ton gold. Askew also calculated geologic and mineable reserves cutting all high grade composite samples to 0.400 oz./ton gold. A comparison of reserves from these two methods is given in the table below.

Geologic Reserves

	Tons (Millions)	Grade	Contained Oz. Gold
Uncut	8.3	.102	842,000
Cut to .400	8.5	.084	716,000

Mineable Proven & Probable Reserves

	Tons (Millions)	Grade	Contained Oz. Gold
Uncut	5.5	.106	580,000
Cut to .400	5.6	.087	489,000

T

To date, only 50 acres of the 2,000 acres of highly prospective skarn geology have been drill tested. Crown will initiate a 100,000-foot drilling program starting March 1, 1990.

In addition, detailed metallurgical testing and environmental studies will be conducted. Initial metallurgical testing conducted to date indicates recoveries in excess of 90 percent are achievable.

Crown is listed on the NASDAQ National Market System under the trading symbol CRRS and on the Vancouver Stock Exchange under the symbol CRO.

LOUISVILLE, CO (JAN. 30) BUSINESS WIRE - Storage Technology Corp. (STK:NYSE) Tuesday reported net income for the fourth quarter ended Dec. 29, 1989, of $22.3 million, or 85 cents per share, compared with $20 million, or 77 cents per share, for the fourth quarter of 1988.

Revenue for the quarter totaled $299.8 million, an increase of 11 percent over revenue of $269.2 million for the comparable quarter of the previous year.

For the full year, the company reported net income of $47.8 million, including an $11.3 million extraordinary gain, or $1.83 per share, compared with net income of $35 million, or $1.34 per share, for 1988.

Revenue for 1989 was $982.5 million compared with revenue of $883.7 million for 1988, an increase of 11 percent.

Commenting on the quarter and year ended 1989, Ryal R. Poppa, chairman, president and chief executive officer, said, ''We continue to demonstrate what a company with a clear business strategy and innovative products can achieve in our segment of the information processing industry.

'' The information storage and retrieval segment continues to experience growth in demand in excess of the information processing industry as a whole.

''Our focus has enabled us to introduce significant new products such as the 4400 Automated Cartridge System 1/8ACS3/8,'' he added. ''In late 1989, just 18 months after the first shipment, we shipped our 1,000th ACS system. Together with our customers, we continue to expand the number of computer environments in which the ACS can be employed.

''In addition to IBM-related installations, the ACS has been installed at sites employing mainframes from Unisys, Cray and Bull H.N.

Storage Technology Corp. manufactures, markets and services, worldwide, information storage and retrieval subsystems for high-performance computers.

ENGLEWOOD, CO (JAN. 30) BUSINESS WIRE - The Aqua Buoy Corp. (OTC pink sheets) Tuesday announced it has signed a contract, in excess of $2.2 million, to supply its marine safety products, Aqua Buoy, Life-A-Line and Radartron to Sumac Companies Japan of Hyogo, Japan.

Aqua Buoy is a patented flotation device worn on the wrist and in a water related emergency, one lifts a lever up and over and the device ejects a flotation cushion which is used to float on until help arrives. Aqua Buoy has been called the "...the greatest aid to safety in, or on the water this decade."

The 1983 Amendment to the 1974 International Convention of Survival of Life at Sea (SOLAS) makes it mandatory for commercial ships in international service, all life boats, life rafts, rescue boats and off-shore platforms to have an efficient radar reflector on them.

Life-A-Line is a helium inflated radar reflector which has been U.S. Coast Guard tested and accepted as meeting USCG requirements as an efficient radar reflector under SOLAS 74/83.

Radartron is a similar, patented radar reflector system with a balloon designed to fly into the wind making it more efficient in higher winds. The device is smaller that Life-A-Line (weighing 450 grams) and is compact so it is easily carried or stowed.

MOORPARK, CA (JAN. 30) BUSINESS WIRE - Terminal Data Corp. (NASDAQ:TERM) Tuesday reported first-quarter fiscal 1990 sales of $5,110,000, an 8 percent decrease from the like period last year, and a net loss of $627,000, or 14 cents per share, compared with earnings of $79,000, or 2 cents per share, for the first quarter of the previous year.

David Krar Hutton, president and chief executive officer, said that compared with the first quarter of fiscal 1989, the first quarter of fiscal 1990 continued the trend of declining sales of micrographic products being partially offset by growth in the sales of the new electronic imaging products.

The company also announced that the annual meeting of shareholders of Terminal Data Corp. will be held on Friday, March 30, at 10 a.m. at the Ramada Hotel-Agoura Hills, 30100 Agoura Road, Agoura Hills, Calif., 91301.

SAN JOSE, CA (JAN. 30) BUSINESS WIRE - EMCON Associates (NASDAQ:MCON) reported net earnings of $3,664,000 for the year ended Dec. 31, 1989, an increase of 24 percent over 1988 earnings of $2,958,000.

Earnings per share in 1989 were 90 cents on 4,093,000 shares outstanding compared with 75 cents on 3,927,000 shares outstanding for the previous year. Net revenue totaled $37,132,000, a 33 percent increase over the 1988 total of $28,001,000. All 1989 figures released are unaudited.

Results for the fourth quarter of 1989 showed net income of $774,000, approximately the same as the 1988 corresponding quarter. Net revenue in the fourth quarter 1989 was $10,136,000, an increase of 28 percent over the 1988 comparative figure.

''I am pleased with the annual and fourth-quarter results,'' stated Ted Briggs, EMCON's president and chief executive officer. ''We were able to achieve our earnings objectives in addition to adjusting our bonus

accruals in the fourth quarter.''

EMCON provides comprehensive engineering and consulting services in waste management and environmental protection. Established in 1971, EMCON today is a leader in the design and development of waste-disposal sites and remediation programs. EMCON serves public and private clients throughout the Western United States.

NAPA, CA (JAN. 30) BUSINESS WIRE - Napa Valley Bancorp (NASDAQ:NVBC), reported 1989 net earnings for the full year of $3,794,000, or $1.22 per share, as compared to $2,823,000 for the previous year, or 91 cents per share, an increase of 34 percent.

All amounts have been restated to reflect the acquisition of Suisun Valley Bank on April 17, 1989, which was accounted for as a pooling of interests. Per share amounts for 1988 have also been adjusted for a 5 percent stock dividend declared in December 1989.

Net earnings for the fourth quarter of 1989 were $857,000, or 27 cents per

share compared to $950,000, or 31 cents per share, for fourth quarter 1988. 1989 earnings include an additional provision for possible loan losses of $350,000 made in the fourth quarter to strengthen the loan loss reserve of the company's largest subsidiary, Napa Valley Bank based on management's assessment of general economic conditions.

In addition, a nonrecurring adjustment of $120,000 was made in the fourth quarter 1989 to accelerate the amortization of intangible assets acquired in connection with the purchase of the Bank of Lake County N.A. Consolidated assets at year end 1989 were $506 million compared to $434 million at year end 1989, a gain of 16.5 percent; loans were $327 million compared to $261 million, representing an increase of 25 percent for the like periods; and, deposits grew by 17 percent from $397 million to $465 million.

EL PASO, TX (JAN. 30) BUSINESS WIRE - El Paso Electric Co. announced Tuesday that on Friday, Jan. 26, it issued and sold in a private placement to institutional investors $153 million principal amount of First Mortgage Bonds, 11.10 percent Series due 2001.

Proceeds from the transaction were used to reduce borrowings by EPE under its bank revolving credit facility. The bank facility, which provides for borrowings by EPE of up to $150 million principal amount outstanding, required the issuance and sale by the company of at least $100 million of long-term debt on or prior to Jan. 31, 1990.

EPE previously announced the divestiture of its non-utility operations on Jan. 17, 1990, through the sale of its subsidiaries: Franklin Land & Resources Inc. and PasoTex Corp. The subsidiaries were sold to an unrelated third party for nominal consideration, which was based upon the combined values of Franklin and PasoTex investments.

The transaction was supported by a fairness opinion from the company's financial advisor, Smith Barney, Harris Upham and Co.

El Paso Electric Senior Vice President and Chief Financial Officer William J. Johnson, stated that the company was very pleased to have completed the first mortgage bond financing. In addition, Johnson reiterated that the sale of Franklin and PasoTex enables the company to fulfill its commitment and goal of returning to its core utility business.

EPE is an electric utility serving approximately 239,000 customers in El

Paso, Texas and the Rio Grande Valley in Texas and New Mexico. The company has a 15.8 percent interest in each of the three 1,270 megawatt nuclear generating units at the Palo Verde Nuclear Generating Station located near Phoenix, Ariz.

SAN FRANCISCO (JAN. 30) BUSINESS WIRE - Charles E. Tingley has been named chief executive officer of Transamerica Leasing, Inc., the leasing operation of Transamerica Corp., James R. Harvey, Transamerica Corp.'s chairman and chief executive officer, announced today.

Tingley, 51, has been president of Transamerica Leasing since Jan. 1, 1989. In assuming the additional position of chief executive officer, he succeeds Richard H. Finn, 55, who continues as Transamerica Leasing's chairman. Finn is also president of Transamerica Leasing's parent organization, Transamerica Finance Group Inc.

Tingley joined Transamerica Leasing in 1979 and served as president of its container leasing subsidiary from 1981 to 1989.

''Chuck Tingley has done an outstanding job as president of Transamerica Leasing as Dick Finn has assumed new responsibilities at Transamerica Finance Group,'' commented Harvey. ''His performance and many years of leasing industry experience make him well qualified for the position of chief executive officer. We look forward to continued growth at Transamerica Leasing under Chuck's leadership.''

Transamerica Leasing, based in White Plains, New York, is the world's leading lessor of intermodal transportation equipment such as containers, chassis and trailers. The company reported record earnings in 1988 of $51 million on revenues of $435 million.

Transamerica Leasing is part of Transamerica Finance Group Inc., which is the country's third largest independent finance organization in terms of capital funds.

Transamerica Corp., based in San Francisco, is a leading provider of specialized financial and insurance services to individuals and organizations. The company's assets totalled $29.2 billion as of Sept. 30 1989.

SAN FRANCISCO (JAN. 30) BUSINESS WIRE - Young & Rubicam San Francisco has named Robert Goldman manager of creative services, a new position.

An architect of the firm's new business program, Goldman, 46, is now charged with monitoring the creative and account resources of Y&R San Francisco, helping allocate and balance them as appropriate.

His duties also include recruitment, budgets and staff assignments within the creative department. The agency's executive creative director, Jay Jasper, crafted the position specifically for Goldman.

''With a dramatic growth in both billings and staff size, and our continued passion for creative excellence, the department demanded enlightened management,'' Jasper said. ''With Bob, we have just that.''

Goldman joined Y&R in 1987, rising to associate creative director. He has worked on most of the firm's key accounts, including Chevron, Hidden Valley Ranch, Lucite Paint and the California Lincoln-Mercury Dealers.

In 1989, he took a leading role in the agency's new business effort, which has resulted in the addition of several clients, including 1st Nationwide Bank.

Before coming to Y&R, Goldman worked at the San Francisco offices of Foote Cone & Belding and Ketchum Advertising. His freelance writing has been published in GQ, Playboy and the Wall Street Journal.

DALLAS (JAN. 30) BUSINESS WIRE - Harken Energy Corp. (NYSE:HEC) of Dallas Tuesday reported that its newly formed, wholly owned subsidiary, Harken Bahrain Oil Co., has concluded a production sharing contract with the Bahrain National Oil Co.

The agreement, signed on Jan. 30, 1990, gives Harken the exclusive right to carry out exploration, development, production, transportation and marketing of petroleum throughout most of Bahrain's Arabian Gulf offshore territories. Subject to the discovery and development of oil and/or gas, the contract has a term of 35 years.

The agreement calls for Harken to commence an exploratory well to test the Khuff formation (estimated depth 13,000 feet) within two years. Harken has identified surface and subsurface structures within the area which are situated on trend between Bahrain's onshore Awali field and Saudi Arabia's nearby offshore Abu Safah field.

Awali field, discovered in 1932, is the site of the first commercial oil discovery on the Arabian side of the Gulf. Awali has over 1.5 billion barrels of crude oil in place and over 10 trillion cubic feet of gas.

It currently produces 42,000 barrels of oil and over 500 million cubic feet of gas per day. Other Harken leads will be evaluated for drilling after further geological interpretation and geophysical surveys.

Harken plans to open offices for Harken Bahrain Oil Co. in Bahrain immediately. Harken also plans to finalize its selection of financing alternatives within the next 30 days and is scheduling the drilling of the first well during late summer 1990.

Harken Energy Corp. acquires, restructures, manages and develops energy assets for itself, other energy companies and financial institutions. HEC explores for, develops and produces oil and gas reserves through its subsidiaries which include Harken Exploration Co. and Harken Bahrain Oil Co.

Through its wholly owned subsidiary, Tejas Power Corp., HEC owns and operates natural gas gathering and transmission facilities in Texas and Louisiana and markets third-party gas to a variety of end-users.

HEC retails and distributes gasoline through its subsidiary, Harken Marketing Co. and wholesales, transports and distributes gasoline and other petroleum products through its subsidiary, Harken Hydrocarbons Inc.

MENLO PARK, CA (JAN. 30) BUSINESS WIRE - Network General (NASDAQ:NETG) Tuesday announced advanced monitoring capabilities for its Ethernet Sniffer network analyzer.

These capabilities include alarms for network malfunction notification, statistics for network performance analysis, and report writing utilities to create management reports on network performance.

These capabilities, which will be available at no additional charge with the next release of the Sniffer software, complement the award-winning network diagnostics capability currently offered on the Sniffer analyzer.

The sophisticated system of alarms features both audible and visual notification of potential problem conditions for individual stations or for the network as a whole. Alarms for individual stations provide threshold levels, which are defined by network managers, for up to 1,024 stations. These alarms alert network managers to the following types of problems:

- Non-operational stations

- Over-utilization of network bandwidth

- Error frequency beyond defined thresholds

- Excessive idle time

Network-wide alarms provide instantaneous information on intruder stations over/under utilization of the network, and excessive errors.

Powerful network statistics provide both graphic and numeric displays of station performance, network utilization, error conditions, protocol usage and frame size. These statistics allow network managers to get a complete picture of network performance.

To assist the network manager in gaining perspective on trends in the performance of the network, this statistical information can be compiled to show daily, weekly and monthly activity. Information can also be saved to disk and exported to spreadsheet or database programs for further analysis.

Founded in 1986, Network General is an industry leader in designing, developing and marketing diagnostic systems for local area networks. The company's Sniffer product was named PC Magazine's ''Editor's Choice'' in 1987 among a selection of competing LAN protocol analyzers, and was awarded the 1987, 1988 and 1989 ''LAN Product of the Year'' in LAN Magazine's diagnostic equipment category.

#90030b0123 01/30/1990 ~Business Wire

HOUSTON (JAN. 30) BUSINESS WIRE - Union Texas Petroleum Holdings Inc. Tuesday reported $172.6 million in net income, or $1.49 per share, for 1989, up 58 percent from $109.3 million, or 73 cents per share, in 1988.

The company's 1989 earnings included a second quarter $58.6 million net income gain (of which approximately $46 million relates to 1990 and 1991) from the business interruption insurance settlement concerning the July 1988 explosion at the U.K. North Sea's Piper field.

Increased U.S. gas volumes, higher ethylene prices, increased income from equity partnerships and a lower effective tax rate also contributed to higher earnings in 1989. The company said that its U.S. gas prices were down in 1989 compared to a year ago due to lower sales under contracts which provided for above-spot market prices.

For the fourth quarter of 1989, Union Texas reported $16.3 million in net income, or 5 cents per share, compared to $14.8 million, or 3 cents per share, in 1988's like period.

The company said that its 1989 fourth quarter earnings benefitted from higher oil and liquefied natural gas (LNG) prices, improved U.S. gas volumes and increased equity income primarily from the liquidation of a drilling partnership.

These items more than offset the negative impacts of lower U.S. gas and ethylene prices and the absence of accruals for business interruption insurance proceeds in 1989's fourth quarter.

Revenues for the full year amounted to $1.16 billion in 1989, up slightly from $1.152 billion a year earlier. During the fourth quarter of 1989, revenues totaled $254.1 million, essentially level with $254.8 million in 1988's corresponding period.

The revenues improvement for the full year was due largely to proceeds from the business interruption insurance settlement, increased U.S. gas volumes and higher oil prices, partially offset by lower U.S. gas prices and lower oil production in the U.K. North Sea.

One of the nation's largest independent producers, Houston-based Union Texas Petroleum Holdings Inc. (NYSE:UTH) explores for and produces oil and gas in the United States and overseas and has petrochemicals and natural gas processing interests.

     #90030b0130 01/30/1990 ~Business Wire

LOS ANGELES (JAN. 30) BUSINESS WIRE - National Lampoon magazine's April 1990 issue -- the first under the auspices of new publisher Michael T. Carr -- will boast a remarkable 200 percent increase in advertising over the April 1989 issue and become the publication's biggest advertising issue in four years, it was announced Tuesday by Dan Grodnik and Tim Matheson, co-chairman and co-chief executive officers of National Lampoon Inc.

As such, the new issue (to be on newsstands in mid-February) will feature more than 40 pages of advertising and enjoy a 100 percent boost in advertising as compared to last year's overall average.

In what will represent a fitting tribute to National Lampoon in its 20th anniversary year, the April 1990 issue also is expected to be one of the magazine's best sellers ever, given its much-anticipated cover parody of the Sports Illustrated swimwear issue (to be on sale at the same time, not coincidentally), as well as its decidedly unique look at the annual college ritual known as Spring Break.

Of further important note is the fact that each of National Lampoon's recent issues has experienced substantially increased newsstand sales over those in previous years.

The concurrent surge in both advertising revenue and general readership is a direct consequence of the forward-looking and aggressive leadership of Grodnik, Matheson and Carr, the latter of whom was named publisher in November 1989, following a highly successful tenure as a top Playboy executive.

Based in the New York offices of National Lampoon Inc., Carr oversees the company's magazine group along with related corporate, promotional and

marketing activities.

While consistently mindful of the trademark irreverence which has made National Lampoon and its film counterparts (including the current ''National Lampoon's Christmas Vacation'') so internationally popular, Grodnik, Matheson and Carr's primary agenda revolves around giving the magazine a more sophisticated, topical and satirical edge, as well as a new editorial look.

A collector's edition 20th anniversary issue, supported by a live promotional campaign, is being planned for later this year.

#90030b0131 01/30/1990 ~Business Wire

LAS VEGAS (JAN. 30) BUSINESS WIRE - The company closed its reverse acquisition of Beat The House Enterprises d/b/a Global Touch Inc. a Nevada corporation with Kiwi III Ltd. a Colorado corporation on Oct. 2, 1989.

Kiwi III Ltd. issued 80 percent of its common stock now outstanding in exchange for all of the issued and outstanding shares of Beat The House Enterprises.

There was a change in management due to the reverse acquisition. The following persons now serve as officers and directors of the company:

David Butler, president and chief executive officer; Terry Adams, vice-president of product development; and Cory Knauss, treasurer and chief financial officer.

David Butler is currently vice-president of DMK which owns and operates two gaming establishments. They are Sunrise Lounge & Restaurant in Las Vegas, and Scotty's Laundromat in Henderson, Nev.

David Butler was employed at Caesars Palace from November 1975 to September 1989. His position was assistant vice-president of slot operations. This included overseeing the entire slot operation and marketing the slot department.

Terry Adams is currently a gaming consultant and Caribbean project manager for the Aruba Americana Casino in Aruba.

Terry Adams' prior gaming experience includes director of slot operations for the Hilton Hotel & Casino in Istanbul and Ankara, Turkey from 1983 to

1987; manufacturing manager for Casino Electronics Inc. in Las Vegas, from 1982 to 1983; and manufacturing and field service manager for Elsinore Manufacturing in Sparks, Nev. from 1981 to 1982.

Cory Knauss, CPA, is currently a small business consultant specializing in the gaming industry.

Cory Knauss was the controller for Casino Electronics Inc., a gaming machine manufacturer from 1987 to 1988; and was a senior accountant for Laventhol & Horwath where he worked on and supervised the audits of many gaming clients from 1984 to 1987.

#90030b0178 01/30/1990 ~Business Wire

CHANDLER, AZ (JAN. 30) BUSINESS WIRE - ShareData Inc. Tuesday announced that it has distributed to eight selected market makers a Prospectus covering 2,335,000 warrants to purchase shares of common stock.

All these warrants are owned by Sheldon L. Miller, the chairman of the board of the company. The Prospectus also covers an additional 159,259 shares owned by other, non-affiliated shareholders. In the distribution, Miller has solicited offers under this Prospectus which was declared effective by the Securities & Exchange Commission on Jan. 24. Any offers should be received by 9:30 a.m. EST, Jan. 31. Miller has no requirement to accept any offers received for his warrants.

The Prospectus states that the company believes that the market for floppy disk entertainment software may have been level or declining during the past 12-18 months and that the company projects that it will sustain an operating loss of approximately $500,000 for the quarter ending Dec. 31, 1989. The anticipated loss reflects the increase in amortization of previously capitalized product development costs and the increase in personnel costs and other selling and marketing costs associated with the introduction of the BSD's products. The company believes that revenue from the direct marketing of the BSD's products will not begin to be materially realized until the quarter ending March 31, 1990. Also the anticipated loss for the quarter ending Dec. 31, 1989 reflects that sales of the CPD's products declined somewhat in the second fiscal quarter compared with the preceding fiscal quarter due to the satisfaction of seasonal orders prior to the expiration of the IJE License on Sept. 2, 1989. The company is aggressively developing additional floppy disk software to replace the volume represented by the IJE License.

The company also announced in the Prospectus that it is currently exploring various alternatives for entry into the market for specialized game computers. The most popular specialized game computer is manufactured by Nintendo of America Inc. The comapny announced that it intends to begin producing and marketing game cartridges for specialized game computers on a limited basis in the near future.

The Consumer Products Division of ShareData develops and markets affordable computer software for a number of computers including IBM, Apple and Commodore. The Business Systems Division markets easy-to-use office automation software. The company is located at 7400 W. Detroit St. Chandler, Ariz. 85226. Telephone number: 602/961-7519.

#90030b0179 01/30/1990 ~Business Wire

LOS ANGELES (JAN. 30) BUSINESS WIRE - Barger & Wolen, a 49-attorney law firm with offices in Los Angeles, San Francisco and San Diego, represented all five winning insurance companies in Monday's landmark ruling by the California Supreme Court, The Travelers Indemnity Company v. Roxani M. Gillespie.

The court ruled that an insurer wishing to withdraw from doing business in California need not place its customers with another company. Proponents of Proposition 103 had argued that the measure required indefinite renewal of qualified policyholders, unless an insurer could convince another company to assume the policies.

Barger & Wolen partner Kent Keller, lead attorney for the five related Travelers companies involved in the lawsuit, said that: "To my mind, this case was always simple. There has to be in this state and in this country a right not to do business and that right has to continue to exist in a democratic society."

Assisting Keller on the case were Barger & Wolen attorneys Robert W. Hogeboom, Steven H. Weinstein and Larry M. Golub. Barger & Wolen is recognized as the state's leading law firm in the representation of insurance companies in the ongoing Proposition 103 hearings.

Barger & Wolen is a general business law firm with expertise in the fields of insurance law, business litigation, employment law, corporate, tax and securities law and real estate tranactions.

BEAVERTON, OR. (JAN. 30) BUSINESS WIRE - Mentor Graphics Corp. Tuesday announced that revenues for the fourth quarter ended Dec. 31, 1989, were a record $98,369,000, an 18 percent increase over the $83,509,000 reported for the fourth quarter of 1988.

Net income for the quarter was a record $11,788,000 (32 cents per share), a 21 percent improvement over the $9,749,000 (28 cents per share) earned in the fourth quarter of 1988.

Revenue for 1989 was a record $380,034,000, a 26 percent increase over 1988 revenue of $300,750,000. Earnings for the year were a record $44,803,000 ($1.22 per share), a 34 percent increase over 1988 net income of $33,540,000 (96 cents per share).

''I am pleased with our fourth quarter performance,'' said Thomas Bruggere Mentor Graphics chief executive officer and chairman of the board of directors. ''Not only did we achieve record revenues and earnings, but we invested substantial resources in future products. For the year, about $50 million was invested in research and development, more than what our two closest competitors combined are able to spend. In addition, we met all 1989 milestones in the development of our Software Release Version 8.0, which includes our new Concurrent Design Environment. We believe that the technology included in this release will begin to change the way the world designs electronic products.

''In addition to exceeding our profitability goals of 15 percent net operating income and 10 percent net income as a percentage of revenues, we also improved our financial position substantially. Our cash balance increased to $145 million and inventories, at $20 million, are at their lowest level in five years.''

On Jan. 11 Mentor Graphics made two announcements of great significance and with far-reaching implications. The first announcement was Mentor Graphics' intention to acquire Silicon Compiler Systems, a technology-rich integrated circuit (IC) design company. This acquisition is designed to ensure that Mentor continues to play a leadership role in the IC design market. The second announcement was the selection by Mentor of Sun Microsystems as an additional hardware platform for its software products. With the addition of Sun to its existing Hewlett-Packard/Apollo platform, Mentor will have access to over 80 percent of the UNIX-based workstation market.

''While there are many reasons to be optimistic about the future, we remain cautious about the short term,'' Bruggere continued. ''The current slowdown in the electronics industry has adversely affected the financial results of many of our customers. As a result, U.S. customer orders for our products have been below expectations. In addition, there will be costs associated with the acquisition of Silicon Compiler Systems in the first half of the year. However, we continue to be optimistic that the latter half of 1990 and beyond will be a strong period for Mentor Graphics.''

Bruggere also announced that the board of directors approved a quarterly cash dividend of 5 cents per share payable on Feb. 20 to shareholders of record on Feb. 9.

Mentor Graphics Corp. (NASDAQ: MENT), Beaverton, was established in 1981

to design, manufacture, market and service electronic design automation (EDA) systems. The company is the leader in worldwide EDA sales, with revenues of $380 million in the last 12 months. The company currently employs more than 2,100 people. In addition to its corporate offices in Beaverton, Mentor Graphics has sales and support offices in more than 50 locations worldwide. The company's headquarters are located at 8500 SW Creekside Place, Beaverton, Oregon, 97005.

#90030b0202 01/30/1990 ~Business Wire

SAN JOSE, CA (JAN. 30) BUSINESS WIRE - ARIX Corp. (NASDAQ/NMS:ARIX) Tuesday announced results for its second quarter of fiscal 1990.

For the three months ended Dec. 31, 1989, net sales were $19,082,000, as compared with $22,219,000 in the second quarter of fiscal 1989. The company posted a net loss of $5,437,000, or (71 cents) per share, compared with second-quarter fiscal 1989 net income of $1,569,000, or 21 cents per share.

For the six months ended Dec. 31, 1989, net sales were $37,386,000 as compared with $42,397,000 in the six months ended Dec. 31, 1988, resulting in a net loss of $5,394,000, or (71 cents) per share. Net income for the comparable period of fiscal 1989 was $2,610,000, or 39 cents per share.

The company noted that these results are consistent with previously announced expectations, and are due principally to the following factors: reduced sales to the company's largest customer, Unisys Corp., partially offset by increased to other customers; increased expenditures in connection with the company's diversification strategy; a non-recurring charge to earnings of approximately $2.6 million in connection with the company's acquisition of the business of Edgcore Technology Inc. and certain operating losses generated by Edgcore.

ARIX chairman and chief executive officer Eugene Manno said: ''We are continuing to make substantial, measured investment to diversify and grow our customer base and develop products for new markets, while reducing costs in those areas not directly related to this goal. The recent reduction in order forecasts from Unisys serves to underscore the need for a successful diversification program.

''Such a program has a negative effect on net income in the near term, but

I am pleased to report that we are making progress toward achieving revenue and income growth over the long term.''

ARIX Corp. designs, manufactures and markets high-performance UNIX-based symmetric multiprocessor computer systems that can accommodate more than 500 users in certain configurations. ARIX distributes its systems almost exclusively through domestic and international reseller channels, including original equipment manufacturers, value-added resellers and system integrators.

REDWOOD CITY, CA (JAN. 30) BUSINESS WIRE - Three prominent California economists will highlight a conference of government certified public accountants and finance officers on Tuesday, Feb. 6 at Le Meridien Hotel in San Francisco.

The conference is sponsored by the San Francisco Chapter of the California Society of CPAs and is open to the public.

Activities at the Finance Officer/Government Accountant/CPA Conference include the presentation of awards to three local government administrators in recognition of their contributions to their respective communities.

Tapan Munroe, chief economist of the Pacific Gas and Electric Co., will present an analysis of the economic impact of the Bay Area earthquake of Oct. 17; Dale W. Larson, vice president and senior economist of the Bank of America, will discuss the unified European market and its effect on California's economy; and, Douglas C. Henton, program manager of the Center for Economic Competitiveness of SRI International, will examine California in the 1990s.

Three government employees will be presented the Public Finance Administration Excellence Awards by the San Francisco Chapter of the state CPA Society. The award recipients are San Francisco Controller Samuel D. Yockey, San Francisco Deputy Mayor Carol Wilkins and Sunnyvale Finance Director Amy Chan. All three will also be honored by Secretary of State March Fong Eu.

Gov. George Deukmejian, Assembly Speaker Willie Brown Jr., Secretary of State Eu, Mayor Art Agnos and U.S. Rep. Nancy Pelosi are scheduled to present messages and greetings to conference participants.

Mayor Agnos is proclaiming Feb. 6 as Finance Officer/Government Accountant/CPA Day in San Francisco.

''The conference is designed to foster the spirit of inter-professional cooperation and to provide valuable economic information to participants '' said Andrew Au, chairman of the Society's San Francisco Chapter Committee on Governmental Accounting and Auditing.

The Governmental Accounting and Auditing Committee was formed to make a positive impact on the quality and practice of governmental accounting and auditing. The San Francisco Chapter is one of 14 chapters of the California Society of CPAs and the largest in the Northern California region. The California Society of CPAs represents more than 28,000 CPAs from government, public practice units of all sizes, industry and academia.

A registration fee of $26 ($20 for government and non-profit organization employees) includes lunch. For additional information, call Deandra Williams at 415/594-2490.

IRVINE, CA (JAN. 30) BUSINESS WIRE - Charles W. Missler, chairman of the board and chief executive officer of The Phoenix Group International Inc. (NASDAQ:PHIX), Tuesday announced that the company has sold its 57 percent interest in Resdel Industries (NASDAQ:RSDLE) through a management buyout to Rossiter and Co., a private company owned by Bruce G. Rossiter, a director and former officer of Phoenix.

Missler explained: ''Rossiter has been a long-time senior officer of Phoenix and brings years of turnaround experience to his assumption of leadership at Resdel. Rossiter has had a major part in Resdel's history, including his arrangement of the divestiture of Resdel's defense electronics business to The Dowty Group P.L.C. last June.''

Phoenix, through a wholly owned subsidiary, purchased its original position in Resdel in 1984 at the encouragement of First Interstate Bank. Terms of the agreement provide for the payment of $1 million to Phoenix from the future profits of Resdel.

The Phoenix position has been fully reserved since the divestiture of Resdel's defense businesses and the completion of the redirection of the company.

Commenting on the transaction, Missler further stated: ''The agreement is consistent with the Phoenix philosophy of allowing management the opportunity of directly participating in the turnaround of troubled companies. This divestiture allows Phoenix to more fully focus its resources on its higher growth portfolio companies.''

The Phoenix Group International, with headquarters in Irvine, specializes in developing emergent technology companies.

VALENCIA, CA (JAN. 30) BUSINESS WIRE - HR Textron Inc. Tuesday announced it has commenced shipping spoiler actuation subsystems to Douglas Aircraft Co. for use in the C-17 -- the U.S. Air Force's newest and most advanced cargo airplane.

HR Textron's spoiler actuation subsystem provides the hydraulic force required to position the spoiler wing panel surfaces. The spoiler slows and maneuvers the plane during both ground and airborne conditions.

The spoiler actuation system for the C-17 is a fly-by-wire control system unit in which two on-board computers process the aircraft's pilot input and sensor data to command the spoiler actuator subsystem. There are four independent spoiler panels per wing and each of the eight panels is driven by a single electro hydraulic actuator.

The set of spoiler actuators just delivered to the Douglas Aircraft Co. will be used on the first flight test aircraft, slated to make its initial flight in 1991. HR Textron will begin shipping production sets of spoiler actuators in 1990.

The C-17 is an advanced short-landing and takeoff cargo aircraft designed for resupplying or deploying troops in forward areas. The aircraft's four powerful jet engines, coupled with an advanced aerodynamic design and the utilization of composite materials enable the C-17 to carry four times the payload of the C-130 Hercules.

The U.S. Air Force plans to procure 210 C-17s through 2001. HR Textron's contract has a program potential in excess of $30 million. The company also furnishes servovalves and fuel components for the C-17 aircraft.

HR Textron of Valencia, Calif., has broad capability in the defense and aerospace industry for producing controls and control actuation systems. Product depth includes subsystems for numerous fixed-wing aircraft, helicopter, missile, and space vehicle applications. They also manufacture automatic test equipment and a variety of aerospace components such as servovalves and fuel and pneumatic systems.

Their PTI Technologies Inc., subsidiary in Newbury Park, Calif., is a recognized leader in the manufacture of filter products and filter modules for fluid systems in aircraft, chemical, and industrial applications.

HR Textron is a subsidiary of Textron Inc., a multi-industry company with operations in three business sectors - aerospace technology, commercial products and financial services. Textron is a $7.5 billion company with headquarters in Providence, R.I.

COSTA MESA, CA (JAN. 30) BUSINESS WIRE - Archive Corp. (NASDAQ:ACHV), a leading supplier of tape drive products, Tuesday announced that the Federal District Court in San Diego denied Cipher's motion to enjoin Archive's tender offer, denied Cipher's motion to dismiss Archive's complaint, and denied Archive's motion to require redemption of Cipher's poison pill.

''The decision regarding the pill does not diminish our intent to complete the tender offer promptly, particularly in light of the overwhelming Cipher shareholders support for our offer,'' said D. Howard Lewis, chairman and president of Archive.

He was referring to an earlier announcement that 82 percent of the outstanding shares of Cipher had been tendered just prior to the offer being extended to Jan. 31, 1990.

Founded in 1980, Archive today is a leading manufacturer and supplier of data backup products to original equipment manufacturers and resellers. Archive and its subsidiary Maynard Electronics offer a complete selection of 1/4-inch cartridge and 4MM DAT tape drives, cassette, 1/4-inch cartridge and 8MM helical scan tape drive subsystems, and software for both DOS and Apple computers. Archive products provide economical data backup for fixed-disk drives and perform additional functions such as program loading, software distribution and archival storage.

BALTIMORE (JAN. 3) BUSINESS WIRE - Allied Research Corp. (NASDAQ: ARAI) said its Belgian subsidiary, Mecar S.A., has received a $10.1 million contract from the Belgian Army for special 105mm training ammunition for the Leopard 1 main battle tank.

The items will be built to U.S. specifications in Belgium under a license purchased from the U.S. Government by Allied Research.

The 105mm cannon is widely used throughout the world on Leopard, M60 and M48A5 main battle tanks.

Allied Research said the order requires complete delivery within 12 months and marks the first large volume ammunition order from Belgium.

M.B. Ruffin, Allied Research's chairman, said his company was pleased by the Belgian vote of confidence and that the order meant a significant in-country market expansion for Mecar.

He also noted that the award was testimony to Mecar's product development skills, and the efficiency of Mecar's new highly automated production complex to provide fast turnaround, while meeting NATO quality targets with low cost volume production.

The company said it is actively marketing those new training rounds to countries that require realistic field training ammunition at low unit cost.

Allied Research is a diversified developer and producer of high technology weapons systems for conventional, light and mobile defense requirements throughout the world.

#90030b0621 01/30/1990 ~Business Wire

PHOENIX (JAN. 30) BUSINESS WIRE - America West Airlines (NASDAQ:AWAL, PSE:AWA) Tuesday announced a record net profit for 1989 of $20,018,000, or $1 per common share.

This compares to a profit of $9,361,000 for the year 1988, or 51 cents per common share. Revenues for 1989 almost reached the $1 billion mark, at $993.4 million, a 28.1 percent increase over 1988's $775.7 million. Operating income for 1989 reached $48.1 million, or 2.6 times more than the $18.1 million for 1988.

For the fourth quarter of 1989, the airline reported a net profit of $1,148,000, or 4 cents per common share. The corresponding quarter in 1988 produced a $19,066,000 profit, or $1.18 per common share. The year-over-year comparisons were affected by a $2,700,000 gain in the fourth quarter of 1989 from the sale of certain foreign tax benefits related to the acquisition of aircraft and $16,587,000 of extraordinary items resulting from a debenture exchange in the corresponding quarter of 1988.

America West's record profit for 1989 marked the fourth profitable year since operations began on Aug. 1, 1983. In addition, the fourth quarter 1989 profit was the seventh consecutive quarterly profit for the airline. ''In a quarter which absorbed start-up costs of launching daily Boeing 747 service from Phoenix and Las Vegas to Hawaii, we are pleased to be profitable,'' stated A.E. Frei, senior vice president - finance and chief financial officer. He continued, ''Sharp increases in fuel prices, late in the fourth quarter, kept up from having a substantially stronger quarter and year.''

A 16.8 percent increase in fuel price over the third quarter of 1989 added over $6 million to the fourth quarter operating expense. Frei said, ''This increase caught the industry by surprise. Every 1 cent increase in fuel prices, at our current consumption rate, adds approximately $3 million to America West's operating costs on an annualized basis.''

America West has recently been recognized by the Department of Transportation as a major carrier, based on the airline's annual revenues. America West flies coast-to-coast and to Hawaii with Boeing 747s, 757s, 737s and de Havilland Dash 8s aircraft. With the addition of Boston in March 1990, the carrier will serve 59 destinations in the United States and western Canada. America West is also vying for Tokyo route authority and has received the DOT Public Counsel recommendation.

SAN FRANCISCO (JAN. 30) BUSINESS WIRE - Park Lane Hotels International has been awarded a contract to design and manage a 200-room luxury hotel in Kyoto, Japan.

The agreement marks the first time an international company has been chosen to operate a hotel in Kyoto, said Lawrence Chan, president and chief executive officer of Park Lane Hotels. The hotel, to be called Park Lane Kyoto, will be the city's first European-style boutique hotel, Chan said.

The hotel is expected to cost $65 million (U.S.) and be completed in 1992. The hotel complex will include three restaurants, banquet rooms, a cafe and parking garage.

Last July, Park Lane Hotels International signed an agreement to manage the 580-room Park Lane Sydney in Australia. That hotel, part of an office and retail complex, is also expected to open in 1992.

Formed in 1985, Park Lane also owns and operates the Parc Fifty Five Hotel in San Francisco, the Parc Fifty One (formerly the Grand Bay) in New York City, Park Lane Radisson in Hong Kong, the Churchill in London, the Fountain Suites in Phoenix, the St. Anthony in San Antonio and the Coco Palms Resort in Hawaii.

The five-star Kyoto hotel will marry European and traditional Japanese influences, said Kenneth Mullins, Park Lane Hotel's senior vice president for Asia and the Pacific.

The centrally located hotel will be owned by Yamasan Company Ltd. and will be developed by C. Itoh. Planning and design work is expected to begin immediately.

Interiors of the Park Lane Kyoto will be designed by Hirsch Bedner Asociates, which is also designing the Park Lane Sydney and refurbishing the Churchill in London.

Kyoto is more than 1,200 years old and home to several hundred shrines and temples. The city is known for its textiles and artisans, as well as being a center of government, banking and insurance. Unlike many other cities in Japan, Kyoto escaped serious damage in World War II and retains its historic character.

Chan said his company plans to continue growing internationally by establishing properties in key markets, such as Los Angeles, Toronto, Chicago and thoughout Asia.

TACOMA, WA (JAN. 30) BUSINESS WIRE - Increased export activity by a variety of Pacific Northwest industries helped the Port of Tacoma reach a new record for cargo movement during 1989.

Statistics released by the Port show that 17,157,000 short tons of cargo were handled at Port facilities during 1989, a 12 percent increase over 1988.

On the export side, shipments through the Port were up 12 percent, driven largely by increased export activity by a variety ofP acific Northwest-based industries.

The Northwest forest products industry experienced a 27 percent increase in the value of their exports through Tacoma. Most of this was due to increased exports of higher-valued products. The volume of paper products increased 47 percent, plywood/veneer almost tripled, pulp was up 14 percent, and the volume of softwood lumber increased 13 percent. The volume of logs exported through Port facilities decreased 2 percent.

Other Pacific Northwest industries increased their export volume through Tacoma in 1989. Frozen fish exports increased 81 percent, while the exports of vegetable products, led primarily by an increase in frozen potato products, more than doubled. Tacoma handled 33 percent of the apples exported through Washington state ports in 1989.

Higher-valued manufactured items from other parts of the United States also showed increased volume activity in 1989. The export of heavy equipment used in agriculture, mining, and road construction was up more than 600 percent, while the export of industrial machinery more than doubled. The export of chemicals and related products through Tacoma increased 52 percent.

More than $25 billion worth of foreign trade moved through the Port, a 30 percent increase over 1988. Container activity also reached an all-time high of 924,974 TEU's (Twenty-Food Equivalent Units), an 18 percent increase over 1988.

Tacoma is currently the sixth largest container port in North America, and the 20th largest container port in the world. A variety of major construction projects were completed by the Port in 1989 to strengthen its role as a leading container port. In October, the Port opened a new $35 million container terminal, that is leased to Maersk Line, one of the world's top five container shipping lines. Maersk has been calling at the Port since 1985, and this terminal meets their expansion needs.

NASHVILLE, TN (JAN. 30) BUSINESS WIRE - The American Network Group Inc. (NASDAQ:AMNT, BSE:ANW) Tuesday annouced its board of directors has appointed Robert J. Williamson, the former president of RKO Radio, as the new president and chief operating officer, effective immediately.

From 1981 - 1985, Williamson was the president of RKO Radio managing 12 major market radio stations, the RKO Radio Networks, RKO Radio Sales and RKO Tape Corp. In addition, the board appointed John J. Casey, American Network's chairman to the additional post of chief executive officer, where he will be responsible for acquisitions, financing and strategic planning.

For the past year, Williamson was president, general manager and partner of WJTC-TV which covers the Mobile, Ala. - Pensacola, Fla. markets. From June 1988 through January 1989, he was president of The Williamson Group where he was responsible for station management and acquisitions,

including WJTC-TV.

From September 1986 thru April 1988, Williamson was senior vice president and executive director of New Century Telecommunications, a division of New Century Entertainment Inc., where he was responsbile for all North American syndicated TV sales and opened regional sales offices.

From 1979 - 1981, he was vice president and general manager of WNAC-TV, a CBS affiliate in Boston, where he was responsible for programming, labor negotiations, the news department, FCC rules, public service, specials and sales. From 1973 - 1979, Williamson was vice president and general manager of WOR-TV, New York covering the same responsibilities.

From 1969 - 1973, he was president of Metro Radio Sales, New York where he managed his Metromedia-owned station representative firm and handled national sales and was a member of Metromedia's Radio Station Acquisition Board. From 1961 - 1969 he was account executive, then vice president for Metro Radio Sales in Chicago.

The American Network Group Inc. currently owns and operates three state radio networks in Tennessee, Kentucky and South Carolina.

#90030b0632 01/30/1990 ~Business Wire

BELLEVUE, WA (JAN. 30) BUSINESS WIRE - Charles M. Pigott, chairman and chief executive officer of PACCAR Inc, announced Monday the following results for the fourth quarter and full year 1989:

PACCAR Inc
(in thousands except per share amounts)

	Three Months Ended		Full Year Ended	
	12/31/89	12/31/88	12/31/89	12/31/88
Manufacturing net sales	$ 812,648	$ 842,192	$3,331,050	$3,112,196
Financial services interest income and other	49,111	42,393	191,852	155,238
Net income	$ 98,871 (a)	46,366	241,920 (a)	175,808
Net income per share	$ 2.83	$ 1.30	$ 6.90	$ 4.90

(a) Includes $52.4 million after-tax gain from sale of a division

and a fleet of railcars.

Annual sales and net income for 1989 set new PACCAR records. Sales were up by 7 percent and net income increased by over 37 percent. U.S. market share improved, placing PACCAR as the largest U.S. manufacturer of heavy-duty trucks according to figures through November.

Net income exceeded last year's record level even without the inclusion of net gains from the previously announced sale of Wagner Mining Equipment Co. division and the sale of a fleet of railcars. Sales for fourth quarter were 3.5 percent lower than the prior year. Without the gains from asset disposals, fourth quarter net income was comparable to 1988.

PACCAR began 1989 with immense truck order backlogs. Demand for new trucks dropped significantly for the entire industry in the third and fourth quarters, but PACCAR's backlogs were sufficient to sustain near capacity production for the entire year. However, reflecting the lower demand, downward production adjustments are anticipated.

PACCAR's automotive parts sales exceeded $200 million for the first time.

The financial services companies experienced moderate growth in their loan and lease portfolios for 1989.

PACCAR Inc
Summary Earnings Statements
(in thousands except per share amounts)

SANTA CLARA, CA (JAN. 30) BUSINESS WIRE - A new startup company, PEER Networks Inc., is building a specialized network computer that can more effectively link dissimilar computer networks found in Fortune 500 companies.

This new network computer is based on a radically new hardware technology -- the first to specifically address the many problems plaguing corporate data communications. The network computer is inherently more fault tolerant, secure, expandable, manageable, programmable, and economical than anything currently on the market.

The company believes the network computer, invented by PEER founder Dr. David Chung, will give it a big advantage in what has become a multi-billion dollar market. The industry is seeing a burgeoning demand for a device that both can glue together disparate computer networks to create one integrated corporate network, and can run network-resident applications such as transaction logging. The PEER network computer is the first device designed specifically to providethese two functions efficiently.

Potential users of the new product include large retail operations, financial institutions, airlines, RBOCS (Regional Bell Operating Companies) and government agencies.

A department store chain, for example, might collect point-of-sale information from computerized cash registers at each sales center. The chain might also collect accounting, inventory, administrative and personnel information from terminals and personal computers elsewhere in the stores.

PEER Networks founder Dr. David Chung is an inventor with some 40 patents to his credit. He has designed integrated circuits, board level hardware, systems, and software for more than 25 years on behalf of such major manufacturers as IBM, Texas Instruments, and Fairchild Semiconductor. He is the inventor of the Fairchild F8, the world's first microcontroller.

In contrast, PEER's hardware architecture supports hundreds of processors operating in parallel -- a design comparable to having many turnstiles, all in operation at once. The result of PEER's design is that the system never becomes a bottleneck -- data keeps flowing even though one component may fail.

PEER is scheduled to ship its first network computer during the second quarter of 1990. The company initially will distribute through a direct sales force, systems integrators and OEMs.

STOCKHOLM, SWEDEN (JAN. 30) BUSINESS WIRE - Ericsson has received an order worth $40 million from the Tunisian Telecommunications Authority for the purchase of AXE digital switching equipment.

The equipment will be manufactured in Sweden and installed in 1990-1991. The order also includes the upgading of previously installed switches. The equipment will be manufactured in Sweden and installed in 1990-1991.

Ericsson will also establish a local company in Tunisia which will work with software and a certain amount of manufacturing. The company will have a total of 50 employees.

Ericsson entered the telephone switching market in Tunisia at the end of the 1950's, after Tunisia's independence from France in 1956. The first AXE order was received in 1980.

This is the third order Ericsson has received from North Africa within the last month. The other two were from Algeria ($36 million) and Morocco (over $30 million).

Headquartered in Richardson, Texas, Ericsson is the wholly owned North American subsidiary of LM Ericsson, of Stockholm, one of the world's leading manufacturers of telecommunications equipment.

MILWAUKEE (JAN. 31) BUSINESS WIRE - Fiserv Inc., a computer-services company providing data processing and information management systems to financial institutions worldwide, has announced record revenues and net income for the company's fourth quarter and year ended Dec. 31, 1989.

For the fourth quarter, Fiserv revenues were approximately $44 million, a 16 percent increase over the $38 million reported for the last quarter of 1988. Net income for the quarter rose to $3,072,000, an increase of 25 percent over the $2,448,000, reported in 1988.

Net income per share for the period based on 8,546,000 shares outstanding

was 36 cents per share, a 20 percent increase over the 30 cents per share on 8,290,000 shares outstanding for the fourth quarter in 1988.

For the year ended Dec. 31, 1989, revenues were over $164 million, a 31 percent increase over the $125 million reported in 1988. Net income rose to $11,350,000, a 23 percent increase over the $9,234,000 in 1988. Net income per share for 1989 based on 8,486,000 shares outstanding increased 20 percent to $1.34 per share from $1.12 on 8,270,000 shares in 1988.

A substantial portion of the revenue increase reported since the beginning of 1989 relates to revenues of companies acquired during the first half of 1988, and, to a lesser degree, to companies acquired in 1989. The company also has experienced overall revenue growth in the operation of its previously existing business.

''During 1989, we aggressively pursued our opportunities, expanding our markets and services through acquisitions, addition of new clients and internal growth,'' says George D. Dalton, chairman and chief executive officer for Fiserv.

''We continued to build our company's recurring revenue base through over ever-increasing share of account, item and transaction processing among the nation's financial institutions. With two acquisitions in the year, we strengthened our presence in the growing credit union industry, and continued our geographic expansion into the New England market. Overall, our acquisition and internal development strategies are contributing substantially to our increases in both revenues and net income.

''We have consistently increased our account processing base and now look forward to making 1990 another record year for Fiserv.''

Complementing the company's growth through acquisitions, Fiserv data center operations and subsidiary companies also advanced their businesses.

In 1989, Fiserv data processing sales professionals signed a new client on an average of once every five business days, with 57 financial institutions choosing the Fiserv solution during the year. With a client contract renewal rate of 96 percent, the company is solidly positioned for continued internal growth in recurring, full-service data processing revenues.

1989 was a banner year for Fiserv subsidiary First Trust Corp., a specialized account processor, administrator and trustee of individual and business retirement plans.

During the year it received transfer of more than 38,000 retirement plans, bringing the total number of individual and qualified retirement plans currently administered to approximately 192,000 with assets valued at over

$2.9 billion.

Sendero Corp., a subsidiary recognized for developing the industry standard for interest rate-risk management and related educational services, added more than 200 new clients in 1989. The company has made over 1,000 installations of the Sendero model technology in 20 countries throughout the world.

Fiserv Forms & Graphics also reported a strong year for 1989, which included the production of a new electronic forms design program. with over 27 years experience, the division provides specialized knowledge on printing design, production, dsitribution efficiencies and marketing of custom printed products to over 3,000 financial and commercial clients throughout the nation.

''Fiserv works in partnership with its clients to develop a comprehensive data processing system that complements their business goals and strategic plans,'' says Leslie M. Muma, president and chief operating officer for Fiserv.

''Together we focus on the computerized systems and operational strategies that an institution needs to provide optimum service to their customers. As a result, we continue to experience gains from institutions interested in our cost effective account processing and related financial information management services.''

A publicly-held company, Fiserv stock is traded in the NASDAQ over the counter market system under the symbol FISV.

#90030b0649 01/30/1990 ~Business Wire

HINTON, Va. (JAN. 30) BUSINESS WIRE - WLR Foods Inc. (NASDAQ:WLRF) Tuesday reported strong results for the second quarter and first six months of fiscal 1990, ended Dec. 30, 1989.

Net sales for the second quarter of fiscal 1990 increased 5.5 percent to $115,810,000 compared to $109,818,000 reported in the same period of fiscal 1989. Net earnings for the second quarter rose 8.6 percent to $2,756,000, or 41 cents per share, compared to $2,537,000, or 38 cents per share, in the comparable period last year. All per share figures have been adjusted to reflect a 3-for-2 stock split distributed May 5, 1989.

For the first six months of fiscal 1990, net sales increased 6.0 percent to $238,535,000 compared to $224,934,000 in the same period of fiscal 1989. Net earnings advanced 38.7 percent to $8,422,000, or $1.27 per share, compared to $6,072,000, or 92 cents per share, in the first half of fiscal 1989.

Commenting on the results, James L. Keeler, chief executive officer, said, ''We achieved strong second quarter results despite lower poultry commodity prices. While we were aided by lower feed costs, we also benefited from our ability to respond to the strong demand in the commodity turkey market which outpaced that of chicken throughout the period.''

Keeler continued, ''The noteworthy increase in earnings for the first half of fiscal 1990 reflects our excellent first quarter in which we began to fully realize the improvements we had worked to achieve in our Rockingham chicken operation. These improvements continued in the second quarter, and helped to offset the very soft broiler market.''

During the fiscal 1990 second quarter, the average market price of turkeys decreased 10 percent and commodity chicken prices decreased 15 percent from the second quarter last year. The improvement in feed costs included a 12 percent reduction in the price of corn, the major ingredient in poultry feed, and a 23 percent reduction in soybean meal.

The company's balance sheet at Dec. 30, 1989 remained strong. Working capital was $45,403,000 and the current ratio was 2.46-to-1. Long term debt-to-equity declined to 3.7 percent, among the lowest in the industry.

Net worth at December 30 increased to $95,068,000 or $14.39 per share.

Keeler concluded, ''As we enter the third quarter, we expect the commodity markets for both turkey and chicken to continue to display seasonal weakness. On the other hand, our results throughout the remainder of the year will continue to benefit from low feed costs, our improved efficiency and our strong financial condition.''

WLR Foods Inc. is engaged in fully integrated turkey and chicken production, processing, further processing and marketing. The company is the eighth largest poultry processor/further processor in the United States. CONTACT: WLR Foods Inc., Hinton

#90030b0656 01/30/1990 ~Business Wire
FORT WORTH, Texas (JAN. 30) BUSINESS WIRE - Pancho's Mexican Buffet Inc., had net earnings of $340,083, or $.07 per share, on revenues of $16,268,341 for the three months ended December 31, 1989, compared to net earnings of $705,652, or $.15 per share, on revenues of $15,346,951 for the same period 1988.

''During our first quarter we continued to experience increased cost of most food products, supplies and services. These cost increases, coupled with continued slight decreases in customer counts and extremely cold weather conditions in late December, resulted in further reduction of profit margins,'' Hollis Taylor, president and chief executive officer, said.

''One new restaurant opened during the quarter, in Aurora, Colo., and one in Lakewood, Colo., is scheduled to open in early April. The scheduling of additional restaurants openings will be reduced, however, as we concentrate on margin improvement. Previously announced plans to open eight restaurants in fiscal 1990 have been changed to four to six new locations,'' Taylor added.

He also announced that Pancho's board of directors has authorized the future purchase of up to 500,000 shares of the company's common stock from time to time in the open market or privately negotiated transcations. Taylor said, ''We feel that it is in the best interests of our shareholders to repurchase stock when, in management's opinion, the stock is undervalued at current market levels. Purchased shares will become treasury shares and will be available for general corporate purposes.''

#90030b0659 01/30/1990 ~Business Wire

GREENWICH, CT (JAN. 30) BUSINESS WIRE - The Fund American Cos. reported consolidated net income of $73 million, or 99 cents per share, for the year ended Dec. 31, 1989, compared to $235 million, or $4.51 per share, for 1988, a decline in net income per share of 78 percent.

A net loss of $16 million was reported for the fourth quarter of 1989, or a 76 cents loss per share after dividends for preferred stock. Net income for the fourth quarter of 1988 was $71 million, or $1.34 per share.

Book value per common share as of Dec. 31, 1989, was $36.21, an increase of 11 percent from $32.75 at year end 1988. The increase in book value for 1989 is attributable mainly to continued favorable performance from the company's equity portfolio.

Consolidated revenues were $3.5 billion for the year ended Dec. 31, 1989, a decrease of 6 percent as compared to $3.7 billion reported in 1988. Consolidated revenues were $874 million for the three months ended Dec. 31 1989, down 4 percent from $910 million reported for the same period of 1988.

The Fireman's Fund insurance operations reported an underwriting ratio of 122.3 percent for the year ended Dec. 31, 1989, compared to 109.2 percent for 1988. For the fourth quarter, the underwriting ratio was 127.0 percent in 1989 and 111.8 percent in 1988.

Losses and loss adjustment expenses for 1989 included $152 million of higher-than-anticipated costs from claims incurred in prior years, primarily legal expenses for the settlement of claims. For the year, Hurricane Hugo caused approximately $49 million of pretax losses, net of reinsurance recoveries. The Oct. 17 California earthquake accounted for approximately $15 million of pretax losses, net of reinsurance recoveries.

Net premiums written in 1989 were $2.7 billion, down 5 percent compared to 1988 premiums of $2.8 billion. The decline is mainly the result of writing fewer policies at prices that are generally flat compared to those of the previous year. For the fourth quarter, net premiums written were $609 million in 1989, compared to $640 million in 1988, also a decrease of 5 percent for the period.

LOS ANGELES (JAN. 30) BUSINESS WIRE - Utilitech Inc. (NASDAQ symbols UTLL - Common Shares, UTLLW - Warrants) announced Tuesday that it has signed a Definitive Agreement with United Merchants & Manufacturers, Inc. (''UM&M'') to acquire its Decora division, best known as the original manufacturer of ConTactR brand self-adhesive products.

Utilitech will pay $23 million in cash for Decora. The purchase price will be paid from new secured and senior subordinated debt currently being finalized with a major Northeastern bank and its affiliate, and from Utilitech's working capital and previously announced credit facility with its merchant bank. The transaction is due to close in February, 1990.

Decora, which operates from its own 230,000 square foot facility in Fort Edward, N.Y., has been in business since 1952, and was the originator of pressure-sensitive stylized decorative covering material. Decora is the sole and exclusive manufacturer of Contact brand decorative covering material for Rubbermaid, the plastic and rubber housewares manufacturer, under a long-standing exclusive manufacturing agreement.

Utilitech is negotiating modifications to the manufacturing agreement to accommodate Rubbermaid's requirement for long-term continuity of supply. A final agreement is expected shortly.

In recent years, Decora has been expanding its business into other areas of pressure-sensitive materials, including specialty tapes, roll label stock, and siliconized release paper. Significant growth opportunities exist from these products for Decora.

The acquisition of Decora represents a major step in the continued growth of Utilitech and the implementation of its business plan. Utilitech's revenues will significantly increase as a result of this acquisition and the recently announced acquisition of Yorkville Industries Inc.

With the addition of Decora, Utilitech expects to report a significant improvement in its future profitability and will continue development of its business plan of expansion through internal growth and acquisition.

The pressure-sensitive material industry, identified as being a highly dynamic growth area, represents opportunities for Utilitech, in addition to its focus in the lighting industry. Utilitech anticipates that further acquisitions will be synergistic to its lighting and pressure-sensitive material interests.

Utilitech Inc. furnishes products and services to the telecommunications and lighting industries.

ORLANDO, FL (JAN. 30) BUSINESS WIRE - Strategic Relations Group (SRG), a subsidiary of Strategic Communications USA Inc., announced Tuesday that Miami-based Noven Pharmaceuticals Inc. (NASDAQ: NOVN) has signed a contract for marketing and stockbroker relations services.

Noven Pharmaceuticals Inc. is engaged in the development and manufacturing of transdermal drug delivery systems. Transdermal systems move a drug from outside the skin through the skin into the bloodstream via thin banadage-like applicators.

''The transdermal process of taking drugs is painless, it does not break the skin like a needle, and it does not send concentrated doses to the stomach like oral medications. The medicine is absorbed into the bloodstream through a small patch the patient wears,'' explained Noven President and COB, Steven Sablotsky.

''We believe transdermal drug delivery will be the way of the future, and that's what makes it an innovation investors need to follow,'' added Roberto Veitia, president and COB of Strategic Communications.

Strategic Relations Group will implement a program which will create awareness of Noven among investors nationwide. Noven has developed a proprietary patch that has numerous advantages over those currently on the market. Its first entry into the marketplace will be a patch which releases the female hormone estrogen through the skin directly into the bloodstream.

The USA market for this one product is expected to be between $150 million and $500 million annually.

Noven President Steven Sablotsky is a pioneer in the field of transdermal research, and developed a transdermal product for Key Pharmaceuticals which became a multi-million dollar source of income for that company.

Sablotsky formed Noven in 1987 for the purpose of expanding transdermal research, applications, and markets.

''We are pleased to add Noven to our growing group of clients,'' added Veitia. ''Noven has a promising story to tell. They want to take an aggressive stance in getting that story told to potential investors, and we are here to make certain that happens.''

Noven Pharmaceuticals Inc. trades on the NASDAQ exchange in the United States. Trading symbol: NOVN.

     #90030b0674 01/30/1990 ~Business Wire
MORRISTOWN, NJ (JAN. 30) BUSINESS WIRE - Businesses that need to move large volumes of computerized information have a new option for doing it more quickly and economically, AT&T said Tuesday.

These customers can now make better use of the Integrated Services Digital Networks (ISDN) capability of AT&T's 5ESS Switch with ISDN workstations

and upgrade packages for personal computers offered by ICL.

Business customers can now control network resources more flexibly and economically without paying the price for a dedicated packet-switched line 24 hours a day. ICL is the first company to offer ISDN equipment to support AT&T's On-Demand B-Channel Packet Switching capability available in 5E5 software.

"This application will bring users economical, high-speed, multiplexed ISDN services to personal computers on the desktop with pushbutton convenience," said Les Eastwood, ISDN applications manager at AT&T Network Systems. "We are pleased to work with ICL in achieving the first personal-computer-to-ISDN interface that uses this capabilty on the 5ESS Switch."

Business customers that need to transfer large amounts of image and text over computers, such as publishers, printers, manufacturers, and physicians, can now use packet-switched channels when necessary to transmit voice or data.

An ISDN Basic Rate Interface (BRI) line provides users with two B-Channels at 64 Kilobits-per-second each, for voice, and one D-Channel of 16 Kilobits-per-second, for data.

Using ICL ISDN workstations or ICL's I(3), an ISDN upgrade package for personal computers, and AT&T's 5E5 software, publishers, printers or manufacturers can now use one B-Channel for a conference call while transferring images and large amounts of data over the other B-Channel to participants.

Any combination of voice, packet data, or circuit-switched data can be sent over the B-channels with improved accuracy and speed. Physicians can respond faster to patient's medication needs by sending important background files and insurance information to the admissions desk. Similarly, manufacturer's engineers can transfer files and review line drawings and detailed schematics over a single telephone line from different locations.

"This capability adds power to ISDN technology as a multi-faceted communications solution," said Ned Semonite, North American ISDN product manager for ICL. "Having packet access through a standard interface directly from the desktop provides a cost effective and efficient bridge to connect multiple ISDN workplaces."

CONTACT: AT&T Network Systems, Morristown, Ellen Bond-Bravo, (201) 631-6533, or (201) 953-8370 (home) or ICL, Stamford, Conn., Ron Aitchison, (203) 968-7222.

#90030b0680 01/30/1990 ~Business Wire

NEEDHAM, MA (JAN. 30) BUSINESS WIRE - Cognex Corp. (NASDAQ:CGNX), a leading manufacturer of machine vision systems, Tuesday announced that Allan Wallack, executive vice president and chief operating officer, has resigned effective Feb. 23, 1990.

Wallack joined Cognex in April 1986 at a time when the machine vision industry was in turmoil. He led the transition from Cognex's previous end-user market focus to an OEM/systems integrator strategy that has proven to be very successful.

In addition, Wallack instituted formal policies and procedures that allowed Cognex to grow both rapidly and profitably over the past four years. To date, Cognex has posted 10 consecutive quarters of profitability and increased revenues.

''Allan has been instrumental in building a foundation for our long-term success,'' said Dr. Robert J. Shillman, president and chief executive officer. ''Allan is leaving us with a solid corporate infrastructure in place, and a highly competent management team ready to capitalize on the growing market opportunities in achine vision.''

''My reasons for leaving are very personal and not at all related to my relationship with Bob or the company, which are both excellent,'' said Wallack. ''In the past nine years, I've dedicated all of my time and energy to making things happen at emerging-growth companies; first at Masscomp, and next, at Cognex. It is now time for me to focus on my personal interests.''

Dr. Shillman said that Cognex has initiated a search for a successor to Wallack, and that he anticipates filling the position sometime during the company's second quarter.

Cognex Corp. designs, develops, manufactures and markets a family of ''machine vision'' computer systems (sophisticated software and high-speed special-purpose computers) which are used to replace human vision in a wide range of manufacturing processes in the semiconductor, electronics, pharmaceutical and aerospace industries.

#90030b0681 01/30/1990 ~Business Wire

SUGAR LAND, TX (JAN. 30) BUSINESS WIRE - Imperial Holly Corp. (AMEX: IHK) reported net income of $8,720,000, or $1.38 per share, on revenues of $198,310,000 for its third fiscal quarter ending Dec. 31, 1989.

Results for the corresponding quarter last year were net income of $10,880,000, or $1.80 per share, on revenues of $176,040,000.

Nine months year-to-date results are revenues of $561,644,000, net income of $15,946,000 and earnings per share of $2.53. Comparable results last year were revenues of $505,307,000, net income of $13,514,000 and earnings per share of $2.30.

Included in the results for the third fiscal quarter of last year was an after tax gain from the sales of securities of $3,871,000, or 64 cents per share.

This gain, along with a gain of $2,212,000 from the restructuring of one of the company's retirement plans, which was recognized earlier, brought the total for non-recurring gains in last year's nine months year-to-date results to $6,083,000 or $1.04 per share.

Thus, excluding the non-operating gains reported last year, this year's third quarter net income increased 24 percent and net income for the year-to-date more than doubled.

Contributing to the outstanding operating results in both periods was an increase in sales volume and an improvement in product prices. At the same time, the continuing amortization of the company's contribution to its ESOP adversely affected the comparison of this fiscal year's results to those of last year's.

This amortization, which will be completed at the end of this fiscal year, resulted in after tax non-cash charges of $1,383,000, or 22 cents per share for the third quarter and $3,029,000, or 48 cents per share for the nine months year-to-date. (There were no ESOP charges in the comparable periods last year).

If these current fiscal year charges and last fiscal year's non-recurring gains are excluded, per share earnings for the quarter ended Dec. 31, 1989 would be $1.60 compared to $1.16 in the like period last year. Year-to-date results would be $3.02 compared to $1.26 last year.

These figures, representing increases of 38 percent and 140 percent, more accurately reflect Imperial Holly operations.

#90030b0687 01/30/1990 ~Business Wire

ORLANDO, FL (JAN. 30) BUSINESS WIRE - Laser Photonics Inc. (NASDAQ: LAZR) announced Tuesday that it has completed development of a new holmium YAG surgical laser.

The holmium laser is used for various medical applications such as general surgery, gastroenterology, vascular surgery, and cardiology. With a total potential market for surgical lasers expected to exceed $300 million in 1990, the company anticipates that this product will perform well in the overall medical marketplace.

Laser Photonics' holmium laser is currently under evaluation by several large OEMs and is expected to be offered on an OEM basis and a direct basis, following FDA approval.

This new solid-state holmium laser can potentially replace many of the infrared gas and solid-state lasers currently used for general surgical procedures and shows promise as a laser for peripheral vascular surgery and cardiology.

The laser offers significant advantages over other types of lasers, due to the high absorption in water of this laser's wavelength. The high absorption allows the laser to vaporize tissues much faster than other available lasers without the associated thermal damage to surrounding tissues.

The laser energy can be transmitted through optical fibers, thus allowing for minimally or non-invasive medical procedures.

Laser Photonics Inc., designs, manufactures, and markets solid-state and gas laser systems, components, and other peripheral equipment for

applications in the medical and scientific markets.

WAYNE, PA (JAN. 30) BUSINESS WIRE - Chairman George R. Jensen Jr. of American Film Technologies Inc. (NASDAQ:AFTI, PHLX:AFT) Tuesday announced record results for the second quarter and first half ended Dec. 31, 1989, and a new contract to color-convert 50 black-and-white films.

Second quarter revenues rose 65 percent to $4,753,640 from $2,878,196 for the like quarter last year. Second quarter net earnings after taxes amounted to $959,940, or 5 cents a share, compared to $218,204, or 1 cent a share, for the like quarter a year ago.

Revenues for the first six months rose 73 percent to $8,261,713, from $4,781,601 for the like period last year. First half net earnings amounted to $1,519,908, or 8 cents a share, compared to a net loss of $(383,507), or 4 cents a share, for the first half last year.

By comparison, fiscal 1989 (June 30) saw revenues of $11,599,000 and net earnings of $622,000, or 1 cent a share.

Jensen said these record results were primarily due to an increase in contract fee work. The equivalent of 17 films were color-converted during the second quarter compared to the equivalent of 11 films in the like quarter last year. Revenues in the second quarter were received from contract fee work as well as from syndication fees for films which the company produced in the first quarter for its own library.

AFT is also pleased to announce that a new contract was entered into with Turner Entertainment/Paravision International (France) for the production of color versions of 50 films from Turner's RKO film library. Starting this summer, the contract revenues will be approximately $11 million, which increases AFT's backlog to an all-time-high $64 million.

AFT is the nation's leader in creating color versions of black-and-white motion pictures and television programs for others on a fee basis and for its own film library. Recently AFT introduced a computer-based paperless animation system.

NEW YORK (JAN. 30) BUSINESS WIRE - William Ziff, chairman of Ziff Communications and the Ziff-Davis Publishing Co., Tuesday announced that J. Samuel Huey, 37, has been promoted to group vice president in charge of MacUser, MacWEEK, and the Ziff-Davis MacNetwork.

Since March of 1988, Huey has been Associate Publisher of PC Magazine, heading up the business side of the publication. He was responsible for general management of PC Magazine's advertising sales operations and marketing activities including market research, advertising promotion, merchandising, circulation strategy, and events.

During Huey's reign, PC Magazine's 1989 revenues surpassed the $100 million mark as the magazine carried almost 6,000 pages of advertising in its 22 issues and surpassed a primary circulation level of 700,000 readers. PC Magazine's advertising revenues were up 35 percent in 1989 over 1988 levels. Huey led an ad sales operation including some 50 field sales and telemarketing personnel.

According to William Ziff, ''Sam Huey is experienced in the management of all phases of a publication -- editorial, business, marketing and sales. I believe that adding Sam to our already excellent staff in the Bay Area will generate another step forward for our Macintosh publications.''

Since its purchase by Ziff-Davis in 1984-5, MacUser magazine has experienced rapid growth in both circulation and advertising revenues. MacUser's product-intensive editorial content focuses on Macintosh and Mac-related personal computer products. The monthly magazine features product reviews and information on enhancing productivity through the use of Macintosh products.

MacUser provides comprehensive information for Macintosh product buyers throughout American business as well as education and government establishments. MacUser's primary paid circulation (subscription and single copy) is 300,000.

MacWEEK is the only weekly newspaper edited specifically for Macintosh volume buyers -- influential professionals who buy and manage a growing number of Macintosh computers at business, government and university sites. Providing the most progressive, accurate and timely coverage of the Macintosh marketplace, MacWEEK is presented in a graphic oversized, four-color format produced entirely on the Mac. MacWEEK is a controlled circulation newspaper with a qualified circulation of 70,000.

The new Ziff-Davis MacNetwork allows Macintosh and related computer

marketers to take advantage of the circulation precision and reach, editorial impact, and Mac-buying results of both Ziff-Davis Macintosh publications. A set of combination rates is available to advertisers who qualify for the MacNetwork and these rates offer generous discounts along with flexible incentives to increase usage of one or both ZD Mac titles.

#90030b0692 01/30/1990 ~Business Wire

BRIDGEWATER, NJ (JAN. 30) BUSINESS WIRE - AT&T and Aristacom International Inc. Tuesday announced new software products to link AT&T's PBX systems to telemarketing applications running in IBM System/370 mainframe environments.

The products, part of Aristacom's Switch Computer Interface Link family (SCIL-Link), offer companies with telephone-intensive applications such as telemarketing and customer service the ability to deliver faster, more personel customer service while improving agent productivity.

Aristacom's new products are SCIL-IG, a software interface to AT&T's ISDN (Integrated Services Digital Network) Gateway, and SCIL-ITG, an interface to AT&T's Integrated Telemarketing Gateway.

AT&T's ISDN Gateway (IG) and integrated Telemarketing Gateway (ITG) products are the switch-link half of the bridge between the DEFINITY Communications System or System 85 Automatic Call Distributor (ACD) and the computer.

Aristacom's SCIL-IG and SCIL-ITG are the application-link half of the connection. Together, they link AT&T DEFINITY products to the user's IBM-based telemarketing/customer service applications.

Integrating the PBX and computer enables organizations to make maximum use of information that accompanies incoming calls from AT&T's long distance network. When ISDN is used, this information includes the caller's billing telephone number and the number the caller dialed.

Traditionally, the agent has been the link between the voice and the data systems. Now, with the computer identifying and intelligently routing calls and sending data with the call, agents are free to start working with the customer the moment the call is answered. This system also eliminates much of the frustration experienced when a caller is asked for an identification number or to describe a problem, only to find out the call needs to be transferred and the process must be repeated.

SCIL-IG offers customers Intelligent Inbound Call Processing, which uses the information transmitted via AT&T's network and the PBX to identify the customer, retrieve the correct file, format it for this customer's application and transmit it to the agent's screen.

#90030b0693 01/30/1990 ~Business Wire

DALLAS (JAN. 30) BUSINESS WIRE - Uranium Resources Inc. (TSE:URI) (NASDAQ:URIX) announced record net income for 1989 of $3,655,000 (13 cents per share) vs. $1,691,000 (6 cents per share) in 1988, or an increase of 116 percent.

Revenue for the year was also a record at $22,204,000 compared to $17,760,000 in 1988, or an increase of 25 percent. Cash flow provided by operations in 1989 increased to a record $11,529,000 vs. $5,825,000 in 1988, or an increase of 98 percent.

Results for the fourth quarter amounted to a loss of $89,000 ($.00 per share) in comparison to net income for the same period in 1988 of $983,000 (4 cents per share). The loss in the fourth quarter, which had been anticipated, was due to a lower level of deliveries scheduled during that period, in comparison to the substantial level of deliveries during the first nine months of the year.

Commenting on the 1989 results, Raymond G. Larson, president, said, ''These record results, despite the continuing unprecedented decline in uranium prices during the year, clearly demonstrate the unique strategic position we have been able to establish in our industry.''

While several factors contributed to this success, ''our ability to produce at low cost (approximately $12.30 per pound including DD&A) at our Kingsville Dome property in South Texas, and our ability to sell under our long term sales contracts, with selling prices substantially over spot, were the major factors,'' he said.

These contracts resulted in 1989 sales of 1,040,000 pounds at an average sales price of $21.35.

The company sells its uranium production to electric utilities, almost exclusively under long term contracts. During 1988 and 1987, the company

signed five uranium-supply contracts of five-to-eight-year duration for approximately seven million pounds of uranium.

At Dec. 31, 1989, the company has in excess of $100 million of contracted deliveries through 1995 under its six long term contracts, at average selling prices of over $20 per pound.

Uranium Resources Inc. is a Dallas-based uranium mining company. The company produces uranium in South Texas using low cost in situ solution mining techniques.

EL SEGUNDO, CA (JAN. 30) BUSINESS WIRE - The Rockwell International Corp. Trust (NYSE:ROK) has made a $500,000 pledge to Stanford University to help construct and equip the Information Science Building at the Near West Campus.

The new facility will be part of the Computer Science Department at Stanford, and will be used by the artificial intelligence faculty and consultants, doctoral and masters students, and research associates.

Rockwell International and the Rockwell Trust have contributed more than $3 million to various programs at Stanford, including engineering and research projects as well as engineering and science graduate fellowships.

This $500,000 commitment to the university will be dispersed over five years. The company is also a founding member of the Center for Integrated Systems, a partnership between Stanford, the U.S. Government and 20 industrial sponsors providing research and production of silicon chips.

Rockwell established a satellite laboratory to pursue Artificial Intelligence research in Palo Alto, Calif., as part of the Corporate Science Center in Thousand Oaks, Calif.

Nearly one-half of Rockwell's Trust contributions go to education-related programs and projects throughout the nation.

Rockwell International is a $12 billion multi-industry company applying advanced technology to a wide range of products in its aerospace, electronics, automotive and graphics businesses.

NEW YORK (JAN. 30) BUSINESS WIRE - Northern Telecom (NYSE:NT) Tuesday unveiled the Meridian 1 business communication systems product line, with double the capacity of any other business communication systems available in the United States.

The Meridian 1 is compatible with communications standards for more than 70 countries, and Meridian 1 digital sets can display operating instructions on a visual panel in any one of six languages -- English, Spanish, German, Dutch, and two versions of French.

Meridian 1 uses an architecture consisting of stackable modules than can be updated with the latest voice features, data connectivity and sophisticated digital networking services for business communication applications ranging in size from 30 to 60,000 lines, the widest range in the industry.

This combines the flexibility, modularity and packaging of the Meridian SL private branch exchange products with the high capacity, redundancy and networking capabilities of Northern Telecom's central office-based systems.

In addition to offering one of the industry's most complete sets of common features and applications across the product line, Meridian 1 also provides common hardware and adaptive software.

This means that currently installed Meridian SL-1 and Meridian SL-100/SuperNode systems can be updated with the latest voice features, data connectivity and sophisticated digital networking services for business communication applications.

Meridian 1 capabilities extend from voice and data features for very small organizations to high capacity advanced tandem networking, very large automatic call distribution (ACD) centers (up to 4,000 agents), multi-function military agency support, campus communication systems, intelligent network node capabilities and the bridge to future high speed broadband fiber-optic based services.

Northern Telecom is the leading global supplier of fully digital telecommunications systems. The company provides products and services to the telecommunications industry, businesses, universities, governments and other institutions worldwide. Northern Telecom Inc., with its headquarters in Nashville, Tenn., employs more than 22,000 people across the United States.

DALLAS (JAN. 30) BUSINESS WIRE - Sterling Software Inc. (ASE:SSW) said earnings per share before an extraordinary gain for the first quarter of fiscal 1990 increased to 17 cents, up from 14 cents per share last year.

Revenue for the quarter ended Dec. 31, 1989, rose to $44.9 million from $40.7 million a year ago.

Sterling said it realized an after-tax extraordinary gain in the first quarter of $369,000, or three cents per share, as result of buying back $2.2 million of its eight percent convertible debentures, reducing the amount outstanding to approximately $63.8 million.

During the same quarter last year the extraordinary gain amounted to $1.1 million, or 10 cents per share. Total earnings per share for the respective quarters were therefore 20 cents in 1990 and 24 cents in 1989.

Sterling Software, headquartered in Dallas, specializes in systems and applications software products and professional services for the federal government.

Results for the comparable 1990 and 1989 periods follow.

LONDON (JAN. 30) BUSINESS WIRE - Northern Telecom (NYSE:NT) Tuesday announced that it has given sole distribution rights to its new Meridian 1 communications system in the United Kingdom to British Telecom.

The agreement will enable British Telecom, which operates one of the world's largest telephone networks, to offer its United Kingdom customers a wider choice of systems and at the same time enhance its capacity to support its multi-national customers.

David Dey, managing director of British Telecom's Communications Systems Division, said: ''Our customers are demanding communications solutions that can help their businesses in the United Kingdom and worldwide.

''British Telecom is committed to meeting this need. Through Meridian 1 we can offer a system that combines the latest technology with quality service and support in the United Kingdom, and we can give our customers access to the same system throughout the world.''

Meridian 1 complies with international standards for Integrated Services Digital Networks (ISDN) and with the United Kingdom's own national requirements for public and private networks. It will allow British Telecom to offer advanced applications in voice, data communications and sophisticated information services, while also providing a technological platform on which to incorporate future innovations.

British Telecom says, ''Meridian 1 is the powerful and versatile product the organization needs to meet the demanding standards of our customers at home and abroad.''

British Telecom's principal business is the provision of telecommunications services, both in the United Kingdom and internationally. The company is among the world's leaders in telecommunications innovation. High speed data services for business, videotex services, optical fiber technology are among the advanced technologies it has applied in its network.

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems. Its revenues in 1989 were approximately $6.1 billion. Its common shares are listed on the New York, Toronto, Montreal, Vancouver, London and Tokyo stock exchanges.

MILWAUKEE (JAN. 30) BUSINESS WIRE - Autotrol Corp., Milwaukee, (NASDAQ:AUTR) announced Tuesday that it filed a registration statement with the Securities and Exchange Commission relating to its proposed offering of up to 780,000 additional shares of its common stock on a subscription basis to present shareholders.

Although the ratio and price to shareholders have not been finally determined, it is expected that each shareholder will have a basic right to purchase additional shares in proportion to the number of shares of common stock owned. It also is expected that shareholders will be given

the right to make further purchases from the shares that are not purchased by others. Autotrol has reserved the right to postpone this rights offer until a later time, or to refrain from making it at all if it deems such action advisable.

The date of record for determining shareholders entitled to subscribe for additional shares of common stock will depend upon the time of Autotrol's regulatory filings, but is expected to be on or after March 1, 1990. It is anticipated that the subscription period will extend for approximately four weeks following the effective date of the registration statement. The definitive terms of the offering, including the subscription price, will be included in the Autotrol prospectus, to be distributed after effectiveness of the registration statement. The rights offer will be made only through that prospectus.

#90030b0715 01/30/1990 ~Business Wire

WASHINGTON (JAN. 30) BUSINESS WIRE - Posting another year of record earnings, MCI Communications Corp. Tuesday reported revenue of $6.47 billion and earnings of $529 million, or $2.09 per common share, for the year ended Dec. 31, 1989.

This compares with 1988 revenue of $5.14 billion and earnings of $334 million, or $1.23 per common share.

Revenue for the three months ended Dec. 31, 1989 was $1.71 billion, an increase of 20 percent over the $1.43 billion reported for the same quarter a year ago. Earnings for the quarter were $101 million, or 39 cents per common share, including two nonrecurring charges. This compares with earnings of $115 million, or 46 cents per common share, for the fourth quarter of 1988.

The company said that while traffic volume for the quarter grew rapidly, earnings were affected by charges for engineering consolidation expenses and for early debt retirement. Without these charges, earnings per common share on a recurring basis would have been 63 cents. Fourth quarter earnings per share, excluding nonrecurring charges, improved 37 percent above year ago levels.

''Overall results for 1989 surpassed all previous MCI performance,'' said Bert C. Roberts Jr., MCI president and chief operating officer. ''In a marketplace that has seen increasing competition and some downward pricing pressure, MCI's overall market penetration has grown by approximately two percentage points. MCI's revenue and earnings gains clearly demonstrate

to our customers and shareholders our ability to meet the needs of the market and do so profitably.''

Earnings per common share increased 70 percent over 1988 levels on annual revenue growth of 26 percent. This was achieved despite an increase in MCI's effective tax rate to 25 percent, from 16 percent in 1988.

Fourth quarter results were affected by two nonrecurring charges: a pre-tax provision of $35 million for consolidating various engineering operations in Texas and an after-tax extraordinary charge of $35 million for early retirement of the remaining $500 million principal amount of MCI's original $1 billion issue of 9-1/2 percent subordinated notes due in August 1993.

Year ago fourth quarter results reflected a pre-tax gain of $12 million from previously negotiated antitrust settlements and an after-tax extraordinary charge of $10 million for early debt retirement.

MCI's year-end results were driven by the company's innovative marketing and its ability to capitalize on high-growth opportunities in the residential, general business and large business markets. Numerous large contracts awarded to MCI from such customers as Merrill Lynch, Westinghouse, Citicorp, and Georgia Pacific, contributed to the company's overall performance.

MCI's success in the general business segment was illustrated by its strong growth in the international, toll-free 800 and virtual private network markets. Results were also spurred by MCI's increased investment in the growing residential market with the introduction of a full range of operator services and MCI's Premier Calling Plans, a line of economical services that allows consumers to purchase long distance service by time, rather than by the distance of the calls.

''Creative marketing approaches, coupled with MCI's ability to identify, manage and effectively deliver key telecommunications services to the marketplace, should stimulate MCI's growth in the 1990's,'' according to Roberts. ''We believe that with this strategic combination, MCI shareholders should continue to see direct bottom line improvements.''

#90030b0716 01/30/1990 ~Business Wire

AUBURN, ME (JAN. 30) BUSINESS WIRE - Mid Maine Savings Bank announced net income for the year ended Dec. 31, 1989 of $1,591,352, or $1.15 per share as compared to $1,093,396, or 79 cents for the year ended Dec. 31, 1988.

Net income for the fourth quarter of 1989 was $422,614, or 31 cents per share as compared to $60,799, or 4 cents for the fourth quarter of 1988. Losses from the sale of securities in the fourth quarter of 1988 accounted for the significant difference in year-to-year fourth quarter results.

Ralph L. Hodgkins Jr., president, stated: ''1989 was a very good year for Mid Maine Savings Bank. The level of earnings, which included the results of operations of Hampton Co-operative Bank, Hampton, N.H., a wholly owned subsidiary acquired on Jan. 4, 1989, enabled the bank to increase its quarterly dividend twice during the year for a total dividend increase of 43 percent, while increasing its provision for loan losses by $519,000.''

''Even though our loan portfolio continues to demonstrate sound underwriting and diversification, we significantly increased the bank's reserve for possible loan losses in response to the declining New England economy,'' Hodgkins stated.

The reserve for loan losses equalled $900,000 or 0.49 percent of total loans at Dec. 31, 1989, compared with the Dec. 31, 1988 balance of $288,697 or 0.29 percent of total loans. Total non-performing loans equaled 0.75 percent of total loans at Dec. 31, 1989, a very favorable ratio compared with other banks in the northeast.

Total net loans increased by $82.6 million or 82.7 percent with the Hampton acqusition accounting for $66.6 million of the increase and total deposits increased by $84.1 million, or 90.0 percent with the acquisition of Hampton representing $82.3 million of the increase.

Total assets were $236.1 million at year end and stockholders' equity totaled $21.8 million, or $15.82 per share.

Mid Maine has 1,380,000 shares of common stock outstanding and is traded on the NASDAQ National Market System under the symbol ''MMSB.''

#90030b0722 01/30/1990 ~Business Wire

MURFREESBORO, TN (JAN. 30) BUSINESS WIRE - First City Bancorp Inc. (NASDAQ/NMS:CITY) Tuesday announced financial results for the year ended Dec. 31, 1989.

Net interest income for the year ended Dec. 31, 1989, was $3,237,768

compared with $3,292,548 reported during the year ended Dec. 31, 1988. Net income was $322,308, or 37 cents per share, compared with net income of $400,211, or 59 cents per share, for the comparable period last year.

For the three months ended Dec. 31, 1989, net interest income was $768,873 compared with $891,528 reported during the same three-month period in 1988. Net income was $94,419, or 7 cents per share, compared with net income of $158,043, or 23 cents per share, reported during the fourth quarter of 1988.

Included in 1989 fourth quarter income statements are certain charges and credits to income which should be considered non-recurring items. Such charges total approximately $251,000 and such credits total approximately $295,000.

Earnings per share amounts for the year and three months ended Dec. 31, 1989, reflect 662,000 new shares sold by the bank on Sept. 21, 1989.

At Dec. 31, 1989, total assets were approximately $138 million, an increase of $32 million from last year. Stockholders' equity was in excess of $12 million, or approximately 9 percent of total assets. Deposits were $116 million and loans totaled $58 million at year-end. First City Bancorp's sole subsidiary, First City Bank, is a bank holding company which serves customers in Murfreesboro, Smyrna, Columbia and the Nashville suburb of Bellevue.

#90030b0723 01/30/1990 ~Business Wire
WATERTOWN, MA. (JAN. 30) BUSINESS WIRE - Summit Technology Inc. (NASDAQ:BEAM) Tuesday announced that the company was awarded a SBIR (Small Business Innovative Research) Phase I grant from the National Institute of Health.

The SBIR grants are awarded to corporate development projects on the basis of scientific and commercial merit.

The grant will be used to provide additional support for the ongoing development of Summit's erodable corneal mask. This patented mask is to be used in the photorefractive keratectomy or 'corneal sculpting' procedure for the treatment of near-sightedness, far-sightedness and astigmatism.

In vivo animal trials are currently underway and trials are expected to begin on humans in the next few months. It is anticipated that the

erodable mask may enhance the procedure by optimizing healing characteristics and by providing the physician with greater clinical control. The single use mask represents a substantial revenue opportunity for Summit.

The excimer laser emits a non-thermal beam which is a broad departure from conventional laser systems. As a result of its non-thermal properties, the excimer laser may be used on such sensitive areas as the cornea of the eye. The cornea is gently 'sculpted' by Summit's ExciMed UV200 to correct near-sightedness, astigmatism and far-sightedness.

The procedure is called photorefractive keratectomy (PRK), an outpatient procedure which takes approximately 30 seconds for the surgeon to perform.

Summit Technology Inc. has established a leadership position in designing, manufacturing and marketing medical excimer laser systems. A major focus of the company's business is in ophthalmology where applications have been developed for the treatment of common vision disorders including near-sightedness, far-sightedness, glaucoma, astigmatism and superficial diseases of the cornea. To date, the Summit Technology ExciMed excimer laser systems have been used to treat several hundred patients in clinical trials domestically and internationally.

PORT CHESTER, NY (JAN. 30) BUSINESS WIRE - Village Financial Services Ltd., (NASDAQ:VIFS) Tuesday reported that fourth quarter consolidated net income was up 56 percent to $610,000 compared to $390,000 for the same period in 1988.

Edmund C. Grainger Jr., chairman of the board and chief executive officer of Village Financial Services said,''Net income for the full year ended Dec. 31, 1989 at Village Financial Services was $2,457,000, up over 35 percent from $1,810,000 for 1988.''

Village Financial Services Ltd., is the bank holding company of Village Bank.

David V. Winstead, president and chief operating officer of Village Finanical Serices Ltd., said, ''We are also pleased to report that the ration of non-performing loans as a percent of total loans decreased to 1.0 percent, down from 1.1 percent at Dec. 31, 1988.''

Winstead added that Village has no real estate owned as a result of

foreclosures.

The bank officials said that full financial results will be reported after annual auditing procedures have been completed.

Village Financial Services Ltd. announced Dec. 4, 1989 that it had completed its acquisition of Village Bank upon the Bank's conversion from a New York chartered mutual savings to a New York chartered stock savings bank. A total of 2,325,000 shares of common stock of Village Financial Services were sold at that time at a final offering price offering price of $10.00 per share.

Village Bank, a wholly owned subsidiary of Village Financial Services Ltd. has assets of $390 million and conducts business from its Administrative Center in Port Chester, Westchester County, New York, and nine full-service banking centers, eight of which are in Westchester County and one in the Riverdale seciton of the Bronx in New York City. Depositors of the bank are insured up to applicable limits by the FDIC.

SYDNEY, AUSTRALIA (JAN. 30) BUSINESS WIRE - Westpac Banking Corporation's (NYSE:WBK) long term credit rating remains sound said the bank's Managing Director, Stuart Fowler, in responding to a downgrading by Moody's earlier Tuesday.

Fowler said the report was not unexpected as rating agencies have put some of the major banks in Australia on notice that they are unlikely to escape downgrading as a result of the deteriorating credit position of Australia.

''As Australia's largest bank, it is unlikely that in the current economic climate Westpac would escape the effect of any downgrading for Australia '' Fowler said.

Fowler commented that the rating for Westpac's long term debt by Moody's was now the fourth highest out of a possible 19 levels. Its ratings for long term debt with Standard and Poor's is currently the third highest out of a possible 22 levels whilst the Keefe Bankwatch rating is the third highest out of a possible nine levels.

Westpac operates in 29 countries worldwide, including the United States England, Japan, and throughout the Western Pacific. In the United States, Westpac branches are located in Chicago, Los Angeles, New York, San Francisco with representative offices in Houston, and Columbus, Ohio.

CONCORD, MA (JAN. 30) BUSINESS WIRE - Forum Re Group Inc. (NASDAQ:FORM), the Concord-based insurance holding company, Tuesday announced that its shareholders have voted to change the company's name to THE GROUP Inc.

Approval of the name was received during a special meeting of shareholders held at the company's headquarters.

The company also announced that Clive Becker-Jones has been named as president of THE GROUP Inc. Becker-Jones, 45, is a 20-year veteran in the insurance industry and previously served as president of Forum Re Group's insurance subsidiaries.

Prior to joining the company in 1987, Becker-Jones served in various management positions with the Hartford Insurance Group.

In his remarks to shareholders, Becker-Jones said, ''The approval of our new name, THE GROUP, marks the conclusion of a year of dramatic change for the company. We spent considerable energy and resources throughout the year working toward the establishment of a single, service-oriented organization which offers an array of products to solve the insurance problems of businesses and groups with unique insurance needs.''

Becker-Jones stated that THE GROUP currently offers products in four business segments: property/casualty, premium financing, brokerage services and ''run-off'' services.

''Having succeeded in building this foundation, the introduction of THE GROUP also marks a beginning -- the start of a new period of growth for the company which our new structure will make possible,'' said Becker-Jones. ''This will enable us to pool our resources and take full

advantage of our number one asset -- the expertise of our employees.''

THE GROUP Inc. (NASDAQ:THEG) develops and markets customized property/casualty, reinsurance and related products that meet the unique needs of specialty insurance markets.

WASHINGTON (JAN. 30) BUSINESS WIRE - Washing D.C. Gas Light Co. Tuesday announced earnings per average share of common stock of $2.95 for the 12 months ended Dec. 31, 1989, representing an increase of 43 cents per share over the prior year.

Operating revenue for fiscal 1989 amounted to $798.7 million versus $698 million for fiscal 1988. Net income for the year came to $58.19 million, as compared to $45.07 million for the previous year.

Record high therm sales for the most recent 12 months, reflecting a 2.7 percent increase in customers' meters since Dec. 31, 1988, contributed to the improvement. In addition, net income applicable to common stock of $56.8 million for the 12-month period ended Dec. 31, 1989, was the highest in the company's history.

For the three-month period ended Dec. 31, 1989, earnings per average common share were $1.64, up 49 cents from the same period in 1988. This improvement is due primarily to the colder-than-normal weather experienced by the Washington, D.C. area in December 1989.

Operating revenue for the fourth quarter was $274.91 million. For the same quarter last year, operating revenue was $231.79 million. Net income for the quarter was $32.07 million, versus $21.14 million for the fourth quarter of 1988.

ARMONK, NY (JAN. 30) BUSINESS WIRE - The IBM Board of Directors Tuesday elected John J. Higgins, Edward F. Rogers and David M. Thomas, corporate vice presidents, and Michael H. Van Vranken, controller.

The three IBM vice presidents will continue in their current positions. Higgins is assistant general manager, finance and planning, US Marketing and Services. Rogers is assistant general manager, finance and planning, Personal Systems Line of Business, and Thomas is president of the National Distribution Division. Van Vranken was assistant controller.

Higgins, who joined IBM in 1970 as a financial analyst, served in a variety of financial posts with the company. He was named controller for the General Technology Division in 1982. In 1988 he became assistant general manager for finance and planning of the Information Systems and Technology Group and moved to his present assignment last year.

He holds a Bachelor of Arts degree in economics from La Salle College in Philadelphia.

Rogers began his career with IBM in Owego, N.Y., as a business planner with the Federal Systems Division. He subsequently held a number of financial assignments in that organization and later moved to the plans and controls function in the Systems Products Division (SPD).

He became SPD controller in 1975 and vice president, plans and controls, of the Information Systems Division in 1980. He became IBM assistant controller in 1985 and assumed his present position last year.

Rogers earned a Bachelor of Arts degree in accounting at the State University of New York in Binghamton and a Master of Business Administration in management accounting and finance from the University of Scranton in Pennsylvania.

Thomas joined IBM in 1972 as a marketing trainee for the Data Processing Division in Tampa, Fla. He was named branch manager in Indianapolis in 1981 and regional manager in Atlanta in 1984.

In 1987 he became vice president, channel management - general products, for the National Distribution Division (NDD) and was designated NDD president the next year.

Thomas is a graduate of the University of Florida, where he received a Bachelor of Science degree and a master's degree in industrial engineering.

Van Vranken joined IBM in 1965 in the corporate accounting department. In 1967 he was named special pricing analyst, and he held various management positions in the pricing field until 1978.

He then was promoted to controller for the Poughkeepsie site in the Data Processing Division. In 1983 he became director of accounting operations, corporate headquarters. Four years later he was appointed group director of accounting operations and financial systems.

Van Vranken obtained his Master of Business Administration degree from Columbia University in 1962.

DEERFIELD BEACH, FL. (JAN. 30) BUSINESS WIRE - Sensormatic Electronics Corporation (SNSR/NASDAQ) Tuesday announced several actions taken by its Board of Directors at its January meeting.

In response to the recent vote by shareholders, the Board has decided to rescind the Shareholders' Rights Plan or ''poison pill'' which was put in place last May. The Rights will be redeemed as of February 15, 1990, and shareholders of record as of that date will be entitled to receive the $0.01 per share redemption price.

In addition, the Board has revised the Company's dividend policy and increased the dividend rate. The dividend rate which had been $0.05 per year, payable on a semiannual basis, has been increased to $0.30 per year and will be payable quarterly.

The first such dividend in the amount of $0.075 per share will be payable April 17, 1990, to shareholders of record on March 26, 1990.

The dividend rate will be reviewed annually in light of future earnings increases and the capital needs for Sensormatic's overall business operations. Sensormatic further announced it will actively continue its open market share repurchase program, under which there currently remain an additional 2.4 million shares to be repurchased. Ronald G. Assaf, Chairman of the Board and President, commented,

''The increased dividend rate and continued share repurchase program

should improve shareholders' total return while permitting the Company to retain a strong balance sheet capable of meeting the growth demands of our business, especially with respect to further investment in products to augment the Company's recent entry into the industrial security field, as well as funding future working capital requirements resulting from anticipated growth in annual revenues in the foreseeable future.''

The Company also announced that Value Equity Associates, which had previously sponsored the shareholder proposal recommending rescission of the Rights Plan, has entered into an agreement with the Company pursuant to which, for a period of two years, it would not take certain actions, including increasing its ownership in the Company's stock to more than 10 percent.

Sensormatic Electronics Corporation is the world leader in loss prevention technology. Sensormatic's electronic article surveillance (EAS) systems are used primarily by retailers to deter shoplifting.

Sensormatic also manufactures and markets closed circuit television systems for retail, commercial and industrial applications, and its POSdata subsidiary is the fastest growing distributor of microprocessor-based point of sale products in the United States. All of the Company's divisions are linked to the largest worldwide sales and service organization in the EAS industry.

#90030b0755 01/30/1990 ~Business Wire

TORONTO, ON (JAN. 30) BUSINESS WIRE - Trevco Oil and Gas announced Tuesday that preparation for mining its 14.44 sq. mile concession in Jamaica is reaching conclusion.

Trevco Management includes David E. Lewis, Q.C. Lewis has held directorships in Falconbridge, Canadian Superior Oil and Alberta Opportunity Company. He won the Petroleum Association Award of Merit in 1962, co-authored ''Canadian Oil and Gas'' and was Chairman, Public Committee, Canadian Bar Association for 10 years.

Lewis, President, heads the Trevco team. A graduate of the University of Alberta, B. Comm., Lewis has owned and managed several companies, gaining an enviable reputation for complex negotiations. Raymond McBeth, B.A. Sc. a professional engineer, partner in Tri-Ocean; Thomas A. Watson,

graduate of Haileybury School of Mining and Concordia University.

Watson is well known in mining circles, currently President and Director of International Larder Minerals Ltd., and a Director of Markridge Resources, Panex Resources, Golden Penguin Resources, Targold Resources, Golden Trio Resources, and Star Data Inc. Thomas Callaghan, B. A., University of Windsor, ex-Senior V. P., the Alberta Stock Exchange; comprise the remainder of the growing Trevco Management group.

Since 1598 when the Spaniards (J. G. Sawkins and C. J. Brown) discovered copper carbonate containing gold, there have been workings in the area which is now an exclusive concession of Trevco. Sawkins reported extractions as high as 15 oz. gold per ton.

Until 1947, no mining laws were enacted for Jamaica. Under the then applicable English law, gold and silver belonged to the Crown so little incentive existed to seek gold. Since that time, a great deal of money (estimated to exceed $10 million in today's dollars) has been spent by some notable explorers, including Teck Corp., (1968-1972).

Trevco's concession in Jamaica contains more than 8,000 ft. of adits and shafts from prior exploration, and CIDA's $50 million, 1986 comprehensive geochemical mapping project of Jamaica indicates clearly that Trevco's concession records the heaviest concentrations of both gold and copper.

Minroc management's independent assessment of Trevco's concession concludes that a minimum in-ground metal value of $43 million exists on the property.

Trevco has now opened no. 5 adit in the Charing Cross mine, re-examined the workings, employed 15 local miners and established the necessary infrastructure to commence mining production in March, 1990. Trevco plans to mine the high grade immediately, and to continue to delineate their large open-pit tonnage. Initial assays indicate that 3 areas may yield 185,000 tons of high-grade ore, approximately $90 million at present values.

Evaluation of copper and silver occurrences continues, with further announcements expected.

#90030b0759 01/30/1990 ~Business Wire

CLEVELAND (JAN. 30) BUSINESS WIRE - Centerior Energy Corp. (NYSE:CX) Tuesday reported 1989 earnings of $266,886,000, or $1.90 per share,

compared to a reported loss of $73,960,000, or 53 cents per share in 1988.

The 1988 loss resulted from nuclear plant-related write-offs that were part of the January 1989 agreement which settled the company's rate cases. Except for the write-offs, 1988 earnings would have been $274,914,000, or $1.95 per share.

The Northern Ohio electric utility holding company noted a continuing improvement in the quality of its earnings. Non-cash accounting credits were a significant part of Centerior's earnings in recent years. These non-cash credits will continue to decline and the cash component of Centerior's earnings will continue to grow as investments in two new nuclear units are increasingly reflected in rates.

1989 revenues of $2,302,436,000, a new record, were up 13 percent from $2,037,560,000 in 1988. The major factor in the revenue increase was a 9 percent rate increase that went into effect in February of 1989. The second of three annual rate increases (7 percent) scheduled as part of the rate settlement becomes effective with bills rendered on or after Feb. 1, 1990.

Fourth quarter earnings were $12,532,000, or 9 cents per common share. The fourth quarter is traditionally the weakest of the year for Centerior for two primary reasons -- less usage of electricity for space-conditioning purposes and a winter rate schedule that is lower than the company's summer rates. In addition, the company began booking some of the additional costs that will be incurred during the refueling and maintenance outage at the Davis-Besse Nuclear Power Station. The outage began last Friday.

For the fourth quarter of 1988, Centerior reported a loss of $2.33 per share, or $327,624,000. Except for the nuclear write-offs, fourth quarter 1988 earnings would have been $21,250,000, or 15 cents per share. Fourth quarter revenues of $532,284,000 were 15.4 percent higher than the $461,285,000 for the fourth quarter of 1988.

Kilowatt-hour sales to retail customers in 1989 were essentially flat, down 0.3 percent, from the record level of 1988. Commercial sales increased 3.9 percent, while residential sales dropped 1.7 percent and industrial sales declined 2.1 percent. Sales were affected by the anticipated softening in industrial production and by more normal weather in 1989 than in 1988, which was marked by a lengthy heat wave.

Wholesale sales dropped sharply (51 percent) from 1988 due to the May 1989 expiration of The Cleveland Electric Illuminating Co.'s 18-month agreement to sell 80 megawatts of its share of Perry Unit 1 output to another utility. Cleveland Electric is one of Centerior's operating subsidiaries; the other is The Toledo Edison Co.

Total retail and wholesale sales of 27,581 millions of kilowatt-hours for the year were down 1.8 percent from 1988.

Centerior's fourth quarter kilowatt-hour sales to retail customers increased 0.8 percent compared to the year-earlier quarter.

The commercial sector accounted for nearly all of the increase, with sales to commercial customers up 7.7 percent over the fourth quarter of 1988. Most of the growth resulted from the addition of all-electric office and retail space, although the coldest December in Northern Ohio weather annals also caused increased usage of electricity.

The frigid holiday season also increased sales to residential customers. Fourth quarter sales to this sector were up 0.9 percent over the last quarter of 1988.

Fourth quarter industrial sales declined 2.7 percent from the year-earlier quarter. The major reasons were a falloff in steel and automobile production and petroleum refining.

Total retail and wholesale sales of 6,567 millions of kilowatt-hours in the fourth quarter were down 1.3 percent from the year-earlier quarter.

#90030b0763 01/30/1990 ~Business Wire

INDIANAPOLIS (JAN. 30) BUSINESS WIRE - Somerset Broadcasting Inc., a subsidiary of The Somerset Group Inc. (OTC:SOMR), reported Tuesday that the previously announced agreement for the sale of radio station WTPI-FM (107.9 mhz), licensed to Indianapolis, was approved by the Federal Communications Commission, and the transfer of ownership was completed today.

The station was sold to MyStar Communications Corp., formerly known as Pinnacle Broadcasting Corp., an Indianapolis-based media company, for $12 million.

Robert H. McKinney, chairman of The Somerset Group Inc., in announcing the sale, stated, ''We are pleased to have sold the station to a media company that is headquartered in the city where WTPI broadcasts, and feel confident the new owner will continue the growth pattern and service to the Indianapolis community that has been established by Somerset Broadcasting Inc.''

The sale represents the first of three stations to be sold by Somerset Broadcasting Inc. since the announcement by The Somerset Group Inc. on Sept. 25, 1989, that it intended to sell all of its radio properties, to concentrate its resources on its other businesses.

The Somerset Group Inc. is a diversified public holding company which through its divisions and subsidiaries engages in three primary lines of business -- banking, construction products and services, and environmental testing.

Through its 21.8 percent investment in First Indiana Corp., whose principal subsidiary is First Indiana Bank, a Federal Savings Bank, the company operates retail banking and real estate lending centers in strategic metropolitan communities.

The Somerset Group Inc. provides construction products and engineering services through its American Precast Concrete Division, one of the largest manufacturers, marketers and installers of precast/prestressed concrete building components in the Midwest.

The company provides analytical testing services for toxic and hazardous compounds in the environment through its recently acquired subsidiary, TMS Analytical Services Inc. The company is also a participant in the Contract Laboratory Programs of the United States Environmental Protection Agency.

#90030b0765 01/30/1990 ~Business Wire

MANCHESTER, NH (JAN. 30) BUSINESS WIRE - Numerica Financial Corp. (NASDAQ:NUME) announced Tuesday a loss of $9,063,000, or $2.04 per share, for the quarter ended Dec. 31, 1989, compared to a loss of $11,229,000, or $2.53 per share for the last quarter of 1988.

For the year ended Dec. 31, 1989, the company lost $22,836,000, or $5.13 per share, compared to a loss of $8,204,000, or $1.84 per share in 1988.

During the fourth quarter, the company's results were principally impacted by the following: a $5.3 million provision for possible loan losses; foreclosure expense of $2.0 million; and foregone interest on non-accrual loans of approximately $1.4 million.

These factors were partially offset by a sale of $71.9 million of home equity loans during the fourth quarter which resulted in a net gain of $1.5 million. Net charge offs during the fourth quarter were $5.1

million, compared to $4.3 million during the fourth quarter of 1988.

For the year, the company had provision for possible loan loss expense of $14.6 million, compared to $8.4 million in 1988, and net charge offs of $8.6 million compared to $6.1 million one year ago. Foreclosure expense of $3.1 million was up $2.3 million from 1988.

Total operating expense, net of foreclosure expense, was down $5.8 million or 15.0 percent, from $39.1 million in 1988, to $33.3 million in 1989. This was principally due to the closing of the company's mortgage banking operations, and the beginning effects of operational consolidations which were undertaken throughout 1989 in both bank affiliates.

At Dec. 31, 1989, loans on non-accrual amounted to $34.3 million, and other real estate owned was $24.2 million, totaling $58.5 million, or 5.3 percent of total assets. This compared to $16.6 million of non-accrual loans, and $12.4 million of other real estate owned totaling $29.0 million or 2.5 percent of total assets at Dec. 31, 1988.

Loans 90 days past due still accruing at Dec. 31, 1989, were $1.9 million, compared to $3.0 million at the end of 1988.

Numerica Financial Corp. is a $1.1 billion multiple savings and loan holding company headquartered in Manchester, N.H., with 16 offices located throughout the state.

#90030b0767 01/30/1990 ~Business Wire

ROCHESTER, NH (JAN. 30) BUSINESS WIRE - Cabletron Systems Inc. (NYSE:CS) Tuesday announced enhancements to its Desktop Network Interface (DNI) PC cards that allow network managers to gather network information from each user station, as well as control all information from one central network management stations.

Using Cabletron's Remote LANVIEW management software and a local traffic statistics program included with each card, managers and users can identify and solve network-traffic or workstation-access problems more quickly and easily than with conventional PC adapter cards. These enhancements, available with all DNI PC cards for IBM and Apple systems, make Cabletron the first vendor to deliver Ethernet PC cards with network management and analyzer capabilities.

Case Western Reserve University, in Cleveland, Ohio, is implementing Cabletron's DNI PC cards as part of its extensive campus-wide fiber optic

network. According to Dell Klingensmith, director of the University's information network services, card management determines where in the network, and in particular at which end-user device, communications problems exist.

''Cabletron's cards allow us to respond quickly to problems which could possibly affect more than one user, and accurately pinpoint potential bottlenecks and difficulties from our Network Information Center,'' said Klingensmith. ''By providing us with revision information, Cabletron's cards allow us to easily identify end-user hardware and software that must be modified or revised.''

In addition to monitoring network traffic, DNI cards determine the operation of the entire subnetwork, the status of the user's PC and its ability to gain access to the network, and what each PC is doing in relation to the total network activity. ''it's like having a powerful network analyzer at every user's desktop,'' added Klingensmith.

''As LANs continue to move beyond the desktop toward becoming architected transport solutions, integrated LAN management rapidly becomes a requirement for managing complex multi-LAN implementations,'' said Bill Redman, vice president, service director local area communications, Gartner Group Inc. ''Network managers need to be able to diagnose down to the port level various LAN malfunctions which these packages enable,'' Redman added.

Through Cabletron's Remote LANVIEW network management software, DNI cards report receive and transmit statistics to an IBM 286 or higher management workstation on the network. These statistics are also available through an on-board local management program which is operated locally at the user's PC.

Remote LANVIEW allows network managers to poll each DNI card, and determine the type of PC being used, the revision level of hardware and software being operated, and the type and revision level of the application software. With this polling system, network managers can segment statistical information, as well as update the network when vendors announce new products, revisions or modifications to existing products. Cabletron's enhanced DNI cards for IBM systems - which support twisted pair, fiber optic and coaxial connections - are available immediately, and DNI card support for Apple systems will be available in two months. Pricing for DNI cards begins at $215. Remote LANVIEW/Windows is priced at $4,995 for MMAC, bridge and DNI PC card management capabilities.

Headquartered in Rochester, N.H., Cabletron is a leading independent supplier of network management solutions, with over 700,000 nodes installed worldwide. The publicly held New York Stock Exchange company

has reported 157.8 percent revenue growth and 310.1 percent earnings growth annually since 1986.

#90030b0769 01/30/1990 ~Business Wire

CLEVELAND (JAN. 30) BUSINESS WIRE - First Union Real Estate Investments (NYSE:FUR) announced Tuesday its 1989 operating results.

Net income reached a new record level of $30 million, or $1.70 per share, compared to $23.4 million, or $1.30 per share, for 1988, a 31 percent increase on a per share basis. The 1989 amount included capital gains of $12.7 million, while the 1988 amount included $5.3 million.

Capital gains for 1989 were the result of the sale of an office building in Atlanta, and a prior year's installment sale. All of the 1988 capital gains were from prior installment sales.

Funds available for distribuiton for 1989, also reached a new record level at $36.2 million, compared to $27.6 million for 1988. The amount of funds available for distribution is income from operations after adding non-cash charges for depreciation and amortization and deducting normal mortgage principal payments, plus funds provided by capital gains. Funds provided by capital gains were $13.5 million in 1989 and $4.6 million in 1988.

Donald S. Schofield, First Union chairman, commented, ''We are optimistic about the Trust's performance for 1990 and the new decade ahead. As our earnings increase in the coming years, we expect to see growth in the portfolio, dividends and shareholder value.''

First Union Real Estate Investments is a self-administered equity real estate investment trust specializing in the ownership of regional enclosed shopping malls, downtown office buildings and multi-family complexes located throughout the United States. The Trust's shares are traded on the New York Stock Exchange, providing shareholders the opportunity to participate in real estate ownership while maintaining investment liquidity.

BEACHWOOD, OH (JAN. 30) BUSINESS WIRE - Horizon Financial Services Inc. (NASDAQ:HFIN) reported higher earnings for the fourth quarter of 1989, but lower earnings for the year as a whole.

Net income for the fourth quarter ended Dec. 31, 1989, amounted to $719,001 or 45 cents per share, compared with $420,989, or 26 cents per share, in the previous year's fourth quarter.

The 1989 fourth quarter included a $864,510 pre-tax gain on sale of loans, a $213,359 gain on sale of a branch site, and a $250,000 write-down on its investment in real estate in development.

Earnings for the year ended Dec. 31, 1989, were $1,208,404, or 75 cents per share, compared with $1,876,880, or $1.17 per share in 1988. Two factors account for most of the 36 percent decline.

First, an unfavorable interest rate environment throughout the year reduced profitability of operations and prompted a less aggressive growth strategy. As part of Horizon's strategy, and as has been successfully accomplished in the past under similar circumstances, the company sold mortgage-backed securities in the fourth quarter. Rather than compete aggressively for relatively high-priced deposits in the local market, Horizon chose to sell $13 million securities to meet liquidity and loan funding needs.

Deposit rates have subsequently eased and the company was able to avoid booking a higher cost of funds, while mortgage rates have risen and presented more favorable investment opportunities.

The second element of lower earnings was unexpected expenses related to Horizon's defense against an unsolicited takeover proposal and costs associated with evaluating potential merger and acquisition candidates.

President and chief executive officer, Lynn L. Fritzsche, commented, ''We were disappointed that we could not expand our franchise last year through an affiliation with another company. We're strong financially and are positioned for growth, unlike some thrifts that are having financial difficulties.''

Fritzsche continued, ''Our earnings have been and will continue to be under pressure until interest rates turn around. We're starting to see some evidence of that although the effect on earnings comes with a lag. Nonetheless, our insurance subsidiary, which became fully operational in the last quarter of 1989, promises to add more substantially to our bottom line in 1990. In its first three months of operation, it produced over $50,000 of pre-tax income.''

In reference to the $250,000 write-down on its investment in real estate in development, Fritzsche said, ''We decided to take the write-down after a formal review of market conditions which indicated some softening in the value of our investment. The $250,000 figure is lower than our original estimate that a $350,000 write-down might be required. The write-down does not reflect upon Horizon's loan portfolio, which retained a very low delinquency rate of 0.67 percent of assets at year end.''

Horizon Financial Services is the holding company for Horizon Savings and Loan and Horizion Financial Insurance Agency. Horizon provides a variety of investment and lending services through seven offices in the greater Cleveland area.

#90030b0774 01/30/1990 ~Business Wire

ROCHESTER, NY (JAN. 30) BUSINESS WIRE - Eastman Kodak Co. Tuesday reported its 1989 year-end employment totaled 137,800 worldwide, down approximately 5 percent from 1988's close of 145,300 employees worldwide.

''More than 90 percent of U.S. employees who left the company under its Limited Separation Enhancement (LSE) plan did so voluntarily and with special benefits,'' explained Kodak chairman and chief executive officer Colby H. Chandler. ''Involuntary separations were minimized by significant efforts to transfer employees internally, strict limitations on hiring, and a reduction of overtime.''

Kodak finished 1989 with 82,900 U.S. employees versus 87,900 at year-end 1988. Employment in Rochester, the company's headquarters city and

principal manufacturing site, was 43,000 at year-end 1989 compared with 47,000 at the previous year's close.

Actions other than the LSE that affected 1989's totals were downsizings in the international operations of Kodak's Sterling Drug subsidiary and in Kodak's Latin American region, the divestiture or sale of various businesses, the consolidation of others, and agreements with outside companies which transferred Kodak employees to those firms.

Among units divested or sold were Aquidneck Data Corp., BioImage, Sayett Technology, and several venture operations.

Consolidations included that of Kodak's Consumer Products, Photofinishing Systems and United States Sales divisions, which resulted in a new, streamlined Consumer Imaging Division (CID) last June. Ultra Technologies, which manufactures and markets Kodak batteries, also became part of CID in December.

Kodak's data-center agreement with IBM and its preferred-supplier arrangement with Businessland Inc., transferred a number of Kodak employees to those organizations. An agreement with Olivetti & Co. resulted in a new company that streamlined operations in the information systems segment.

The only significant 1989 employment increase resulted from the acquisition of LLA Photofinishing in France, which added about 2,300 workers.

NEW ORLEANS (JAN. 30) BUSINESS WIRE - The Freeport-McMoRan Inc. (NYSE:FTX) board of directors Tuesday declared a regular quarterly cash dividend of 37-1/2 cents per share and a special quarterly cash dividend of 25 cents per share payable March 1, 1990, to FTX common shareholders of record at the close of business on Feb. 15, 1990.

In January 1989, the FTX board increased the regular quarterly cash dividend on the company's common stock from 15 cents per share to 37-1/2 cents per share (or from 60 cents per share annually to $1.50 per share annually) and provided for special quarterly cash dividends of 25 cents per share on FTX common stock through the third quarter of 1990, at which time the amount of the special dividend will be reviewed.

At the same time, the FTX board also discontinued the company's quarterly

property distributions to FTX common shareholders.

BELTSVILLE, MD. (JAN. 30) BUSINESS WIRE - John Hanson Savings Bank, F.S.B., Tuesday reported net income for the three month period ending Dec. 31, 1989 of $44,000, or 1 cent per share, based on 5,772,453 weighted average number of shares outstanding.

Income before tax and extraordinary items was $81,000 for the period. This compares to a reported net loss of $412,000, or 7 cents per share, based on 5,749,940 weighted average number of shares outstanding. The loss before taxes and extraordinary items was $668,000 for the same quarter in fiscal 1989.

Net income for the six month period ending Dec. 31, 1989 was $2,183,000, or 38 cents per share, compared to net income of $404,000, or 7 cents per share, for the six months ending Dec. 31, 1988.

John Hanson continues to restructure its balance sheet to accomodate the new rules reflected in the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA). Previously reported sales in the first quarter resulted in a reduction in the bank's interest rate sensitivity and has allowed John Hanson more earnings stability. For the remainder of the year, John Hanson Savings Bank will direct its efforts toward the reduction of problem assets.

On Dec. 31, 1989, John Hanson Savings Bank F.S.B. had total assets of $910 million, total liabilities of $879 million and stockholders' equity of $31 million.

John Hanson Savings Bank, F.S.B., has fifteen branch offices and is headquartered in Beltsville. The bank's stock is traded on the National Association of Securities Dealers' Automated Quotation (NASDAQ) National Market System under the symbol ''JHSL.''

NEW ORLEANS (JAN. 30) BUSINESS WIRE - The Freeport-McMoRan Inc. (NYSE:FTX) board of directors Tuesday declared a regular quarterly cash dividend of

$.46875 per share on its $1.875 convertible exchangeable preferred stock for the period February 1 through April 30, 1990, payable on May 1, 1990, to shareholders of record at the close of business on April 16, 1990.

The preferred shares currently are convertible into FTX common stock at $24.17 each. The conversion price will be adjusted on February 15, 1990, the record date for the company's next special quarterly cash dividend to its common shareholders. In January 1989, FTX increased the regular quarterly cash dividend on the company's common stock from 15 cents per share to 37 1/2 cents per share, provided for special quarterly cash dividends of 25 cents per share on FTX common stock through the third quarter of 1990, and discontinued making quarterly property distributions on the company's common stock. The conversion price of the preferred shares will be adjusted quarterly through the third quarter of 1990 using a formula that includes the difference between the 62 1/2 cents per share amount of the combined quarterly cash dividend and the 15 cents per share amount of the prior quarterly cash dividend paid on the company's common stock.

BOSTON (JAN. 30) BUSINESS WIRE - 3i Ventures, an international venture capital firm, provided $1 million of a $2.1 million round of financing for Flavors Technology Inc. of Amherst, N.H.

Led by 3i Ventures, the $2.1 million funding will be used by Flavors Technology for continued development as well as sales and marketing efforts.

Flavors Technology was founded in 1985 by Richard Morley, a nationally recognized expert on industrial automation and artificial intelligence, to exploit expert systems technology in control and automation uses. The company's products are used by customers in industrial and factory automation markets.

Flavor's new product, the Parallel Inference Machine (PIM), is the first industrial supercomputer. Designed to solve massive real-time problems in control and simulation, PIM uses a spread-sheet like programming model and a natural rule-based programming language which can increase programmer productivity more than tenfold.

The PIM hardware can predictably evaluate and fire more than 1 million control statements per second -- 100 times the speed of today's control systems.

According to Tom Stark, the 3i Ventures vice president who specializes in automation investments, ''Flavors Technology is very representative of the type of factory automation company we seek to invest in, because its products use existing technology to create solutions for current industrial issues.

''Combine that with Richard Morley's vast experience with industrial automation and artificial intelligence start-up companies and you have the makings of a very successful company.''

3i Ventures is considered one of the leading investors in industrial automation and related industries having invested more than $8.3 million in this area since 1987. Additional areas of interest include start-up and early stage companies in biotechnology and healthcare; computer hardware, software and services; and telecommunications.

3i Ventures is one of two U.S. subsidiaries of 3i Group plc, one of the world's largest sources of venture capital. 3i's other U.S. operating unit is 3i Capital which invests in companies seeking capital for growth, acquisition, share repurchase or leveraged buyout. Offices are located in

Boston, Newport Beach and Menlo Park, Calif.

#90030b0804 01/30/1990 ~Business Wire
SAN DIEGO (JAN. 30) BUSINESS WIRE - The Christiana Companies Inc. (NYSE:CST) Tuesday announced a net profit of $1,181,000 (23 cents per share) for the three months ended Dec. 31, 1989, compared to $257,000 (5 cents per share) for the three months ended Dec. 31, 1988.

For the six months ended Dec. 31, 1989, net profit was $1,706,000 (33 cents per share) compared to a net profit of $441,000 (8 cents per share) for the six months ended Dec. 31, 1988.

Second quarter profit included an after tax gain on the sale of 7.4 acres of land in San Diego of approximately $882,000, or 17 cents per share. The remaining 52.5 acres in the parcel will be sold in the future.

Excluding profits from the real estate transaction, the last quarter performance from operations represents an increase of approximately 20 percent over the like period in 1988. Sheldon B. Lubar, chairman, said that rental real estate operations continued to improve with occupancy levels reaching almost 100 percent. Operations of Prideco Inc., the company's 65 percent owned energy equipment manufacturing subsidiary, also showed strong improvement with earnings up 220 percent over the comparable period last year.

The company also announced that it had expanded its board to include six directors and elected Albert O. Nicholas a new director. Nicholas is founder and president of The Nicholas Company Inc., an investment advisor. The Nicholas Co. serves as advisor to five Nicholas funds with assets in excess of $2 billion.

BOSTON (JAN. 30) BUSINESS WIRE - Capitol Bancorporation (NASDAQ:CAPB), the holding company for Capitol Bank and Trust Co., Tuesday reported a net loss for the fourth quarter and year ended Dec. 31, 1989.

Net loss for the fourth quarter was $3,969,000, or ($1.27) per share

compared to net loss of $2,820,000, or (90 cents) per share for the same quarter in 1988.

For the year ended Dec. 31, 1989, net loss was $9,791,000, or ($3.13) per share compared to net income of $294,000, or 9 cents per share for the same period in 1988.

The fourth quarter and year-end net losses are attributed primarily to the continuing effects of the bank's non-performing assets. To date, non-performing assets remain steady at $65 million compared to $64 million as of Sept. 30, 1989.

Capitol Bancorporation is the holding company for Capitol Bank and Trust Co. Capitol Bank has four branches in Boston, and six branches outside of Boston and on the North Shore.

PRINCETON, NJ (JAN. 30) BUSINESS WIRE - Church & Dwight Co. Inc., (NASDAQ:CRCH) Tuesday said that as part of its year-old restructuring plan it intends to divest its DeWitt brands and overseas operations, and take a fourth quarter 1989 pre-tax charge of approximately $9 million or 35 cents per share.

Church & Dwight Co. Inc, will retain DeWitt's Greenville, S.C., manufacturing facility, where it makes Arm & Hammer Dental Care products.

Dwight C. Minton, chairman and chief executive officer, commented, ''We acquired the DeWitt company in 1986 to support the market entry of our Arm & Hammer Dental Care toothpaste and Tooth Powder, which has been an outstanding success. However, the balance of the DeWitt portfolio does not meet our strategic goals and will be divested.

''New ownership for this business will result in focused attention on the core DeWitt businesses and be in the best long-term interest of its suppliers, customers and employees.''

#90030b0810 01/30/1990 ~Business Wire

LEXINGTON, MA. (JAN. 30) BUSINESS WIRE - Unitrode Corp. (NYSE:UTR), a

manufacturer of electronic components and subsystems, Tuesday announced that the Defense Electronics Supply Center (DESC) has released its shipping hold on JAN-branded products manufactured in the Semiconductor Products Division.

This hold was issued last month when the company discovered deficiencies in adhering to certain quality control procedures in its Watertown, Mass., facility. The company indicated that a small amount of the product controlled by this hold is ready for immediate shipment and that it expects gradually to increase shipments.

Unitrode also announced a reduction of about 75 employees in the Semiconductor Products Division and a plan to close its Westbrook, Maine, facility by the end of 1990 and to transfer all operations from there to its Watertown plant.

In addition, the company is considering other restructuring actions in this division as well as in other divisions, including the discontinuance of product lines and disposal of assets, which are designed to improve the company's cost structure. These actions will result in a substantial increase in the $7 million pretax loss previously estimated by the company for the fourth quarter ending Jan. 31, 1990.

Commenting on the announcements, Howard Wasserman, president and CEO of Unitrode, said, ''The release of the DESC hold puts us back in business in the Semiconductor Products Division. Although we expect to ramp up shipments over the next few months, we decided to make that division a more compact, more efficient operation.

''While these actions were painful to the employees in Watertown and Westbrook, we do not expect that the restructuring actions now under consideration will result in significant, further reductions in personnel. We continue to look strategically at our various businesses so as to make Unitrode a stronger, healthier, and profitable company.''

Unitrode is a manufacturer of superior quality electronic components and subsystems, including discrete semiconductors, power management integrated circuits, switching power supplies, and data conversion products. Its products are sold throughout the world for a variety of defense/aerospace, industrial, computer/telecommunications, data processing and consumer applications.

#90030b0816 01/30/1990 ~Business Wire

MARLBOROUGH, MA (JAN. 30) BUSINESS WIRE - Alloy Computer Products Inc. (NASDAQ:ALOY) reported sales for the fourth quarter ended Dec. 31, 1989 of $8.0 million.

For the same period, the company reported a loss of $977,000 or 21 cents per share. These results were a significant improvement over the third quarter of 1989, when the company reported a $1.7 million loss on sales of $6.5 million.

Fourth quarter results represented a 23 percent increase in sales over third quarter of 1989. For the 12 month period ended Dec. 31, 1989, Alloy reported sales of $31.8 million, and a loss of $4.8 million or $1.01 per share.

Commenting on the company's progress over the past three months, Alloy's President and Chief Executive Officer Richard G. Meise said, ''We are pleased with the increase in sales over third-quarter levels and the rssultant reduction in losses. Alloy is making great strides in the networking arena, as evidenced by our recent acquisition of Earth Computer Technologies, a Fountain Valley, Calif.-based networking company.

''By combining the award-winning products of both companies, Alloy will provide a full menu of solutions for workgroup computing.''

During the fourth quarter, sales of Alloy's 386/MultiWare, an MS-DOS-based multiuser, multitasking system, increased by more than 200 percent over the previous quarter. 386/MultiWare has been acknowledged by industry experts for its performance. Most recently, the system was awarded PC Magazine's Editors' Choice.

Unrelated to the quarterly results, Alloy also announced that Bessemer Venture Partners has acquired 750,000 shares of Alloy stock owned or controlled by the company's founder Richard A. Gorgens, and has also supplied the company with $500,000 of convertible subordinated debt. As part of the agreement, Gorgens has agreed to not publicly trade any remaining Alloy shares owned or controlled by him through Dec. 31, 1990.

''We are very pleased with the recent events at Alloy and believe that our additional investment in the company is an indication of our confidence in the company's management team and product strategy,'' said Bessemer partner and Alloy board member G. Felda Hardymon. As a result of its latest investment, Bessemer now owns approximately 22 percent of all outstanding shares of the company.

Founded in 1979, Alloy Computer Products Inc. designs, develops manufactures and markets multiuser operating systems, networking hardware and tape backup systems for the personal computer industry.

Alloy's products are marketed throughout the United States and Canada, and abroad through the company's wholly owned subsidiaries: Alloy Computer Products (Europe) Ltd., and Alloy Computer Products (Australia) Pty. Ltd.

NORTH BERGEN, N.J. (JAN. 30) BUSINESS WIRE - Emerson Radio Corp. (NYSE:EME) reported its operating results for the third fiscal quarter and nine months ended Dec. 31, 1989.

For the third fiscal quarter, consolidated net sales totaled $229,881,000 compared to $216,827,000 for the same period last year. The company reported consolidated net income of $4,507,000, or 13 cents per share, for the three month period ended December 31, 1989, an increase of 26 percent over last year's net income of $3,590,000, or 10 cents per share. Last year's net income included an extraordinary tax credit of $381,000, or 1 cent per share.

Consolidated net sales reached $713,099,000 for the first nine months of

the current year. Last year's comparable sales figure totaled $590,585,000.

Consolidated net income for the first nine months reached $13,289,000, or 37 cents per share, as compared to net income of $8,158,000, or 22 cents per share, for the same period last year. Net income for last year's nine month period included an extraordinary tax credit of $580,000, or 1 cent per share.

''Sales for the quarter ended December 31, 1989 were very disappointing,'' commented Stephen L. Lane, president. ''On a short term basis, we are concerned about the economy, and more specifically, retail sales. Consequently, we remain concerned about the fourth quarter's results.''

Emerson Radio Corp. designs and markets a full line of popularly priced consumer electronics products. The range of the company's products includes televisions, video cassette recorders, compact disc players, radios, stereo systems, tape players and recorders, microwave ovens, compact refrigerators, telephones and answering machines.

#90030b0826 01/30/1990 ~Business Wire

LOUISVILLE, KY (JAN. 30) BUSINESS WIRE - I.C.H. Corp. (ASE:ICH) announced Tuesday that it is continuing its efforts to bring together a group of potential investors to bid for the publicly owned shares of First Executive Corp. (FEC) consistent with its Standstill Agreement with FEC, even though an offer has been made by Rosewood Financial Inc.

For the purpose of clarification ICH notes that:

1. ICH does not intend to make an additional investment in FEC, although it is working on the formation of a group to make a proposal.

2. On Jan. 29, 1990, ICH declared its regular quarterly dividend on its Series A Preferred Stock and will pay the dividend on March 1, 1990, to record holders on Feb. 15, 1990.

3. As it relates to ICH's reported GAAP results, the company has

accounted for its investment in FEC by the equity method and as a result will reflect its 20 percent equity in FEC's previously reported fourth quarter write downs of up to $515 million.

Consequently, ICH will report a substantial loss for the 1989 fourth quarter. ICH previously reflected its equity in FEC's loss on its proposed sale of a subsidiary and reported a $99 million loss on the sale of certain of its own subsidiaries.

In addition, ICH has reflected substantial write-offs of its investments in Integrated Resources and Southmark Corp. It is critical to understand that these write downs reflect extraordinary unrealized investment losses, some of which might not be realized in fact.

Nonetheless, the fundamental core business operating results of ICH showed improved strength in 1989, and we expect a continuation of that trend going forward.

4. ICH recently closed the sale of its Great Southern Life Insurance Co. subsidiary and used the proceeds to pay $100 million of its bank debt. This payment, in addition to its regular annual amortization payment of $50 million, has reduced ICH's bank debt to $490 million from a high of $750 million on Dec. 31, 1986.

5. ICH expects to close the sale of Philadelphia Life Insurance Co. and certain of its Denver-based companies to HMS Insurance Holdings Inc. during the first quarter of 1990. It plans to apply a substantial amount of the net cash proceeds of these sales to the further reduction of ICH's bank debt.

6. ICH believes that the market has substantially overreacted to First Executive's recent news concerning its investment portfolio. However, even if market perception is accurate, it would not affect the substantial improvement in 1989 results of operations of ICH's insurance subsidiaries with statutory earnings before debt service expected to exceed $250 million.

Results in 1990 are expected to be in line with 1989 for those subsidiaries retained by ICH. These earnings were more than sufficient to meet all of ICH's debt service and preferred dividend requirements.

ICH has not relied nor does it expect to rely upon any cash flows from its investment in FEC in arriving at those base line results. Moreover, the surplus positions of ICH's life insurance subsidiaries are very strong and, even with a write-down or complete write-off of its investment in FEC, these subsidiaries would still have in excess of $250

million in surplus over required levels.

In summary, ICH could survive the worst with respect to FEC, but expects to realize a substantial part of its investment in FEC in due course. Pursuant to this expectation, ICH is continuing its efforts to help stabilize and improve the situation of FEC.

#90030c0057 01/30/1990 ~Comtex
WASHINGTON (JAN. 30) COMTEX - Federal Reserve Chairman Alan Greenspan said today that it appears the U.S. economy is not headed toward a recession, though he won't "bet the ranch" on it.

Greenspan noted the economy is softening but based his assumption on data from the Commerce Department's index of leading indicators and on an economic index compiled by the National Bureau of Economic Research.

"The Commerce Department's index of indicators suggest that the probability of a recession developing in the next six months increased last spring to almost 30 percent, but according to the most recent estimates has declined to about 20 percent," Greenspan told the Joint Economic Committee of Congress. "The probability of a recession in the next six months based on the NBER index has also declined since last spring and according to the December reading stands at about 10 percent."

Committee Chairman Lee Hamilton (D-IN) said economists had previously testified before his panel that the chance of a recession occuring this year is as great as 35 percent.

"The difference between 10 and 35 percent is insignificant," countered Greenspan. "What these numbers suggest is that its less than 50 percent. Though our economy is continuing to soften, the probability of recession is less now than a few months ago. However, we are still at risk."

Greenspan pointed out that although a recession appears unlikely, there are troubling areas in the economy. He cited weakness in the auto industry, a slowdown in construction of new homes and commercial buildings, segments of the construction industry reporting difficulty in obtaining credit in the wake of newly-imposed restrictions on lending by thrift institutions, a slowdown in capital spending, and the loss of 195,000 jobs in the

manufacturing sector since last March.

On the positive side, Greenspan noted that demand for long-lived assets is still growing in some areas, as in the case of civilian aircraft for which the level of the orders backlog has doubled over the past two years. Foreign demand for many U.S. manufactured products is strong, total private nonfarm payrolls have continued to rise, employment in medical care is up nearly 400,000 from last year, and there is strength across a wide variety of consumer and capital goods as well as industrial supplies.

"We've had seven years of reasonably strong economic growth," Greenspan said. "We are now in a process of adjustment. Individual industries may go in recession without taking the whole economy."

Greenspan said reducing the Federal budget deficit, cutting inflation and increasing savings are the key ingredients to a healthy economy. "What's wrong with our economy is we do not save enough," he stated. Investment creates growth. Our domestic savings are inadequate to spur investment. We are fortunate foreigners invest to keep us going. The way to increase domestic savings is by bringing down the Federal budget deficit."

Greenspan said he also favors President Bush's controversial capital gains tax cut plan because he believes it will stimulate investment.

Several days ago White House Press Secretary Marlin Fitzwater publicly called for lower interest rates. When Sen. Paul Sarbanes (D-MD) asked if this signalled a strain in relations with the White House, Greenspan said that was not the case. "Fitzwater should have made the statement in private, but I was not particularly concerned by it," Greenspan said. An incredulous Hamilton said it was inconceivable that Fitzwater would call on the Fed to lower interest rates without the approval of President Bush. Greenspan declined to speculate on Hamilton's assumption.

Greenspan conceded that with the changes occuring in the economy, there is a decline in the quality of economic data. "We have good data in manufacturing and certain other areas of the economy," he said. "The problem is the nature of our economy is changing in a manner that old statistical measures don't capture -- how do you define a unit in computer software?"

Greenspan said that economic data needs to be collected into the Spring to determine whether a recession will be avoided. "We never really know where the economy is going," he added.

WASHINGTON (JAN. 30) COMTEX - Benj. Franklin Federal S&L Assn. filed a Form 8-K with the NASD announcing it has met the deadline to file a capital plan with the Office of Thrift Supervision.

The Benj. Franklin is one of several hundred savings institutions nationwide required to file a capital plan because they fall short of new capital standards imposed by the Financial Institution Reform Recovery and Enforcement Act.

In filing the capital plan, The Benj. Franklin has requested an exemption from the new capital requirements. While its capital plan is pending, The Benj. Franklin complies with the requirement to file a capital plan and is not subject to sanctions. However, OTS has authority to take action on unsafe and unsound practices or condition of the company, other than its capital shortfall.

-30- 994

#90030c0065 01/30/1990 ~Comtex

WASHINGTON (JAN. 30) COMTEX - Maryland Federal Bancorp Inc. filed a Form 8-K with the NASD announcing that on Jan. 18, 1990 it adopted a shareholder rights plan by declaring a dividend distribution of one preferred share purchase right for each outstanding share of the company's common stock. For each share of common stock issued in the future, one such right also will attach automatically.

The dividend distribution will be payable on Feb. 12, 1990 to stockholders of record on the same date. The rights will expire 10 years later.

Each right entitles the stockholders to buy one one-hundredth of a share of a new series of preferred stock for $45. The rights may be exercised only if a person or group acquires beneficial ownership of 20% or more of the company's common stock or announces a tender offer or exchange offer that would result in ownership of 20% or more of the common stock.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: NONE

GROUP LED BY CENTAUR PARTNERS OF BETHESDA, MD OWNS 3,595,500 SHARES (16.53%) OF NATIONAL INTERGROUP INC (TICKER: NII) OF PITTSBURGH, PA.

ANNOUNCEMENT:

Centaur plans to have some or all of the Pittsburgh-based pharmaceuticals and steel holding company sold.

Centaur, which is controlled by Abbey J. Butler, the head of C.B. Equities Inc. of New York, said it will seek to replace the National Intergroup board with a panel more amenable to its aims.

Centaur plans to wage a written consent campaign to topple the National Intergroup board, and thinks National Intergroup will invoke a ''super majority'' rule, which requires an 80 percent shareholders' vote to change the board.

National Intergroup reduced the trigger point on its ''poison pill'' shareholders rights plan last week.

Now, if a hostile bidder acquires more than 10 percent of National's stock, rather than 20 percent as under the original plan, other shareholders have the right to buy stock at cheaper prices.

Centaur has filed suit in Delaware Chancery Court to overturn the amended poison pill and make it easier to topple the National Intergroup board.

Centaur is also seeking to overturn National's super majority rule.

LATEST TRANSACTION:

Centaur purchased 3,393,500 shares from Nov. 19 to Jan. 26, 1990 for $12.61 to $18.12 per share.

PURPOSE:

Sale of company.

MULHOUSE, France (JAN. 30) - Polish Prime Minister Tadeusz Mazowiecki on Tuesday urged western nations to cancel a large part of his country's debt two weeks ahead of debt talks in Paris.

In an interview published in the French regional newspaper L'Alsace, Mr. Mazowiecki called on the West to "repay the moral debt it still owes central Europe" by agreeing to cancel "a significant part" of Poland's

debt.

He also said he wanted interest and repayment of Poland's debt to be suspended for this year "which would greatly help Poland carry out its difficult economic programme."

International experts estimate Poland's total foreign debt at almost 41 billion dollars, and the government is due to hold talks on the debt problem with western state creditors in Paris in mid-February.

Mr. Mazowiecki also said that "the time has come to give concrete shape to the creation of a 'council of European cooperation'" which would take into account both French President Francois Mitterrand's vision of a European confederation and Soviet leader Mikhail Gorbachev's idea of a "common European home."

He said it would be natural to see economic cooperation between Poland, Czechoslovakia and Hungary, "the three countries most advanced on the road towards a market economy."

Mr. Mazowiecki is due to hold talks Tuesday with the 23-country Council of Europe in Strasbourg, which deals with issues including culture and human rights, before going on to Belgium.

BRUSSELS (JAN. 30) - The EEC on Tuesday announced emergency aid of 2.6 million ECU's (3.12 million dollars) for victims of a hurricane-force storm that swept across six countries killing scores of people and damaging hundreds of homes.

The package will go to "the priority needs of families" affected by Thursday's the storm, in a sign of "Community solidarity," the European Economic Community's executive Commission said.

Britain will get 900,000 European Currency Units (ECU's) (1.08 million dollars); the Netherlands 500,000 ECU's (600,000 dollars); France 400,000 ECU's (480,000 dollars); Belgium and West Germany 300,000 ECU's (360,000 dollars) apiece; and Denmark 200,000 ECU's (240,000 dollars).

KAMPALA (JAN. 30) - At least 33 people have died from meningitis in Uganda over the past two weeks, medical services director at the Health Ministry Eriab Muzira said Monday.

Most deaths occurred in the capital Kampala, particularly in the heavily-populated southern and western slums, and in northeastern Arua district, he said.

The number of cases diagnosed in Kampala alone had risen to 156 and he feared there could be a number of sufferers who had not reported for treatment.

In Arua district 30 people had been hospitalised, according to the area medical officer in a report released Monday.

A task force to fight the epidemic has been set up and a large supply of vaccines was due to arrive in the country Tuesday, said Dr. Muzira.

Priority for vaccination would be given to high risk health workers in hospitals, schools, the army, police and other institutions.

The Health Ministry reported an outbreak of meningitis in both Arua district and Kampala two weeks ago. It said then there had been 76 cases, of which 18 had died.

#90030d0400 01/30/1990 ~French/German News Agency

BERLIN (JAN. 30) - A continuing exodus of East Germans to the West coupled with demands for steep wage rises are plunging the economy into crisis and threatening the stability of the country, analysts say here.

The economic and social situation "is deteriorating at a disturbing rate," Prime Minister Hans Modrow told parliament Monday.

He said that current demands for higher wages, holidays and pensions would cost the country more than 40 billion Ost marks (almost eight billion dollars), which would "be well beyond the state's capabilities and would endanger the very existence of East Germany."

"The economic situation is worsening daily because of strikes...which are causing a chain reaction," threatening food supplies and the public health system, Mr. Modrow said.

Matters are being made worse by the fact that the exodus to the West is continuing, and "none of the government's appeals have so far had any effect."

According to West German estimates, some 2,000 East Germans are still leaving the country daily for West Germany.

East Germany has said that the 350,000 people who left last year sparked

the beginning of a recession, pointing to the fact that the country had three per cent negative growth in the fourth quarter compared to the same period in 1988.

The authorities are expecting production to be down four to five per cent on the 1989 level this year because of the exodus, and the budget last year showed a deficit of six billion Ost marks (almost a billion dollars) according to the cabinet's economic committee.

The committee, which replaced the economic planning ministry, has said that the country should move towards a "market economy taking into account social and ecological factors" to "pull East Germany out of crisis."

Cologne (JAN. 30) - West Germany remained the world's top exporter of candy confections in 1989, with exports reaching 1.8 billion marks (1.07 billion dollars), up 14 percent from the year before, the industry reported here Tuesday.

The Association of Confectioners said German candy exports weighed 301,600 tons, up by 34,000 tons from 1988. Most exports went to other European Community countries.

Germans ate most of their own candies, the association said. Candy production reached 2.04 million tons, up 5.8 percent from 1988, while the value of the candy produced increased 3.6 percent to almost 14.4 billion marks.

The association disclosed the figures in previewing the International Candy Confections Exhibition to be held here February 4 to 8. A total of 1,062 companies from 41 countries will be participating in the fair.

LONDON (JAN. 30) - British services group BET said Tuesday it controlled 96.5 percent of takeover target employment agency Hestair.

As of Friday, when the offer expired, BET had received acceptances totalling 44.7 percent, which added to its existing 51.8 per cent gave it 96.5 percent.

BET launched a 192 million pound (320 million dollars) friendly takeover bid for Hestair in December.

JAKARTA (JAN. 30) - Rescuers Tuesday spotted the wreck of a charter plane which went missing with 19 people aboard shortly before its scheduled landing on the Indonesian resort island of Bali on Thursday.

A helicopter pilot sighted the wreckage of the HS 748 twin-prop on the 3,726-meter (12,225-foot) Rinjani Mountain on the neighboring island of Lombok, an official at the search and rescue center in Bali said by telephone.

Bad weather and difficult terrain prevented the helicoptor from landing, he said, adding that the pilot could not tell if there were any survivors among the 16 passengers and three crew.

The Airfast Indonesia plane was on a flight from Ujungpandang in south Sulawesi to the Bali capital of Denpasar.

#90030d1510 01/30/1990 ~French/German News Agency
WARSAW, (JAN. 30) - Poland's newly-formed social democracy party is committed to ''far-reaching reforms'' but the process may be a long one, chairman Aleksander Kwasniewski said Tuesday.

The view ''that at the touch of a magic wand we have all suddenly become social democrats'' was exaggerated, he said.

Kwasniewski, 36, was elected Monday to lead the new Social Democracy of the Polish Republic which has replaced the Polish United Workers' Party (Puwp).

The communist Puwp, which ruled the country for more than 40 years, was disbanded Monday by some 1,500 delegates to the party congress at Warsaw's Palace of Culture. Delegates committed the party to the concept of parliamentary democracy.

''We have been accused of simply giving the Puwp a new banner. That is not true. We want to be a party of far-reaching reforms,'' said Kwasniewski at

the close of the congress.

He said it was imperative to break with communist tradition. A new way of thinking and acting was necessary. Talks would need to be held with left-wing factions in the country, he said.

Delegates closed the almost four-day congress by electing the new party's leadership structure, the 150-member main council.

A number of well-known representatives of the party's conservative wing failed to win backing for a place in the council, including Warsaw party chief Janusz Kubasiewicz and Jerzy Majka, editor-in-chief of the Puwp newspaper, Trybuna Ludu.

Mieczyslaw Rakowski, chairman of the Puwp council of Ministers, had announced he would not be running for a place on the new party's council. He is to lead the launch of a new magazine to deal with Polish and international social-democratic issues.

WINDHOEK (JAN. 30) - Namibia and Angola are poised to enter a new era of trade relations which will also directly involve South Africa, a group of leading Namibian entrepreneurs told a media briefing here Tuesday.

The wheels for normalising trade relations between the two neighbouring countries were set in motion during a four-day visit by a 15-member delegation to Angola.

The trip was instigated by South West Africa People's Organisation (SWAPO) leader Sam Nujoma, set to become an iNdependent Namibia's first president, and Angolan President Eduardo Dos Santos.

As a direct result of the group's discussions with Mr. Dos Santos and the Angolan ministers of trade, tourism and foreign affairs, the Banco Nacional de Angola is to open an account with the Bank of Namibia to facilitate payment for trade between the two countries, lawyers said.

Members of the group emphasized that full trade relations would not be possible until there was peace in Angola, where anti-Marxist rebels have been fighting since independence in 1975, but said commodity trading, particularly with southern Angola, was "virtually imminent."

Although formal trade with Angola almost ground to a halt on independence, informal cross-border trade mainly involving bartering has continued between residents of the region.

LONDON (JAN. 30) - Coast guards retrieved two bodies from the English Channel on Tuesday believed to be from the Greek freighter Flag Theofano, which sank in a violent storm overnight.

Coast guards said they spotted a shipwreck south of Portsmouth that could be the Flag Theofano, but that divers had been unable to reach the wreck because of high winds and turbulent waters.

Fuel was seeping from the wreck and bubbles were seen rising from the water, Lloyd's insurers said, adding that an empty Flag Theofano life raft and wreckage had been washed ashore.

The unidentified bodies were found early Tuesday near West Wittering, opposite Hayling island.

The ship had a crew of 11 Greek, seven Maldivians and one Egyptian, according to British representatives of the Greek owner Seawave Compania Nanera. Coast guards said there was little hope of finding survivors.

The 2.818-ton Flag Theofano left the French Channel port of Le Havre Monday and was headed for Southampton with a shipment of 4,000 tons of cement.

Coast guards did not receive an SOS after the captain's last radio call to Southampton asking for a pilot to enter the port.

LONDON (JAN. 30) - Iraqi government forces have killed large numbers of people in southern Iraq, including unarmed civilians, in an apparent bid to root out army deserters, Amnesty International said Tuesday.

Troops attacked 30 towns and villages inhabited mainly by Shiite Moslems between January 10 and 23, the international human rights organization said in a statement.

Amnesty said the death toll was unknown but that "large numbers of people" had been killed.

On Friday, an independent group, the Organization for the Defense of Human Rights in Iraq, said 10,000 people had been killed or wounded in the attacks.

However Amnesty said the figure could not be confirmed.

The London-based group said reports it had received indicated the attacks were linked to a government campaign to capture hundreds of deserters hiding in the provinces of al-Basra, al-Nasiriyah and al-Amara.

KABUL (JAN. 30) - Mujahedeen cluster rockets fired into central and suburban Kabul Monday and Tuesday damaged the vacant West German embassy compound and hit a bus station and residential area, leaving two dead and 28 wounded, witnesses and officials said.

The West German embassy compound in the fashionable Wazir-Akphar-Khan district was damaged when two of the rockets impacted at the back of the embassy's rear wall, security men on the scene said.

They said the rockets had sprayed explosives throughout the embassy garden, shattering a glass house and damaging a service building.

Local German embassy staff told an Agence France Presse reporter on the scene that there had been no deaths or injuries as a result of the two hits.

Two other rockets fell nearby, but apparently in military housing complexes. The government did not report the casualties from attacks on military installations.

A government spokesman said two more cluster rockets, which carry 98 small bomblets in the warheads, hit Kabul early Tuesday, impacting at a bus stand in Kolala Kushta and a residential area in the northwest of the city where two people were killed and 28 injured.

Spokesman Naqib Sameer said the mujahedeen, who have been raining rockets on the city for more than a year as a part of their effort to overthrow the Soviet-backed regime of President Najibullah, had changed their pattern of rocketing.

Now, he said, the resistance fighters were sending two or three cluster rockets into the city daily, instead of the 20 to 30 non-cluster Egyptian-made Saker 20 and Saker 30 missiles.

The hit on the German embassy. which did not damage the main chancery building, came one month after France announced that it would be the first West European country to reopen its mission here since the Soviet troop withdrawal in February last year.

Reliable diplomatic sources have said that Italy will follow suit in the

first week of March, and that both Austria and West Germany are likely to also follow the same month.

CEBU, PHILIPPINES (JAN. 30) - A mentally retarded man killed himself and seven other people, including three children, in an accidental grenade blast in this central island late Monday, the military and survivors said Tuesday.

Eight people were also injured in the blast caused by Ananias Millobe, 19, a resident of Balamban town.

Mr. Millobe approached a crowd of people gathered beside a church that evening and offered to say mass for them, prompting the crowd to laugh at him.

"Why are you laughing at me? If you laugh during mass, God will not accept you," survivors quoted him as saying.

He then told them to dance to commemorate a recent religious festival. But as he began to jump about himself, a hand grenade fell out of his pocket and exploded among the crowd, killing Mr. Millobe and seven other people.

ISLAMABAD, (JAN. 30) - The turmoil in disputed Kashmir and its repercussions in neighboring Pakistan have hit recent Indo-Pakistani efforts at normalizing bilateral ties.

A renewed war of words has curbed frequent expressions of goodwill by leaders of the two countries, amid speculation of possible fighting over the disputed Kashmir area, which has caused two wars between India and Pakistan since 1947.

State-run radio and television networks here and local newspapers have been giving wide coverage to the uprising in Kashmir, backed by statements from Pakistani politicians in support of the Jammu and Kashmir Liberation Front.

The opposition has demanded that Pakistan raise Kashmir at the United Nations Security Council, where India's ally, the Soviet Union, has used its veto more than 100 times to block a vote on a plebiscite in Kashmir.

Kashmir is divided by a "line of control." On one side is the Indian state of Jammu and Kashmir, and on the other side is Azad (Free) Kashmir, which is independent, according to Islamabad.

The combined opposition parties, which staged a massive rally against Prime Minister Benazir Bhutto in Karachi on Friday, have called for a National Assembly session next week to discuss Kashmir.

India and Pakistan have traded charges and counter-charges over Islamabad's alleged support to Kashmiri militants. New Delhi has also renewed charges of Pakistani support for Sikh separatists in the Indian Punjab.

Indian Prime Minister Vishwanath Pratap Singh and Foreign Minister Inder Kumar Gujral, who after ousting the government of former premier Rajiv Gandhi had pledged to continue the normalization initiated last year by Mr. Gandhi and Ms. Bhutto, have resumed accusations of Pakistani interference.

They have also said Iran is behind Moslem militancy in Kashmir, a position viewed here as the start of a campaign against Moslem countries.

Pakistan has denied allegations of interference, holding India responsible for the "purely indigenous" events in Kashmir.

Critics of India say its failure to hold a self-determination plebiscite in Kashmir, as provided in U.N. resolutions, has caused the unrest.

When Ms. Bhutto and Mr. Gandhi met here for the first time in December, 1988, they sought to revive the spirit of the 1972 Simla accord signed by their late parents, former premiers Zulfikar Ali Bhutto and Indira Gandhi.

In June 1989, Mr. Gandhi became the first Indian premier to visit Pakistan in 30 years. His visit triggered a thaw in relations, as the two premiers agreed not to attack each other's nuclear facilities.

They also moved to defuse military confrontation by redeploying troops on the 20,000-foot Siachin Glacier in the snow-bound Korakorum mountains to their pre-1972 positions.

But progress on detente was slowed by domestic opposition faced by each of the leaders. India did not withdraw its troops from the glacier in Kashmir and there have been no further meetings.

Ms. Bhutto's opponents, particularly Punjab chief minister Nawaz Sharif, accused her of showing "softness" towards India and objected to India's plan to build a dam across the Jhelum river in Indian-controlled Kashmir.

Opposition leaders also accused her of not standing up to alleged "Indian hegemonistic designs."

Meanwhile, Indian leaders kept up their criticisms of Pakistan's nuclear

program and its alleged support for the Sikh secessionist movement. Also, the agreement on not attacking nuclear plants was not ratified.

The "Simla spirit now seems to have evaporated" with the uprising of the Kashmiri Muslims, a political commentator here said.

Ms. Bhutto attempted to forestall further opposition to her India policy by carrying out Pakistan's biggest-ever military exercise in the central Punjab region in mid-December, involving 200,000 troops.

Officials said the war games were aimed at testing Pakistan's newly evolved "offensive-defense" strategy and recently acquired sophisticated weapons.

#90030d1920 01/30/1990 ~French/German News Agency

PARIS (JAN. 30) - French national electricity concern Electricite de France criticised the government Tuesday for imposing low prices as it announced that its losses more than doubled in 1989.

EDF had losses of four billion francs (701 million dollars) last year, up from 1.8 billion francs (315 million dollars) in 1988, largely due to a summer drought which lost it 30 percent of hydroelectric production or 20 billion kilowatthours.

A mild winter and lack of water for its nuclear plants took the total cost due to climatic factors to 4.4 billion francs, as the company had to use more nuclear power and start up more costly coal and oil-powered plants to make up for the hydroelectric shortage.

But "we would have been able to have a security margin which would have prevented bad weather leading to financial disaster" if the government had not insisted on low prices, said managing director Jean Bergougnoux.

The government allowed a price increase of one per cent in May and 1.5 per cent in December, but this represented a three per cent fall in real terms, although EDF's agreement with the government provided for an annual fall in prices of 1.5 percent in real terms, EDF said.

"The financial situation is going badly, everything else is going fine," EDF president Pierre Delaporte said.

EDF increased its electricity exports by 15 percent to 42.2 billion kilowatthours last years, with Britain the leading client at 13 billion kilowatthours.

Mr. Bergougnoux said that the privatisation of Britain's Central Electricity Generating Board (CEGB) as a "chainsaw massacre" but said that

the EDF was "playing the game" in the British market and was seeking new partners there.

#90030d1980 01/30/1990 ~French/German News Agency

HELSINKI (JAN. 30) - Finland had a current account deficit of 21 billion markka (5.25 billion dollars) in 1989, while its trade deficit totalled 5.5 billion markka (1.37 billion dollars), the government bureau of customs said Tuesday.

The current account deficit is more than four percent of gross national product (GNP), compared with about three per cent in 1988.

Finland had a trade surplus of 783 million markka (196 million dollars) in 1988, but last year import value rose by 14 percent, double the rate of export growth.

Imports in 1989 totalled 105.3 billion markka (26.3 billion dollars) against exports of 99.79 billion markka (24.95 billion dollars).

Exports to the European Economic Community increased by eight percent and were about 44 percent of the total, but EEC imports rose 17 percent to account for 44.5 percent of total imports.

Imports from the neighbouring Soviet Union increased by eight percent to 11.4 percent of the total, while exports rose four percent and accounted for 14.5 percent of the total.

The biggest trade deficit, 7.43 billion markka (1.86 billion dollars), was with West Germany, while the biggest surplus was in trade with Britain, totalling 5.06 billion markka (1.26 billion dollars).

#90030d2070 01/30/1990 ~French/German News Agency

LONDON (JAN. 30) - Official figures published Tuesday leave Chancellor of the Exchequer John Major with the uncomfortable prospect of having to find revenue to cover a real increase in public spending in his first budget in March.

A White Paper on the Government's Expenditure Plans for the next three financial years published Tuesday confirmed that spending as a proportion of Gross National Product is expected to creep up from 38.75 to 39 in 1990-91 (April-March).

The Treasury is allowing this deviation from its long-term strategy of slimming down public sector spending in order to accommodate some of the

demands of Mr. Major's Cabinet colleagues for extra cash for their departments in the March 20 budget.

But the downward trend is due to resume in 1991-92 and 1992-93, with the share of public spending declining to 38.75 and 38.5 over the two years.

The figure was 43.5 when Mrs. Thatcher took office in 1979.

The White Paper puts flesh on the bare bones of public expenditure estimates already announced in Mr. Major's Autumn Statement in November.

The report expects inflation, currently running at an annual rate of 7.7, to slow gradually to 6.5 by September.

But unemployment is forecast to rise from 1.64 million to 1.75 million, a prediction in line with the Confederation of British Industry (CBI)'s monthly report out earlier Tuesday.

Economists expect the March budget to present a careful set of measures designed to keep the pressure on inflation while avoiding recessionary overkill.

#90030d2110 01/30/1990 ~French/German News Agency

LONDON (JAN. 30) - An Englishwoman who found a message in a bottle that took 34 years to drift from South Africa to England is trying to trace the sender.

A coastguard official said the barnacle-encrusted bottle that Anna Alexander found on a Cornish beach may have bobbed round much of the Pacific, passing near Australia and Japan and then possibly being swept back past South Africa again before being pushed north through the Atlantic by the Gulf Stream.

The bottle contained a 1956 shilling coin and the address near Durban of one Ryan Smith, who was then a schoolboy.

Mrs. Alexander said she had written to the mayor of the city in a bid to trace Mr. Smith.

"I could hardly believe my eyes, and I still can't, that this fragile bottle had been in the water all that time," she said Tuesday.

"I keep wondering what progress that little boy has made through his life... I would love to meet the man if I can trace him."

#90030d2160 01/30/1990 ~French/German News Agency
PARIS, Jan 30 (AFP) - French President Francois Mitterrand has told Iran that a pro-Iranian terrorist jailed for life here will be released in July, the satirical weekly Le Canard Enchaine said in a report appearing Wednesday.

The pledge prompted the convicted terrorist, Anis Naccache, 36, a Lebanese, to give up a hunger strike last week, according to the paper.

Mr. Naccache's lawyer Jacques Verges said last week he obeyed an "express request" from Iranian President Ali Akbar Rafsanjani and the country's spiritual guide Ayatollah Ali Khamenei to end the hunger strike he started on September 8.

He had recently been reported to be close to death.

Le Canard Enchaine said "the promise to release Anis Naccache soon was transmitted by the Elysee (Mr. Mitterrand's residence) to Iran's highest leaders."

A likely date for the relase was the French national holiday on July 14, the paper added.

Mr. Naccache was sentenced to life imprisonment in March 1982 for an unsuccessful attempt to murder the Shah's last prime minister Shapur Bakhtiar. A policeman and a woman bystander were shot dead and three other people injured in the attack.

Iran has repeatedly tried to persuade France to free Mr. Naccache.

French President Francois Mitterrand said on January 5 that Mr. Naccache could "not expect to obtain his freedom through a hunger strike" although Mr. Mitterrand said Mr. Naccache could expect to "be released when the time comes".

"If Anis Naccache decides to die in prison and we do not have the means to prevent him from doing so, it would be his responsibility," Mr. Mitterrand said.

#90030d2460 01/30/1990 ~French/German News Agency
PARIS (JAN. 30) - France was bracing for a day of massive labor unrest Wednesday to protest the socialist government's austerity measures with strikes expected to hit railways, hospitals, airlines and electricity services.

The worst affected will be commuters and travellers in the capital and other major French cities when a 36-hour railway strike starts Tuesday night.

Labor trouble has been on the rise for several months by French workers who feel their salaries have not kept pace with the national economic scene, which has greatly improved over the last two years.

To help boost the economy, the government in 1983 broke the link that kept salaries in pace with inflation. An offical evaluation by the French Center for the Study of Revenues and Costs shows that the average French worker saw his buying power chipped away by two per cent between 1982 and 1988.

During this same period, French firms stepped up investments and industrial production rose 16 per cent between 1987 and 1989 after stagnating between 1980 and 1986.

But Socialist Prime Minister Michel Rocard has stood firm, stating that "priority will be given to employment and investment, that is to say, stimulating the supply side of the market," and not to increasing salaries.

The three million suburban commuters around Paris who depend on the trains to get to work were facing a nightmare Wednesday: very few trains, no taxis and giant traffic jams expected to choke every access to the city.

The stoppage, agreed to by six of the seven railway workers' unions for the first time in more than 10 years, is to affect all branches of the SNCF, the state railway.

Strikers are protesting a joint government and SNCF restructuring plan slated to slash 4,500 jobs a year over the next five years, cutting the total SNCF workforce from 204,300 to 181,500 by late 1994.

Unions contend the quality and safety of conventional train travel will deteriorate as money is poured into the modern high-speed TGV and other new lines.

The railway workers will be joining the interns in state hospitals who walked off the job two weeks ago and have stalled all but emergency services.

JERUSALEM (JAN. 30) - Israeli military authorities have closed 12 schools on the occupied West Bank since Sunday because they were the scene of anti-Israeli disturbances, army officials said Tuesday.

The authorities ordered the indefinite closure of two schools Tuesday in the latest such measure, the officials said.

In Bethlehem, meanwhile, students and teachers at the town's university staged a sit-in protest to demand its reopening, Palestinian sources said.

West Bank universities have been closed since the start of the two-year-old Palestinian uprising in the occupied territories.

Israeli troops shot and wounded at least three Palestinians in the latest clashes on the West Bank, including a schoolgirl, the Arab sources said.

#90030d3320 01/30/1990 ~French/German News Agency

WASHINGTON (JAN. 30) - The United States has removed Mozambique from its list of Marxist nations, a step that will facilitate U.S. trade with the African country, the State Department said Tuesday.

President George Bush determined last Wednesday that U.S. firms dealing with Mozambique should be allowed assistance from the U.S. Export-Import Bank ''based on Mozambique's move away from the Soviet bloc and socialism and towards the West'', it said.

The bank provides trade credits and insurance to U.S. companies for commerical transactions with foreign countries.

The southeast African nation had been one of 30 countries barred from these privileges due to the fact that they were governed by a communist regime.

State Department spokeswoman Margaret Tutwiler said that since 1986, Maputo had implemented a series of economic and political reforms, had joined the World Bank and the International Monetary Fund, and was leaning increasingly towards free enterprise.

Bush's move is expected to facilitate Mozambican efforts to purchase 250 million dollars worth of jetliners for its national airline from the Boeing Company, which will receive 20 million dollars in credit from the Export-Import Bank.

#90030d3610 01/30/1990 ~French/German News Agency

PHNOM PENH, VIETNAM (JAN. 30) - The Soviet Union will make a total withdrawal of its forces from its air and naval base at Cam Ranh Bay in southern Vietnam, the Soviet ambassador to Phnom Penh said Tuesday.

"We withdrew some of our planes at the end of December and the pullout will surely be total," Ambassador Rachid Kamidouline said during a press conference.

But he said that Moscow "was not in a hurry."

"There has been no bargaining whatsoever with the United States on this issue, but we think this gesture on our part will contribute to detente," Mr. Kamidouline said.

"Cam Ranh is a Vietnamese -- not Soviet -- base and it has no vital strategic role because we have essentially technical personnel there," he said.

U.S. Pentagon officials have said that the Cam Ranh Bay base, built by the United States during the Vietnam war, is the most important Soviet facility abroad.

Soviet President Mikhail Gorbachev has proposed that Moscow would pull out of Cam Ranh Bay if Washington would shut its bases in the Philippines.

The Soviets announced last week that they were beginning to remove offensive weapons stationed at the Cam Ranh Bay facility. Hanoi has not commented on the subject, beyond saying that the decision was an "internal Soviet matter."

#90030d4680 01/30/1990 ~French/German News Agency

TOKYO (JAN. 31) - Heller Overseas Corp., a U.S.-based subsidiary of Japan's Fuji Bank, is to link with a Hungarian and an Austrian bank in a joint venture in Hungary, sources close to the company said here Wednesday.

The new financial joint venture will concentrate on advice, leasing and factoring for Hungarian companies, particularly those concentrating on exports, the sources said.

Hungary Credit Bank, the country's largest commercial bank, Austria's Oesterreichische Volksbank and Heller Overseas will each hold 30 percent of the new venture's initial capital of one billion forints (about 17 million dollars), they said.

The remaining 10 percent will be held by a group of local companies.

Heller Overseas is a subsidiary of the Heller group, purchased by Fuji Bank in 1984, which holds a dominant place in the American factoring market.

Fuji Bank is the third largest urban bank in Japan.

#90030d4700 01/30/1990 ~French/German News Agency

TOKYO (JAN. 31) - Japan's Ministry of International Trade and Industry (MITI) is to underwrite trade insurance for a 140 billion yen (979 million dollar) project to build a petrochemicals plant in Nigeria, MITI sources said Wednesday.

This is is the first time since 1985 that MITI has agreed to underwrite such insurance for equipment exports to the debt-ridden African country, they said.

MITI has decided to underwrite the insurance as the project is expected to help Nigeria to reduce its foreign debts, they said.

MITI decided last year to expand its state-financed insurance program for exports to debtor countries.

Several companies from Japan, France and Italy are participating in the construction of the plant in Port Harcourt to be operated by the Nigerian National Petroleum Corp.

The plant is expected to have an annual production capacity of 300,000 tonnes of ethylene, 80,000 tonnes of polypropylene and 250,000 tonnes of polyethylene, and is expected to earn foreign currency worth 100 million dollars a year by exporting half of its products, informed sources said.

#90030d8500 01/30/1990 ~French/German News Agency

BEIJING (JAN. 30) - China's trade deficit reached 6.5 billion dollars in 1989, up sharply from last year's 3.09 billion dollars, according to

customs statistics published Tuesday in the English-language China Daily.

Chinese exports totalled 52.5 billion dollars, up 10.5 percent from 1988, and imports reached 59 billion dollars, up seven percent, the paper said, adding that imports of luxury goods had dropped in the same period.

In 1989, China imported 3.3 million tons of crude oil, up 281.8 percent from 1988, 2.3 million tons of charcoal, up 35.2 percent, 12.6 million tons of iron ore, up 19.4 percent, 16.6 million tons of grain, up 8.1 per cent, and 9.5 million tons of steel, up 3.7 percent, the paper said, quoting customs statistics.

Imports, however, were significantly lower: washing machine imports dropped 59.4 percent to 12,225 units, refrigerators were down 0.53 percent to 437,955 units, colour televisions down 12.2 percent to 402,324 sets and cigarettes down 45.2 percent to 43.8 million cartons.

However, the paper commented that despite the austerity policy, imports of cars increased 35.8 percent to 44,998 units and 45,179 cassette recorders were imported, up 47.6 percent from 1988.

MANILA (JAN. 30) - The Asian Development Bank (ADB) extended a record 3.624 billion dollars in loans in 1989, a 15 percent increase over the 1988 figure of 3.146 billion dollars, a bank statement said here Tuesday.

This included 11 loans to private companies totalling 96 million dollars in 1989, the ADB statement said.

Lending from the bank's ordinary capital resources rose 10 per cent to 2.26 billion dollars while soft loans extended through the Asian Development

Fund increased by 26 percent to 1.363 billion dollars, the Manila-based bank added.

Of the bank's developing member countries, Indonesia received the largest amount of loans totalling 772 million dollars, followed by Pakistan at 724 million dollars and the Philippines at 558 million dollars.

About 23 percent of all the loans went to the agriculture sector while social infrastructure such as water supplies and sanitation facilities received 21 percent.

Industry and the non-fuel minerals sector also received 21 percent.

Tokyo (JAN. 30) - Japan exported 5,884,000 vehicles in 1989, down 3.6 per cent from the year before and the first time since 1983 that exports fell below six million, the industry said Tuesday.

The Japan Automobile Manufacturers Association said that a chief factor in the decline was the rising production in the United States by Japanese car producers.

Car exports came to 4,392,000, down 0.9 percent from 1988, while truck exports dropped 10.4 percent to 1,457,000. Bus exports plunged 23.1 percent to 35,149.

The association said vehicle exports to the U.S. dropped 9.9 percent to 2.43 million, putting the U.S. share in overall exports at 41.3 percent, down from 44.2 percent in 1988.

Exports to Europe reached nearly 1.71 million vehicles, up 0.2 percent.

The vehicle exports in 1989 accounted for 45.2 percent of total Japanese production, down 2.9 percent.

#90030d9350 01/30/1990 ~French/German News Agency

SYDNEY (JAN. 30) - Westpac Banking Corp. and National Australia Bank Ltd. suffered on the share market here Tuesday after New York credit rating agency Moody's Investors Service Inc. downgraded them.

Moody's cited the quality of their Australian loans in announcing the cut to two of the country's biggest banks.

National Australia Bank (NAB) finished Tuesday two cents down on the

Australian Stock Exchange at 6.80 Australian dollars (5.17 U.S.), up from its early low at 6.76 dollars (5.14 U.S.), while Westpac ended four cents down at 6.06 dollars (4.61 U.S.) after bottoming at 5.96 dollars (4.53 U.S.).

Moody's said NAB's two billion dollar (1.52 billion U.S.) acquisition of Yorkshire Bank earlier this month was a negtaive factor because the purchase price constituted a significant amount of goodwill, thereby reducing NAB's adjusted net worth.

NAB's senior debt was downgraded to Aa3 from Aa2, subordinated debt to A1 from Aa3 and its long-term deposits to Aa3 from Aa2.

Moody's said NAB could experience increased problem loans in its Australian portfolio, and future weaknesses could show in the commercial real estate market and middle market lending.

Moody's added that NAB's exposure to the operating companies of the Bond Group, the struggling Australian conglomerate, should not result in a material loss because the bank had sound documentation which gave NAB control over the cash flow and assets of these companies.

The ratings agency said that Westpac's downgrades were prompted by the bank's vulnerability to a deterioration in domestic asset quality.

Westpac Banking's long-term deposits were dropped to Aa3 from Aa2, the subordinated debt rating to A1 from Aa3, and the rating of noncumulative preferred stock to A2 from A1.

The guaranteed bonds of Westpac International Finance, a funding subsidiary, were downgraded to A1 from Aa3.

Moody's noted that during the past few years there had been a sharp increase in Westpac's domestic lending business.

Westpac said that the downgrading was not unexpected, given Moody's downgrading of Australia's sovereign debt rating from Aa1 to Aa2 in August.

JAKARTA (JAN. 30) - Indonesia may cut the selling price of its liquefied natural gas (LNG) to stay competitive and hold its lead in the world markets, Mines and Energy Minister Ginanjar Kartasasmita said here Tuesday.

Mr. Ginanjar told a parliamentary hearing that Indonesia was currently in the last stages of repaying from its export proceeds of LNG the first foreign loans which it used to construct its LNG processing facilities.

Once these loans were fully repaid, the proceeds would be all profit, he said.

"We are then faced with the choice of either retaining our prices, or reducing them in order to become even more competitive," the minister said, noting large scale LNG expansion plans under way in Australia and Qatar.

"We have the experience... We can compete and we can become even more competitive," he added.

Indonesia is the world's largest LNG supplier with annual exports of 17.8 million tons to Japan and South Korea under long term contracts.

#90030d9520 01/30/1990 ~French/German News Agency

MANILA (JAN. 30) - The Philippines is confident of getting at least 711 million dollars in new loans from its creditor banks, Finance Secretary Jesus Estanislao said Tuesday.

Mr. Estanislao said in an interview that the banks had committed 611 million dollars in new loans, short of the 750 million the country was hoping to get.

But he added that the government was confident that another 100 million dollars in loans would be committed before February 16, when the loan agreement is due to be signed.

"We always said this is something that will be kept open till the day of signing," Mr. Estanislao said.

The finance secretary earlier said that some bankers were reluctant to extend new loans in part because of a bloody coup attempt by rightwing renegade soldiers in December.

He and outgoing Central Bank Governor Jose Fernandez and incoming governor Jose Cuisia have just returned from negotiations abroad with creditor banks.

The new money was part of a debt package which includes a scheme where Manila will use funds from multilateral and official sources to buy back about 1.3 billion dollars of its foreign debt at a 50 percent discount.

Creditor banks were offered a choice of selling their loans to Manila or providing new credit. While offers to sell debt paper overshot the 1.3 billion dollar target, offers to give new loans fell short.

The Philippines has a 27.2 billion dollar foreign debt.

LONDON (JAN. 30) - British bank National Westminster said Tuesday it was holding talks with shareholders in the holding company of Dutch banking group F. van Lanschot Bankiers NV (FVL), with a view to raising its stake from 40 to 80 percent.

If the talks with other shareholders are sucessful, NatWest will purchase the additional stake in the holding company, van Lanschot's Beleggings Compagnie, from Rabobank Nederland, which has been a co-shareholder with NatWest since 1978.

"We are discussing this opportunity to increase our shareholding in van Lanschot as part of our strategy of developing profitable market segments in key European countries," Ian Farnfworth (eds: correct), NatWest's European businesses General Manager said.

"We intend that van Lanschot should retain its well-established name and character", he added.

FVL, established in 1737, provides corporate and personal banking services at its 20 branches throughout the Netherlands and at its Luxembourg subsidiary.

NatWest, one of Britain's four major clearing banks, made 1.4 billion pounds (2.4 billion dollars) in 1988.

PARIS (JAN. 30) - French state-owned company Thomson-CSF said Tuesday it was to set up a joint venture with British Aerospace to produce weapons systems for missiles.

The new company, Eurodynamics, will initially coordinate activities of the two groups, but eventually merge their tactical missile operations, Thomson said in a statement.

The venture is expected to have an annual turnover of some 14 billion francs (2.4 billion dollars) and will be the first European venture producing arms systems for land, air and sea tactical missiles.

The French government had on January 11 approved plans for cooperation between Thomson and the British group.

BANGKOK (JAN. 30) - Thailand has projected that its trade deficit will surpass six billion U.S. dollars this year, an increase of almost 25 percent from 1989, a government spokesman said Tuesday.

The increase was expected because of higher imports of capital goods and fuel oil, he said, citing a government report.

The Export Development Board forecast a deficit of around 153 billion baht (6.12 billion dollars), the spokesman said at a news conference.

Exports this year were expected to total 617 billion baht (24.68 billion dollars), an increase of 19.3 percent over 1989, he said.

BILBAO, Spain (JAN. 30) EFE - One person died when a bomb exploded Tuesday under a car parked in the town of Galdacano, a suburb of the industrial city of Bilbao in northern Spain's troubled Basque region, police said.

Authorities said the identity of the victim was not immediately known.

The attack bore the hallmarks of the Basque separatist terror group ETA which has killed over 600 people since it took up arms in 1968 to fight for the right to independence for Spain's Basque region.

#90030e0013 01/30/1990 ~Latin America New Agency
MALAGA, Spain (JAN. 30) EFE - A Spanish woman has been sentenced to six months in jail for an illegal abortion she had four years ago, but the doctor accused of carrying out the operation was acquitted for lack of evidence.

The defendant's lawyer said they would appeal the case on grounds of constitutional guarantees against self-incrimination and claimed that the only evidence against his client came from her own testimony.

He said the woman, Josefa Lara, was upset and vulnerable when she admitted to police that she had had an abortion after a vindictive ex-boyfriend informed on her to the authorities.

Lara was sentenced Monday by a tribunal in the southern city of Malaga that ruled her abortion in 1986 did not meet the requirements of Spanish

law.

The government passed a law five years ago decriminalizing abortion in cases of danger to the mother's health, where there is a risk of a malformed fetus or when rape is involved.

The time limit is usually twelve weeks although operations can be carried out later in certain circumstances. All medical staff, however, may refuse to carry out an abortion.

The prosecutor asked for the minimum sentence and Lara will not have to serve the jail snetence as she has does not have a prior criminal record.

The doctor accused of carrying out the operation, German Saenz de Santamaria, said after the trial that the court had condemned "the only decent and mature person involved in the case".

"The sentence shows the discrimination that women suffer, since they have no rights over their own bodies or their own deeds," Saenz said.

Women's rights groups claim current laws are so restrictive and prospects of a free operation in a state hospital so remote, that 96 per cent of Spanish women who decide to terminate their pregnancies go to expensive private clinics or go abroad.

These groups allege the government has turned a deaf ear to calls for reforms out of fear such a move could anger Spain's still-powerful Catholic church, and reluctant to fund large numbers of abortions by the public health service.

Three doctors are currently on trial in the northern city of Pamplona accused of carrying out an abortion in 1986 which was not covered by the law.

The doctors, who claim the operation was perfectly legal, had charges filed against them by an anti-abortion group linked to the secretive conservative Catholic movement Opus Dei.

If found guilty, the three doctors could be disqualifed from practicing medicine in addition to facing 12-year jail sentences and heavy fines.

#90030p0002 01/30/1990 ~PR Newswire
SALT LAKE CITY (JAN. 30) PR NEWSWIRE - Smith's Food & Drug Centers Inc. (NYSE: SFD), today reported record sales and net income for fiscal 1989.

For the fiscal year ended Dec. 30, 1989, sales totaled $1.73 billion, up 24 percent from $1.39 billion last year. Net income of $26.1 million was up 48 percent over last year's $17.7 million. Net income amounted to $1.16 per common share compared to 91 cents, an increase of 27 percent. Sales in comparable stores for fiscal 1989 increased 10.6 percent over fiscal 1988. Gross margins for fiscal 1989 increased to 21.76 percent from 21.58 percent in the prior year.

Sales for the fourth quarter totaled $478 million compared to $396 million last year, an increase of 21 percent. Net income was $7.3 million, up 55 percent over $4.7 million reported for the like quarter last year. Net income was 29 cents per common share compared to 24 cents, an increase of 21 percent.

Gross margins for the fourth quarter decreased to 21.54 percent from 21.64 percent due primarily to the new stores opened in the Phoenix market. Compression of gross margins is expected in new markets as the company promotes price competition to establish market share and build sufficient volume to effect economies of scale. The decrease in gross margins was offset by a reduction in percentage of total expenses to net sales caused by higher sales volumes and increases in comparable store sales which spread fixed costs over a larger sales base. Interest expense decreased due to the reduction of debt from the proceeds of the company's initial public offering.

During fiscal 1989, Smith's opened 13 new combination food and drug centers in St. George, West Jordan and Logan, Utah; Albuquerque, N.M.; Sierra Vista, Cottonwood, and Casa Grande, Ariz.; Idaho Falls, Idaho; Las Vegas, Nevada; and 4 in Phoenix. Two stores in Brigham City and Price,

Utah were completely remodeled. Six obsolete, smaller stores were closed during the year.

On Jan. 25, 1990, the board of directors increased the regular quarterly dividend from 5 cents per common share to 7 cents per common share. This dividend is payable on March 15, 1990 to common stockholders of record on Feb. 15, 1990.

Smith's is a leading regional supermarket chain operating 98 stores at the end of fiscal 1989 in eight intermountain and southwestern states. The majority of these stores are large combination food and drug centers.

#90030p0024 01/30/1990 ~PR Newswire

ATLANTA (JAN. 30) PR NEWSWIRE - Video Display Corp. (NASDAQ: VIDE) announced today the acquisition of the assets of privately held Vanco Inc. (Vanco) of Lake Bluff, Ill.

The company will be operated as a separate subsidiary named Vanco International Inc. Vanco imports, packages, and distributes consumer electronic accessories such as cables, connectors, adaptors, etc. for audio, video, telephone, C.B. radio, and general electronic usage. Vanco's sales for the calendar year 1989 were approximately $4,500,000 and $3,500,000 for calendar 1988.

Ron Ordway, chief executive officer of Video Display, stated that existing management will remain at Vanco. Plans are to continue the growth in sales and market share of Vanco by coordinating marketing strategies between Vanco and other Video Display divisions, namely Fox International (a warranty consumer electronic parts distributor based in Cleveland) and Video Display's entertainment CRT division. Revenue growth for Vanco of 25 percent per year is anticipated with a favorable impact on the growth of Fox and VDC's entertainment division as well.

In other announcements, Ordway revealed plans for further cost reductions at Video Display Corp. through facility consolidation and elimination of other administrative and overhead costs.

The facility consolidations deal primarily with the reduction of leased space at two plants in the entertainment CRT division. The Major Electronics plant in Van Nuys, Calif. has reduced its leased space from 40,000 square feet to 20,000 square feet. The Empire Video plant in Jacksonville, Fla. has ceased production and within the next 60 days will have reduced its space requirements from 50,000 square feet to 8,000

square feet. Production and storage capacity lost at these locations is being absorbed by the production facility at the Chroma Video plant in White Mills, Pa.

Additional steps taken in the restructuring will reduce administrative and overhead expenses. $10 million of debt has been "fixed" at 9.75 percent for one year with Citizens and Southern Bank, Atlanta. Compared to 1989 interest rates, this move will save $75,000 in interests costs. Two ongoing legal suits will be settled with no detrimental effect on the company which will reduce legal costs by approximately $250,000 annually. Consulting costs incurred with the relocating of the Novatron Tube Plant from Cambridge, Mass. to the existing Video Display plant in Bossier City, La. have now been terminated.

Anticipated cost savings from these actions are approximately $1 million. Additionally, Video Display expects these costs savings to have a postitive effect on earnings for the fourth quarter of fiscal 1990 and an even larger impact in the first half of fiscal 1991.

CONTACT: Ronald D. Ordway, CEO, or Ed Cordell, CFO, 404-938-2080, both of Video Display

#90030p0026 01/30/1990 ~PR Newswire

LINCOLNSHIRE, IL (JAN. 30) PR NEWSWIRE - Morgan Products Ltd. (NYSE: MGN) today announced a net loss of $3.7 million or $.43 per share on sales of $430 million for the year ended Dec. 31, 1989. As previously announced, the company charged 1989 net income $3.0 million of $.36 per share for the costs associated with restructuring of certain of its manufacturing operations. For 1988, Morgan reported sales of $440 million and net income of $5.4 million or $.64 per share.

On Nov. 15, 1989, Morgan announced plans for the restructuring of certain manufacturing operations affecting the Weed, Calif., fir door plant and Heritage Hardwoods operations in Shawano, Wis. Company officials now report that the phased closing of the Weed plant and consolidation of West Coast fir door production into the Springfield, Ore., facility is proceeding on schedule and should be complete by mid- year. This action enables Morgan to use more efficiently the capacity of its more modern Springfield, Ore., and Lexington, N.C., fir door production facilities and reflects the current soft market conditions in both the residential construction and the repair and remodeling markets.

Concurrently, the consolidation of production of certain products utilizing hardwoods through the transfer of stairparts operations from Oshkosh, Wis., to Morgan's Heritage Hardwoods subsidiary in Shawano, Wis., is underway and should be completed by June 30, 1990. The company

continues to explore divestiture of the combined stairparts and Heritage businesses with interested parties including a management-led group.

Other factors contributing to the decline in net income in 1989 included lower sales, continued higher than expected manufacturing costs and a decline in gross margins of products distributed by the company. A reported 7 percent decline in housing starts coupled with a slowing in the repair and remodeling markets were the principle reasons for the 2 percent sales decline from the prior year. Inefficient material utilization combined with operating inefficiencies at the company's West Coast fir door plants and at its Heritage Hardwoods plant, had a negative impact on net income for the year. The transfer of production from Weed, Calif., to Springfield, Ore., and the potential divestiture of the combined stairparts and Heritage operation are expected to substantially improve gross margins.

Morgan Products Ltd. is a leading manufacturer and distributor of specialty building products through its three business units: Morgan Manufacturing, a national manufacturer which makes and sells premium interior doors and entrance systems under the brand names Morgan and Nicolai; Morgan Distribution, a regional wholesale distributor of specialty building products, primarily millwork, including windows and doors; and Morgan Technologies, a developer of software systems for use by specialty building products dealers.

#90030p0028 01/30/1990 ~PR Newswire

SEATTLE (JAN. 30) PR NEWSWIRE - Ackerley Communications Inc. (AMEX: AK) reported the company's preliminary unaudited results for both their final quarter and fiscal year ended Dec. 31. Sales for the fourth quarter ended Dec. 31 were $45.9 million, up 13 percent from $40.8 million a year earlier. Sales for the fiscal year ended Dec. 31 reached $168.6 million, up 10 percent from $153.5 million for the prior year.

Adjusted operating profit (defined as net revenue less operating expenses plus other income before depreciation, amortization and interest) -- the "cash flow" by which the company measures its performance -- remained at $8.7 million for the fourth quarter and reached $33.1 million for the year up 5 percent from $31.6 million for the previous year. The year-to-date figures reflect the January acquisition of radio station WBOS-FM, Boston. Without the acquisition, the year-to-date adjusted operating income would have risen 11 percent.

The company showed a net loss applicable to common shares of $2.9 million, or 19 cents per share, for the quarter ended Dec. 31, compared to a gain of $0.1 million, or one cent per share, for the comparable quarter. For the year, the company lost $7.4 million, or 48 cents per share, compared to the year earlier loss of $2.5 million, or 16 cents per share. In 1989, the company had major acquisitions in both the broadcasting and out-of-home segments. These acquisitions increased the non-cash expenses of depreciation and amortization, as well as interest due to borrowings associated with these same acquisitions, both of which together more than offset the gain in adjusted operating income.

Ackerley Communications is a national multimedia advertising business, with interests in outdoor and airport advertising, broadcasting and professional sports, notably the Seattle SuperSonics.

Ackerley Communications provides display advertisements in more than 120 airport terminals throughout the United States. The company's outdoor advertising division serves the metropolitan markets of Boston and Worcester, Mass.; Miami and West Palm Beach, Fla.; Seattle/Tacoma, Wash.; and Portland, Ore. With approximately 11,000 sign locations, it is among the nation's largest out-of-home advertising media firms.

Its broadcasting properties include television stations KVOS-TV in Bellingham, Wash.; KGET-TV in Bakersfield and KCBA-TV in Salinas, Calif.; KKTV in Colorado Springs, Colo.; and WIXT-TV in Syracuse, N.Y. Ackerley owns radio stations WBOS-FM in Boston; KJR-AM and KLTX-FM in Seattle; and KGON-FM and KFXX-AM in Portland, Ore.

#90030p0036 01/30/1990 ~PR Newswire

SAN DIEGO (JAN. 30) PR NEWSWIRE - First National Corp. (AMEX: FN), the holding company for First National Bank, reported record net earnings for the year ended Dec. 31, 1989, of $5.3 million; a 62 percent increase over 1988 earnings of $3.3 million.

Fully diluted per share earnings for 1989 were $1.62, an increase of 51 percent over the $1.07 per share reported for 1988.

For the 1989 fourth quarter, net earnings were $1.4 million compared with $1.3 million earned in the fourth quarter of 1988. Fully diluted per share results were $.43 for the fourth quarter of 1989 compared with $.40 for this same period last year.

First National's 1989 results produced a 1.05 percent return on average

assets and 16.09 percent return on average equity.

Total assets reached $538 million at Dec. 31, 1989. This was a 14 percent increase over the $471.9 million reported for the 1988 year end.

Net interest income, after provisions for loan and lease losses grew $6.1 million, or 31 percent to $25.6 million for the latest 12 month period. Other operating income, reflecting primarily servicing income and net gains from the sales of loans and loan servicing was $6.7 million in 1989 compared with $3.8 million in 1988. As of Dec. 31, 1989, First National's mortgage banking operation serviced nearly $2 billion in mortgage loans for investors.

First National's Corporate Trust Group was administering in excess of $101 million in assets at 1989 year end, up substantially from the $2.3 million at the end of the 1988 start-up year.

First National's total deposits were $490.6 million at Dec. 31, 1989, an increase of 18 percent from $415.3 million a year ago. Demand deposits grew 57 percent to $194 million, representing 40 percent of total deposits at 1989 year end. Net interest margin, on a fully taxable equivalent basis, was 6.46 percent for 1989, up 73 basis points from the prior year.

Shareholder's equity grew to $36.3 million representing 6.7 percent of assets. First National Corp.'s primary capital ratio was 7.46 percent at the end of 1989.

First National Corp. is the holding company for First National Bank, headquartered in San Diego County. Founded in 1981, First National offers commercial banking, mortgage banking and corporate trust services through seven offices and four loan production offices throughout Southern California.

JACKSON, MI (JAN. 30) PR NEWSWIRE - Consumers Power Company continued improving its environmental performance last year with a 2.5- percent decrease from 1988 and 23-percent reduction since 1987 in sulfur dioxide emissions from its coal-fired electric generating plants.

Sulfur dioxide emissions in 1989 totaled 103,000 tons, down from 106,000 tons in 1988 and 134,000 tons in 1987. Since 1975, Consumers Power Company has lowered its sulfur dioxide emissions by 68 percent, despite a 21-percent increase in coal consumption during the period.

"Our exclusive use of coal containing less than 1 percent sulfur during the last two years demonstrates that Consumers Power and its electric customers have already shouldered a significant share of the burden in reducing sulfur dioxide emissions for cleaner air," said Gordon L. Heins, senior vice president of energy supply. "While Congress debates how to achieve cleaner air nationally, it's important that Michigan people not be taxed twice by having to pay again for emissions reductions elsewhere," Heins said.

In 1987, Consumers Power completed the switch to use of low-sulfur coal exclusively in the electric generating units it owns and operates near Bay City, Grand Haven, Monroe and Muskegon. The utility burns about 7 million tons of coal per year to help provide almost 30 million megawatt-hours of electricity to about 3.3 million people in Michigan.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

TORRANCE, CA (JAN. 30) PR NEWSWIRE - Ashton-Tate Corporation (NASDAQ: TATE) today launched an Authorized Educational Reseller Program and named two national educational product distributors, Soft-Kat Inc. of Chatworth, Calif., and NACSCORP, of Oberlin, Ohio.

Under the Authorized Educational Reseller Program, Ashton-Tate will authorize resellers to sell educational versions of its software products to colleges, universities and other educational institutions. Authorization will be granted following the company's review and approval of completed application forms which are currently being mailed to resellers nationwide.

National, regional and independent software stores and college and university bookstores are all eligible to participate in this program. Resellers will be selected based on a variety of criteria, including a history of servicing educational accounts and the support of a dedicated educational sales operation.

Upon authorization, resellers will be able to purchase products from Ashton-Tate's educational catalog and price list through Soft-Kat or NACSCORP. They will also receive technical and marketing support from Ashton-Tate and the two distributors.

This program marks the first time Ashton-Tate has authorized resellers to serve educational customers on its behalf.

Two of the country's top educational software product distributors, Soft-Kat and NACSCORP will help Ashton-Tate fill product orders more rapidly while allowing the company to effectively reach and support more educational resellers, according to Motika. "Soft-Kat and NACSCORP will also help us launch quality national promotions which will provide greater value for our educational resellers," she added.

Ashton-Tate offers educational versions of most of its popular products, including dBASE IV, dBASE III PLUS, Framework III and MultiMate version 4.0 for the DOS operating system, and FullWrite Professional and Full Impact for Macintosh computers. These versions offer most the same features found in their retail counterparts, but are explicitly limited for sale only to faculty and students of nonprofit educational institutions. The educational versions differ from "Student Edition" Ashton-Tate software titles, which are limited-functionality products distributed by Addison-Wesley Publishing Company of Reading, Mass.

Headquartered in Torrance, Ashton-Tate develops and markets microcomputer business applications software for the DOS, OS/2 and Macintosh operating systems. The company offers products in five major categories: database management systems, word processing, integrated decision support software, spreadsheets and graphics. Ashton-Tate also markets a comprehensive line of service and support programs for individuals, corporations and government agencies.

NEW YORK (JAN. 30) PR NEWSWIRE - Mitsubishi Heavy Industries America, Inc. (MHIA) has announced plans to open a machine tool manufacturing plant in Hopkinsville, Ky. The new plant will manufacture horizontal machining centers, vertical machining centers and CNC lathes and within four years is expected to produce more than 30 sets of machining centers and lathes per month. The first machine tools from the Hopkinsville facility are expected to be in production by July 1990.

MHIA is a U.S. subsidiary of Mitsubishi Heavy Industries, Ltd. (MHI), has its principal office in New York, with divisions and affiliates throughout North America. MHIA deals in power generating systems, ships and vessels, aerospace systems, air-conditioning systems turbochargers, machine tools, printing presses and steel mill equipment, and other industrial and technologically advanced products. MHIA also purchases products and equipment manufactured in the United States for installation in products

manufactured by its parent, MHI.

MHI is an international supplier of machinery, plants and technology and is a leader in the areas of space, ocean development, energy, and environmental protection with annual sales of $14 billion.

Hopkinsville is situated approximately 75 miles northwest of Nashville, Tenn., and is on the interstate highway system. The MHIA plant will be located within the Hopkinsville Industrial Park, on a 29-acre parcel of land which will be acquired by MHIA. A new building, containing approximately 4,800 square meters of floor space, is to be constructed for the manufacturing facility, with completion scheduled for June 1990.

MHIA will make an initial capital investment of $6 million in this facility. In addition, MHIA will provide significant manufacturing and design technology and other technical assistance to the new facility during its start-up phase. Sales, technical support and after-sales service of the machines produced at Hopkinsville will be conducted from the headquarters of MHIA's machine tool division, located in Bensenville, Ill.

Production activity in the new facility will be conducted by American Precision Machinery, Inc. (APM), a newly created subsidiary of MHIA with its 100 percent ownership. APM will strive to contribute to the local economy and its people and hopes to become an upstanding member of the Hopkinsville community.

APM will employ 40 persons full-time at the new facility during 1990, two of whom will be sent from Japan by MHI. MHIA expects to increase the number of factory workers and other employees at this facility progressively over the next four years.

PITTSBURGH (JAN. 29) PR NEWSWIRE - Allegheny International, Inc. (AI) (NYSE: AG) today announced it expects to have U.S. Bankruptcy Court approval within the next week to submit its latest plan of reorganization to creditors and shareholders for a vote. Acceptance of the plan, submitted to the court last month, would pave the way for the Pittsburgh-based consumer products company to emerge from chapter 11 protection during the first half of this calendar year.

AI said that it believes the plan will have broad constituent support and that it believes it can be confirmed shortly after voting would be completed in late March. The plan provides for the retention of all AI's consumer products businesses as a group.

In a related development, AI's board of directors said it had "concerns" about a Jan. 25, 1990 offer by Japonica Partners, a New York investment and advisory firm reportedly with no operating assets, to acquire AI. The board said it has questions concerning Japonica's ability to consummate the proposal and noted that it has directed AI's advisors to explore those concerns with Japonica prior to considering any matters regarding Japonica's proposal.

PITTSBURGH (JAN. 30) PR NEWSWIRE - Joy Technologies Inc. announced today that John N. Hanson has joined the company as president of the worldwide Mining Machinery Group and senior vice president and group executive of the company.

Hanson was previously corporate vice president of marketing of Caterpillar Inc., a position he held since 1987. Prior to that, he was president of Caterpillar's Solar Turbines Inc. subsidiary. He earlier held positions with International Harvester Co., Gould Inc. and Westinghouse Electric Corp.

Hanson holds bachelor and master of science degrees from the Massachusetts Institute of Technology and a Ph.D. degree in nuclear science and engineering from Carnegie Mellon University. In 1970, he was selected as one of the 17 White House Fellows and served as executive assistant to the secretary of labor.

Joy is the world's leading manufacturer of underground coal mining machinery, with facilities in the United States, South Africa, Australia and the United Kingdom. Hanson will be responsible for all aspects of Joy's worldwide mining business.

Marc F. Wray, chairman and chief executive officer of Joy, stated, "John Hanson brings a strong commitment to build on the competitive strengths of our mining machinery business, enhancing value to our current and future customers. His leadership skills and broad experience in global, highly technical, capital goods businesses will benefit our evolving strategies. We now have in place a senior management team that will maintain leadership in the markets Joy serves and energize our future growth on a worldwide basis."

Joy Technologies Inc., a Pittsburgh-based company, is a worldwide producer of capital equipment for mining, air pollution control and other industrial applications.

WASHINGTON (JAN. 30) PR NEWSWIRE - Hardee's Food Systems, Inc., and Marriott Corporation (NYSE: MHS) announced today an agreement by which Hardee's would acquire Marriott's Roy Rogers restaurant business for a purchase price of $365 million.

The sale is subject to any necessary governmental review, and is expected to be completed by the end of March 1990.

The Roy Rogers fast food chain consists of over 600 restaurants, located primarily in the metropolitan Washington, Baltimore, Philadelphia and New York areas. Established by Marriott in 1968, Roy Rogers has a menu which features quality chicken, hamburgers and roast beef.

J.W. Marriott, Jr., chairman and president of Marriott Corporation, said, "The decision to sell Roy Rogers was a difficult one, but it is a strategic action that will help us to concentrate our focus on our lodging and contract service operations in the 1990s. Hardee's is a leader in its industry and we are confident that Roy Rogers restaurants will have a solid future as part of the expanding Hardee's system."

This is the third major acquisition for Hardee's, which acquired the 200-unit Sandy's system in 1972, and the 650-unit Burger Chef chain in 1982. In each case, the acquired restaurants were successfully converted to the Hardee's trademark.

The third largest fast food hamburger chain in America, Hardee's has systemwide sales of approximately $3.5 billion and operates and franchises 3,300 restaurants in 40 states and nine foreign countries.

Marriott Corporation, based in Washington, D.C., is a diversified hospitality company primarily involved in lodging and contract services.

LOS ANGELES (JAN. 30) PR NEWSWIRE - HarCor Energy Inc. (NASDAQ: HARC) announced today the successful completion of the LEA 403 No. 6 well located in Lea County, N.M. During an initial five-day pump test, production averaged 330 Bbls. of oil per day and 23 Bbls. of water per

day. The completion resulted from the re-entry of a previously abandoned well with production being restored from the Devonian formation through perforations from 11,642 feet to 11,672 feet. The re-entry is part of an ongoing program to enhance production from properties acquired by HarCor in an earlier transaction announced on Oct. 23, 1989.

HarCor holds a 26.5 percent working interest in the Lea 403 No. 6 well, which is operated by a third party.

HarCor is a Los Angeles-based independent oil and gas company with activities in the United States and Canada.

CANOGA PARK, CA (JAN. 30) PR NEWSWIRE - New Image Industries Inc. (NASDAQ: NIIS) today reported a 158 percent increase in sales and a 133 percent gain in net income for the second fiscal quarter of 1990 ended Dec. 31, 1989, from the corresponding period last year.

Net sales for the quarter rose to $3,409,000 from $1,319,000 in the prior period. Net income climbed to $413,000, or $.14 per share, from $177,000, or $.08 a share, in the fiscal 1988 second quarter.

For the six months ended Dec. 31, 1989, net sales increased 92 percent to $55,526,000 from $2,871,000 in the similar fiscal 1988 period. Net income increased 154 percent to $642,000, or $.24 per share, from $253,000, or $.12 a share, in the prior year's six month period.

Gross margins for the six months rose to 57 percent from 54 percent and the net income margin increased to 12 percent from 9 percent.

The continuing improvement in net operating results was due to increased sales in the beauty, weight loss and architectural/ landscape design industries, coupled with an increase in international sales and contributions from the company's entry into the cosmetic surgery and dental marketplace.

In Dec. 1989, the company acquired Image Technologies N.V., its largest European distributor headquartered in Ghent, Belgium. The acquisition will be the foundation of an aggressive expansion in Europe with the opening of additional offices in Germany, France, the United Kingdom and the Netherlands planned for this calendar year. These offices will market New

Image's total family of turnkey computer imaging systems and proprietary software.

New Image International N.V., a wholly owned subsidiary formed to manage the European expansion, will be headed by Guy DeVreese, founder and president of Image Technologies.

New Image Industries designs, assembles and markets a family of computer imaging products that enable users to visually communicate to prospective clients the results of their proposed services before the services are performed. The products, currently marketed to the beauty, architectural/landscape, weight loss and medical and dental industries, include turnkey computer imaging systems and proprietary software. New Image Industries is traded on the NASDAQ National Market System.

#90030p0048 01/30/1990 ~PR Newswire

FORT MILL, SC (JAN. 30) PR NEWSWIRE - Springs Industries (NYSE: SMI) today reported record sales and earnings for the year 1989 but lower earnings for the fourth quarter.

In the fourth quarter, net sales were $484,987,000, up .2 percent from net sales of $484,229,000 in the fourth quarter of 1988. Net income in the quarter was $19,582,000, or $1.10 per share, down 16.7 percent from net income of $23,519,000, or $1.32 per share, in the fourth quarter of 1988.

For the full year 1989, net sales were $1,909,256,000, up 4.6 percent from net sales of $1,824,760,000 in 1988. Net income for the year was $64,850,000, or $3.64 per share, an increase of 22.7 percent over net income of $52,846,000, or $2.98 per share in 1988. Earnings in 1988 were reduced by a special one-time pretax charge of $18 million for restructuring, equivalent to $11.2 million after taxes, or $.63 per share.

Walter Y. Elisha, chairman and chief executive officer, stated, "While we are pleased with our overall results for the year 1989, weaknesses in several of our markets developed in the latter part of the year, and we did not end on as strong a note as we might have wished. Shipments in the fourth quarter were roughly equivalent to year ago levels. However, continued growth in the home furnishings area offset lower sales in our finished fabrics group.

"Fourth quarter operating earnings in our home furnishings group were below our strong year ago quarter, partly due to close outs of several specialty lines and to an increased provision for doubtful retail

accounts. This group continues to enjoy firm demand and carries unfilled order positions well ahead of year ago levels.

"We have continued to reduce production of finished fabrics for the apparel market, resulting in much lower fourth quarter volume in comparison to a year ago. Although manufacturing improvements and strict cost controls have improved earnings, margins are still meager as the result of intensely competitive conditions in a weak market, notably women's wear.

#90030p0050 01/30/1990 ~PR Newswire

ATLANTA (JAN. 30) PR NEWSWIRE - The Coca-Cola Company (NYSE: KO) established record net income and net income per common share levels in 1989 as the concluding achievements in a decade of outstanding growth.

The Company reported today that net income available to common shareholders in 1989 was $1.7 billion, an all-time high, and net income per common share was $4.92, also a record.

Net income per common share in 1989 was $3.35 after excluding a $1.47 per common share gain on the sale of Columbia Pictures Entertainment Inc. stock in November and a $0.10 per common share gain on the sale of Belmont Springs Water Co. Inc. in August. In the fourth quarter, net income per common share was $0.72, after excluding the Columbia gain.

In the fourth quarter, unit case sales in the United States advanced 4 percent and gallon sales of concentrates and syrups grew 3 percent.

For the full year, unit case sales in the United States advanced two and one-half percent impacted by slower restaurant industry customer traffic. United States soft drink operating income in 1989 benefitted from control of administrative expenses and a two and one-half percent gain in gallon sales of concentrates and syrups.

At Coca-Cola Foods, volume in the chilled and frozen orange juice categories increased 29 percent and 10 percent, respectively. Chilled volume growth was led by the completion of the national roll-out of Minute Maid from concentrate orange juice in the 96 oz. plastic bottle and the continued success of Premium Choice not-from-concentrate orange juice. Premium Choice sold more than three times the volume of the prior year as it expanded into new markets. Operating income declined 2 percent due primarily to the sale of the coffee and bottled water businesses during the year.

In 1989, the Company acquired 14 million shares of common stock to complete the 40 million share repurchase program initiated in 1987 and 5 million shares under a new 20 million share repurchase program started in October 1989.

#90030p0052 01/30/1990 ~PR Newswire

PERKASIE, PA (JAN. 30) PR NEWSWIRE - Independence Bancorp (NASDAQ: INBC) today reported net income of $16 million for the year ended Dec. 31, 1989, compared with a net loss of $10.4 mi11ion in 1988.

Primary and fully diluted earnings per share for 1989 were $1.48, compared with $1.04 loss per share a year ago.

"We accomplished what we set out to do in 1989," said John D. Harding, president and chief executive officer. "We continued to build core operating earnings and, at the same time, we improved our balance sheet structure and interest rate sensitivity. As a result, we expect better earnings growth in 1990."

For the fourth quarter of 1989, net income was $4.83 million, equal to 44

cents per share on a primary and fully diluted basis, compared with $5.04 million or 49 cents primary and 48 cents fully diluted for the same period last year.

In the fourth quarter, Independence added $3.5 million to its reserve for certain asset-backed bonds placed on nonaccrual status in 1987. The timing on this reserve was, in part, related to management's reassessment of the prospects for an early settlement of all or part of the litigation concerning these bonds.

Also in the quarter, the company reported a $407,000 capital stock tax refund, a $638,000 extraordinary gain net of tax on the repurchase of convertible subordinated debentures, and gains of $1.65 million from the settlement of litigation and claims. Securities losses were $498,000 in the fourth quarter.

Net income for the year was affected by a change in the computation of the Pennsylvania bank shares tax which resulted in a one-time expense of $4.4 million in the second quarter, and by $1 million in severance expenses in the third quarter.

Independence reported securities losses of $8.9 million for the year, compared with securities losses of $32.6 million in 1988. Total investment securities were $635 million at year end, compared with $818 million a year ago.

Total loans were $1.70 billion at year-end 1989 compared with $1.67 billion a year ago. The allowance for possible loan losses was 1.35 percent of total loans at Dec. 31, 1989, compared with 1.32 percent a year earlier.

Independence continued to rank near the top of its industry peer group in loan quality ratios. Net charge offs were $4.14 million for 1989 ($919,000 in the fourth quarter), or 0.25 percent of total loans, compared with $2.65 million for 1988 ($832,000 in the fourth quarter). Nonperforming loans were $12.3 million at Dec. 31, 1989, representing 0.72 percent of total loans. For 1988, nonperforming loans were $8.29 million, or 0.50 percent of total loans.

Core deposits grew 15.6 percent in 1989 to $2.0 billion. Total deposits were $2.2 billion at year end, compared with $2.3 billion in 1988, reflecting a reduction in higher cost time deposits.

The net interest margin improved to 4.05 percent for the year compared with 3.51 percent in 1988.

Non-interest expense, excluding the Pennsylvania bank shares tax expense and severance expenses, increased 4.20 percent in 1989.

Independence Bancorp is a $2.7 billion bank holding company in eastern Pennsylvania.

WASHINGTON (JAN. 30) PR NEWSWIRE - Leon Daniel, senior editor, columnist and a 34-year veteran of United Press International, has been named chief correspondent for the news service, Managing Editor Bill Ferguson announced yesterday.

UPI editorial management created the chief correspondent position to enhance UPI's enterprise reporting and spot coverage of national news.

"Leon is one of UPI's best and most aggressive reporters, and has worked for UPI on five continents," Ferguson said.

Daniel, based in Washington, will team with permanent beat reporters to expand UPI's coverage of both major breaking news and national stories demanding longer-running coverage.

As a reporter, Daniel, 58, has covered most of the major news stories of the last three decades, including the U.S. space program, the civil rights movement, the Grenada invasion and the Persian Gulf war. Covering the fall of Saigon, Daniel was one of the last Western reporters expelled from the city.

In Washington, "Leon will also smoke-out what UPI has always known as 'offbeaters', stories outside the traditional spot news beat on Capitol Hill and in the federal agencies and departments," Ferguson explained.

Daniel, who begins his new assignment Feb. 5, has served as UPI managing editor-international, chief news editor in Europe, national reporter covering the United States and, most recently, senior editor writing "Commentary on the News" five days a week.

Daniel has been UPI chief correspondent for East Asia based in Manila, chief correspondent for South Asia based in New Delhi and manager for Thailand, in Bangkok. He served as a U.S. Marine during the Korean War and was awarded the Purple Heart for wounds suffered during action there.

A native of Etowah, Tenn., near Knoxville, Daniel joined United Press as a college intern covering the Tennessee Legislature in 1955. He attended the University of Tennessee at Knoxville, and was elected founding president of the university's chapter of the Society of Professional Journalists, Sigma Delta Chi (SPJ/SDX).

United Press International, founded in 1907, has 180 bureaus and is represented in 90 nations. UPI is owned by Infotechnology, Inc. (NASDAQ: ITCH), an information and communications company.

#90030p0055 01/30/1990 ~PR Newswire

PITTSBURGH (JAN. 30) PR NEWSWIRE - Mellon Bank Corp. (NYSE: MEL) announced today that it is seeking a buyer for its consumer finance company, which operates under the name "Mellon Financial Services" and is headquartered in Oak Brook, Ill.

"Mellon Financial Services-Oak Brook is a profitable, well-run consumer finance business, but it is not essential to the achievement of our retail banking strategy," said Frank V. Cahouet, chairman and chief executive officer of Mellon Bank Corp. "Its sale represents a redeployment of resources within the retail business, which we are focusing in the Central Atlantic region."

As a result of the sale, the corporation does not anticipate issuing common stock in connection with its recently announced plan to purchase 54 PSFS branches from Meritor Savings Bank in Philadelphia. Previously, the corporation had expected to finance the acquisition by issuing common stock, preferred stock and debt.

Mellon Financial Services-Oak Brook operates 97 offices in 17 states, principally in the Midwest and western United States. At Dec. 31, 1989, it had assets of approximately $550 million; liabilities of approximately $495 million; approximately $55 million in equity; and approximately 375 employees. The company specializes in consumer lending, dealer sales finance plans, and resort time-sharing loans.

Goldman, Sachs & Co. has been retained by the corporation to assist in identifying potential buyers and evaluating their bids for Mellon Financial Services-Oak Brook.

With assets of $31.5 billion at Dec. 31, 1989, Mellon Bank Corp. is one of the nation's 20 largest bank holding companies. Through its subsidiaries, it provides wholesale, middle market and retail banking, as well as numerous service products including trust and investment, data processing and cash management.

ATLANTA (JAN. 30) PR NEWSWIRE - T2 Medical Inc. (NASDAQ-NMS: TSQM) announced record revenues and earnings today for the first quarter ended Dec. 31, 1989.

Revenue for the first quarter was $14,650,000, a 231 percent increase over the $4,420,000 reported for the first quarter in fiscal year 1989. Net income for the quarter was $3,035,000 compared to net income of $1,180,000 for the first quarter in fiscal year 1989, a 157 percent increase. Net income per share was $.25 for the first quarter vs. $.14 for the first quarter in fiscal year 1989, a 79 percent increase.

The financial statements for the first quarter of fiscal 1989 were restated to reflect the five previously announced pooling of interest acquisitions completed during the first quarter of fiscal year 1990. In addition, the first quarter of fiscal 1989 financial statements do not include the operation of the 21 centers acquired on Jan. 5, 1989, accounted for as purchases.

On Jan. 2, 1990, T2 Medical Inc. announced that it had offered to prepay a portion of its notes issued in connection with the acquisition of 21 of its home infusion therapy centers in January 1989. In letters sent to the former physician/shareholders of those centers, T2 Medical Inc. offered to prepay an aggregate of $12,831,619 in principal amount of its notes due in January 1991 at 88 percent of their face amount (or a discounted aggregate amount of $11,291,825).

As of Jan. 30, 1990 approximately 163 holders of these notes accepted T2 Medical Inc.'s prepayment offer representing $5,397,041 in principal amount (or a discounted aggregate amount of $4,749,396). The prepayment of notes due in January 1991 does not effect the aggregate of $12,831,619 in principal amount of notes due in January 1992.

T2 Medical is a leading provider of home infusion therapy in the United States. Infusion therapy is the administration to a patient of nutrients antibiotics, and other drugs and fluids, either intravenously or through a feeding tube. T2 Medical Inc.'s headquarters are in Roswell, Ga.

CAMDEN, NJ (JAN. 30) PR NEWSWIRE - Campbell Soup Co. (NYSE: CPB)

announced today it is putting its Juice Bowl Products Inc., subsidiary up for sale and will close a frozen food plant in England, in a continuing move to optimize assets.

Campbell President and Chief Executive Officer David W. Johnson said that Juice Bowl, "although an excellent business with great strengths and market leadership in its category," no longer fits Campbell's long- term strategy. And, he said the frozen convenience food plant at Sittingbourne Kent, England will be closed and production moved to another Campbell plant in Salford, near Munchester, England.

Johnson said the actions were taken following an intensive and continuing review of all Campbell assets.

"If Campbell is to achieve the level of financial strength that its shareholders have a right to expect, we must be certain that we are structured to obtain maximum returns from all our assets. These two actions are very important and positive steps in that direction."

Campbell acquired Juice Bowl in l982 under a strategy of expanding juice beverages beyond Campbell's existing vegetable juice category, and acquiring capacity for the introduction of new blended products and the production of tomato-based juices. Under Campbell's current long-term strategy, however, the Juice Bowl Lakeland, Fla. business, which has 220 employees, is no longer required in order to meet Campbell's beverage production needs. Campbell has retained Goldman-Sachs to assist it in selling Juice Bowl.

The Sittingbourne plant, which employs 262 people, produces frozen sausage rolls. Sittingbourne became a Campbell plant following Campbell's May 1988, acquisition of Freshbake Foods Group P.L.C., a leading British frozen food producer. Freshbake is now a unit of Campbell Foods P.L.C.

#90030p0066 01/30/1990 ~PR Newswire

NEW YORK (JAN. 30) PR NEWSWIRE - Huntsman Holdings Corporation made public today the following letter sent Jan. 29, to R.S. Evans, chairman of the special committee of the board of directors of Aristech Chemical Corporation (NYSE: ARS):

We were very disappointed with your letter of January 26 in which you rejected our request for an extension of your 5:00 p.m. January 29 deadline for the submission of bids to acquire Aristech Chemical Corporation. As I will explain below, we and GE Plastics will require at least another two weeks for our due diligence investigation before being

in a position to submit a formal bid for Aristech. Accordingly, we hereby renew our request for an extension of your deadline at least to Feb. 14, 1990.

As you know, we signed a confidentiality agreement with Aristech on Jan. 24, 1990. Pursuant to that agreement, you furnished us late that day with certain limited financial information on Aristech. However, as we have advised you, we need access to considerable additional information and people. In this regard, earlier today we called Aristech's general counsel, David F. Tuthill, and sent to him an outline of additional due diligence requirements, which included among other items: (i) Visits to each of the Aristech facilities (and meetings with certain managers and financial people at each of these facilities), (ii) meetings with Anthony F. Mastro, your chief financial officer and members of his staff, (iii) meetings with Craig R. Andersson, your chief operating officer and members of his staff, (iv) meetings with Mr. Tuthill, your general counsel and members of his staff, (v) access to and review of various legal and other documents at the company's headquarters in Pittsburgh, and (vi) meetings with Price Waterhouse, your certified public accountants.

Although we intend to work as efficiently and expeditiously as we can, we know that it is unrealistic to expect that we will be able to complete our due diligence investigation work on any faster time table than the approximately two-week schedule we have set for ourselves.

I want to emphasize to the special committee and the entire board that we genuinely want to acquire Aristech. As you all know, I have been pursuing this objective for more than a year and fully intend to achieve this goal. The fact is, however, that it is just not reasonable for you to expect us to make our formal proposal until we have had a reasonable period of time to complete a reasonable due diligence review of your company. You are all aware that Mitsubishi, working with Mr. Marshall and other members of your management, have had an enormous amount of time to study fully all aspects of the company's businesses, assets, liabilities and prospects. While we know we will not be able to obtain access to all of the information which Mitsubishi has had furnished to it by Mr. Marshall and others (particularly the data, views and facts that reside only in the heads of Mr. Marshall and other of your senior managers), we do expect to have full access to all information about the company and its businesses.

When we complete our plant and facilities visits, review documents and other financial information and perform other due diligence steps, we will need some time to digest the information we will have received, to discuss it with GE Plastics and to reach a conclusion as to the level of our bid.

Rest assured that our bid will be at least $27 per share unless some materially negative information comes to our attention as a result of our

due diligence work.

While this process is going on, we fully intend to work with your lawyers to draft and develop appropriate documentation for the transaction. We have instructed our lawyers, Skadden, Arps, Slate, Meagher & Flom, to commence discussions promptly with your lawyers on this subject.

We are working diligently to complete as promptly as practicable the necessary steps to finalize our bid. We will keep you apprised of our progress and will try to be responsive to any questions you may have.

Jon M. Huntsman Chairman of the Board

#90030p0067 01/30/1990 ~PR Newswire

CLEVELAND (JAN. 30) PR NEWSWIRE - McDonald & Company Investments, Inc. (NYSE: MDD) today reported results for the third quarter and nine months ended Dec. 29, 1989.

Revenues for the third quarter ended Dec. 29, 1989 increased 27 percent from $15,542,000 a year ago to $19,713,000. For the nine months ended Dec. 29, 1989, revenues increased $8,258,000 from $47,562,000 a year ago to $55,820,000, an increase of 17 percent.

Third quarter income before extraordinary gain was $471,000 or $.09 per share compared to $614,000 or $.10 per share in the prior fiscal year, a decline of 23 percent in income before extraordinary gain and 10 percent in earnings per share. Income before extraordinary gain for the first nine months was $2,346,000 or $.41 per share compared to $2,449,000 or $.39 per share a year ago. This represents a decrease in income before extraordinary gain of four percent and an increase in earnings per share of five percent.

Net income for the quarter was $784,000 or $.14 per share compared to $614,000 or $.10 per share in the year-ago quarter, an increase of 28 percent in net income and 40 percent in earnings per share. For the nine-month period, net income was $2,659,000, an increase of nine percent over the net income of $2,449,000 reported a year ago. Earnings per share rose 18 percent to $.46 from $.39 earned in the nine months ended Dec. 30, 1988.

Included in net income for both the quarter and the nine-month period was an extraordinary gain of $313,000 after taxes or $.05 per share resulting from the Company's purchase and retirement of $2,095,000 face value of its

eight percent convertible subordinated debentures.

The average number of common shares outstanding in the third quarter was 5,736,000 compared to 6,242,000 in the year ago third quarter. Average common shares outstanding in the first nine months was 5,770,000 compared to 6,286,000 in the first nine months of last year.

Directors of McDonald & Company Investments, Inc., today declared a regular quarterly dividend of five cents per share payable Feb. 23, 1990 to shareholders of record Feb. 13, 1990.

McDonald & Company Investments, Inc. through its principal subsidiary, McDonald & Company Securities, Inc., operates a regional investment banking and brokerage business with twenty-one offices in Ohio, Michigan, and Indiana and five offices in Illinois, Massachusetts, New Jersey, Philadelphia and Texas.

CHARLEVOIX, MI (JAN. 30) PR NEWSWIRE - William L. Beckman has been named plant manager of Consumers Power Company's Big Rock Point nuclear plant. He succeeds Thomas W. Elward who has been named vice president of CMS Generation Company, a subsidiary of CMS Energy Corporation.

Beckman, 44, previously was radiological services manager of Consumers Power's Palisades nuclear plant near South Haven, a position he held since 1984. Before that, he was director of nuclear training for the company. Beckman is a graduate of the U.S. Navy's nuclear power school and earned a bachelor of science degree in chemistry from Fairfield University in Fairfield, Conn.

Beckman joined Consumers Power in 1975. Last year, he served as a member of an International Atomic Energy Agency team invited by the government of Brazil to review the operation of its Angra-1 nuclear power plant.

Elward served as Big Rock Point's plant manager since May 1987. "Tom's tenure at the plant has been marked by hard work and excellent performance in a very demanding business," said David P. Hoffman, vice president of nuclear operations. "I am confident that Bill Beckman will carry on that tradition."

In his new capacity at CMS Generation, Elward will be involved with the development of new generating facilities for commercial power production.

Owned and operated by Consumers Power Company, Big Rock Point is capable of producing 67 megawatts of electricity, enough to serve a community of 50,000 people.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

PITTSBURGH (JAN. 30) PR NEWSWIRE - Alan S. Fellheimer, chairman of Equimark Corp. (NYSE: EQK), disclosed today that the corporation has offered for sale on a confidential basis its credit card and national, non-Pittsburgh and non-Philadelphia, revolving credit businesses with $460 million in assets.

Equimark's decision to sell was made after the completion of a comprehensive study of the credit card industry. The study concluded that consolidation within the industry is making it increasingly difficult for smaller credit card issuers to compete and that the market is currently yielding excellent premiums on credit card portfolios.

The company said it has been reported that 10 banks now control more than half the Visa and MasterCard business in the United States, compared to the 37 percent share they had in 1987.

"Larger institutions have been aggressively expanding their charge card business, which can be very profitable for them because of economies of scale that are difficult to achieve for smaller organizations," said Fellheimer.

"In light of this movement toward fewer, larger issuers and present market interest," he said, "we believe this is a sound business and strategic decision for the corporation at this time. By taking this step now, we can maximize shareholder value in the long term."

William J. Bradley, president of Equibank (Delaware) N.A. (EDNA), said Equimark does not anticipate that the ultimate buyer will maintain the company's facility and staff; therefore, approximately 200 employees in Delaware will be affected by the sale. The company intends to provide a competitive separation package to its employees. All efforts will be made to ensure that EDNA's operations will not be interrupted during the transition period.

Equimark Corp. is a diversified financial services institution with $3.8 billion in assets. Equimark's principal subsidiaries are Equibank, The Liberty Financial Group Inc., EquiManagement Inc., and Treasure Valley Bancorp Inc. Equibank (Delaware) National Association is a wholly owned subsidiary of Equibank.

#90030p0076 01/30/1990 ~PR Newswire

ATLANTA (JAN. 30) PR NEWSWIRE - HBO & Co. (NASDAQ: HBOC) revenue for the fourth quarter ended Dec. 31, 1989, increased 16 percent to $60 million.

The revenue strength in the fourth quarter is a result of strong software license fees and hardware sales. Net income during the fourth quarter increased 29 percent to $6.3 million. Fully diluted earnings per share increased 32 percent from $.31 during the fourth quarter of 1988 to $.41 during the fourth quarter of 1989. Revenue and earnings per share for the quarter were the highest in company history.

Net income and earnings per share for 1989 increased 23 percent over the prior year. The company reported fully diluted earnings per share of $.98 compared to $.80 per share in 1988. Net income reached $15.5 million compared to $12.5 million in 1988. Operating income increased 19 percent to $25.1 million. Revenue increased 9 percent to $203.6 million in 1989.

Commenting on the company's performance, Chief Financial Officer Thomas H. Muller Jr. reported that: "The company as a whole performed close to expectations. Revenue grew faster than in 1988 in line with our forecasts and HBO's operating performance during 1989 was supported by the ongoing focus on managing expense growth. Another important factor was the return to profitablity of Medical Systems Support Inc., the company's equipment maintenance subsidiary."

During the fourth quarter HBO reported that it did not purchase any additional treasury shares. To date the company has purchased 858,500 shares under an authorized program to buy up to 2 million shares. Management stated that it expects to be making open market purchases of its stock from time-to-time during the coming year.

The following results are unaudited.

#90030p0077 01/30/1990 ~PR Newswire

LAKEWOOD, COL (JAN. 30) PR NEWSWIRE - Plains Petroleum (NYSE: PLY) today reported significant increases in 1989 earnings, both for the year and the fourth quarter. For the year, Plains' earnings from operations rose 39 percent to $13.7 million, or $1.44 per share, versus prior year of $9.8 million ($1.04 per share). Further, a fourth quarter sale of properties in the Bradshaw field of western Kansas resulted in a one-time after tax gain of $2.4 million, or $25 cents per share, bringing total 1989 reported earnings to $16.1 million, or $1.69 per share. Revenues for 1989 increased 20 percent to $42 million and cash flow from operations amounted to $20.8 million (excluding the one-time gain), up one-third over the previous year.

For the fourth quarter, the company finished on an auspicious note. Natural gas volumes sold for the month of December were 2-1/2 billion cubic feet (Bcf), the highest of any month in the company's 4-year history. The record sales month was due primarily to a larger market and extremely cold weather in Plains' primary market area of western Kansas and Nebraska and eastern Colorado. Fourth quarter earnings from operations rose to $3.95 million, or 41 cents per share, versus 1988 fourth quarter earnings of $2.04 million (22 cents per share). The fourth quarter 1989 result is before recognition of the gain of 25 cents per share in November on the Bradshaw property sale. Inclusion of this

one-time gain resulted in reported net earnings of $6.3 million, or 66 cents per share, for the quarter.

Acquisition efforts continued apace during 1989, and as a result one particular effort came to fruition on Jan. 12, 1990, when Plains closed the $2.75 million cash purchase of certain oil properties located in southeastern New Mexico. This opportunity had been previously discussed in the company's third quarter report to shareholders in November 1989 as a pending acquisition. This acquisition represents expansion into a new state and the properties are a good regional fit for Plains' office in west Texas.

The appeal of an appellate court's decision with respect to the Federal Energy Regulatory Commission's (FERC) Order 451 continues to move forward. The FERC and Plains, in affiliation with a group of 20 natural gas producers, will file on or before March 15 petitions with the U.S. Supreme Court, requesting that the Court review the decision of the appellate court which vacated Order 451 on Sept. 15, 1989. The Supreme Court has stayed the implementation of the lower court's decision until it rules on the appeal. While the natural gas industry may not know the final outcome until 1991, Plains' management, based upon opinions from outside counsel, remains optimistic that the pricing benefits of FERC Order 451 will be affirmed. If the Supreme Court would either refuse to hear the appeal or, after hearing the appeal decide not to overturn the appellate court's decision, Plains could, as previously disclosed, have a maximum potential net refund obligation of as much as $13-1/2 million (excluding interest) through yearend 1989.

Plains produces, develops and explores for oil and gas in the Midcontinent Greater Permian Basin and Gulf Coast regions of the U.S. The company's reserve base is over 90 percent natural gas and the balance oil. Plains is a Colorado-based company with additional offices in Lakin, Kan. and Midland, Texas.

#90030p0085 01/30/1990 ~PR Newswire

LOS ANGELES (JAN. 30) PR NEWSWIRE - Citing continued operating improvement, Broad Inc. (NYSE: BRO), a financial services company, today announced net income for its 1990 first quarter ended Dec. 31, 1989, of $3.3 million or $.10 per share. The results compare with a net loss of $19.4 million or $.63 per share for the three months ended Dec. 31, 1988.

On an operating basis, the company said its after-tax income for the December quarter rose to $10.0 million or $.30 per share before net realized investment losses, compared with $1.6 million or $.05 per share before net realized investment losses and corporate restructuring costs in 1988.

Broad Inc. Chairman and Chief Executive Officer Eli Broad said that operating performance during the quarter remained "on target to significantly exceed 1989 results during the current fiscal year ending Sept. 30, 1990.

"As a spread management business specializing in annuities and other investment-oriented products, we have succeeded in maintaining our investment spreads at constant levels in recent quarters, while reducing our operating costs and increasing our base of invested assets," he reported.

"During the December quarter, we continued to upgrade our high- quality portfolio, keeping nearly one-third of our investments in cash, floating-rate or below-three-year maturities and further reducing our exposure to the high-yield market. As a result of these conservative investment philosophies, combined with our strong capital position and earnings progress, S&P and Moody's both reaffirmed our 'investment grade' ratings last week. This may well help to increase sales in future periods as we benefit from the 'flight to quality' that is taking place in our industry," he said.

Broad Inc. is the parent company of SunAmerica Corporation, a financial services group which markets investment-oriented long-term savings products through a network of more than 15,000 representatives nationwide. At Dec. 31, 1989, it had total assets of $7.4 billion and total capital of $530 million.

TRENTON, NJ (JAN. 30) PR NEWSWIRE - Donald M. Hooton, president of Versus Technology Inc. (NASDAQ: VSTI) announced that the company has received an expansion order for equipment and installation services to expand the coverage of the Michigan Bell Scan Alert Service in the Detroit area. This total order represents approximately $620,000 to Versus.

This service employs Versus technology for monitoring alarms installations continuously via telephone lines without affecting regular phone service. In the second or the expansion stage (the first part is now being installed) an additional 43 central offices in the Detroit area will be enabled to offer Michigan Bell Scan Alert Service.

Shipments for the second part will commence in February.

Hooton noted that on-going expansion of Versus installations by the Ameritech (NYSE: AIT) telephone companies reflects their confidence and continuing commitment. Versus conducted an expansion for Indiana Bell in the Indianapolis area in 1989 and a similar expansion is anticipated in 1990 for Wisconsin Bell in the Milwaukee area. Versus technology is installed in six of the seven operating companies.

The Versus technologies use telephone lines to provide alarm services, meter reading electronically to a utility's computer and remote energy management, which enables utilities to monitor and control usage.

NEW YORK (JAN. 30) PR NEWSWIRE - Borden, Inc. (NYSE: BN) today reported record net income of $99.9 million in the fourth quarter of 1989, up 6.5 percent from $93.9 million in the same period of 1988. Earnings per share for the quarter just ended rose 6.3 percent to $0.67 from $0.63. Sales of $1.95 billion in the fourth quarter of 1989 were 1.5 percent below $1.98 billion in the prior year period, largely reflecting a decline in the dairy division.

As previously reported, Borden established in the third quarter of 1989 a $570.7 million pretax ($404.4 million aftertax, or $2.73 per share) charge for a reserve to cover the cost of corporatewide reconfiguration and restructuring programs. This resulted in a net loss for the year 1989 of $60.6 million, or $0.41 per share, compared with net income of $311.9 million, or $2.11 per share, in 1988. Sales for 1989 rose 4.8 percent to $7.59 billion, from $7.24 billion.

Excluding the one-time charge, 1989 income increased $31.9 million, or 10.2 percent, and earnings per share rose 10.0 percent from the prior year.

"Our performance in the fourth quarter continued the trends of the preceding months," said R.J. Ventres, Borden chairman and chief executive officer. "The grocery and specialty products division improved

substantially, paced by our world-leading pasta business, and there were strong gains on the foreign side of the snacks and international consumer products division. These advances were partially offset by the severe squeeze on profit margins in our dairy division."

The reserve, announced on Sept. 28, 1989, provides for a restructuring of the U.S. dairy operations, exiting from selected overcrowded markets and concentrating in Borden's strongest growth regions in the south and west. The major portion of the reserve covers a program to streamline and consolidate production throughout the company's other, rapidly growing business areas, with the goal of being a lowest-cost producer in each by 1992.

Fourth quarter operating income reached a record $222.3 million, 5.6 percent ahead of the $210.5 million reported in the 1988 fourth quarter.

Borden, Inc. is a worldwide producer of foods, non-food consumer products, and packaging and industrial products. The company ranks number one in the world in pasta, wallcoverings, forest products adhesives and vinyl wrapping films; number one in U.S. dairy; number two in salty snacks in North America; and number one or two (nationally or regionally) in 26 U.S. niche grocery products categories.

ROCKY MOUNT, NC (JAN. 30) PR NEWSWIRE - Pioneer Bancorp., Inc. (NASDAQ: PSBN), headquartered in Rocky Mount, North Carolina, reports its earnings

for the first quarter of its fiscal year ending September 30, 1990.

Net income for the quarter was $332,655 or $.19 per share, based upon weighted shares outstanding of 1,741,421, compared to net income of $326,255 or $.18 per share based upon weighted average shares outstanding of 1,813,621, earned in the first quarter of fiscal 1989.

Theo H. Pitt, Jr., chairman and chief executive officer stated, "Although our earnings continue to be adversely affected by our non-performing assets, we are pleased to report a slight improvement in net interest income this quarter.

"We have focused our attention squarely on these non-earning assets and are pleased with our efforts to date and anticipate improvement throughout this year. The problems associated with real estate cycles are certainly not new for financial institutions. We critically evaluate the adequacy of our reserve levels and make adjustments when deemed warranted by management."

Through its savings and loan subsidiary, the corporation is also actively involved in mortagage banking, consumer lending, real estate management and sales and offers a full line of life, property and casualty insurance products.

Pioneer Savings Bank, Inc., is currently the seventh largest thrift institution in North Carolina with assets in excess of $569 million and 25 banking offices in eastern North Carolina.

CHICAGO (JAN. 30) PR NEWSWIRE - GATX Corp. (NYSE: GMT) today announced it has sold 17 warehouse properties for a total consideration in excess of $90 million in cash. The properties were acquired late last year in conjunction with GATX's purchase of Associated Unit Companies, Inc., based in Jacksonville, Fla., the nation's largest provider of warehousing services. GATX previously announced its intention to sell the warehouses as part of its acquisition strategy.

Fourteen of the warehouses are currently on lease to Associated Unit and will continue to be operated by them. The remaining three are operated by third parties.

GATX provides asset based services to industry by providing railcar leasing, maintenance and management; capital goods leasing, financing, financial services, and real estate; bulk liquid terminals storage and pipelines; warehousing services; and Great Lakes shipping.

COLUMBUS, OH (JAN. 30) PR NEWSWIRE - Leslie H. Wexner, Chairman and Chief Executive Officer of The Limited, Inc. (NYSE/LSE/TSE: LTD) was joined today by Governor Richard F. Celeste to announce that the company's Lane Bryant Division, headquartered in New York, will be moved to Columbus, Ohio beginning in the spring. The move is expected to be completed by the end of May. Lane Bryant is a 720-store chain that sells special size women's fashion apparel.

"We are pleased that Les Wexner and The Limited are continuing to expand their Ohio base," the Governor said. "I believe this announcement is a tribute to the people of Ohio."

The Limited also said that its other New York-based divisions, Henri Bendel, Brylane and Lerner, will remain in New York. The Lerner offices located on West 33rd Street will begin a multi- million dollar renovation program in the spring.

In making the announcement, Mr. Wexner said, "I am very pleased with the support and leadership Governor Celeste has provided us over the years." Mr. Wexner continued, "This move to Columbus signals the importance of Lane Bryant to our future growth. Clearly, the resources available in Columbus will add significant support to Lane Bryant at this important stage of its development."

Mr. Wexner added, "We are pleased with the leadership being provided by Lane Bruant's new President Cheryl Nido Turpin, and are confident that she and her associates will move us towards the Lane Bryant sales goal of $2 billion by the mid-1990s."

Lane Bryant currently employs 240 in New York. When the move is completed The Limited expects a similar number to be employed in Columbus.

In addition to the Lane Bryant office and distribution center, the new Reynoldsburg campus will be home to Victoria's Secret Stores and Victoria's Secret Catalogue offices and distribution centers, and will provide a temporary distribution facility for Henri Bendel and Abercrombie & Fitch. Lane Bryant will temporarily occupy offices at Cleveland Avenue and I-270.

The Limited, Inc., through the Limited, Express, Vitoria's Secret, Henri Bendel, Lerner, Lane Bryant and Abercrombie & Fitch, presently operates 3,176 specialty apparel stores throughout the U.S. and distributes apparel nationally through the Victoria's Secret, Lerner, Lane Bryant and Roaman's catalogues.

NORCROSS, GA (JAN. 30) PR NEWSWIRE - CytRx(R) Corporation (NASDAQ: CYTR) announced today that the U.S. Patent and Trademark Office has issued U.S. Patent number 4,897,263 for the use of CytRx's RheothRx(R) copolymer in the treatment of tissue damaged by low blood flow. The inventor is Dr. Robert L. Hunter, Jr., M.D., Ph.D., Professor in the Department of Pathology and Laboratory Medicine, Emory University School of Medicine.

Emory owns the patent, while CytRx Corporation has worldwide exclusive rights to make, use, and sell RheothRx copolymer for treating diseases in which damage due to reperfusion injury is a component.

Therapies for opening blocked blood vessels such as coronary artery bypass surgery, balloon angioplasty or treatment of heart attack with clot

dissolving enzymes such as t-PA are unquestionably of great value.

However, recent research has suggested that the reopening of previously blocked vessels may also have an injurious component. This type of injury is known as "reperfusion injury."

Laboratory studies have shown that, under experimental conditions, RheothRx copolymer limits "reperfusion injury" and as such, may be useful to improve existing therapies to open blocked blood vessels.

According to Jack Luchese, president and CEO of CytRx, "The beneficial effects of RheothRx in laboratory studies of reperfusion injury have been quite dramatic," He added. "This therapy is not restricted to treatment of the oxygen-starved heart, but offers great promise for the treatment of stroke."

RheothRx copolymer has completed Phase I clinical trials evaluating safety in humans, as required by the U.S. Food and Drug Administration. Clinical trials for testing the effectiveness of the compound in another vascular occlusive disorder (crisis of sickle cell disease) are expected to begin by the end of the first quarter of 1990.

CytRx Corporation is a development-stage pharmaceutical company engaged in the research and development of therapeutics incorporating copolymers. The company's products are intended for use in the treatment of cardiovascular and other vascular disease, immune system diseases and infectious diseases.

CONTACT: Jack J. Luchese, president and CEO of CytRx, 404-368-9500 or Susan Noonan or Anthony J. Russo both of Noonan/Russo Communications, 212-979-9180 for CytRx.

JACKSON, MI (JAN. 30) PR NEWSWIRE - Although January temperatures have been warmer than normal in Michigan, your furnace has still been working to keep you snug. Consumers Power Company suggests you might take some steps to make sure it keeps you warm for the rest of the winter.

Vance G. Anderson, general supervisor of gas services for the utility, said, "It is important for homeowners to make sure their furnace is working properly. It should be inspected at least once a year," he stated.

There are a couple of signs that your furnace isn't operating correctly, according to Consumers Power. One is excessive buildup of moisture on your home's walls, ceilings and windows.

Another sign is if you or members of your household are experiencing physical problems such as chronic headaches, smarting eyes, nausea, drowsiness or unconsciousness. A simple blood test can detect the effects of elevated carbon monoxide inhalation.

Faulty operation can occur when the furnace lacks air for combustion or when products of combustion are not vented properly. Without proper venting, dangerous carbon monoxide fumes can remain in the house. If you suspect carbon monoxide, call Consumers Power or a qualified heating contractor.

For a homeowner, Anderson lists a few simple safety checks that can be made:

-- Make sure that the furnace chimney is free of leaves, nests or other obstructions.

-- Check the vent pipe connected to the chimney; make sure the attachment is secure and free of rust and holes.

-- Replace the filter regularly. And always remember to replace the furnace blower compartment door after replacing the filter.

-- Make sure there is an adequate supply of air for combustion around appliances installed in enclosed spaces. Install louvers or provide a direct source of outside air.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

HOUSTON (JAN. 30) PR NEWSWIRE - Zapata Corporation (NYSE: ZOS) reported an operating loss of $800,000 for the first quarter of fiscal 1990, which ended Dec. 31, 1989, Zapata Chairman and Chief Executive Officer R.C. Lassiter said today.

The 1990 operating loss compares with operating income of $2.3 million for the first quarter of 1989; however, the 1989 results included the recovery by Zapata's oil and gas division of $5.9 million from the Bolivian state-owned oil company. Adjusting for that Bolivian payment, Zapata's $800,000 operating loss for the 1990 quarter reflects an improvement over an operating loss of $3.6 million for the year- earlier period.

Zapata recorded a net loss of $7.5 million (24 cents a share) for the quarter, compared with a net loss of $6.7 million (21 cents a share) for the first quarter of 1989. Revenues totaled $42.7 million for the 1990 quarter, vs. $45.1 million a year earlier.

Zapata's drilling division posted an operating loss of $4.1 million for the first quarter of 1990, compared with an operating loss of $8.1 million the year before. The improvement was primarily due to lower operating costs. Day rates were slightly improved during the quarter compared with the previous year while rig utilization averaged 78 percent, the same as the 1989 quarter.

The company's oil and gas division's operating income of $4.6 million was comparable to that of the 1989 first quarter after excluding the $5.9 million recovery from the Bolivian state-owned oil company. Zapata's marine protein division posted operating income of $500,000, vs. operating income of $2.4 million a year earlier reflecting lower fish meal and fish oil prices.

Zapata Corporation is a Houston-based international company that operates a fleet of offshore drilling rigs, conducts commercial menhaden fishing operations that produce fish meal and edible oil, and produces oil and natural gas.

FREEPORT, IL (JAN. 30) PR NEWSWIRE - Newell Co. (NYSE: NWL) today reported that sales, net income and fully diluted earnings per share for the year ended Dec. 31 reached record highs. The fourth quarter earnings performance also established an all-time high for any quarter in the company's history. Newell's 32 percent return on beginning common equity for the year 1989 was also a record.

For the full year 1989, sales increased 13.6 percent to $1.123 billion from $988.2 million. Net income was $85.4 million vs. $61.4 million, up 39 percent. Fully diluted earnings per share were up 39.6 percent from $1.01 to $1.41.

For the fourth quarter, sales increased 9.8 percent to $278.5 million from $253.7 million. Net income was $29.7 million vs. $21.2 million, up 39.8 percent. Fully diluted earnings per share were 49 cents, up 40 percent from 35 cents achieved in the comparable 1988 period.

The increase in sales for both the quarter and the full year was due primarily to: internal growth, the acquisitions of the Thomas Paint Applicator business and REMA Bakeware in December 1988, and the acquisitions of the WearEver cookware business and the Metal Closure Division of Owens-Illinois in January 1989. Sales of Newell's existing domestic consumer businesses were up approximately 6 percent in 1989. The increase in net income for the full year was due to the increased sales, and substantial margin improvements in Newell's industrial product lines and gains in most of the consumer businesses.

Newell completed the sales of its Boye/Wright sewing notions business and its Carr-Lowrey specialty glass container business during the fourth quarter. These dispositions generated an after-tax gain of $4.7 million and reduced Newell's long-term debt to total capital ratio to 24 percent at Dec. 31, 1989. For the full year, the gain from these divestitures was essentially offset by the write-off of an investment in Western Savings & Loan. Further improvement in Newell's capitalization occurred in January 1990 with receipt of approximately $48 million gross proceeds from the sale of its investment in Vermont American.

Newell manufactures and markets high-volume hardware/housewares and industrial products. Hardware/housewares products are sold principally through discount, variety, chain and hardware stores, hardware and housewares distributors, and home improvement centers. Industrial products are sold directly and through distributors to volume purchasers.

#90030p0115 01/30/1990 ~PR Newswire

LONDON (JAN. 30) PR NEWSWIRE - The Albert Fisher Group PLC today announced that it has completed the acquisition of Beswicks Limited, a leading producer of sauces and dressings in the UK, for a maximum consideration of 4.5 million pounds sterling.

Beswicks is a specialist producer and supplier of premium quality dressings and sauces for the retail and catering markets.

The products comprise a comprehensive range of salad dressings, mayonnaise and sauces which are supplied in either glass or plastic containers mainly to major retailers and caterers in the UK.

Beswicks has a 26,000 sq. ft. leasehold processing facility at Littleborough in Lancashire in addition to a 26,000 sq. ft. warehousing and distribution facility at Rochdale.

David Beswick (aged 45), one of the principal shareholders, who has been primarily responsible for the growth and development of Beswicks, has entered into a three year service agreement.

The net tangible assets of Beswicks at Oct. 31, 1989, amounted to 985,000 million pounds. Adjusted profits before taxation in respect of the year ended Oct. 31, 1989 were 422,000 million pounds on turnover of 10 million pounds.

The board of Albert Fisher considers the acquisition of Beswicks to be a further useful step in developing Albert Fisher's European food processing and distribution operations. Beswicks has a high quality product range and its operations are complementary to the existing food processing and distribution operations of Albert Fisher.

The initial consideration of 2.5 million pounds will be satisfied by the payment of 1.875 million pounds in cash and by the issue of 513,981 new ordinary shares in Albert Fisher. The new ordinary shares, which the vendors have undertaken to retain for a minimum period of two years from their date of issue, will rank pari passu with the existing issued ordinary shares save that they will not rank for the rights issue announced on Dec. 21, 1989 but will rank for the bonus issue of warrants. Application will be made to the Council of the Stock Exchange for the new ordinary shares to be admitted to the official list.

A deferred consideration in the maximum sum of 2 million pounds will be payable upon the basis of 5 pounds of consideration for every 1 pound of profits before taxation in excess of 900,000 million pounds in the two years ending Oct. 31, 1991, and such consideration will be satisfied by

the issue of new ordinary shares in Albert Fisher.

CONTACT: Tony Millar of The Albert Fisher Group PLC in London, 0753-857111, Alan Parker of Brunswick Public Relations, 01-404-5959, or Fern Lazar or Debra Seltzer of Dewe Rogerson, 212-688-6840, for Albert Fisher Group PLC.

#90030p0116 01/30/1990 ~PR Newswire

NEW YORK (JAN. 30) PR NEWSWIRE - International Business Machines Corp. and Motorola, Inc., today announced the formation of ARDIS, a new company that will provide the first commercially availble nationwide advanced radio data information service.

ARDIS, to begin full commercial operation in early April 1990, allows companies to provide their growing numbers of mobile workers interactive access to various computer data bases and information systems via two-way radio data terminals, while in a building or on the street. This service will enable sales and service professionals and other mobile workers to economically send and receive critical information to help them and their companies be more responsive to their customers while improving productivity.

ARDIS is being formed through the integration of IBM's nationwide private radio data system and Motorola's shared use radio data network, which will result in bringing immediate service to more than 8,000 U.S. cities and towns in all 50 states.

Motorola designed, manufactured and installed IBM's radio data network in 1983. It is used by 16,000 IBM and 2,000 ROLM service personnel. It is the result of hundreds of millions of dollars in combined investment and over six years of development and operating experience by both companies.

ARDIS will work with customers through its own direct sales and support organization, through IBM and Motorola, and through consultants, systems integrators and other vendors.

This proven nationwide service will provide to customers their choice of applications and equipment. ARDIS will support most common computer protocols. Thus, customers will be able to use their existing equipment and applications software, or select from any supplier's computer and data terminals for use on ARDIS. In addition, outside software developers will continue to expand the breadth and scope of applications -- a number of which are already available.

Field service personnel and sales professional are targeted users of ARDIS. Airlines, insurance representatives, realtors and brokers can use

hand-held data terminals to enter orders and respond to inquiries with more accurate and timely data. Courier, messenger, and other pick-up and delivery operations can substantially improve employee productivity and responsiveness with dispatch applications using ARDIS. In addition, public safety agencies, security firms, news media, legal professionals, manufacturers, wholesale and retail distributors, medical professionals, utilities and public information networks, and others are among the potential benefactors of the power of computer solutions made available whenever and wherever the need occurs.

Motorola will offer its current line of data terminals for use on ARDIS. IBM will develop products to meet the needs of the mobile worker in a wireless environment and today demonstrated a prototype laptop PC/radio terminal.

The new company will headquartered in Lincolnshire, Ill., a suburb of Chicago.

CONTACT: Ken W. Sayers of IBM, 914-697-6537, or Bob Walz of Motorola, 708-576-6609, or Jim McClure of Edelman Public Relations, 312-280-2182, for IBM

#90030p0118 01/30/1990 ~PR Newswire

GREENSBURG, PA (JAN. 30) PR NEWSWIRE - Southwest National Corp. (NASDAQ: SWPA) parent company of Southwest Bank, released preliminary earnings results today.

Net income for the year 1989 was $3.9 million or $1.43 per share. This is a decrease of 21 percent or approximately $1.0 million from the prior year net income of $4.9 million.

Joseph L. Bair, president and chief executive officer, stated that the decline in earnings was primarily the result of a $1.4 million non-recurring increase in the Pennsylvania shares tax expense for the year. The tax was imposed by the legislature in July on all banking institutions in the commonwealth to replace an earlier tax that was declared unconstitutional.

Bair noted that the shares tax adjustment has been very uneven in its impact on banks. "Some banks have even received substantial refunds. We understand, for example, that one large Pittsburgh-based bank received a rebate of $51 million.

"Unfortunately for us, our strong equity position, which is the basis for the tax, has resulted in our incurring one of the heaviest adjustments relative to our size and earnings in the state." Southwest's shareholders'

equity at year end was $50.7 million., a 3.5 percent increase from the $49.0 million reported a year ago. Bair indicated that their ratio of equity to assets was 8.8 percent. "This is very strong relative to industry standards," he noted.

Aware that lawsuits have again been filed to overturn the tax, Bair said that Southwest has no plans to join in the suit. "Our own position is somewhat neutral," he stated. "All we ask is that we be taxed fairly. Quite frankly, we don't want to have to face another unpredictable adjustment down the road. There's no guarantee that it will be better."

Southwest also attributes part of the earnings decline on another significant non-recurring expense related to its wholesale conversion to a new data processing system in 1989. Characterized as a massive undertaking by the bank, Bair noted that it was accomplished nearly flawlessly. "This is a direct investment in the future and we felt it was absolutely necessary for competing effectively in the 1990s. We feel we are now capable of taking on anyone competitively."

Donald A. Lawry, senior vice president and controller, said, "The tax and conversion expenses mask a very strong performance for the bank for the year. Net interest income increased 12.4 percent to $20.4 million from $18.2 million a year ago. Also, income from interest and fees on loans increased 21.1 percent to $32.1 million. Income from trust fees and deposit account service charges, our largest sources of non-interest income, increased 15.9 percent."

Lawry went on to say, "We also had solid growth. Total assets increased 8.1 percent to $574.9 million from $532.0 million a year ago. Average earning assets increased 10.2 percent in 1989 to $525.9 million. Our core operations are very healthy and we are looking forward to reporting earnings on the basis of a normal year in 1990. We are expecting a good, strong year."

Net income for the fourth quarter ending Dec. 31, 1989 was $860,000 or $.31 per share. This represents a decline of 38 percent or approximately $527,000 from the $1,387,000 reported for the same period one year ago.

Bair said the decline for the quarter resulted from the same non-recurring expenses already noted. However, another contributing factor was a declining net interest margin brought on by falling interest rates in the market place.

A problem for Southwest has been an unprecedented growth in certificates of deposit in 1989. "Over 30 percent," according to Bair. "The S&L crisis has influenced a large number of depositors to move to safety and quality, and that is Southwest Bank," asserts Bair. "These deposits are not repricing as quickly as our loans and our interest expense remains high.

We just have to wait it out until rates normalize. However, it's a short-term problem we welcome."

In other business, the corporation's board of directors on Jan. 16 declared a dividend payment of $.21 per share, payable on March 10, 1990, to shareholders of record on Feb. 10, 1990.

SHELTON, CT (JAN. 29) PR NEWSWIRE - Data Switch Corporation (NASDAQ: DASW) today announced the Universe, a new distributed matrix switch platform that goes beyond traditional switching capabilities to include:

-- Unlimited distance and metropolitan-area separation between front-end processors and modems;

-- T-1 circuit switching, intelligent T-1 multiplexing, and digital access and cross connect (DACS) capabilities;

-- Central network management with NetView interface and host terminal

control;

-- Enhanced Redundancy System that facilitates disaster recovery applications.

Data Switch also introduced the Liberator, which can incorporate other vendors' older installed matrix switches in the Universe architecture.

In making the announcements, Michael Fitzpatrick, senior vice president and general manager of the Data Communications Systems Division, said: "The new Universe was designed of the Data Communications Systems Division said: "The new Universe was designed to optimize configuration flexibility in today's complex networks. It substantially reduces expensive cable runs, helps resolve physical layout problems, and provides true distributed connectivity within a building or campus, or even between unmanned remote sites.

"The Universe can also play an important role in a company's disaster recovery plans with the Enhanced Redundancy System (ERS)," Fitzpatrick added. "ERS provides an 'insurance policy' against major outages by allowing all local and remote switch cabinets to be transferred to redundant central cabinets in a secure location in the event of catastrophic damage, such as fire, water, or sabotage."

Non-distributed switches supported by the Liberator include the IBM Model 3728; the Bytex Autoswitch 240 and 480 and the Unity 10 and 30; and the Dynatech CTM series.

Universe, which will be available in April 1990, and Liberator, which will be available in the third quarter, are priced at approximately $320 per port.

SAGINAW, MI (JAN. 30) PR NEWSWIRE - Polar Molecular Corporation (NASDAQ: PMCX) will ship its first order of DurAlt(R) Fuel Conditioner (FC) to ELF AQUITAINE's Solaize refinery this week under a new long-term contract.

One of the world's largest refiners ($21 billion in revenues), ELF purchased DurAlt FC for blending into their high-technology gasoline and diesel fuels. ELF's testing found dramatic reductions in Octane Requirement Increase, a major concern of engine manufacturers and refiners when DurAlt FC was added to their gasoline.

BIRMINGHAM, AL (JAN. 30) PR NEWSWIRE - Sonat Inc. (NYSE: SNT) today announced the acquisition on Friday, Jan. 26, of 100 percent of the common stock of Carlile and Howell, Inc. in exchange for 1,576,320 shares of Sonat's common stock.

Carlile and Howell, Inc. owns 100 percent of Marshall Exploration, Inc., which is engaged in oil and gas exploration and production in east Texas and north Louisiana and in the natural gas gathering business. Sonat estimates that the acquisition increases its proved oil and gas reserves by approximately 23 million barrels of oil equivalent. Carlile and Howell will operate as a subsidiary of Sonat Exploration Company, which is a wholly owned subsidiary of Sonat Inc.

Ronald L. Kuehn, Jr., Sonat chairman, president and chief executive officer, said, "We are delighted with this acquisition, which enhances Sonat Exploration's already strong position in the important east Texas and north Louisiana gas fields."

Carlile and Howell and Marshall Exploration are headquartered in Marshall, Texas. Sonat Exploration is a domestic oil and gas exploration and production company headquartered in Houston. Sonat, headquartered in Birmingham, is a worldwide energy company involved in natural gas transmission and marketing, oil and gas exploration and production, and oil services. Sonat common stock is traded on the New York Stock Exchange under the symbol SNT.

HOUSTON (JAN. 30) PR NEWSWIRE - Gamma Biologicals, Inc. (NASDAQ: GAMA), today reported net income of $1,063,000, or 23 cents per share, on sales of $14,028,000 for the nine months ended Dec. 31, 1989. These results compare with a net loss of $249,000, or five cents per share, on sales of $13,671,000 for the same period last fiscal year.

For the quarter ended Dec. 31, 1989, Gamma earned $239,000, or five cents per share, on sales of $4,602,000 vs. $44,000, or one cent per share, on sales of $4,385,000 for the third quarter of fiscal 1989.

"Sales and earnings for both the nine months and the quarter were on target," stated Chairman David E. Hatcher, "and we expect to meet our

projections for fiscal 1990, which ends March 31. Already we have in-house firm orders which will assure a strong fourth quarter.

"While third-quarter sales were up more than $215,000 over last year, we accept that this quarter traditionally is the weakest of the year," Hatcher said. "For one reason, we do not ship products for export after the first week in December to accommodate our foreign dealers' holiday schedules. For another, fewer elective surgeries are performed domestically during the holiday season, so hospitals and laboratories need less reagent products."

"Year-to-date, margins continue to be strong," Hatcher reported. "Our new, high-margin, paternity testing products, PV-Plates and PT- Trays, contributed more than 10 percent to earnings, even though we didn't begin shipping PT-Trays until mid-December."

Gamma Biologicals manufactures and markets a wide range of highly refined and specialized testing products, known as diagnostic reagents, as well as specialized instrument systems. Gamma markets to hospitals, blood banks, medical laboratories, physicians' offices and research institutions. The company's stock is traded over-the-counter in the NASDAQ National Market.

SOUTH BEND, IN (JAN. 30) PR NEWSWIRE - 1st Source Corporation (NASDAQ/NMS: SRCE) today reported record net income of $10.6 million for the year ended Dec. 31, 1989, an increase of 11.6 percent from the previous record of $9.5 million reported for 1988. 1989 was the first year in 1st Source history in which net income exceeded $10 million and the fourth consecutive year in which net income reached record levels.

Ernestine M. Raclin, chairman of the board, and Christopher J. Murphy III, president, said the record-setting performance reflects the continued strength of the economy of 1st Source's primary geographic service area as well as the successful implementation of a strategy that focuses on business fundamentals.

"During 1989, we made important progress in achieving our long-term goals of growth and profitability," said Raclin. "By sticking to the basics of customer service, credit quality and improved productivity," said Murphy, "we're preparing 1st Source for the opportunities and challenges of 1990 and beyond."

As of Dec. 31, 1989, total assets of 1st Source were $1.19 billion

compared to $1.10 billion a year earlier. Common shareholders' equity grew from $68.8 million at year-end 1988 to $76.8 million at year-end 1989 an increase of 11.6 percent. During the same period, deposits grew 9.5 percent, increasing from $912 million at the end of 1988 to $999 million at the end of 1989.

1st Source's reserve for loan losses as of Dec. 31, 1989, was $12.0 million, or 1.59 percent of total loans, compared to $13.1 million, or 1.73 percent, a year earlier. The ratio of non-performing assets to loans decreased from 1.41 percent at the end of 1988 to 1.19 percent at the end of 1989.

For the fourth quarter of 1989, net income was $2.9 million compared to $2.7 million for the fourth quarter of 1988, an increase of 8.7 percent.

1st Source Corporation has five subsidiaries: 1st Source Bank; 1st Source Bank of Starke County; 1st Source Capital; 1st Source Earnings Corporation; 1st Source Leasing and 1st Source Insurance.

Marketmakers in 1st Source shares are The Chicago Corporation, City Securities Corporation, William Blair & Company, Edward D. Jones & Company Raffensperger Hughes & Co., Inc. and Roney & Company.

#90030p0129 01/30/1990 ~PR Newswire

ALEXANDRIA, VA (JAN. 30) PR NEWSWIRE - Building on medical research that links aging with gradual failure of the human immune system in general and the thymus gland in particular, CEL-SCI Corporation (NASDAQ: CELI) of Alexandria is proposing further investigation of its patented Interleukin-2 (IL-2) "cocktail" as an anti-aging immune system restorative.

Located high in the chest, the thymus gland produces immunologically active white blood cells called T-cells or T-lymphocytes, which kill invading bacteria and viruses.

The thymus also produces at least four hormones or lymphokines which act as immune system modulators. Chief among them is IL-2, which has been shown to trigger the human immune system response. According to a recent issue of Hospital Practice magazine, "IL-2 synthesis decreases markedly with aging."

By age 50, despite its importance to the immune system, the thymus shrinks to only about 15 percent of the maximum size reached during sexual maturity at about age 14. Scientific research indicates the shrunken thymus is also greatly diminished in function.

As a consequence, the body's ability to recognize foreign invaders deteriorates and people become more likely to develop diseases like cancer or rheumatoid arthritis due to malfunction of the immune system itself.

Writing in Immunology magazine, Dr. William O. Weigle, chairman of the Department of Immunology Research Institute of Scripps Clinic in La Jolla, Calif., said, "A contributing factor to the decline (of the human immune system) is loss of the ability to produce adequate quantities of IL-2."

Other research noted in the New England Journal of Medicine found that administration of IL-2 to aged mice appeared to restore certain immune system functions. In work done by CEL-SCI's researchers, it was shown that CEL-SCI's patented Interleukin "cocktail" is effective in restoring immunity (thymus and spleen weight) in animals given an immunosuppressive dose of steroids.

CEL-SCI pioneered production of IL-2 and other human immune system lymphokines from natural mammalian cell cultures as an anti-cancer "cocktail" treatment designed to boost the body's ability to produce lymphokine activated killer (LAK) cells which attack and destroy tumors.

CEL-SCI President Maximilian de Clara said initial human trials of the mixture "demonstrated that unlike IL-2 fashioned from gene-spliced bacteria, the natural "cocktail" is not rejected by the body and produces no serious side effects."

Noting that small doses of the CEL-SCI cocktail "may be just what the doctor ordered" for the elderly, de Clara said he will support further research aimed at confirming evidence of the product's anti- aging and immunorestorative capabilities.

CEL-SCI went public in 1983 and holds exclusive license for 11 U.S. and European patents covering production, product and administration of cell-cultured IL-2 and IL-1.

NAPERVILLE, IL (JAN. 30) PR NEWSWIRE - Nalco Chemical Co. (NYSE: NLC) announced record sales and earnings yesterday - for both the fourth quarter and the year 1989.

Net earnings to common shareholders for the quarter rose over 7 percent reaching $30.1 million versus $28.1 million for the fourth quarter last year. On a primary per share basis, earnings increased by 14 percent to

82 cents compared to 72 cents in the year ago quarter. For the year, earnings also increased more than 7 percent, to $113.5 million from $106.0 million in 1988. Primary earnings per share increased by 11.5 percent to $3.01 in 1989 compared to $2.70 in the previous year. Fully diluted earnings for the quarter and year were 4 cents a share and 10 cents per share lower than primary earnings. These figures take into account the assumed conversion of convertible preferred stock issued to the Nalco Employee Stock Ownership Plan (ESOP).

Sales were up 8 percent to $283.2 million from $262.0 million for the fourth quarter last year. Higher sales were recorded by all five Nalco operating units. The Water and Waste Treatment Division continued to lead among the U.S. operations. Excellent results were also reported by U.S. subsidiaries. Total sales for 1989 increased almost 8 percent to $1.1 billion from $994.2 million last year.

Commenting on operations, W.H. Clark, chief executive officer, said: ''The company reached a sales milestone of $1 billion in early December. Our core business in water and waste treatment continued as our best performing operating division. A new business venture in the field of air pollution control, Nalco Fuel-Tech, Inc., plus focused marketing efforts in waste minimization, co-generation and automated feeding and surveillance equipment hold great promise for Nalco in 1990 and beyond. It is our belief that environmental concerns will present new opportunities to assist customers with a complete range of Nalco pollution control capabilities.

"We are beginning to see some slowing in the operations of certain customers, particularly in the automobile and steel markets. However, strength seems to be building in other areas including oil field chemicals. We continue to be optimistic about our opportunities in 1990 and feel our growth rate should at least equal that of 1989.''

COLUMBUS, IN (JAN. 30) PR NEWSWIRE - Arvin Sango, Inc. has been awarded additional automotive parts contracts from Toyota Motor Manufacturing, USA. Arvin Sango, Inc., is a joint venture company formed in 1986 by Arvin Industries, Inc. (NYSE: ARV), and Sango Company, Ltd., to manufacture automotive parts in North America.

Under the new contracts, Arvin Sango will supply the instrument panel reinforcement assembly and various large stampings to Toyota's Georgetown, Kentucky, assembly plant. The parts will be directly supplied to Toyota from Arvin Sango facilities in Madison, Indiana. Major components of

those parts will be manufactured by Arvin's North American Automotive division. As previously announced, Arvin Sango is currently the supplier of exhaust systems to Toyota Motor Manufacturing, USA.

Toyota Motor Manufacturing, USA, Inc., Georgetown, Kentucky, is a subsidiary of Toyota Motor Corporation, the third largest automobile manufacturer in the world. The $1.1 billion investment by Toyota in Kentucky includes an $800 million automobile manufacturing plant and a $300 million Power Train Plant.

Arvin Industries, Inc., an Indiana corporation, is a global company whose products are sold in more than 100 countries in North and South America, the European Common Market, the Pacific Rim and the Third World.

STAMFORD, CT (JAN. 30) PR NEWSWIRE - Combustion Engineering Inc. (NYSE: CSP) (C-E) shareholders at a meeting here today approved the merger of C-E into a subsidiary of Asea Brown Boveri Inc. (ABB).

With this action, Asea Brown Boveri Inc., headquartered here, doubles its sales to approximately $7 billion and now has some 40,000 employees. The company is part of the ABB Group with worldwide order intake of more than $25 billion, including C-E. ABB is the world's largest electrical engineering company.

The merger is the second and final step in the acquisition of C-E by ABB. More than 90 percent of the outstanding common stock of Combustion Engineering was purchased by ABB on Dec. 15, 1989 pursuant to a tender offer of $40 cash per share, or roughly $1.6 billion. In 1989, ABB completed the purchase of Westinghouse's transmission and distribution operations in the U.S., Canada and certain other countries in a transaction valued at about $800 million.

George S. Kimmel, president and chief executive officer of the U.S.-based Asea Brown Boveri Inc., said that ABB's core businesses will remain products and services in power generation, transmission and distribution, process and factory automation, environmental control, engineering services, industrial systems, mass transportation and financial services.

Kimmel said that the company is uniquely qualified to answer many of the country's economic challenges. "The United States has increasing needs for cost-effective energy production and distribution, and for a more competitive industrial sector with improved environmental control, as well

as for more efficient mass transportation, " he said. "We have the people, products and services to satisfy those needs."

Kimmel added that demands for more efficient energy and for a cleaner environment will continue to drive much of ABB's worldwide research and development efforts. The company is committing $1.5 billion overall to these and other core areas of its business, he said, adding that ABB plans to increase its research and development investment in the United States.

The ABB Group operates in more than 140 countries and has some 215,000 employees.

#90030p0146 01/30/1990 ~PR Newswire

DEERFIELD, IL (JAN. 30) PR NEWSWIRE - Premark International, Inc. (NYSE: PMI) today announced net income for 1989 declined 26 percent to $78.4 million, or $2.24 per share, from $105.3 million, or $3.03 per share, in 1988. Sales increased 8 percent to $2.6 billion.

Included in 1989 results is a $19.4 million fourth-quarter pretax charge associated primarily with streamlining at the company's Food Equipment Group. Excluding that charge, net income would have been $90.5 million, or $2.58 per share, a 14-percent decline from 1988 results.

The decline in net income in 1989 was due to lower profits in the company's Food Equipment Group and Tupperware operations, which more than offset a slight increase in the consumer and decorative products segment. All Premark segments contributed to the sales increase.

Premark's net income in the fourth quarter of 1989 was $18.8 million, or $.54 per share, compared with $31.9 million, or $.91 per share, in 1988. The decline is due primarily to the $19.4 million charge, lower profits at the Food Equipment Group and higher interest expense. Excluding the charge, net income in the fourth quarter would have declined 3 percent to $30.9 million. Sales increased 7 percent to $698 million, compared with $651 million in the prior year.

Premark International, Inc. is a $2.6 billion multinational company that markets premium products under leading brand names such as Tupperware, West Bend, Wilsonart, Hobart, Vulcan, Hartco and Precor. Premark stock is listed on the New York, Pacific and London stock exchanges.

LOS ANGELES (JAN. 30) PR NEWSWIRE - Quotron Systems Inc. today announced that it has signed an agreement with Equinet Pty Ltd. making Equinet the exclusive agent to market Quotron's financial information services throughout Australia and New Zealand. Equinet will also provide systems support for Quotron's current customers in Australia.

Equinet, headquartered in Melbourne, is a real-time quote vendor that supplies detailed information on the Australian and New Zealand markets to customers in both countries. The agreement enables Equinet to offer its customers for the first time the combination of Equinet's local market data with the full breadth of Quotron's international market data.

"With the growing importance of the Australian capital markets, both in the region and worldwide, we believe it is imperative to combine our strengths with a partner in Australia," said George Malanga, Quotron's Asia/Pacific managing director.

"Equinet is well respected in Australia and New Zealand for its first-class information combined with state-of-the-art technology, proven development and support. Our agreement enables Equinet to offer its customers international data and enhances Quotron's market share in these two countries."

Equinet will deliver Quotron's international market data from 67 exchanges worldwide via Equinet Trader(tm), Equinet's PC-based service that currently delivers financial information on the Australian and New Zealand markets.

Under the agreement, Equinet will sell the QUOTRON 1000(R) to new customers who wish to receive a broader range of Quotron services, and will provide service for all QUOTRON 1000s, including those already installed in Australia. Equinet is a wholly owned subsidiary of McIntosh Hamson Hoare Govett, one of the largest Australian stock brokerage firms.

Quotron also announced that in September 1989 it signed a similar agreement with Systex Corp., making Systex the exclusive agent for Quotron's financial information services in Taiwan. Systex will be responsible for the localization of Quotron's services by translating selected information into Chinese and integrating the Quotron service with Systex's real-time stock service.

Systex, established in 1973, is a subsidiary of YFY Group, one of the largest business conglomerates in Taiwan. Systex's major business areas are financial information services, mainframes, minicomputers, personal computers, and software products, with expertise in communication networks applications software, and systems integration. Systex is one of the

leading computer and financial information services companies in Taiwan.

A leading provider of financial information services for more than 30 years, Quotron Systems Inc., delivers real-time prices for more than 120,000 investment instruments through an international network of more than 100,000 terminals in 23 countries.

Quotron also provides sophisticated trading and decision-support systems, analytical software, integrated services for brokerage operations, and highly reliable communications network services to its customers worldwide.

#90030p0161 01/30/1990 ~PR Newswire

GREENWICH, CT (JAN. 30) PR NEWSWIRE - Under a contract with AT&T Computer Systems, United Parcel Service (UPS) announced today it has taken delivery of 1,700 AT&T networked computers, with several thousand more systems slated for delivery over the next 12 months.

Total value of the agreement is estimated at up to $29 million.

UPS will use the AT&T 6386/SX, 6386/25 and 6386/33 WorkGroup Systems (WGS) in its worldwide network of package distribution centers and its central information processing operations. Over time, the AT&T computers will be integrated into a wide range of UPS business applications.

"The primary computing device at UPS is no longer the mainframe, it's the PC," said Frank Erbrick, UPS senior vice president, Information Services. "We made that decision in order to move computing as close as possible to the end user, while maintaining centralized control of resources."

Erbrick said that UPS conducted an extensive evaluation of PCs from several suppliers for quality and compatibility with UPS's multi-vendor installed base of PCs, minicomputers and mainframes. "We also based our decision on AT&T's leadership in support of open standards, research and development and price competitiveness," Erbrick said.

"UPS has blazed trails in the transportation industry by adopting a PC- and 386 LAN (local area network)-based computing platform," said Gordon J. Bridge, president of AT&T Computer Systems. "AT&T's strength in providing networked computing solutions was a perfect match with that architecture."

Erbrick noted UPS's substantial investment in hardware, software and training required that the company select a vendor whose product line would be compatible with existing systems and who was committed to open industry standards.

The ability of AT&T's WorkGroup Systems to accommodate MS/DOS, OS/2 and the UNIX operating systems will allow users at UPS to run applications linked to LANs, other PCs, minicomputers and mainframes in a seamless network, Erbrick said.

UPS, based in Greenwich, is a worldwide company serving all 50 states and more than 180 countries and territories. With a volume of 2.8 billion packages and documents in 1989 and revenue of more than $12 billion, UPS is the largest package delivery company in the world.

#90030p0167 01/30/1990 ~PR Newswire

NEW YORK (JAN. 30) PR NEWSWIRE - WMS Industries Inc. (NYSE: WMS) announced today results of operations for the second quarter and six months ended Dec. 31, 1989.

Revenues for the quarter ended Dec. 31, 1989 increased to $37,834,000 from $31,391,000 in the corresponding quarter of the prior fiscal year. Net income was $1,508,000 or $.18 per share in the quarter ended Dec. 31, 1989 as compared with a loss of $687,000, ($.09 per share), in the prior year's corresponding quarter.

Revenues at the Condado Plaza Hotel & Casino were higher in the second quarter than in the comparable quarter of the prior year. However, because of the effects of Hurricane Hugo, which struck Puerto Rico in September 1989, the occupancy and average room rates as well as food and beverage revenues at the Condado Plaza and the El San Juan Hotel & Casino were below our expectations. The company has business interruption insurance and has recorded in the second quarter an amount representing the estimated minimum amount of proceeds expected to be recovered.

Revenues in the company's coin-operated amusement games business increased in the second quarter over the prior year's comparable quarter principally

reflecting an increase in units of pinball games sold. Operating results were somewhat lower than the prior year due to increased expenses including higher engineering costs incurred in connection with the ongoing development of seven video game models of which one has been recently released and four will be available for introduction during the remainder on the current fiscal year, compared with two video models developed and introduced in the prior fiscal year.

WMS Industries Inc. is engaged in the design, manufacture and sale of coin-operated amusement games and the ownership and operation of hotels and casinos.

CONTACT: Barbara M. Norman, vice president of WMS Industries Inc., 212-751-5300, or Phillip Sardoff or Gordon H. Wolfe of Wolfe Lombard, Inc. 212-545-8400, for WMS Industries.

LIVINGSTON, NJ (JAN. 30) PR NEWSWIRE - Mayflower Financial Corporation, (NASDAQ-NMS: MFFC) the holding company of Mayflower Savings Bank, SLA, today announced that its net income for the three months ended Dec. 31, 1989, amounted to $303,504, or 26 cents per share, as compared to $341,784 or 30 cents per share, for the comparable 1988 period.

Net interest income before provision for loan losses amounted to $840,187 during the three-month period ended Dec. 31, 1989, compared to $924,902 for the same period in 1988.

Norman Goldfarb, president and chief executive officer of the company, stated that the primary reason for the decrease was an increase in the cost of deposits which reduced the company's net interest income before

provision for loan losses during the three months ended Dec. 31, 1989, by $84,715, or 9.2 percent, as compared to the comparable period in 1988.

This increase was partially offset by a decrease of $23,000 in total other expenses.

Goldfarb reported that, as of Dec. 31, 1989, total assets amounted to $122,760,479 and total stockholders' equity amounted to $17,477,627, which resulted in a ratio of stockholders' equity to total assets of 14.24 percent, one of the highest in New Jersey.

Goldfarb stated, "We are very pleased to report that we are continuing to operate profitably, especially in this first full quarter since the enactment of the Financial Institutions Reform Recovery and Enforcement Act of 1989."

Mayflower Financial Corporation is the holding company of Mayflower Savings Bank, SLA, a New Jersey-chartered, federally insured savings association located in Livingston. The company's principal executive offices are located at 72 South Livingston Ave., Livingston, N.J., 07039.

#90030p0175 01/30/1990 ~PR Newswire

CAMBRIDGE, MA (JAN. 30) PR NEWSWIRE - Genetics Institute, Inc. (NASDAQ: GENI) and Chugai Pharmaceutical Co. Ltd. announced today that they have filed in the U.S. District Court of Massachusetts for a permanent injunction enjoining Amgen Inc. from infringing Genetics Institute's '195 erythropoietin (EPO) product patent.

In recognition of the public interest and the fact that Amgen is currently the only company licensed by the FDA to sell EPO in the U.S., Genetics Institute and Chugai are also proposing a stay of that injunction pending appeal.

However, during the appeal period Genetics Institute and Chugai have requested that Amgen be required to provide for potential damage payments (which may be multiplied) by depositing into an escrow account all profits it receives from the sale of EPO.

Genetics Institute and Chugai further requested that the Court order Amgen to certify to the FDA that it cannot assure the supply of its EPO in light of the Court's previous decision that Amgen's manufacture and sale of the product infringe valid claims of Genetics Institute's EPO patent. This certification should eliminate any possibility of an Orphan Drug

exclusivity conflict as the FDA considers registration of Marogen Sterile Powder. Marogen, the EPO product of Chugai-Upjohn, Inc., was developed by Genetics Institute and licensed to Chugai.

In addition, Genetics Institute and Chugai are seeking an entry of final judgement on all issues decided by the Court on Dec. 11, 1989, in order to appeal the validity of the remaining claims of the Amgen '008 EPO patent.

Gabriel Schmergel, president and chief executive officer of Genetics Institute, commented "Amgen has no right to manufacture or sell its product in the U.S. without a license from us. All of our attempts to fairly settle the matter out of court have been rebuffed and we are now forced to pursue a judicial conclusion to protect our interests."

BACKGROUND On Dec. 11, 1989, the U.S. District Court of Massachusetts ruled that certain claims of Genetics Institute's EPO patent are valid and infringed by Amgen's manufacture and sale of its EPO product in the U.S. The Court also ruled that Genetics Institute's manufacture of EPO in the U.S. infringes the Amgen EPO patent but that Chugai does not infringe the Amgen patent by importing or selling EPO.

EPO is a protein which is useful in the treatment of anemia. Genetics Institute has licensed EPO to Chugai for sale in the U.S. Chugai's affiliate, Chugai-Upjohn awaits FDA approval to market Marogen in the United States.

Genetics Institute is a leading biotechnology firm engaged in the discovery and development of human pharmaceuticals through recombinant DNA and other technologies. The company has a diversified portfolio of licensed and proprietary pharmaceutical products.

Chugai is a leading research-based pharmaceutical company headquartered in Tokyo, Japan. One of the top 10 companies in that market, Chugai is a developer and manufacturer of oncology, cardiovascular, metabolic and gastroenterology drugs, and has a growing research commitment to the products of biotechnology.

ST. LOUIS (JAN. 30) PR NEWSWIRE - The May Department Stores Company (NYSE: MA) has named Donald R. Andrus chairman of Foley's, effective February 1. Andrus currently serves as chairman of May Company, Ohio.

Michael Steinberg continues as president and chief executive officer of Foley's. Andrus succeeds Jerome R. Rossi, whose resignation was announced previously.

In making the announcement, May Vice Chairman Lawrence E. Honig said, "We are very happy to have Don Andrus join Foley's. He has tremendous energy and experience, and his broad range of skills will ensure that Foley's will continue to grow and further enhance its premiere position. He and Foley's chief executive officer, Michael Steinberg, will make a powerful management team."

Andrus is a veteran of 24 years of retailing, 19 of those with the May Company. He joined the company's Hecht's department store division in 1971 and served for nine years in a variety of sales support functions. Positions at Hecht's included manager of selling services, operations manager, general manager, and regional vice president of stores. He was named senior vice president, director of department stores, for Famous-Barr in 1980 and in 1986 was named chairman of May Company, Ohio.

Andrus received a B.S. degree from the University of Pittsburgh in 1966. Both he and his wife, the former Sandra Yedlicka, are natives of Pittsburgh. They have two children.

Foley's is a division of The May Department Stores Company. May is one of the country's leading retailers, operating 290 department stores and 2,704 specialty shoe stores.

#90030p0182 01/30/1990 ~PR Newswire

SOUTH BEND, IN (JAN. 30) PR NEWSWIRE - 1st Source Corporation (NASDAQ/NMS: SRCE) today reported record net income of $10.6 million for the year ended Dec. 31, 1989, an increase of 11.6 percent from the previous record of $9.5 million reported for 1988.

1989 was the first year in 1st Source history in which net income exceeded $10 million and the fourth consecutive year in which net income reached record levels.

Ernestine M. Raclin, chairman of the board, and Christopher J. Murphy III, president, said the record-setting performance reflects the continued strength of the economy of 1st Source's primary geographic service area as well as the successful implementation of a strategy that focuses on business fundamentals.

"During 1989, we made important progress in achieving our long-term goals of growth and profitability," said Raclin. "By sticking to the basics of customer service, credit quality and improved productivity," said Murphy, "we're preparing 1st Source for the opportunities and challenges of 1990 and beyond."

As of Dec. 31, 1989, total assets of 1st Source were $1.19 billion compared to $1.10 billion a year earlier. Common shareholders' equity grew from $68.8 million at year-end 1988 to $76.8 million at year-end 1989 an increase of 11.6 percent. During the same period, deposits grew 9.5 percent, increasing from $912 million at the end of 1988 to $999 million at the end of 1989.

1st Source's reserve for loan losses as of Dec. 31, 1989, was $12.0 million, or 1.59 percent of total loans, compared to $13.1 million, or 1.73 percent, a year earlier. The ratio of non-performing assets to loans decreased from 1.41 percent at the end of 1988 to 1.19 percent at the end of 1989.

For the fourth quarter of 1989, net income was $2.9 million compared to $2.7 million for the fourth quarter of 1988, an increase of 8.7 percent.

1st Source Corporation has five subsidiaries: 1st Source Bank; 1st Source Bank of Starke County; 1st Source Capital; 1st Source Earnings Corporation; 1st Source Leasing and 1st Source Insurance.

Marketmakers in 1st Source shares are The Chicago Corporation, City Securities Corporation, William Blair & Company, Edward D. Jones & Company Raffensperger Hughes & Co., Inc. and Roney & Company.

#90030p0184 01/30/1990 ~PR Newswire

NEW YORK (JAN. 30) PR NEWSWIRE - Robert L. Collett has been elected president of Milliman & Robertson, Inc., one of the nation's largest actuarial and employee benefits consulting firms.

Collett, a principal in the firm's office in Houston, was elected by principals of the company's 22 national offices, according to James A. Curtis, the company's former president who retains the responsibilities of chairman and chief executive officer. In his new position, Collett will assist Curtis in the management and operations of the firm while continuing to serve as a principal in the Houston office.

The new president joined Milliman & Robertson in 1966 in Philadelphia and four years later was selected to open the firm's first office in the southern U.S. in Houston. In addition to its national offices, the company is affiliated with Eckler Partners Ltd. in Canada and Bacon & Woodrow in the United Kingdom.

Collett's career has been related primarily to assisting life and health insurance companies in the analysis of new ventures and forecasting. His expertise includes actuarial appraisals, risk analysis, and the development of monitoring systems.

An active member of several professional organizations, Collett is a Fellow of the Society of Actuaries and serves on various committees of the group, including the Appraisal Task Force of the Actuarial Standards Board. He also holds membership in both the American Academy of Actuaries and the International Actuarial Association and has served as president of the Actuaries Club of the Southwest. He is the author of a number of articles which have appeared in domestic and international professional publications.

Collett holds a bachelor's degree in mathematics from Rice University and a master's degree in economics from Duke University. For a number of years, he has served on the Industry Advisory Committee to the actuarial science program at the University of Texas.

In addition to serving Southwest clients, Collett has worked extensively in Mexico with foreign companies seeking to expand insurance and reinsurance activities there. He also has assisted Mexican companies in financial forecasting and in adaptation of U.S. insurance products to the Mexican market.

Active in church and civic programs, Collett helped found Trees for Houston, a non-profit organization which has sponsored the planting of thousands of trees in Houston along major thoroughfares and residential streets.

Milliman & Robertson, established in 1947, is among the nation's largest actuarial and employee benefits consulting firms.

#90030p0188 01/30/1990 ~PR Newswire

WILMINGTON, DE (JAN. 30) PR NEWSWIRE - Du Pont (NYSE: DD) announced plans today to sharply improve performance of its polymer products businesses.

"The plans include shifting resources to improve productivity and reduce costs; focusing on products, markets and technologies where Du Pont's polymers businesses are strongest; and improving the ability of employees to contribute to business decisions by streamlining organizations," said Archie W. Dunham, group vice president-polymer products. "These actions will strengthen our product offering and our ability to serve customers' needs."

Under-performing new ventures will be dropped; small product lines may be sold or operated through joint ventures; and some 900 jobs worldwide will be eliminated. About two-thirds of the positions to be eliminated are in the United States, with more than one-half of those expected in the Wilmington area. Ninety percent of the reductions will be salaried positions. The reductions are expected to come through retirement incentives or transfers.

The polymer products businesses currently employ about 9,500 people; Du Pont's total employment is 141,000.

"Our immediate objective is to achieve cost reductions of $100 million this year. To do so, we must make significant improvements in productivity of existing assets and create a culture where all polymer products employees recognize the need to improve performance on a continuous basis," said Dunham.

"We need to streamline our businesses through the elimination of management layers and by broadening responsibilities. We hope the changes will drive authority to the customer interface or to our plants, where decisions can be made most effectively. These changes should result in fewer meetings, fewer reports and greater job satisfaction for our employees," he said.

The polymer products businesses are part of Du Pont's polymers business segment, which earned $455 million in 1989, compared with $531 million in 1988.

#90030p0189 01/30/1990 ~PR Newswire

DALLAS (JAN. 30) PR NEWSWIRE - Uranium Resources, Inc. (URI) (Toronto: URI; NASDAQ: URIX) announced record net income for 1989 of $3,655,000 ($.13 per share) vs. $1,691,000 ($.06 per share) in 1988, or an increase of 116 percent.

Revenue for the year was also a record at $22,204,000 compared to $17,760,000 in 1988, or an increase of 25 percent. Cash flow provided by operations in 1989 increased to a record $11,529,000 vs. $5,825,000 in 1988, or an increase of 98 percent.

Results for the fourth quarter amounted to a loss of $89,000 ($.00 per share) in comparison to net income for the same period in 1988 of $983,000 ($.04 per share). The loss in the fourth quarter, which had been anticipated, was due to a lower level of deliveries scheduled during that period, in comparison to the substantial level of deliveries during the first nine months of the year.

The company sells its uranium production to electric utilities, almost exclusively under long-term contracts. During 1988 and 1987, the company signed five uranium-supply contracts of five-to-eight-year duration for approximately seven million pounds of uranium. At Dec. 31, 1989, the company has in excess of $100 million of contracted deliveries through 1995 under its six long-term contracts, at average selling prices of over $20.00 per pound.

RICHARDSON, TX (JAN. 30) PR NEWSWIRE - Rubicon Corporation (NASDAQ: RBCN) a Richardson, Texas developer of computer based laboratory information systems for independent laboratories, hospitals and health maintenance organizations, reported revenue of $852,000 and a profit of $35,000, or 1 cent per share, for the second quarter ended Dec. 31, 1989.

For the six months ending Dec. 31, 1989, revenue was $1,863,000 compared to $7,025,000 for the six month period ended Dec. 31, 1988. The company reported profits for the six month period of $416,000, or 11 cents per share, compared to a profit of $735,000 or 16 cents per share in the six month period one year ago.

The company's revenue decreased during the first six months of fiscal 1990 from revenue for the comparable period of fiscal 1989 by $5,162,000. Both the decrease in revenue from computer equipment sales and software license fees for the six months, and the quarter, relate primarily to the high level of initial start-up activity on a large contract in the prior year.

#90030p0200 01/30/1990 ~PR Newswire

SUGAR LAND, TX (JAN. 30) PR NEWSWIRE - Imperial Holly Corporation (AMEX: IHK) reported net income of $8,720,000, or $1.38 per share, on revenues of $198,310,000 for its third fiscal quarter ending Dec. 31, 1989. Results for the corresponding quarter last year were net income of $10,880,000, or $1.80 per share, on revenues of $176,040,000.

Nine months year-to-date results are revenues of $561,644,000, net income of $15,946,000 and earnings per share of $2.53. Comparable results last year were revenues of $505,307,000, net income of $13,514,000 and earnings

per share of $2.30.

Included in the results for the third fiscal quarter of last year was an after tax gain from the sales of securities of $3,871,000 or $0.64 per share. This gain, along with a gain of $2,212,000 from the restructuring of one of the company's retirement plans, which was recognized earlier, brought the total for non-recurring gains in last year's nine months year-to-date results to $6,083,000 or $1.04 per share.

Thus, excluding the non-operating gains reported last year, this year's third quarter net income increased 24 percent and net income for the year-to-date more than doubled.

Contributing to the outstanding operating results in both periods was an increase in sales volume and an improvement in product prices.

At the same time, the continuing amortization of the company's contribution to its ESOP adversely affected the comparison of this fiscal year's results to those of last year's. This amortization, which will be completed at the end of this fiscal year, resulted in after tax non-cash charges of $1,383,000 or $0.22 per share for the third quarter and $3,029,000 or $0.48 per share for the nine months year-to-date. (There were no ESOP charges in the comparable periods last year).

If these current fiscal year charges and last fiscal year's non- recurring gains are excluded, per share earnings for the quarter ended Dec. 31, 1989 would be $1.60 compared to $1.16 in the same period last year. Year-to-date results would be $3.02 compared to $1.26 last year. These figures, representing increases of 38 percent and 140 percent, more accurately reflect Imperial Holly operations.

#90030p0203 01/30/1990 ~PR Newswire

PHILADELPHIA (JAN. 30) PR NEWSWIRE - Scott Paper Co. (NYSE: SPP) today reported that 1989 primary earnings per share, excluding special items, rose 2 percent to $4.11 from $4.01 in 1988.

This represents the sixth consecutive year of record earnings per share from normal operations. Including special items for both years, primary earnings per share for 1989 were $5.11, compared with $5.23 in 1988. Dollar sales for 1989 increased 7 percent to an annual record of $5.1 billion from $4.7 billion the year before.

Special items in 1989 reflect a gain related to the previously announced sale of timberlands located in Washington State and charges related primarily to asset restructuring. The gain on the timberlands sale resulted in an increase of $1.75 in earnings per share, while asset restructuring and other special charges decreased the year's earnings per share by $0.75. Earnings per share for 1988 also reflected special items, including a gain of $1.53 from the sale of Scott's interest in Brunswick Pulp & Paper Company and special charges amounting to $0.31. Earnings per share in 1989 were calculated on the basis of fewer shares, reflecting Scott's purchase of common stock warrants in June of 1989.

For the fourth quarter of 1989, earnings per share decreased 8 percent from $1.05 in 1988 to $0.97. Net income was down 11 percent, from $80.9 million to $71.6 million in 1989. Sales grew to $1.3 billion, a record for a fourth quarter.

Philip E. Lippincott, Scott's chairman and chief executive officer, said, "Although we reported our sixth consecutive year of record earnings per share from normal operations, and had an outstanding performance from our U.S. tissue business, Scott's overall financial results in 1989 were disappointing. Our printing and publishing papers business had significant manufacturing difficulties throughout the year and a very unsatisfactory fourth quarter, approximately $0.30 per share behind 1988's fourth quarter performance. We also continue to be negatively impacted by high pulp costs worldwide, price controls in Mexico, and the costs associated with our investment strategies in our foodservice business and in Europe."

Lippincott indicated that 1989 sales revenue for the total U.S. personal care and cleaning business increased 9 percent to an annual record. Income from these operations, however, declined slightly, primarily due to the

loss of fiber earnings as a result of the 1988 sale of Scott's interest in Brunswick Pulp & Paper Company and the cost of integrating the foodservice business. Excluding special items, earnings from Scott's largest business the tissue portion of the U.S. personal care and cleaning business, were up 24 percent to an all-time annual record. Unit sales and dollar revenues also established yearly highs. These records were achieved despite the impact of high pulp costs.

MORRIS PLAINS, NJ (JAN. 30) PR NEWSWIRE - Warner-Lambert Company (NYSE: WLA) today reported earnings per share rose 20 percent in the fourth quarter ended Dec. 31, 1989.

Sales and net income for the quarter were both company records for a fourth quarter. Sales increased 5 percent, or 8 percent at constant currency rates, to $1.04 billion from $998 million in the comparable 1988 period, and net income rose 19 percent to $92 million, compared to $78 million in 1988.

Earnings per share in the quarter were $1.37 compared to $1.14 in the comparable 1988 period.

For the year, earnings per share rose 22 percent to $6.10, and worldwide sales increased 7 percent, or 10 percent at constant currency rates, to $4.2 billion. Net income for the year rose more than 21 percent to $413 million.

Warner-Lambert is a worldwide company devoted to developing, manufacturing and marketing quality health care and consumer products. It employs approximately 33,000 people at its operations in more than 130 countries.

#90030p0205 01/30/1990 ~PR Newswire

LOS ANGELES (JAN. 30) PR NEWSWIRE - In town to address The Los Angeles Society of Financial Analysts, Roy A. Meierhenry, senior vice president and chief financial officer of PHH Corporation (NYSE: PHH), used the occasion to review PHH's operations in California.

Meierhenry said: "During the past two years, our vehicle management

subsidiary, PHH FleetAmerica, has doubled its complement of staff in its West Coast regional office, located outside of Los Angeles in Irvine. With more than 38,000 vehicles currently under management in California, we see the West Coast as one of our largest potential markets for new business. Currently among companies with fleets of more than 75 units, there is a total market approaching a quarter of a million vehicles.

Meierhenry continued: "PHH's Relocation and Real Estate Management Services business segment ranks Los Angeles as the tenth fastest growing area in the country in terms of the numbers of corporate transferees moving into the area. Last year, PHH Homequity moved 568 business executives into the Los Angeles metropolitan area. PHH US Mortgage, our mortgage banking subsidiary which supports our relocation activities, documented its average loan size in the Los Angeles metropolitan area as $299,000."

In addition, reports Meierhenry, PHH Fantus, another corporate subsidiary, sees continued vitality in the area of corporate facilities location. "Several PHH Fantus clients have taken serious looks at location alternatives and decided to remain in L.A. Among the many factors are a strong employee loyalty to the area and the tremendous vitality of the area, particularly among companies doing business in Asia." In the past year PHH Fantus has developed a proprietary software marketing tool called "Forte" for use by economic development professionals to assist in analyzing an area's strengths and matching those strengths with synergistic industries. Meierhenry added, "For a variety of economic, environmental and employment reasons, Los Angeles will need a high degree of selectivity in targeting marketing efforts to attract those industries that will enhance and complement their development goals."

With regard to PHH's facilities management operations in Los Angeles, Meierhenry noted, "Although there may be a potential for current overbuild in the commercial sector, we see the market for design and space planning in Los Angeles growing."

PHH Corporation, listed on the New York, London and Toronto Stock Exchanges, has annual revenues of $1.6 billion and total assets of $4 billion. PHH provides a broad range of integrated management services and cost control programs to over 3,000 corporate clients throughout the United States, Canada and Europe. Its business segments include vehicle management, relocation management and facilities management services.

POULSBO, WA (JAN. 30) PR NEWSWIRE - Pope Resources, a Delaware Limited

Partnership, reported a net loss of $567,000, or 47 cents per ownership unit, on revenues of $4,453,000 for the fourth quarter ended Dec. 31, 1989.

This compares to net income of $963,000, or 84 cents per ownership unit, for the same period in 1988 on revenues of $3,297,000.

For the 12 months ended Dec. 31, 1989, net income totalled $2,608,000, or $2.22 per ownership unit, on revenues of $19,743,000. Revenues from 1988 were $18,068,000 with net income of $7,488,000, or $6.28 per ownership unit.

"As anticipated, the current quarter's loss results from reduced timber harvesting and start up expenses related to Port Ludlow development," according to George H. Folquet, Pope Resources' president and chief executive officer. "Furthermore, over $1.1 million of gain was recognized on a large timber exchange in the fourth quarter of 1988 that was not repeated this year."

Pope Resources is a master limited partnership and owns 72,000 acres of timberland and development property in the Puget Sound area of Washington state.

ANN ARBOR, MI (JAN. 30) PR NEWSWIRE - TriMas Corporation (NASDAQ: TMAS) today announced the acquisition of three subsidiaries of Masco Corporation (NYSE: MAS).

Under the terms of a definitive agreement concluded today, TriMas has acquired from Masco all of the capital stock of Compac Corporation, Reese Products Company and Fulton Manufacturing Corporation.

The purchase price consists of a $77 million cash payment plus additional future payments contingent upon the combined level of profitability of the three businesses. Aggregate annual sales for the three acquired companies were in excess of $80 million in 1989.

Compac Corporation manufactures flame-retardant facings and jacketings and pressure sensitive tapes primarily for the insulation and fiberglass industries; production facilities are located in Netcong and North Bergen, N.J. Reese Products is a manufacturer and distributor of trailer hitches, tow bars and accessories with production facilities in Elkhart and Goshen, Ind., Ontario, Canada, and Victoria, Australia.

Fulton Manufacturing produces winches, jacks and couplers for marine and

other applications at its West Allis and Wausau, Wis., manufacturing plants.

TriMas also announced that, in consideration of the favorable long- term outlook for the company and to broaden the market for the company's shares its board of directors today adopted a resolution for a stock split, effected in the form of a 100-percent stock distribution (one additional share for every share held) to stockholders of record as of the close of business on Feb. 12, 1990, to be issued on Feb. 28, 1990.

TriMas Corporation manufactures specialty industrial products including specialty fasteners, products for the containment and dispensing of fluids and gases and precision cutting tools.

DALLAS (JAN. 30) PR NEWSWIRE - Sterling Software Inc. (AMEX: SSW) said earnings per share before an extraordinary gain for the first quarter of fiscal 1990 increased to 17 cents, up from 14 cents per share last year. Revenue for the quarter ended Dec. 31, 1989 rose to $44.9 million from $40.7 million a year ago.

Sterling said it realized an after-tax extraordinary gain in the first quarter of $369,000, or three cents per share, as result of buying back $2.2 million of its eight percent convertible debentures, reducing the amount outstanding to approximately $63.8 million. During the same quarter last year the extraordinary gain amounted to $1.1 million, or 10 cents per share. Total earnings per share for the respective quarters were therefore 20 cents in 1990 and 24 cents in 1989.

Sterling Software, headquartered in Dallas, specializes in systems and applications software products and professional services for the federal government.

#90030p0219 01/30/1990 ~PR Newswire

LOS ANGELES (JAN. 30) PR NEWSWIRE - The Foothill Group Inc. (NYSE: FGI) today reported that net income for the year ended Dec. 31, 1989, was $10,694,000, or $0.96 per fully diluted share, compared to net income of $13,456,000, or $1.23 per fully diluted share, for the year ended Dec. 31, 1988.

The principal factor causing the year-to-year difference was an increase in the company's tax rate which rose from 26 percent in 1988 to 40 percent in 1989. The company's provision for income taxes for 1989 was $7,129,000 compared to $4,601,000 for 1988.

Foothill reported record pretax income of $17,823,000 in 1989 compared to $17,698,000 the previous year. Revenues for 1989 reached $99,942,000, compared to $92,246,000 in 1988.

John Nickoll, president and co-chief executive officer, said, "Foothill concentrated heavily on further improving its subsidiaries' operations and earnings during 1989.

"This emphasis helped us to achieve a return on average common equity of approximately 17 percent and a return on average assets of 1.65 percent. Our objectives continue to be a return on average common equity of 20 percent and a return on average assets of approximately 2 percent."

Foothill made progress in improving the credit quality of its finance receivables as evidenced by a large reduction in write-offs in 1989. Net write-offs totaled $2,979,000 in 1989, compared to $6,491,000 in 1988.

During the year, Foothill successfully continued its cost control efforts by reducing general and administrative costs as a percent of average assets. "We are committed to reducing our G & A expenses, and were successful the last three years in reducing them as a percent of average assets from 4.39 percent in 1986 to 3.07 percent in 1989," Don Gevirtz,

chairman and chief executive officer, stated.

The Foothill Group Inc. specializes in providing innovative financial services through its three highly specialized, yet complementary operating units.

Foothill Capital Corporation offers asset-based financing tailored to businesses whose credit needs require more unique, sophisticated types of loan programs. Foothill Thrift and Loan specializes in fully secured commercial and industrial lending in California. The Capital Markets Division focuses on asset management activities, arbitrage trading and investing in companies in reorganization.

#90030p0225 01/30/1990 ~PR Newswire

DALLAS (JAN. 30) PR NEWSWIRE - Oryx Energy Company (NYSE: ORX) replaced 100 percent of its 1989 production at an average finding, development and acquisition (FDA) cost of about $5 per equivalent barrel (eqb), it was announced today.

"This is the best year we've had in a long time," said James E. McCormick, Oryx Energy president and chief operating officer. "We've doubled our

reserve replacement rate and cut average finding cost in half since designing a program three years ago to improve our field performance.

"We continue to identify good prospects with attractive rates of return. We have the skills and the resources to take advantage of these domestic opportunities. Our improving reserves replacement and finding cost performance prove that we're doing it," continued McCormick.

Oryx Energy replaced all of its 1989 production of 97 million eqb by aggressively exploring for and developing reserves in key areas of the United States. This year's FDA cost of $5.07 per eqb is the lowest in 10 years. Natural gas additions from the Gulf of Mexico and oil from horizontal drilling in south Texas have helped add low-cost, high- quality reserves.

Trimmer staffs and more efficient work processes led to a $63 million savings in operating and administrative cash expenses in 1989 over 1988. Net interest and debt expense fell by $22 million due to capital restructuring programs and non-cash expenses were down by $35 million in the year-to-year comparison.

These results relate to Oryx Energy's domestic operations and do not include any impact from its previously announced $1.1 billion acquisition of international properties. That transaction, which became effective in January, adds 264 million eqb proved reserves at about $4.24 per eqb.

Dallas-based Oryx Energy conducts its domestic operations through Sun Energy Partners, L.P. (NYSE: SLP). Oryx Energy, the managing general partner and 98-percent owner of the partnership, is the largest independent oil and gas company in the world with assets in excess of $5 billion and proved reserves of more than 1 billion eqb.

#90030p0227 01/30/1990 ~PR Newswire

ATLANTA (JAN. 30) PR NEWSWIRE - Health Images Inc. (NASDAQ: HIMG), today announced December 1989 consolidated net revenues of $2,898,118, an increase of $682,397 or 30.8 percent over December 1988 consolidated net revenues of $2,215,721.

Gross same center revenues (before deduction for contractual adjustments and uncollectible accounts) decreased $5,184 or 0.3 percent as compared to the 1988 period. Net same center revenues decreased by $215,087 or 11.4 percent in December 1989 as compared to the preceding year. Revenues of the Engineering Services Division were $712,186, an increase of $408,426 or 134.5 percent as compared to the preceding year. Miscellaneous revenues were $10,477, a decrease of $7,449 or 41.6 percent as compared to December 1988. Revenue data are summarized in the following table.

Robert D. Carl III, president and CEO, said: "As previously announced, Health Images had an excellent fourth quarter. However, due to unseasonable bad December weather including ice storms in Houston and Atlanta and snow storms in the Northeast and Jacksonville, Fla. area, same center gross revenues fell marginally. After 13.1 percent contractual allowances and provisions for bad debts in December 1989 as compared to a 5.1 percent provision for contractual allowances and bed debts in December 1988, net same center revenues declined. It is important to note that the unusually low December 1988 charge-off rate for contractual allowances and bad debts was due to reversals of overaccruals made for such items in the preceding months of 1988 and does not reflect any adverse change in net collections."

Health Images Inc. operates magnetic resonance imaging centers, manufactures magnetic resonance imaging scanners, and provides equipment maintenance services for major medical diagnostic imaging equipment.

NEWPORT BEACH, CA (JAN. 30) PR NEWSWIRE - Pacific Scientific Company (NYSE: PSX) Friday announced that the company is continuing in its stock repurchase plan, first announced in December 1987, to repurchase up to 275,000 shares of the company's common stock -- approximately 5 percent of all shares currently outstanding. To date, approximately 75,000 shares have been repurchased under this 1987 plan.

The repurchased stock is available for general corporate purposes including acquisitions. Purchases of these shares will be made from time to time on the open market or in negotiated transactions.

The company expects to announce its 1989 results within the next few weeks. Edgar S. Brower, president and chief executive officer, stated that the company's order backlog at the end of 1989 was $98 million, equal to approximately half of expected 1990 sales. The current earnings outlook for 1990 is for continued improvement.

Pacific Scientific's core business is designing, manufacturing and marketing technology based proprietary products for niche markets. The principal products are electric motors and controls; aircraft equipment, including fire suppression systems, electric generators and alternators; and electric instruments for industry and electric utilities.

VANCOUVER, BRITISH COLUMBIA (JAN. 30) PR NEWSWIRE - St. George Minerals Inc.'s (Vancouver Stock Exchange: SGG.V), Vancouver, board voted today to consolidate with its subsidiary, St. George Metals, Inc., Houston, and to apply for a NASDAQ listing of the consolidated company's shares.

Under the proposed plan, subject to approval by shareholders of both companies, each Minerals shareholder will receive one share of Metals common stock for each share of Minerals common stock held, resulting in a total of approximately 18 million shares outstanding of the combined company. After consolidation, each pre-consolidation Minerals and Metals shareholders will own precisely the same percentage of the company as before consolidation. There would be no dilution of any shareholder's ownership as a result of consolidation.

Procedures will begin immediately to qualify Metals shares for a NASDAQ listing with trading expected to commence about Aug. 1, 1990. Minerals shares will continue to be traded on the Vancouver Stock Exchange until consolidation, at which time Metals shares will replace Minerals shares on the VSE.

The consolidation plan, as approved by the boards of both companies, proposes the exchange of Minerals shares for an equal number of Metals shares (one for one), and will be presented to Minerals shareholders at the company's annual meeting tentatively scheduled for May 31 in Vancouver. Should the shareholders approve the consolidation, St. George Minerals Inc. (a Canadian company) and St. George Holdings, Inc. (a U.S.

company) will be liquidated.

Management feels the consolidation will be a very positive move since it will simplify the companies' corporate structure by having only one company rather than the current three, and by having only one group of shareholders rather than the current two groups. Consolidation will also eliminate certain redundant expenses. Further, management feels the NASDAQ listing, coupled with the continuation of the Vancouver listing and the increased number of shares, will enhance the marketability of the company's stock.

St. George Minerals Inc. is listed on the Vancouver Stock Exchange, and has an interest in approximately 33,000 acres of mining claims in Nevada, principally in the Battle Mountain-Eureka mineral belt and the Carlin gold belt.

The information is this report has neither been approved nor disapproved by the Vancouver Stock Exchange.

CHICAGO (JAN. 30) PR NEWSWIRE - Santa Fe Railway has entered into a "Power By The Mile" agreement with the Electro-Motive Division of General Motors (EMD) under which EMD will assume responsibility for maintenance of 158 EMD locomotives in the railway's fleet.

Michael R. Haverty, Santa Fe president, said that as a result of this agreement, and an earlier similar agreement with another manufacturer, the railroad will save about $10 million annually in maintenance expenses.

Work under the new agreement will be performed at Santa Fe's diesel locomotive maintenance facilities at Chicago. EMD will provide technical direction of maintenance work, and Santa Fe employees will provide the labor. EMD will reimburse Santa Fe for the labor provided.

The agreement covers 103 GP-60 locomotives, each of which generates 3800 horsepower, and 55 GP-50 locomotives, which generate 3500 horsepower. Sixty-three of the GP-60s are being delivered later this year, while the balance of the units involved are already in the railway's fleet. All of the locomotives involved are four-axle, high- speed units used in the railway's intermodal service.

Haverty said the balance or approximately 1,200 locomotives not included in the two agreements will continue to be maintained at the company's

facilities in Kansas City, Kansas; Barstow, Calif.; and San Bernardino, Calif.

"We believe this arrangement is beneficial to both the railroad and the manufacturer," Harvety said. "Our expenses are being reduced and the manufacturer's direct involvement in the maintenance process allows them to help assure that their locomotives perform to high standards of quality."

WASHINGTON (JAN. 30) PR NEWSWIRE - The 150 Air Wisconsin (United Express) flight attendants, represented by the Association of Flight Attendants, AFL-CIO, ratified today, by mail ballot, a new contract with the airline's management.

The new agreement, which will go into effect immediately, was approved by 100 percent of those flight attendants who returned their ballots.

Over the three-year life of the contract, wage and longevity increases range from 4 percent to 25 percent. AFA was also successful in obtaining higher pay-hour guarantees. Flight attendants will receive retroactive pay starting with the "effective" date of the contract, July 1, 1989.

The contract preserves and improves important work rules. AFA also negotiated pay guarantee for situations when flight attendants accrue long hours on duty with very few flight (pay) hours. This "duty rig" equals one hour of pay for every three hours on duty. Other improvements were

made in sick leave and vacation accrual, insurance coverage, per diem and uniform allowance.

AFA and Air Wisconsin management reached a tentative agreement on Jan. 5, 1990, after three days of mediation. The Air Wisconsin flight attendants' contract became subject to amendment on June 30, 1989. Under the Railway Labor Act, contracts do not expire, but instead become amendable. Negotiations between the flight attendants and representatives from the airline's management began May 31, 1989.

"The Air Wisconsin flight attendants can be proud of this new agreement," said Susan Bianchi-Sand, AFA national president. "They were able to negotiate improvements in most areas of their contract and set the trend for better working conditions at other carriers."

The Association of Flight Attendants, AFL-CIO, represents 28,000 flight attendants on 18 airlines and is the largest flight attendant union in the world.

CHICAGO (JAN. 30) PR NEWSWIRE - United Airlines announced today that it will begin daily non-stop service between Portland, Ore.'s International Airport and Washington's Dulles International Airport on June 8, 1990.

This is the first time that United has offered nonstop service linking the nation's capital with Oregon. The flights will be open for sale effective immediately.

United's Flight 170 will depart from Portland at 12:55 p.m. daily and arrive at Dulles at 8:40 p.m. The westbound Flight 169 will depart Dulles at 9:00 a.m. and arrive in Portland at 11:29 a.m.

The new flights are being added to meet additional demand for non-stop service between the two cities during the summer months.

United currently operates 27 daily departures from Portland with non-stop service to San Francisco, Chicago, Denver, Los Angeles, Sacramento, Seattle and Oakland. In addition, passengers can make convenient connections to more than 150 cities via United hubs in Chicago, Washington Dulles, Denver and San Francisco.

SEATTLE (JAN. 30) PR NEWSWIRE - The Navy Automatic Data Processing Selection Office, Washington, D.C., has awarded a five-year information services contract, valued at an estimated $105 million, to Boeing Computer Support Services, Boeing announced today.

The contract is for three years plus two one-year options. The basic three-year contract is valued at approximately $60 million.

According to Boeing's Harold Olson, the company will provide the Naval Weapons Center, China Lake, Calif., with a full range of information services including: software development, computing operations, information handling, systems engineering, communications and network services, data base management systems, computer-aided design and manufacturing, and information management systems. The Naval Weapons Center is the Navy's primary research, development, test and engineering center for air warfare and missile weapon systems,

"We recognize that the China Lake Naval Weapons Center plays a critical part in our nation's defense," said Fred Lavering, program manager for Boeing. "Boeing is committed to providing complete, responsive information services support to this vital national resource."

Lavering and a management team from Boeing and its subcontractors will be located on-site at China Lake and in nearby Ridgecrest, Calif.

He added that over the next 60 days the transition of contract support and changeover will take place.

An experienced team of major subcontractors will join Boeing on the project, including Systems Exploration Inc., or SEI, San Diego; Computer Software Analysts, Camarillo, Calif.; and Pulau Electronics, Chatsworth, Calif.

In addition to providing computing support to the Naval Weapons Center, Boeing is involved in a number of other significant Navy programs, including demonstrating and validating the air-to-surface Advanced Interdiction Weapon System, updating the mission electronics for the P-3 submarine-hunting aircraft and building the E-6 airborne communications aircraft.

COLUMBUS, GA (JAN. 30) PR NEWSWIRE - In a release today, James H. Blanchard, chairman of the board of Synovus Financial Corp. (NYSE: SNV) announced that H. Lynn Page has been elected vice chairman of the board of SNV, James D. Yancey has been elected president, Stephen L. Burts Jr. has been elected executive vice president and treasurer and G. Sanders Griffith III has been elected vice president, general counsel and secretary of the $2.4 billion asset multi-financial services company.

Blanchard also announced that Samuel M. Wellborn III has been elected president and named to the board of directors of Columbus Bank and Trust Co., SNV's wholly owned $958 million asset lead banking subsidiary, and that Kenneth E. Evans has been elected executive vice president and named to the board of directors of Total System Services Inc. (NYSE: TSS), SNV's majority-owned credit card processing company.

In commenting on the announcement, Blanchard stated: "I am delighted with these promotions and our new organization. This is an outstanding group in every respect. This reorganization of senior executive leadership creates new opportunities for leadership for those involved, and, very importantly, creates opportunities for increased responsibility and individual growth for others in an ever broadening and growing family of companies."

Page joined Columbus Bank and Trust Co. in February of 1965. He was promoted to president of Synovus Financial Corp. in April of 1986. Page serves on the boards of Synovus Financial Corp., Total System Services Inc., and Columbus Bank and Trust Co.

Page is a graduate of Georgia Tech with a B.S. degree in industrial management. He has been active in the community, serving as past president of the Metropolitan Boys Club, past president of the Green Island Country Club, past treasurer of the East Columbus Rotary Club, past third district chairman of the joint Georgia Tech - Georgia Development Fund, past director of the Big Eddy Club and has served on the vestry of Trinity Episcopal Church.

He is currently on the board of Payment Systems Inc. (PLUS), a member of the Green Island Country Club and a member of the Georgia Tech Club. He is married to the former Ida Pound and they have two children. Page is 49 years old.

Yancey joined Columbus Bank and Trust Co. in October of 1959. He was promoted to president of Columbus Bank and Trust Co. in March of 1983. Yancey serves on the boards of Synovus Financial Corp., Total System Services Inc. and Columbus Bank and Trust Co. Yancey is a graduate of the school of Banking of the South at Louisiana State University and the

Stonier School of Banking at Rutgers.

He has been active in the community, serving as past president of the Country Club of Columbus, Green Island Country Club and the Metropolitan Boys Club, past campaign chairman of the United Way, past chairman of the Columbus Chamber of Commerce and recipient of the Columbus College Thomas Y. Whitley Distinguished Alumnus Award.

He is currently a director of the Business Council of Georgia, president-elect of Historic Columbus Foundation Inc., and secretary of Columbus College Foundation Board of Trustees. He is married to the former Ruth Brooks of Columbus and they have two children. Yancey is 48 years old.

Burts joined Columbus Bank and Trust Co. in July of 1973. He was promoted to senior vice president and treasurer of Synovus Financial Corp. in July of 1986. Burts received a B.B.A. degree in accounting from Columbus College and also graduated from Bank Administration Institute's Controllership School at the University of Wisconsin.

Burts is a certified public accountant. He is a member of the American Institute of Certified Public Accountants, Georgia Society of Certified Public Accountants, National Association of Accountants and has served on the administrative board of St. Mark United Methodist Church. He is married to the former Joyce Drawdy of Columbus and they have two children. Burts is 36 years old.

Griffith joined Synovus Financial Corp. in September of 1988 as vice president and general counsel. Griffith is a graduate of LaGrange college with a B.A. degree in business administration and economics and a graduate of the University of Georgia Law School.

He is a member of the American Bar Association, Georgia Bar Association and the Columbus Bar Association and is an executive board member of the Chattahoochee council of Boy Scouts of America. He is married to the former Elizabeth Williams and they have two children. Griffith is 36 years old.

Wellborn joined Columbus Bank and Trust Co. in February of 1965. He was promoted to executive vice president of Columbus Bank and Trust Co. in December of 1984. He is a graduate of the University of Georgia with a B.B.A. degree and a graduate of the Georgia Banking School and Manufacturers Hanover School.

He has been active in the community, serving as past chairman and past president and currently as a member of the board of the United Way, past president of the Metro Columbus Boys Club and past president and past chairman of the American Cancer Society.

He is currently president of the Southern Open Inc., a director of the W.C. Bradley Co., a director and member of the finance committee of the Columbus Museum of Arts and Sciences, a trustee of Roosevelt Institute - Development Fund, a director of the board of trustees of St. Francis Hospital, a member of the Development Authority of the city of Columbus and a director of the Green Island Country Club.

He is married to the former Laurie Claire Reed and they have three children. Wellborn is 48 years old.

Evans joined Columbus Bank and Trust Co. in December of 1973. In 1979, he was elected as vice president and secretary of Synovus Financial Corp. and was promoted to executive vice president and secretary of Synovus Financial Corp. in June of 1986.

Prior to his promotion to executive vice president of Total System Services Inc., Evans was also executive vice president and cashier of Columbus Bank and Trust Co. and secretary of Total System Services Inc.

Evans is a 1970 graduate of Columbus College with a B.S. degree in business administration and was chosen as the outstanding business graduate for 1970.

He is also a graduate of the School of Banking of the South at Louisiana State University. He is past president of the Chattahoochee Council of Boy Scouts of America, a member of the Georgia Council on Economic Education, and is a faculty member of the Georgia Banking School at the University of Georgia.

He is married to the former Shari Phipps and they have two children. Evans is 41 years old.

IRVINE, CA (JAN. 30) PR NEWSWIRE - Rainbow Technologies Inc. (NASDAQ: RNBO) today reported record quarterly unaudited revenues and earnings. For the quarter ended Dec. 31, 1989, net income increased to $591,000 compared with $237,000 in the quarter ended Dec. 31, 1988. Revenues increased to $3,500,000 from $1,729,000 in the corresponding 1988 quarter.

"During the 4th quarter of 1989, Rainbow continued to invest in the development of new products and increased its commitment to the international market which made up about 33 percent of sales during the

4th quarter. We expect strong growth to continue in 1990," said Walter Straub, president.

Revenue, net income, and per-share information is summarized below:

RAINBOW TECHNOLOGIES INC.

Quarter ended Dec. 31,	1989	1988
Revenues	$3,500,000	$1,729,000
Net income	591,000	237,000
Net income per share	.31	.13
Twelve months ended Dec. 31,	1989	1988
Revenues	$11,515,000	$6,153,000
Net income	1,725,000	951,000
Net income per share	.91	.54

CALABASAS, CA (JAN. 30) PR NEWSWIRE - Players International, Inc. (NASDAQ: PLAY) announced today that it has been granted a gaming- related service industry license by the New Jersey Control Commission.

The license authorizes the company to engage in all types of business activities with casinos within the state of New Jersey. Players had previously been operating under a system of individual approvals during the two-year licensing process.

After thorough investigation of the company and its officers, Players was issued a one-year, renewable license that was required because Players markets gaming tournaments and provides other services to Atlantic City casino hotels.

Commenting on the license, David Fishman, vice chairman of Players International, said, "The licensing requirements in the state of New Jersey are the most stringent in the world. By receiving unanimous approval of the Casino Control Commission, Players has strengthened its reputation in Atlantic City as the sole national marketing company servicing the gaming industry."

Players International specializes in marketing services and products to the gaming industry worldwide.

The company operates Players Club, a membership club with more than 82,000 members, designed to deliver discounts and other benefits to recreational gamers; International Gaming Promotions, marketer of gaming tournaments and special events; Players World Travel, a travel agency; has an agreement for the marketing of electronic cash advance system; through 50 percent-owned affiliates, publishes a monthly newspaper for gaming enthusiasts, and operates cruise ship casinos.

#90030p0259 01/30/1990 ~PR Newswire

SAN DIEGO, CA (JAN. 30) PR NEWSWIRE - General Dynamics (NYSE: GD) Convair Division has been awarded a contract by Rockwell International (NYSE: ROK) to build another midfuselage section for the space shuttle orbiter. The section encompasses the payload bay portion of the orbiter between the forward and aft fuselage sections.

Convair had been under contract to Rockwell from 1973 to 1985 for design and production of the payload bay and had delivered five sections plus a spare. The spare is being used to build the replacement orbiter for Challenger now in assembly at Rockwell. The midfuselage to be built will

become the replacement spare for NASA and is identical to the last structure Convair built. The contract is expected to be worth approximately $30 million.

The midfuselage is primarily an aluminum structure, yet it can handle up to 65,000 pounds in the cargo bay. One of the prime goals in designing the payload bay structure was to minimize weight and maximize payload while maintaining structural strength and integrity. Company-funded studies led to development of lightweight boron/aluminum structural tubes to reduce the weight of the midfuselage. Other studies led to the adaptation of honeycomb side skin panels also to reduce weight.

The midfuselage is approximately 60 feet long, 17 feet wide and 13 feet high. the structure is connected to the forward fuselage, aft fuselage and wings. it also supports the payload bay doors, forward wing glove fairing and various other orbiter systems components.

Convair will reassemble some of the previous work force, which had been reassigned to other programs since the last midfuselage was delivered in December 1985. At peak, approximately 100 people will be involved in production of the structure with delivery expected in mid-1993.

BEDFORD, MA (JAN. 30) PR NEWSWIRE - Millipore Corporation (NYSE: MIL) announced today that sales for 1989 were $657,515,000, an increase of 6 percent. Earnings per share for the year declined to $1.90 from $1.96 in 1988. Fourth quarter sales increased 1 percent over the same period in 1988, and earnings per share were 61 cents, up from 60 cents.

Pre-tax income for the quarter included a $3 million net gain from the sale of Millipore's Process Water Division in November. The sales growth rates for the quarter and year were reduced by a stronger U.S. dollar and the impact of the Process Water sale. Excluding these effects, sales growth for the fourth quarter would have been 8 percent, and 10 percent for the year. Earnings growth was also reduced by the strong dollar.

Millipore is a multinational, high-technology growth company that leads the emerging $3 billion separations industry. Millipore products are used for analysis, purification and synthesis in life science research, pharmaceutical production, environmental testing, food and beverage processing, semiconductor manufacturing and health care.

Results for the quarter are as follows:

MILLIPORE CORPORATION

#90030p0265 01/30/1990 ~PR Newswire

SAN FRANCISCO (JAN. 30) PR NEWSWIRE - Chevron Chemical Company is now marketing an environmentally safe airport deicer which meets all federal requirements for use on runways. The deicer, trade name ICE-B-GON Runway Deicer, is CMA, or Calcium Magnesium Acetate.

"We developed CMA for runways because the industry needs an environmentally safe deicer," said Peter McCrea, Chevron Chemical Company vice president. "Current deicers can contaminate surface and ground water."

Responding to the needs of airports, Chevron conducted research to develop a CMA formulation which does not damage aircraft. Extensive research and testing was done to ensure ICE-BE-GON Runway Deicer meets both the Society of Automotive Engineers (SAE) Aerospace Committee and Federal Aviation Administration (FAA) specifications.

Dupage Airport, near Chicago, is the first airport to use CMA on its runways. "As EPA implements storm water runoff regulations, the environment will play a much greater role in determining what deicers we use," says Byron Miller, director of field operations for Dupage Airport. "Aircraft safety and the environment are top priorities here at Dupage and we hope CMA will address both these concerns."

Made from limestone and acetic acid (the principle component of vinegar), CMA is no more corrosive than tap water, is not harmful to plants and fish and will not reduce surface and ground water quality. It is biodegradable and may benefit plant growth by improving soil quality.

CMA was developed following years of research by the Federal Highway Administration to find a deicing alternative to salt.

Chevron Chemical Company, headquartered in San Ramon, Calif., is a wholly-owned subsidiary of Chevron Corporation which manufactures, markets

distributes, and develops agricultural and industrial chemicals worldwide.

OAKBROOK TERRACE, IL (JAN. 30) PR NEWSWIRE - Telesphere Communications, Inc. (AMEX: TSP), a full service interexchange carrier and provider of enhanced telecommunications services, announced the offering of a new long distance product with the trade name ''TeleWATS CitySaver(SM).''

CitySaver(SM) is a dedicated access product designed for high volume long

distance users and multi-location national accounts. CitySaver(SM) offers 5 percent, 10 percent and 15 percent discounts off Telesphere's regular dedicated access rates with volume discounts up to 10 percent. Customers can experience discounts up to 25 percent off Telesphere regular dedicated access rates.

"These discounts, off already low rates, represent an aggressive stance in the long distance industry, particularly when other carriers are announcing 2 percent and 3 percent rate reductions," commented Nick Jent, senior vice president, sales & marketing, at Telesphere. "CitySaver(SM) offers innovative pricing that is happily tailored to both our customers and our national network."

TeleWATS CitySaver(SM) will be available Feb. 1, 1990. Telesphere Communications, Inc., with a nationwide digital fiber optic network and fully deployed CCS system 7, is a provider of long distance network services, operator services, interactive 900 service and other enhanced communications services.

ARLINGTON, VA. (JAN. 30) PR NEWSWIRE - Members of USAir's Frequent Traveler Program flying on USAir and USAir Express through April 6, 1990, will earn one free roundtrip for every three roundtrips taken in a special Frequent Traveler Program promotion.

Five roundtrips will earn the frequent traveler two free roundtrips, and seven roundtrips will earn three free roundtrips. A maximum of three free roundtrips can be earned during the promotion.

USAir will also retroactively credit current USAir frequent travelers for all flights taken on and after Jan. 14.

Free award flights will be for coach class travel between cities on USAir's continental U.S. and Canadian route system. They must be taken between Sept. 4 and Dec. 14, 1990. Normal blackout periods will apply.

"This special offer is our way of thanking regular customers for their business, as well as encouraging others to come fly with us," said Donald Witte, USAir director - marketing services.

USAir is also offering a special mileage bonus for all flights taken on USAir and USAir Express between Feb. 1 and March 31. In addition to earning normal mileage credits for flight segments, frequent travelers will earn 1,000 extra miles for every flight segment traveled.

For example, a frequent traveler going from Charlotte, N.C., to Washington D.C. would normally earn 750 miles each way. Now the traveler will receive the 750 miles each way plus a 1,000 mile bonus each way.

DALLAS (JAN. 30) PR NEWSWIRE - Harken Energy Corp. (NYSE: HEC) of Dallas today reported that its newly-formed, wholly-owned subsidiary, Harken Bahrain Oil Co., has concluded a Production Sharing Contract with the Bahrain National Oil Co. The agreement, signed on Jan. 30, 1990, gives Harken the exclusive right to carry out exploration, development, production, transportation and marketing of petroleum throughout most of Bahrain's Arabian Gulf offshore territories. Subject to the discovery and development of oil and/or gas, the contract has a term of 35 years.

The agreement calls for Harken to commence an exploratory well to test the Khuff formation (estimated depth 13,000 feet) within two years. Harken has identified surface and subsurface structures within the area which are situated on trend between Bahrain's onshore Awali field and Saudi Arabia's nearby offshore Abu Safah field. Awali field, discovered in 1932, is the site of the first commercial oil discovery on the Arabian side of the Gulf. Awali has over 1.5 billion barrels of crude oil in place and over 10 trillion cubic feet of gas. It currently produces 42,000 barrels of oil and over 500 million cubic feet of gas per day. Other Harken leads will be evaluated for drilling after further geological interpretation and geophysical surveys.

Harken plans to open offices for Harken Bahrain Oil Co. in Bahrain immediately. Harken also plans to finalize its selection of financing alternatives within the next 30 days and is scheduling the drilling of the first well during late summer 1990.

Harken Energy Corp. acquires, restructures, manages and develops energy assets for itself, other energy companies and financial institutions. HEC explores for, develops and produces oil and gas reserves through its subsidiaries which include Harken Exploration Co. and Harken Bahrain Oil Co. Through its wholly-owned subsidiary, Tejas Power Corp., HEC owns and operates natural gas gathering and transmission facilities in Texas and Louisiana and markets third party gas to a variety of end-users. HEC retails and distributes gasoline through its subsidiary, Harken Marketing Co. and wholesales, transports and distributes gasoline and other petroleum products through its subsidiary, Harken Hydrocarbons Inc.

PITTSBURGH (JAN. 30) PR NEWSWIRE - L. B. Foster Co. (NASDAQ: FSTRA) announced today net income for 1989 of $1.3 million or $.13 per share on sales of $238.0 million.

In 1988, net income was $8.3 million from continuing operations or primary earnings of $.85 per share. Sales were $262.1 million. In 1988, earnings included a gain of $2.3 million from the adoption of Statement of Financial Accounting Standards No 96, "Accounting For Income Taxes." Net income, including this change was $10.6 million or primary earnings of $1.08 per share.

In the fourth quarter of 1989, L.B. Foster Co. had a net loss of $886,000 or $.09 per share on sales of $56.8 million. In 1988, net income in the fourth quarter was $1.3 million or $.13 per share on sales of $64.4 million.

"The year 1989 was a disappointment. Construction and Rail Products' sales and operating income improved over 1988 but could not offset the decline in Tubular Products," said Joseph H. Dugan, president and CEO. "The fourth quarter loss was due to difficult tubular markets, problems at the Fosterweld Division, plus charges for potential environmental compliance costs," Dugan added.

L. B. Foster Co., located in Pittsburgh, is a manufacturer, fabricator and distributor of construction, rail and tubular products.

#90030p0283 01/30/1990 ~PR Newswire

CHICAGO (JAN. 30) PR NEWSWIRE - ABN/LASALLE North America, Inc. today completed the acquisition of Exchange Bancorp, Inc. (NASDAQ: EXCG), a $3 billion Chicago bank holding company.

Exchange Bancorp, effective today, will be merged into LaSalle National Corp., the fifth largest bank holding company in Illinois.

Harrison Tempest, president and CEO of LaSalle National Corp., described the merger as a significant step toward building the Midwest's premier financial institution. "Every effort to grow and improve at LaSalle National Corp. is directed toward serving our customers. This merger enhances our expertise, management depth and our overall ability to serve the people that do business with us," Tempest said.

With the acquisition of Exchange Bancorp, LaSalle National Corp. now has assets of more than $6 billion and is a leading provider of trust and middle-market banking services to businesses and individuals throughout the Midwest.

Ira J. Kaufman, chairman and CEO of Exchange Bancorp, Inc., said, "We have had marvelous cooperation on both sides ever since we announced our agreement to merge. This has not only allowed us to close so quickly, but also bodes well for the future of the combined organization."

Following the merger of the holding companies, the two flagship banks, LaSalle National Bank and Exchange National Bank, will merge during mid-1990.

"The banks will be merged when it is certain that all customers can be served by one combined LaSalle National Bank as well as they were by the separated institutions," Tempest said.

As reported at the time of the merger announcement last July, John Rau, president of Exchange National Bank, will also become president and CEO of LaSalle National Bank, reporting to Tempest, effective immediately.

The merged corporation has an expansive community bank presence throughout the Chicago area, with locations throughout the south, west and north suburbs.

LaSalle National Corp. is a subsidiary of Algemene Bank Nederland N.V. (ABN Bank), which is one of the largest international banks, with assets of more than $85 billion and more than 950 offices in 43 countries worldwide.

In North America, ABN operations totalling more than $13 billion in assets are managed by Tempest, who is the CEO of ABN/LASALLE North America, Inc., in addition to his leadership of all LaSalle National Corp. operations in Chicagoland.

#90030p0285 01/30/1990 ~PR Newswire

HOUSTON (JAN. 30) PR NEWSWIRE - Union Texas Petroleum Holdings Inc. (NYSE: UTH) today reported $172.6 million in net income or $1.49 per share for 1989, up 58 percent from $109.3 million or 73 cents per share in 1988.

"We are very pleased with Union Texas' financial and operating results in 1989," said Chairman and CEO Clark Johnson. "Union Texas recorded a good performance throughout 1989, reflecting higher production from our operations in Indonesia and the Gulf of Mexico and improved oil prices."

The company's 1989 earnings included a second quarter $58.6 million net income gain (of which approximately $46 million relates to 1990 and 1991) from the business interruption insurance settlement concerning the July 1988 explosion at the U.K. North Sea's Piper field. Increased U.S. gas volumes, higher ethylene prices, increased income from equity partnerships and a lower effective tax rate also contributed to higher earnings in 1989. The company said that its U.S. gas prices were down in 1989 compared to a year ago due to lower sales under contracts which provided for above-spot market prices.

For the fourth quarter of 1989, Union Texas reported $16.3 million in net income or five cents per share, compared to $14.8 million or 3 cents per share in 1988's same period. The company said that its 1989 fourth quarter earnings benefitted from higher oil and liquefied natural gas (LNG) prices, improved U.S. gas volumes and increased equity income primarily from the liquidation of a drilling partnership. These items more than offset the negative impacts of lower U.S. gas and ethylene prices and the absence of accruals for business interruption insurance proceeds in 1989's fourth quarter.

Revenues for the full year amounted to $1.160 billion in 1989, up slightly from $1.152 billion a year earlier. During the fourth quarter of 1989, revenues totaled $254.1 million, essentially level with $254.8 million in 1988's corresponding period. The revenues improvement for the full year

was due largely to proceeds from the business interruption insurance settlement, increased U.S. gas volumes and higher oil prices, partially offset by lower U.S. gas prices and lower oil production in the U.K. North Sea.

In 1989, the company's average sales price for worldwide oil was up by 11 percent from a year ago. The company's average sales price for U.S. gas was off by 18 percent with lower sales under contracts which provided for above-spot market prices.

MIAMI (JAN. 30) PR NEWSWIRE - CenTrust Bank (AMEX: DLP), a state savings bank, with headquarters in Miami, today asked the American Stock Exchange to halt trading in CenTrust shares pending the company's filing of an amended Form 10-K for the fiscal year ended Sept. 30, 1989. A five-day suspension of trading in CenTrust securities, ordered by the Office of Thrift Supervision on Jan. 23, expired yesterday. The OTS action was based on its claim that CenTrust's Form 10-K as originally filed was materially deficient and misleading.

CenTrust has denied and continues to deny the substance of the OTS allegations concerning its financial statements and the other disclosures in its Form 10-K, but will amend the Form 10-K in a manner intended to respond to the OTS comments, the company stated. CenTrust said that its amendment would not change CenTrust's previously reported financial results for its fiscal year ended Sept. 30, 1989, or prior periods. CenTrust expects to file its amended 10-K on or about Feb. 1, 1990, and has requested the trading halt through such filing, the company said.

#90030p0289 01/30/1990 ~PR Newswire

SEATTLE (JAN. 30) PR NEWSWIRE - Firm orders and options for up to 87 Boeing jetliners were announced today by International Lease Finance Corp. (ILFC) of Beverly Hills, Calif. If all options are exercised, the package would have a total value of about $4.5 billion, the Boeing Commercial Airplane Group in Renton, Wash., confirmed.

The firm orders include 39 jetliners with a value of about $1.9 billion, bringing the leasing company's Boeing backlog to 164 jetliners. ILFC also announced it was taking options on 48 more Boeing airplanes.

Once again, ILFC has purchased all four types of Boeing jetliners at the same time. These include: 27 model 737s, two long-range 747-400s, five medium-range 757s and five 767-300 extended range aircraft. Deliveries of each of these models begin in 1995. Also, under the Boeing "family" concept, ILFC has reserved the right to select at a later date the type of 737 (-300, -400 or -500) that it wants. Options taken today include 24 more 737s, three more 747-400s, 12 more 757s and nine more extended-range 767-300s.

This announcement brings ILFC total firm orders from Boeing to 229 jetliners since it placed its first order in early 1977.

ILFC, a major owner/lessor of commercial jet aircraft, is Boeing's 10th largest of 264 customers. It was the first customer to order all four types of current Boeing products at the same time (May 1988).

DALLAS (JAN. 30) PR NEWSWIRE - A jury's award of $9 million to an ex-Dallas employee of Xerox Corporation (NYSE: XRX) is "outrageous," and the verdict should be thrown out and the company found blameless, Xerox said today in motions and briefs filed in U.S. District Court here.

The Xerox papers asked the trial judge, Sidney A. Fitzwater, to reverse the jury's verdict and to rule that there was no fraud or age discrimination as claimed by the former employee, Elizabeth Layman, now of San Antonio.

"The jury's verdict was the result of passion and prejudice," the papers said.

The Jan. 9 verdict followed a four-week trial in which Layman claimed Xerox fraudulently made a promise in 1986 to find her a job in California and had no intention of keeping the promise. The jury's $8,750,000 punitive damage award was based on this fraud claim for which they also gave her $139,716 in "actual" damages.

Xerox contended in a brief that Layman was offered two jobs with the company in California, both at higher pay than she had been making in Dallas. The company purchased her Dallas house in anticipation of her move and offered her relocation expenses. She refused the job offers and she asked to resign with severance pay which she received.

Layman's suit also claimed she was discriminated against because of her age and the jury awarded her compensatory damages of $145,000 for back pay

and benefits in connection with that claim. A Xerox motion claimed Layman's age was never a factor. She is now 47. A second Xerox motion said the trial was tainted by testimony the obviously biased jury heard on a claim which was later dismissed. Xerox said the court should order a new trial.

A sex discrimination claim, which was not put before the jury, has yet to be ruled on by the judge. Xerox said this Layman claim also is without merit and, in a third motion, asked for a ruling against it.

MINNEAPOLIS (JAN. 30) PR NEWSWIRE - G&K Services Inc. (NASDAQ: GKSRA), Minneapolis-based textile leasing company, reported record operating results for both the second quarter and the first six months of fiscal 1990.

Net earnings for the current quarter were $2,701,000, up 25 percent from the $2,162,000 earned in the same period a year ago. On a per-share basis net earnings were 20 cents, compared with 16 cents a year earlier. Revenues were $29,543,000, a 9-percent increase from $27,202,000 in the prior year.

For the first six months of fiscal 1990, net earnings were $5,270,000, up 24 percent from the $4,238,000 earned a year earlier. Per-share net earnings for the six-month period were 39 cents, compared with 32 cents in the prior year. Revenues reached $57,901,000, a gain of 9 percent from $53,159,000 in the comparable period last year.

All per-share values have been restated to reflect a 50 percent stock dividend paid in October 1989, which increased the number of shares outstanding to approximately 13,427,000.

Richard Fink, chairman of the major textile leasing company, noted that pre-tax margins rose to an all-time high of 15 percent in the second quarter of fiscal 1990 versus 13 percent in the year-earlier quarter. "These numbers reflect our continuing success in improving productivity in all phases of our business. The new efficient processing facilities we are constructing have been a big help in reducing our operating costs," said Fink.

"The maturing of our more recent acquisition and startup locations have also boosted earnings. Most of these are now showing a profit, following several years of significant losses.

"G&K continued to strengthen its balance sheet during the second quarter," Fink said. "Cash flows from operating activities rose to $7,775,000 for the first six months of fiscal 1990 compared with $5,948,000 in fiscal 1989, a gain of 31 percent. Stockholders' equity also increased to $65,610,000, or $4.89 per share, from $57,620,000 or $4.29 per share a year ago."

Commenting on the outlook for fiscal 1990, Fink said, "We expect our revenue growth rate to improve only slightly during the second half of the fiscal year. But we are planning several new startup operations and continue to pursue acquisitions aggressively.

"Earnings will continue very strong," Fink added, "and we expect to meet analyst projections despite the impact of our planned startups. We anticipate excellent results for fiscal 1990. Revenues and earnings will again be at record levels."

G&K Services is one of the largest textile leasing companies in the United States. The company provides and maintains work garments and other related textile products to a wide variety of businesses and institutions. G&K operates in 21 states, serving customers from 17 processing plants and 28 sales and service centers.

#90030p0302 01/30/1990 ~PR Newswire

WEST LAFAYETTE, IN (JAN. 30) PR NEWSWIRE - Great Lakes Chemical Corporation (NYSE: GLK) today reported record earnings and revenues for the year of 1989.

Net income for the year 1989 rose 19 percent to $122,918,000, or $3.52 per share, versus the Company's previous all-time high of $103,288,000, or $2.97 per share, reported in 1988. Revenues jumped 37.6 percent to $847,738,000 compared with $616,046,000 posted in the previous year.

For the fourth quarter of 1989, net income increased to $31,457,000, or $.90 per share, representing a 14.3 percent gain over the $27,515,000, or $.79 per share, earned in the 1988 fourth quarter. Revenues for the quarter of $237,569,000 climbed 51.7 percent higher than the $156,562,000 generated in the corresponding quarter of the previous year.

Emerson Kampen, Great Lakes Chemical Corporation's Chairman, President and CEO, commented on the Company's record-setting results, "Clearly, we are quite pleased with the significant gains in both revenues and profits that occurred this year, but 1989 proved pivotal in other ways. As a result of the addition of Octel Associates, coupled with a broadening of our specialty chemicals business to new markets and new areas, Great Lakes stands today less affected by swings in the business cycle and better equipped to control its own future."

He continued, "Despite a slowing of the overall economy during the last three months of 1989, demand for many of our bromine and furfural derivatives -- principally in the oil field clear fluids, POLYMEG (TM) product areas, and certain flame retardants -- continued to approach, and in some cases, exceed supply capabilities. Our Octel affiliate's sales volume again surpassed market projections, benefiting from heightened demand for product in Eastern Europe.

Great Lakes Chemical Corporation, a Fortune 500 company, is the world's leading producer of bromine, brominated chemicals and furfural derivatives for such applications as flame retardants, agriculture, oil and gas well completion fluids, water sanitizers and other specialty applications. The stock of the Company is traded on the New York Stock Exchange.

LAS VEGAS, NV (JAN. 30) PR NEWSWIRE - National Heritage Industries (NASDAQ: NHER), general partner of Heritage Hotel Limited Partnership I, announced today that a loan of $10,200,000 from Valley Bank of Nevada has been completed for the construction financing of the Chaparral Hotel/Casino. The construction will begin immediately and it is expected that the 312-room hotel and casino will be open in the fall of this year.

A franchise agreement has been reached with Hospitality International and the Chaparral shall become part of the Master Host Resort Hotel worldwide reservation system. The completed hotel/casino will include three restaurants, live entertainment, two pools, spa and complete casino gaming facilities.

Additionally, it was announced that the Chaparral Hotel/Casino project has received a MAI appraisal which now valu%g3/8Q! completed project at $24,000,000. The major factors taken into account in completing the MAI Appraisal are the Hotel/Casino's close proximity to the Las Vegas Convention Center, and the $109,000 monthly lease payments from United Coin Machine Co. for the food, beverage and gaming interests in the project. National Heritage has a long standing reputation for quality construction in the Las Vegas and Southern California markets, and will act as general contractor for the project.

HOLLYWOOD, FL (JAN. 30) PR NEWSWIRE - General Rent-A-Car will give away more than 100 free car rentals in a new sweepstakes, starting Feb. 1, for members of Southwest Airlines' Company Club, "The First Infrequent Flyer Program."

Two grand prize winners will receive a year's use of a 1990 Chrysler New Yorker, Chrysler LeBaron or Plymouth Voyager, three of the most popular cars in General's fleet. One hundred second-prize winners will receive a certificate good for a free three-day weekend rental of any standard car, with upgrades based on availability. The certificates from General Rent-A-Car are valid through May 31, 1991.

Entry forms will be sent to members of Southwest Airlines' Company Club in their monthly newsletter and will be available at all General Rent-A-Car locations within the Southwest Airlines system.

Completed forms can be dropped off at any of these General locations, which include Phoenix, Los Angeles, Oakland, Ontario, San Diego, San Francisco, Las Vegas, Albuquerque, Austin, Corpus Christi, Dallas, Houston and San Antonio. The sweepstakes ends on May 1, and the drawing will be held on May 10, 1990.

General Rent-A-Car also has created a special weekend rate for Company Club members. A coupon, distributed in the Company Club newsletter, entitles the holder to rent any car through the standard class for $19.99 a day, with upgrades based upon availability. Customers must pick up rentals on a Friday, Saturday or Sunday and drop them off by noon Monday.

General features the quality products of the Chrysler Corporation at each of its 94 rental locations nationwide.

#90030p0311 01/30/1990 ~PR Newswire

HOUSTON (JAN. 30) PR NEWSWIRE - Battle Mountain Gold Co. (NYSE: BMG) today reported 1989 net income of $26.4 million, or 40 cents per share, down 56 percent from last year's record $59.4 million, or 91 cents per share.

For the fourth quarter of 1989, net income was $5.2 million, or 8 cents per share, compared with $12.1 million, or 18 cents per share, earned during the like period in 1988.

Net sales for 1989 were $130.6 million, down 7 percent from $140.8 million in 1988. Revenues for the fourth quarter of 1989 were $29.6 million, compared with $32.4 million in the like quarter of 1988.

BMG Chairman Douglas J. Bourne said earnings for the year declined primarily because of lower realized gold prices, which averaged $386 per ounce in 1989, compared with $447 a year earlier.

Also contributing to the reduced earnings were an increase in the company's provisions for unproven lease abandonments, generally higher G&A costs associated with increased acquisitions and related activities, and a onetime deferred tax adjustment with respect to cumulative prior periods' earnings at the company's Pajingo mine in Australia. The decreases were partially offset by increased gold sales attributable to higher gold production volumes.

Exclusive of the non-cash deferred tax adjustment, net income for 1989 would have been $31.1 million, or 47 cents per share.

Battle Mountain Gold common stock trades on the New York Stock Exchange, the Australian Stock Exchange Limited, the Frankfurt Stock Exchange, the Swiss Stock Exchanges and the Toronto Stock Exchange under the symbol BMG.

CONTACT: Les Van Dyke of Battle Mountain Gold Co., 713-653-7248.

OLD GREENWICH, CT (JAN. 30) PR NEWSWIRE - Gordon R. Lohman has been elected to the board of directors of American Brands, Inc. (NYSE: AMB). Lohman is president and chief operating officer of AMSTED Industries Incorporated.

Chairman and Chief Executive Officer William J. Alley also announced that five management directors have resigned from the Board, but their management responsibilities remain unchanged, and they will continue to serve on the company's subsidiary boards. Alley noted that as a result of the changes, which are all effective today, outside directors now constitute a majority of the American Brands Board.

The management directors who have resigned from the Board are:
-- Robert L. Austin, senior vice president and chief administrative officer.
-- John T. Ludes, group vice president. Ludes also serves as president and chief executive officer of Acushnet Company and as president and chief executive officer of American Brands International Corporation.
-- Robert L. Plancher, senior vice president and chief accounting officer.
-- Paul A. Randour, senior vice president and general counsel.

-- Robert J. Rukeyser, senior vice president-corporate affairs.
The board now has 13 members:
-- William J. Alley, chairman and chief executive officer of American Brands.
-- Eugene R. Anderson, a partner in the law firm of Anderson Kill Olick & Oshinsky, P.C.
-- Norman E. Auerbach, retired chairman and chief executive officer of Coopers & Lybrand.
-- Catherine M. Bedell, president of Bedell Associates, and a former six-term member of Congress.
-- Thomas C. Hays, president and chief operating officer of American Brands.
-- Arnold Henson, executive vice president and chief financial officer of American Brands.
-- Anthony D. Househam, chairman of Gallaher Limited.
-- Howard C. Humphrey, vice president-life insurance of American Brands and
chairman and chief executive officer of the Franklin Life Insurance Company.
-- John W. Johnstone, Jr., chairman of the board, president and chief executive officer of Olin Corporation.
-- Wendell J. Kelley, chairman and president of Illinois Power Company.
-- Gordon R. Lohman, president and chief operating officer of Amsted Industries Incorporated.
-- Charles H. Mullen, vice president-tobacco of American Brands and chairman, president and chief executive officer of the American Tobacco Company.
-- Charles H. Pistor, Jr., chairman of the board and chief executive officer of NorthPark National Bank.

American Brands is a global consumer products holding company with four core businesses -- tobacco, distilled spirits, life insurance and office products. Each has brand name leaders in its industry.

In tobacco, major cigarette brands include American Tobacco's Carlton, Lucky Strike, Pall Mall, Tareyton and Malibu and, in the U.K., Gallaher Limited's Benson & Hedges, Silk Cut and Berkeley. In distilled spirits, leading brands include Jim Beam bourbon, DeKuyper liqueurs, Windsor Canadian Supreme Whisky, Gilbey's gin and vodka and Kamchatka vodka. Life insurance is sold by The Franklin group of companies. The ACCO World office products group includes Swingline, Wilson Jones, Day- Timers and substantial international operations, including Rexel.

The MasterBrand Industries hardware and home improvement emerging core business includes Master Lock, Waterloo Industries, Aristokraft and Twentieth Century.

Specialty products include Titleist, Pinnacle and Foot-Joy golf products

and, in the U.K., Gallaher's Prestige housewares line, Dollond & Aitchison optics, and Forbuoys and NSS Newsagents.

#90030p0313 01/30/1990 ~PR Newswire

NEW YORK (JAN. 30) PR NEWSWIRE - Vista Chemical Co. (NYSE: VC) today announced a new family of thermoelastic polymer products, called PLENEX(TM), with reduced-smoke, low-flame characteristics that meet the stringent requirements for plenum-rated applications in the wire and cable industry.

PLENEX was designed to meet the toughest fire and safety restrictions required for low-voltage cable applications. Vista's new engineered plastic passed the modified Steiner horizontal tunnel test to earn the Underwriters Laboratory Subject 910 approval for both wire insulation and jacketing applications found in the highly regulated plenum spaces.

Plenum spaces are the areas above a suspended ceiling used to recirculate air to the rooms below. These spaces are subject to the strictest fire and safety building codes because the circulating air inside could quickly spread fire and smoke throughout an entire building. Plenum-rated materials must produce low levels of smoke and very little flame spread to help contain or slow down a fire enough to allow time to evacuate a building full of people safely.

Plenum spaces contain miles and miles of specially rated wire and cable for telephone lines, computer networks, music and public address systems, fire alarms and automatic sprinklers systems, security systems and air conditioning and thermostat control systems. In 1980, approximately 30 million feet of cable was installed in plenum spaces. Industry estimates expect more than one billion feet of plenum-rated cable to be installed in 1990. That represents about 20 million pounds of polymer per year.

PLENEX offers wire and cable producers production and cost advantages over the fluoropolymer products traditionally used in plenum-rated jacketing applications. PLENEX can be processed on a wider and less-costly range of equipment than can fluoropolymers and will be available at substatial cost savings.

Wire and cable installers will enjoy the increased flexibility PLENEX offers. Unlike fluoropolymer jackets, PLENEX jackets will not kink and recoil, allowing them to bend and conform more easily in the space installed. In addition, jacketing material made with PLENEX can be opened easily with a ripcord, unlike fluoropolymer jacketing, which is

difficult to cut and trim during installation.

#90030p0316 01/30/1990 ~PR Newswire

OLD TOWN, ME (JAN. 30) PR NEWSWIRE - Net sales for the fiscal year ended Nov. 24, 1989, were $14,314,000, down 22 percent from fiscal year 1988 sales of $18,442,000. A net loss of $208,000, or 14 cents per share, was incurred in the current year, versus a net income of $1,294,000 or 86 cents per share, a year ago.

In the fourth quarter of 1989, net sales were $3,505,000, 18 percent less than the $4,281,000 in the comparable quarter of 1988. The current quarter sustained a net loss of $180,000, or 12 cents per share, compared to a net profit of $369,000, or 25 cents per share, in the fourth quarter of 1988.

The uncertainties and problems stemming from a poor retail climate combined with manufacturing difficulties were primarily responsible for the decline in sales during 1989. These adverse circumstances led to excess inventories as well as to higher costs and low productivity in our manufacturing operations.

Disposition of inventories will contribute to continuing losses in the first half of fiscal 1990, but programs to restore growth to our sales and balance to our costs will become effective as the year progresses.

At a scheduled meeting of the board of directors held on Jan. 30, 1990, the directors voted to pay a dividend of 5 cents per share on March 15, 1990 to all stockholders of record Feb. 23, 1990.

#90030p0317 01/30/1990 ~PR Newswire

HOPKINTON, MA (JAN. 30) PR NEWSWIRE - Avatar Corporation announced a series of new products in the MacMainFrame Series of Macintosh-to-mainframe connectivity products.

The new products provide IBM 3270 connectivity, including mainframe graphics emulation, in remote or local, single workstation or gateway versions for coax, SDLC and Token Ring physical networks. Avatar Corporation is the only company to provide such a broad range of Macintosh-to-mainframe communications products for virtually any Macintosh

in any network configuration.

The new MacMainFrame Series products announced today include: MacMainFrame Graphics; MacMainFrame SDLC Workstation; MacMainFrame Token Ring Workstation; MacMainFrame Coax Gateway; MacMainFrame SDLC Gateway; and MacMainFrame Token Ring Gateway. (See separate product information below for specifications of each product).

"With these new products, the MacMainFrame Series now provides MIS managers and Macintosh users with even more ways to access host information and to painlessly integrate any Macintosh into a variety of network environments including coax, SDLC and Token Ring," said Tom Bogan, president of Avatar.

"And because our products provide access over any AppleTalk network, Macintosh users on EtherTalk, TokenTalk or LocalTalk LANs are all now able to use mainframe information in desktop applications," Bogan added.

The goal of the MacMainFrame Series is to provide a range of IBM mainframe connectivity options so that physical networks are no longer barriers in Macintosh-to-mainframe communications. With MacMainFrame, MIS managers can choose their network topology first, such as LocalTalk, Coax or Token Ring, and then choose their IBM 3270 services.

Because MacMainFrame was developed with a flexible architecture, 3270 services are split into the client/server model with the physical connection on a server machine and the client on any Macintosh connected to an AppleTalk network.

For example, the server can be a Macintosh SE, SE/30 or II family physically connected to Coax, SDLC or Token Ring. The client applications software can be MacMainFrame Workstation multi-session software, a Hypercard application such as MacPROFF, their MacMainFrame Graphics application or a customer written application that uses their common API.

CONTACT: Heidi Palmer of Avatar, 508-435-3000.

#90030p0323 01/30/1990 ~PR Newswire

COLUMBUS, OH (JAN. 30) PR NEWSWIRE - U.S. Bankruptcy Judge Barbara Sellers has appointed Jay Alix as operating trustee of Cardinal Industries Inc., following his nomination by Conrad Morgenstern, U.S. trustee for Ohio and Michigan. Cardinal is the nation's largest producer of modular homes, and is general partner of more than 500 limited partnerships controlling 1,000 rental properties worth an estimated $1.6 billion and the Knights Inn motel chain.

As trustee, Alix assumes management control of the large, privately held company, which filed May 15 for reorganization under Chapter 11 of the Federal Bankruptcy Code. Considered one of the nation's leading authorities in analyzing and turning around troubled companies, the Detroit-based restructuring expert has been working with Richard Miller, president of Wang Laboratories, Inc., in concluding one of the nation's largest recent corporate turnarounds at Wang.

Alix' court appointment to take management control of Columbus-based Cardinal comes after several months of creditor petitions to the court to appoint a trustee to help develop a reorganization plan for the financially distressed company.

Cardinal reported fiscal 1988 revenues of $767 million, and is general partner for 528 limited partnerships, more than 40 of which also have filed for Chapter 11 reorganization. Accountants for the creditors' committee reported in mid-November that the 29-year-old company had experienced negative cash flow of $1.4 million from mid-May through the end of October 1989, and was losing about $270,000 a month then.

Nationally, Cardinal limited partnership holdings include 451 apartment buildings, 100 Knights Inn motels, 18 Arborgate Inn motels, six condominiums and seven retirement villages.

In Michigan, Cardinal partnerships own almost 100 rental properties, including 65 apartment buildings and 23 Knights Inn motels. The holdings include eight Knights Inn motels in the Detroit tri-county area, as well as an Arborgate Inn and the Olivewood and Durham apartment complexes in Sterling Heights.

Alix is president of Jay Alix & Associates, based in suburban Detroit's Southfield. His nine-year-old firm of certified public accountants and corporate turnaround consultants is one of three CPA firms in the nation -- and the only Midwest firm -- specializing exclusively in corporate turnarounds and managing troubled and distressed businesses through crises and reorganizations.

He also is an instructor of the nation's federal bankruptcy judges and U.S. district judges, U.S. trustees and U.S. attorneys on financial analysis of troubled and bankrupt companies.

Alix has achieved wide recognition nationally for his approach to rehabilitating distressed and insolvent companies and for saving several prominent companies from liquidation, including 113-year-old Detroit confectioner Fred Sanders, Inc., in 1988, and the nation's oldest steel company, suburban Philadelphia-based Phoenix Steel Corp. the prior year. He initially gained recognition for his work in the mid-1980s as the financial adviser and accountant to the bankruptcy trustee of the Delorean

Motor Company.

He has been working since August directly with Wang's Miller in the restructuring of the giant minicomputer manufacturer, including renegotiating $500 million in debt and selling more than $500 million in non-strategic assets to help the company recover from a record loss of $424.3 million on sales of $2.87 billion for the year ended June 30, 1989.

Alix is regularly called upon to render testimony as an expert witness in Bankruptcy and Federal District Court on a variety of matters relating to corporate turnarounds, insolvency, accounting, analysis and business valuations. He serves as an operating trustee, examiner and receiver, under court appointment, and frequently investigates financial irregularities, corporate mismanagement and fraud, at the courts' or creditors' request.

He is a member of both the American Institute and Michigan Association of Certified Public Accountants, the Insolvency Accountants Association, the National Association of Credit Management and the National Association of Bankruptcy Trustees.

Alix began his career with Price Waterhouse in New York City, and is a licensed certified public accountant in Michigan and New York. Graduated from the University of Pennsylvania's Wharton School of Business with a bachelor's degree in finance, he earned a master's degree in business administration in accounting from Rutgers University, where he was president of the M.B.A. class. He also served a two-year term as president of The Wharton Alumni Association of Michigan and is a member of its board of directors.

TROY, MI (JAN. 30) PR NEWSWIRE - K mart Corporation (NYSE: KM) today announced the purchase of approximately 90 acres of property in Greensboro N.C., for construction of a new K mart distribution center. It will be situated east of Greensboro near Wendover and Penry roads.

Construction will begin in May 1990, for the 1,500,000-square-foot distribution center to be self-developed by K mart Corporation. The center will be completed and fully operational in 1991.

The K mart Greensboro Distribution Center will be a full operation distribution center servicing 194 K mart stores in the states of North Carolina, South Carolina, and parts of Virginia, West Virginia, Maryland and Tennessee when fully operational. It is anticipated that 300 to 350 new jobs will be created when K mart opens the Greensboro center, bringing K mart's employee total in North Carolina to more than 9,000.

"The addition of the K mart Greensboro Distribution Center will provide quicker distribution of merchandise to North Carolina stores and those in the surrounding states," said Anthony R. Mauro, K mart's vice president for distribution and transportation.

K mart Corporation currently operates 16 distribution centers across the country providing service to its over 2,200 U.S. K mart stores. Presently, the 194 K mart stores in the six-state area are serviced by distribution centers in Georgia, Kansas, Pennsylvania and Ohio. In December 1989, K

mart announced construction of an additional distribution center in Ocala, Fla.

K mart is also the proud sponsor of the K mart Greater Greensboro Open to be held April 15-24, 1990.

K mart Corporation serves America with over 4,000 retail outlets in all 50 states in the United States and in Puerto Rico and Canada. K mart, currently operating 2,318 K mart stores, is also the parent company for Pay Less Drug Stores, Builders Square, Waldenbooks and PACE Membership Warehouse Clubs.

#90030p0329 01/30/1990 ~PR Newswire

FREEPORT, IL (JAN. 30) PR NEWSWIRE - Newell Co. (NYSE: NWL) today reported that sales, net income and fully diluted earnings per share for the year ended Dec. 31 reached record highs. The fourth quarter earnings performance also established an all-time high for any quarter in the company's history. Newell's 32 percent return on beginning common equity for the year 1989 was also a record.

For the full year 1989, sales increased 13.6 percent to $1.123 billion from $988.2 million. Net income was $85.4 million vs. $61.4 million, up 39 percent. Fully diluted earnings per share were up 39.6 percent from $1.01 to $1.41.

For the fourth quarter, sales increased 9.8 percent to $278.5 million from $253.7 million. Net income was $29.7 million vs. $21.2 million, up 39.8

percent. Fully diluted earnings per share were 49 cents, up 40 percent from 35 cents achieved in the comparable 1988 period.

The increase in sales for both the quarter and the full year was due primarily to: internal growth, the acquisitions of the Thomas Paint Applicator business and REMA Bakeware in December 1988, and the acquisitions of the WearEver cookware business and the Metal Closure Division of Owens-Illinois in January 1989. Sales of Newell's existing domestic consumer businesses were up approximately 6 percent in 1989. The increase in net income for the full year was due to the increased sales, and substantial margin improvements in Newell's industrial product lines and gains in most of the consumer businesses.

Newell completed the sales of its Boye/Wright sewing notions business and its Carr-Lowrey specialty glass container business during the fourth quarter. These dispositions generated an after-tax gain of $4.7 million and reduced Newell's long-term debt to total capital ratio to 24 percent at Dec. 31, 1989. For the full year, the gain from these divestitures was essentially offset by the write-off of an investment in Western Savings & Loan.

Further improvement in Newell's capitalization occurred in January 1990 with receipt of approximately $48 million gross proceeds from the sale of its investment in Vermont American.

Newell manufactures and markets high-volume hardware/housewares and industrial products. Hardware/housewares products are sold principally through discount, variety, chain and hardware stores, hardware and housewares distributors, and home improvement centers. Industrial products are sold directly and through distributors to volume purchasers.

#90030p0330 01/30/1990 ~PR Newswire

DEERFIELD, IL (JAN. 30) PR NEWSWIRE - Baxter Healthcare Corporation and Hybritech Incorporated today announced a worldwide cooperative agreement to develop, manufacture and market monoclonal antibody-based tests for cancer and other conditions for use with Baxter's diagnostic instrument systems. Financial terms were not disclosed.

Under the agreement, scientists from Baxter's Dade Division and Hybritech Incorporated, a subsidiary of Eli Lilly and Company, will work together to develop the tests, which will be manufactured by Baxter and marketed by Hybritech. The tests, which will bear a Hybritech label, will be used with Baxter's Dade Stratus Immunoassay System, a fully automated analyzer that measures key blood components in minutes.

The agreement combines Hybritech's expertise in monoclonal antibody- based diagnostics research with Baxter's strong presence and reputation for quality in the rapidly growing immunodiagnostic testing market. The worldwide market for immunodiagnostic products in health care has been estimated at $3 billion to $4 billion.

Through the agreement, Hybritech gains access to a broad, global, installed base of instruments for its tests.

The agreement will make Baxter's Dade Stratus Immunoassay System more useful to clinicians by opening up new areas of testing and applications for the device. One of the most significant additions will be tests for the prognosis and management of cancer patients, including tests for colon prostate and breast cancer. The Stratus System currently performs 26 different tests, including the analysis of hormone levels in the blood, pregnancy, thyroid function and a recently introduced test that helps diagnose heart attacks. Additional tests for other types of cancer, as well as for other physical conditions, will be jointly determined and developed in the future.

Hybritech Incorporated, located in San Diego, is a subsidiary of Eli Lilly and Company (NYSE: LLY), and manufactures and sells diagnostic products worldwide.

Baxter Healthcare Corporation is the principal U.S. operating subsidiary of Baxter International Inc. (NYSE: BAX). Baxter, headquartered in Deerfield, is the leading worldwide manufacturer and marketer of health-care products, systems and services.

SAN RAFAEL, CA (JAN. 30) PR NEWSWIRE - Fair, Isaac Co. (NASDAQ: FICI) the originator and leading supplier of credit scoring technology, today introduced TRIAD, a new powerful account management system. TRIAD, developed for bankcard and retail card issuers, will give creditors better management control and significant improvements in portfolio profitability.

TRIAD is a lower-priced addition to Fair, Isaac's Adaptive Control System (ACS) line of products. Developed in 1985, ACS is currently used by 35 major creditors to manage and monitor over 60,000,000 accounts every month. Results reported by users of Adaptive Control technology include a 24 percent reduction on delinquencies and a 30 percent increase in account usage. Profit improvements have been reported as high as $10 per account

per year, derived from savings in operating costs, reduced write-offs and increases in revenue.

This is in sharp contrast to recent industry surveys that indicate annual charge-offs have risen from 2.5 percent to 4 percent of average indsutry credit balances since 1980.

TRIAD operates on the two basic principles that govern ACS. The first is that strategies should be designed to result in treatments that differentiate accounts according to their degree of risk. The second principle is that new strategies should constantly be devised and tested in an environment marked by feedback of results and continual learning. TRIAD delivers on these priniples with behavior scorecards, Adaptive Control Software, and strategy consulting.

The Adaptive Control Software automates the scoring process and provides all the necessary facilites of executing multiple strategies simultaneously. The ability to run multiple strategies simultaneously on small, statistically representative groups of accounts, reduces the risk to the creditor of trying new strategies in the search for the most profitable set of strategies.

The third part of TRIAD is Fair, Isaac's strategy consulting services. Fair, Isaac works closely with the creditor to develop and evaluate account management strategies. The TRIAD system's extensive reporting feature allows credit managers to monitor the results of strategic changes and, based on those results, quickly exploitopportunities at the moment of greatest advantage.

Fair, Isaac was established in 1956, and today serves approximately 400 customers worldwide, including over half of the 100 largest U.S. banks. The company is a pioneer and world leader in the development of statistically-based control systems and products used by credit grantors and other businesses, including utilities and insurance companies.

#90030p0337 01/30/1990 ~PR Newswire

LAFAYETTE HILL, PA (JAN. 30) PR NEWSWIRE - Home Unity Savings Bank PaSA (NASDAQ: HUSB) today announced net income of approximately $55,000 or $0.03 per share, for the fourth quarter of 1989.

For the 12-month period ended Dec. 31, 1989, the bank's net loss was approximately $1.1 million or $0.53 per share. These results reflect dramatic improvements from the corresponding periods of 1988, when the bank reported a net loss of $12.7 million for the fourth quarter and $17.4 million for the year.

Net interest income after provision for possible loan losses for the fourth quarter of 1989 was $2.8 million, an improvement of $3.1 million over the comparable figure for the fourth quarter of 1988. The bank's provision for possible loan losses was only $297,000 for the fourth quarter of 1989, a reduction of $2.6 million (89.7 percent) from the provision of $2.9 million for the fourth quarter of 1988. The bank's net interest income for the fourth quarter of 1989 also reflects continued improvement in the bank's net interest spread, to 1.93 percent at Dec. 31, 1989, from 1.61 percent at Dec. 31, 1988, and 1.75 percent at Sept. 30, 1989. The bank's "one-year gap" as a percentage of total assets was a positive 0.93 percent at Dec. 31, 1989, compared to a negative 2.80 percent at Dec. 31, 1988.

Fourth quarter results also reflect significantly lower losses on real estate owned in the fourth quarter of 1989 of $177,000 down approximately $1.6 million (88.9 percent) from losses on real estate owned of $1.8 million in the fourth quarter of 1988. The bank also experienced continued reductions in most other categories of general and administrative expense, resulting in a savings of approximately $1.2 million from the fourth quarter of 1988. The bank's results for the fourth quarter of 1988 also reflected a non-recurring loss of $6.9 million incurred in the bank's financial restructuring.

Michael C. Rush, Home Unity's president and chief executive officer, commented: "We are extremely pleased by the continued, significant improvements the bank has realized in recent quarters. Our fourth quarter profit is our first quarterly profit in over two years, and comes just one year after the completion of our financial restructuring in the fourth quarter of 1988. Our net interest spread in the fourth quarter reached its highest point in the last three years.

"We believe that the steady improvement in our operating trends in recent quarters demonstrates the prudence of our focus on community banking, core operating income, asset quality and cost containment. We have submitted our capital plan to the Office of Thrift Supervision for approval, and are presently responding to its request for additional information. We believe that the continued improvement in our operating trends provides a basis for obtaining the OTS's approval of our capital plan and the necessary capital infusion we are seeking."

Home Unity is insured by the FDIC, and has 15 full-service offices in Philadelphia, Bucks and Montgomery counties. Corporate headquarters are located in Lafayette Hill.

KANSAS CITY, MO (JAN. 30) PR NEWSWIRE - Marion Merrell Dow Inc. today announced sales of $337 million and net earnings of $22 million, or $.11 per share, for the quarter ended Dec. 31, 1989. This compares with sales of $220 million and net earnings of $54 million, or $.35 per share, reported by Marion Laboratories, Inc. for the same three-month period a year ago.

Results for the three months just ended include a $44 million pre- tax special charge against earnings, or $.16 per share after tax, related to the combination of Marion and Merrell Dow Pharmaceuticals Inc. Without the special charge, and excluding Merrell Dow results, net earnings for the quarter would have increased 18 percent, to $63 million.

In making the announcement, the company said the financial results for the 1989 three-month period reflect two months of performance by Marion and a single month (Dec. 1989) by the newly combined company, Marion Merrell Dow.

For the six months ended Dec. 31, the newly expanded global pharmaceutical

company reported pre-tax special charges of $297 million ($1.13 per share after tax) related to the transaction with The Dow Chemical company that led to the creation of Marion Merrell Dow. As a result of these special charges, the company reported a net loss of $79 million, or $.46 per share. Without these special charges, primarily expenses associated with the settlement of stock appreciation rights (SARs) held by Marion associates (employees), as well as business restructuring charges, net earnings (excluding Merrell Dow) for the six months would have totaled $123 million, a 22 percent increase over the prior year.

On a pro forma basis, Marion Merrell Dow sales for the year ended Dec. 31, 1989, would have been $2.2 billion, up 11 percent from the prior year. For the 12 months just ended, net earnings for the combined company would have been $397 million, versus net earnings of $332 million. Earnings per share in 1989 of $1.43 compared with $1.20 in the prior year, up 19 percent. Beginning with the first-quarter 1990, the company will report complete combined results and prior-year pro forma comparisons, company officials said.

(JAN. 30) UPI - Pfizer Inc. has announced that Diflucan (fluconazole), a new antifungal agent, has been cleared for marketing in the U.S. Diflucan will have broad application in the treatment of fungal infections, including oropharyngeal and esophageal candidiasis, serious systemic candidiasis such as urinary tract infection, pneumonia and peritonitis, as well as for acute therapy and for suppression of relapse of cryptococcal meningitis.

Severe and life-threatening fungal infections caused by pathogens such as Candida and Cryptococcus are an important cause of medical complications and mortality in patients with weakened immune systems.

"Cancer patients, people with AIDS, organ transplant recipients, diabetics and patients on long-term antibiotic treatment or with in - dwelling catheters are all at risk for significant fungal infection," said Dr. Barry M. Bloom, president of Pfizer Central Research.

"The discovery of Diflucan is the result of years of antifungal research at Pfizer," said Dr. Bloom. "We are proud of this major advance. The speed with which regulatory review has proceeded both here and abroad reflects the medical importance of Diflucan and the high quality of the science underpinning its discovery and development."

The first of a totally new class of antifungal compounds, Diflucan is a broad-spectrum agent that can be administered once daily, either orally or by injection. The product will be available in hospitals and pharmacies shortly.

"We believe Diflucan will offer an improved quality of life to many patients," said William C. Steere, Jr., president of Pfizer Pharmaceutical Products, "because it offers safety and dosing advantages as well as effectiveness in a wide range of fungal infections."

Pfizer Inc. is a diversified, research-based health care company with businesses in pharmaceuticals, hospital products, animal health, consumer products, specialty chemicals and specialty minerals. The company reported sales of approximately $5.7 billion for 1989.

NEW YORK (JAN. 30) PR NEWSWIRE - Timeplex today introduced a series of powerful local area and wide area broadband networking systems that support high-speed, high-bandwidth applications that companies require in the '90s. In addition to expanding its wide-area networking solutions to include T-3, Timeplex is also expanding horizontally by entering the high-speed LAN connectivity market.

These new networking systems include: The TIME/LAN Family of Fiber Distributed Data Interface (FDDI)-based routers, FDDI intelligent concentrators, and routing bridges, and the TX3/SuperHub, the industry's highest capacity commercial T-3 networking system.

"Today we are announcing the first members of a new generation of systems which give concrete form to our vision of broadband networking in the '90s. Timeplex believes that these systems are important and meet real

user needs -- needs which only can be satisfied with communications platforms offering quantum leaps in capability," said Dewaine Osman, Timeplex president. "Due to new bandwidth-intensive applications, our customers require much greater capacity both on premises and in the wide area. The proliferation of LANs also requires high bandwidth for premises consolidation and connectivity to the wide area. These new communications platforms we are announcing today are the best means to achieve the required price and functionality for our customers.

"Timeplex believes that FDDI will be the backbone technology for LAN interconnection. FDDI optical fiber offers tremendous advantages in terms of bandwidth capacity, connectivity, and performance. Prior to the availability of Timeplex's FDDI products, the issues of price per connection to the dual FDDI ring, the security and integrity of the data, and the ability to provide effective network management were market inhibitors. The TIME/LAN Family cuts connection costs in half, meets the demand for high levels of network security and reliability, and provides effective network management. These breakthroughs, along with the existence of premise distribution systems that include fiber, demonstrate that FDDI is not a future technology, it is practical and deliverable today," said Osman.

"The T-3 market is evolving in much the same way that the T-1 market grew -- with networking, rather than point-to-point systems being the best solution. Accordingly, today we are announcing the TX3/SuperHub, a T-3 networking system. The market's demand for capacity keeps accelerating due to the very high bandwidth applications and the requirements of LAN/WAN interconnectivity," added Osman. "We expect the demand for T-3 services to grow because T-3 circuits are becoming widely available and because of the economic benefit of T-3. In some instances, the break-even point for cost-justification of T-3 is as low as four T-1 circuits, even though T-3 is the equivalent of 28 T-1s. The TX3/SuperHub provides the platform needed for super backbone transport networks that will consolidate WANs, much as FDDI can consolidate LANs.

Timeplex, the worldwide leader in communications networking, offers a broad range of high-performance T-1 and T-3 networking systems, FDDI, Ethernet, and Token Ring LAN/WAN and LAN/LAN connectivity systems, packet switching systems, and network management systems for today's complex multi-vendor environments. Timeplex also participates in other leading technologies, including ISDN. Founded in 1969, Timeplex has sales and support offices around the world, and systems installed in approximately 2,600 enterprises in over 70 countries.

CANTON, MA (JAN. 30) PR NEWSWIRE - Hills Department Stores, Inc. (NYSE: HDS) today announced that its Hills Stores Company subsidiary ("Hills") has signed a letter of commitment with The Taiyo Kobe Bank, Ltd., a Japanese bank ("Taiyo Kobe"), setting forth the principal terms and conditions on which Taiyo Kobe will replace the present lenders under Hills' bank credit agreement and will provide an aggregate of $400 million of senior financing to Hills. This senior financing will consist of a working capital facility of up to $300 million and, beginning in 1991, an additional working capital facility of up to $100 million. These facilities are to be available under a five-year amended and restated credit agreement, which the parties expect to negotiate and execute on or before March 31, 1990, and, as is customary, are subject to satisfactory completion of due diligence and other conditions specified in the commitment letter.

This financing is expected to meet the seasonal working capital requirements of Hills in the ordinary course of its business.

Hills intends to seek an additional $100 million in financing through a private placement to institutional purchasers of subordinated notes or other junior financing. The proceeds of such additional financing are to

be used to refinance existing term indebtedness of Hills. Completion of this financing is also a condition of Taiyo Kobe's commitment.

Stephen A. Goldberger, chairman and CEO of Hills, stated, "We are pleased to be establishing this long-term banking relationship with an institution as significant as The Taiyo Kobe Bank. The five-year term of this working capital facility should provide a stable framework for Hills' operations going forward." Taiyo Kobe, with assets of over $174 billion (U.S.), is the 18th largest bank in the world.

Hills, the fifth largest discount department retailer of general merchandise in the United States, presently operates 208 stores in 14 central and eastern states, principally in Indiana, Michigan, New York, Ohio, Pennsylvania, Tennessee and West Virginia.

ARDMORE, OK (JAN. 30) PR NEWSWIRE - Noble Affiliates Inc. (NYSE: NBL) today reported consolidated net income of $31,378,000, or 72 cents per share, for 1989, more than double its previous year's net income of $11,832,000, or 27 cents per share. Revenues for 1989 were $211,607,000, up 10 percent over 1988's revenues of $191,721,000.

The 1989 net earnings include a credit of $8,825,000, equivalent to 20 cents per share, as a result of the company's adoption in the first quarter of Statement of Financial Accounting Standards No. 96, "Accounting for Income Taxes."

For the fourth quarter of 1989, Noble Affiliates had consolidated net income of $1,740,000, or 4 cents per share, on revenues of $50,636,000. For the like period of 1988, net income was $1,525,000, or 4 cents per share, on revenues of $47,090,000.

Robert Kelley, president and chief executive officer, credited the earnings gain for the year to higher oil prices and the successful negotiation of a gas contract buydown agreement concluded during the second quarter, from which the company received a lump-sum, nonrecoupable cash payment of $15.3 million.

During the year, the company received an average price of $17.59 per barrel of oil, compared with an average of $14.39 per barrel in 1988. Oil production during 1989 averaged 9,779 barrels per day, up slightly from the previous year.

Average gas prices received by the company during 1989 improved slightly to $2.07 per thousand cubic feet from the $2.05 averaged in 1988. Gas production during the year averaged 152.7 million cubic feet per day, down 3 percent from the 1988 daily average of 158 million cubic feet.

Gas prices received by the company in the last quarter of 1989 averaged $2 per thousand cubic feet, down seven percent from the $2.15 per thousand cubic feet averaged in the like period of 1988. Gas production in both

periods was about the same.

Oil prices received by the company averaged $18.04 per barrel in the 1989 fourth quarter, up 44 percent above the average received in the like period of the prior year. Oil production in the 1989 period averaged 10,797 barrels per day, 14.5 percent over that of the 1989 fourth quarter.

Noble Affiliates Inc. is an independent energy company with exploration and production operations throughout major basins in the United States, including the Gulf of Mexico and offshore California, as well as foreign operations primarily in Canada, Tunisia and Indonesia. Its common stock is listed on the NYSE under the symbol "NBL."

#90030p0364 01/30/1990 ~PR Newswire

BALTIMORE (JAN. 30) PR NEWSWIRE - PharmaKinetics Laboratories, Inc. (NASDAQ-NMS: PKLB) today reported results for the quarter and six months ended Dec. 31, 1989.

As anticipated, the company reported a net loss of $362,560, or 4 cents per share, for the quarter ended Dec. 31, 1989, as compared to earnings of $669,128, or 7 cents per share, for the same period a year ago. For the recent six month period the company reported a net loss of $756,053, which included non-recurring expenses of $556,000 previously reported in the first quarter, associated with the ongoing governmental investigation of the generic drug industry, including clients of the company, and other matters. The loss for the six months ended Dec. 31, 1989, compares to net earnings of $1,227,222, or 13 cents per share, for the same period one year ago. Contract revenue for the three and six months ended Dec. 31, 1989, was $5,982,652, and $12,646,630, which compares to $6,487,686 and $11,743,972 for the respective periods of the prior year.

The loss for the quarter was primarily caused by the decline in domestic contracts during September and October due to the industry disruption associated with the governmental investigations of the generic drug industry. The financial impact of this decline was realized during the recent quarter when such work would be scheduled for completion. This trend was reversed in subsequent months, which should have a positive impact on future quarters.

Steven A. Woodman, chief executive officer, commenting on the quarter, said, "We are pleased that demand for our services began to normalize during the recent quarter as evidenced by the initiation of studies for a record number of new clients." Commenting further, he said, "We are enjoying significant success at International Bio Research, our European

subsidiary, which further reinforces our confidence in the long term potential of PharmaKinetics."

PharmaKinetics Laboratories, Inc. is a leading drug development company providing services to pharmaceutical and biotechnology firms seeking new drug approvals in the United States and Europe.

#90030p0365 01/30/1990 ~PR Newswire

RICHMOND, VA (JAN. 30) PR NEWSWIRE - Universal Corporation (NYSE: UVV) announced today that earnings for the second quarter ended December 31, 1989, increased to $26,270,000 or $1.55 per share compared to $25,792,000 and $1.52 per share last year. Net income for the six-month period was $41,009,000 or $2.42 per share compared to $39,804,000 or $2.35 per share last year. Included in the fiscal 1990 six-month results is the cumulative effect of the adoption of FAS 96-Accounting for Income Taxes.

Gross revenues were $891 million the second quarter compared to $903 million last year. For the six months, gross revenues were $1.6 billion in both years.

In this country, buying orders executed for customers were above those of the comparable period last year; however, processing volume was somewhat less. Domestic tobacco earnings rose as a result of a larger volume of shipments in the period. Although orders for the U.S. Burley crop, currently being marketed, are considerably above last year, the size of the crop is not sufficient to fill these orders. Hence, the anticipated third quarter volume increase in buying and processing will not be realized. The company expects to benefit from lower processing costs on similar volume as last year.

Results from foreign tobacco operations in the quarter were below those of last year. This decline was primarily because of reduced earnings in Brazil which continued to suffer sharp increases in costs due to the government's monetary policy. Foreign tobacco earnings are expected to be up over the remaining six months of the fiscal year.

Title insurance earnings were down in the quarter and year to date. Revenues were lower in the quarter as activity in real estae markets continued to slow down. Pricing in the title insurance industry remains very competitive causing margins to be squeezed. Efforts are continuing to reduce staff and extend further cost-cutting measures. There has been some improvement in claims. During both the three and six-month period, claims were down approximately 20 percent as compared to last year. Hopefully, this trend of lower claims will continue.

Deli Universal's agri-products results were below those reported in the quarter and six-month period last year, but timber operations in Europe, an important part of the group, continued to perform well above the results for the same periods last year.

#90030p0366 01/30/1990 ~PR Newswire

CHICAGO (JAN. 30) PR NEWSWIRE - Following are two dividend releases for the Chicago Dock and Canal Trust, a real estate investment trust based in Chicago.

The dividends were declared at the January 30 meeting of the Trust's board of trustees, to shareholders of record as of Feb. 15, 1990 and April 13, 1990. Because the next meeting of the board of trustees will not take place before the declaration deadline for the April dividend payment, the board declared both dividends at this time to comply with NASD and SEC regulations.

FIRST DIVIDEND: The board of trustees of The Chicago Dock and Canal Trust (NASDAQ: DOCKS) declared a dividend of $.06 per share payable on March 1,

1990 to shareholders of record as of Feb. 15, 1990.

This dividend compares to $.06 per share for the same period last year. The Chicago Dock and Canal Trust is a real estate investment trust engaged primarily in the business of acquiring and holding real estate and interests in real estate for investment. The trust, formed in 1962, is successor to the Chicago Dock and Canal Co., founded in 1857 by Chicago's first mayor, William Ogden.

The trust's assets include ownership of a major interest in the Equitable Building and a substantial portion of the land at Cityfront Center, a major mixed-use development, both in Chicago.

The trust also owns Kipling Plaza (a 90,000-square-feet shopping center in suburban Denver), Lincoln Garden (a 73,000-sq.-ft. office complex in Tampa), Watergate Park (a 107,000-sq.-ft. office complex in Indianapolis), and One Michigan Avenue (a 144,000-sq.-ft. office building in Lansing, Mich.

SECOND DIVIDEND: The board of trustees of The Chicago Dock and Canal Trust (NASDAQ: DOCKS) declared a dividend of $.03 per share payable on April 27, 1990 to shareholders of record as of April 13, 1990.

This dividend compares to $.03 per share for the same period last year. The Chicago Dock and Canal Trust is a real estate investment trust engaged primarily in the business of acquiring and holding real estate and interests in real estate for investment.

The trust, formed in 1962, is successor to the Chicago Dock and Canal Co., founded in 1857 by Chicago's first mayor, William Ogden. ATLANTA (JAN. 30) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) has announced that Frequent Flyers traveling on Delta or The Delta Connection carriers between Feb. 1 and April 6, 1990, can earn free round-trip tickets or free First Class upgrades.

"Delta's bonus program offers the best of both worlds with appeal to all travelers," said Whit Hawkins, Delta's senior vice president - marketing, in making the announcement. "The free upgrades for First Class travel are sure to be popular with the frequent business traveler while, in addition, we offer free tickets for those passengers who prefer to earn the free travel. Members also will have the opportunity to combine these awards at the higher levels."

Passengers who fly 10 segments will earn three First Class upgrades or one free round-trip coach ticket, 18 segments earn six First Class upgrades or two free tickets, and 24 segments earn nine First Class upgrades or three free tickets. A qualifying flight segment is travel on the same Delta/Delta Connection flight number on the same date. A minimum fare of $50 for each segment is required.

Delta will enhance the use of its bonus awards as there are no advance reservation or minimum stay requirements for the use of Delta's free tickets, Hawkins noted.

The upgrades may be used for travel between Sept. 4, 1990, and May 31, 1991. The upgrades are not applicable with certain deeply-discounted fares, but there are no blackout dates.

The free tickets are valid for travel between Sept. 4 and Dec. 14, 1990. Seats are limited, and there is a Thanksgiving blackout period. The free tickets may be transferred to a family member.

The free tickets are valid for travel on Delta or The Delta Connection carriers within the contiguous 48 states, Canada, the Bahamas, Bermuda, Puerto Rico and Mexico. Frequent Flyers in Alaska and Hawaii may travel to the other specified destinations. The First Class upgrades are valid

for travel on Delta only.

COLUMBUS, OH (JAN. 30) PR NEWSWIRE - Banc One Corporation (NYSE: ONE) announced today that it has completed its initial equity investment in Bank One, Texas, NA in Dallas, Texas. Bank One, Texas will have assets of $11 billion of which approximately $2.5 billion are contained in a special collection pool administered for the benefit of the FDIC. The transaction has created a strong equity capital position of $450 million in the bank. Bank One, Texas operates 63 banking offices located in major markets throughout Texas.

Today's action involves the purchase by Banc One of the Class A voting stock of the bank and an equity investment by the FDIC in the Class B and C shares of the bank. Banc One has committed to purchase all of the B and C shares from the FDIC over a period of the next five years. Banc One's ownership will be accounted for under the equity method until it has acquired over 50 percent of the total shares from the FDIC.

John B. McCoy, chairman and chief executive officer of Banc One, said that "We are delighted that Bank One, Texas is on board. We see great opportunity to develop this banking franchise in the near future."

Banc One Corporation has assets of $26.6 billion and common equity of

$2.25 billion at year end 1989. Banc One Corporation now operates banking organizations in Indiana, Kentucky, Michigan, Ohio, Wisconsin and Texas with 626 offices.

LOWELL, MA (JAN. 30) PR NEWSWIRE - COMFED BANCORP, INC. (AMEX: CFK) today reported a net loss of $6 million, or 71 cents per share for the quarter ended Dec. 31, 1989, compared to a net loss of $1.4 million or 16 cents per share for the comparable quarter ended Dec. 31, 1988.

The $6 million operating loss reported by COMFED for the current quarter is a direct result of continuing problems in the bank's real estate loan portfolio. Non-performing commercial, income property and construction loans increased by $13 million during the quarter; and non-performing single-family residential loans increased by $8.4 million. At the end of the quarter, COMFED's non-performing loans totaled $124.8 million, reflecting further deterioration in the New England real estate market.

For the nine months ended Dec. 31, 1989, COMFED's net loss was $9.6 million or $1.15 per share compared to net income of $17,000 for the similar nine-month period ended Dec. 31, 1988.

COMFED Bancorp, Inc. is a $1.5 billion asset holding company headquartered in Lowell, Mass. Stockholders' equity at Dec. 31, 1989 was $75.2 million, or $9 per share. COMFED engages in residential mortgage lending, loan servicing, and retail banking through its principal operating divisions: COMFED Mortgage Company and COMFED Savings Bank.

#90030p0386 01/30/1990 ~PR Newswire

LANCASTER, PA (JAN. 30) PR NEWSWIRE - Year-end financial results for 1989 released today by Armstrong World Industries, Inc. (NYSE: ACK), showed the company reporting record sales and net earnings for the sixth consecutive year.

Company sales from continuing businesses in 1989 reached $2.51 billion, 10 percent higher than the comparable 1988 figure of $2.29 billion. Earnings after-tax from continuing businesses were $153.7 million, compared with

$151.0 million in 1988, a 2 percent increase.

Including the results from discontinued businesses and the gain from the sale of those businesses, net earnings for 1989 were $187.6 million, a 15 percent increase from the $162.7 million reported in 1988.

The discontinued businesses were the company's carpet operations and its Applied Color Systems subsidiary, sold by Armstrong late in 1989.

The fourth-quarter comparison showed that sales from continuing businesses increased by 2 percent to $617.7 million in 1989 from the 1988 level of $606.6 million. Earnings after-tax from continuing businesses were $31.4 million, up 5 percent from 1988's $30.0 million. Including the earnings from discontinued businesses and the gain from their sale, net earnings for the quarter were $55.3 million compared with $34.6 million in 1988 -- a 60 percent increase.

Primary earnings per share of common stock from continuing businesses for the full year 1989 declined to $3.17 from $3.26 in 1988. Total primary net earnings per share of common stock increased to $3.92 in 1989 from $3.51 in 1988. Fully diluted earnings per share in 1989 were $3.03 from continuing businesses and $3.72 in total.

For the fourth quarter, primary earnings per share of common stock from continuing businesses declined to 63 cents from 65 cents in 1988. Total primary net earnings per share of common stock increased to $1.17 from 74 cents during the same quarter in 1988. Fully diluted earnings per share for the quarter were 58 cents from continuing businesses and $1.07 in total.

The return on average common shareholders' equity was 17.9 percent in 1989 and 17.0 percent in 1988.

SAN JOSE, CA (JAN. 30) PR NEWSWIRE - Businessland Inc. (NYSE: BLI) an international leader in the distribution, integration and support of microcomputer and workstation systems, today announced the opening of a Businessland Rents depot in one of the country's most active rental markets -- Chicago.

Businessland Rents -- Chicago, the fourth site of this independent

Businessland division, will serve the healthy and diverse business base of the greater Chicago area.

"As corporate headquarters for many of this country's largest companies, Chicago currently has one of the most dynamic economies in the U.S.," stated Dave Fuller, general manager of Businessland Rents -- Chicago. "Key targets include a wide array of businesses such as retail food services, technology and development, financial services, banking, manufacturing and waste management."

Brian Leeland, vice president of Businessland Rents, said, "A common denominator appears to be the ability of each of these businesses to quickly implement new ways of doing business with maximum flexibility. For Chicago-based companies, renting means greater flexibility and is fast becoming a strategic advantage. Businesses with temporary training needs, varying workload cycles or contractual assignments are finding that rentals are now a viable alternative to capital purchases."

Capital conservation, sudden surges in workload, training, temporary projects system failures, and the need to evaluate and test new technologies are now day-to-day concerns for most businesses, and all contributing factors to the phenomenal growth of the PC rental market.
$300 Million Rental Market

The U.S. PC rental market is currently estimated in excess of $300 million annually, and expected to grow by 30 percent over the next two to three years, says Businessland's Leeland.

Businessland's new Chicago Rents office is part of the company's plan to expand the Rents division into at least 20 major metropolitan regions throughout the United States during the next four years. The company now has four dedicated, regional Rents facilities, including sites in Houston, Los Angeles and Pleasanton, Calif. Businessland Rents -- Chicago Backed by $1 Billion Company

The new 10,000-square foot Chicago Businessland Rents office is a dedicated, regional facility which will serve businesses of all sizes in the greater Chicago area. The Facility has a multi-million dollar inventory of brand-name microcomputers, workstations and peripherals from the industry's top manufacturers, including Apple and IBM.

Businessland Rents Chicago is fully staffed with technical, sales, and administrative personnel and draws on the resources of its $1 billion parent company to offer comprehensive start-to-finish services, including delivery, installation, integration, training and technical support.

Founded in 1982, Businessland Inc. is an international leader in the distribution, integration and support of microcomputer and workstation

systems for business. The company integrates microcomputer products from selected manufacturers to create systems tailored to specific customer needs and provides the high-level service and support to maximize their productivity.

Businessland operates centers and branch offices in 50 major U.S. metropolitan markets, five metropolitan areas in Great Britain, two in Canada and two in West Germany. It reported sales of $1.2 billion in fiscal 1989.

LAS VEGAS, NEV (JAN. 30) PR NEWSWIRE - National Heritage Industries (NASDAQ: NHER), general partner of Heritage Hotel Limited Partnership I, announced today that a loan of $10,200,000 from Valley Bank of Nevada has been completed for the construction financing of the Chaparral Hotel/Casino. The construction will begin immediately and it is expected that the 312-room hotel and casino will be open in the fall of this year.

A franchise agreement has been reached with Hospitality International and the Chaparral shall become part of the Master Host Resort Hotel worldwide reservation system. The completed hotel/casino will include three restaurants, live entertainment, two pools, spa and complete casino gaming facilities.

Additionally, it was announced that the Chaparral Hotel/Casino project has received a MAI appraisal which now values the completed project at

$24,000,000. The major factors taken into account in completing the MAI Appraisal are the Hotel/Casino's close proximity to the Las Vegas Convention Center, and the $109,000 monthly lease payments from United Coin Machine Co. for the food, beverage and gaming interests in the project. National Heritage has a long standing reputation for quality construction in the Las Vegas and Southern California markets, and will act as general contractor for the project.

LANCASTER, PA (JAN. 30) PR NEWSWIRE - Three members of Armstrong World Industries' (NYSE: ACK) senior management team, each with more than 30 years of service with the company, will retire February 1.

They are Robert H. Caldwell, senior executive vice-president and a member of the company's Board of Directors; John B. Helmer, group vice- president for Industrial Specialties Operations, and Charles A. Walker, Jr., vice-president and treasurer.

Caldwell, a 1953 graduate of the University of Illinois, joined Armstrong's Floor Division marketing organization in 1956 after service as a navy officer. Following assignments in New York City and Hartford, he became assistant district manager at Baltimore in 1962, then district manager at Buffalo in early 1964. Later that year he moved to the company's headquarters at Lancaster to become a marketing manager. In the autumn of 1967, when Armstrong formed a Carpet Division, Caldwell was named its general sales manager. He was elected a vice-president of the company and was named general manager of Corporate Markets Sales Operations in 1974. Five years later he was elected group vice-president for Carpet Operations.

He became a part of Armstrong's President's Office in 1983 when he was elected an executive vice-president and was elected to membership on the Board of Directors; his current term on the Board expires in April. Caldwell has served as a senior executive vice-president since March 1, 1988.

Helmer, who has served as group vice-president for Industrial Specialties Operations since the beginning of 1988, is a 1954 graduate of Ohio State University. He began his Armstrong association in 1956 after service as a Navy officer. He gained experience as a marketing representative in Cleveland, Los Angeles and Chicago before being named in 1965 as assistant district manager at Philadelphia for the Industry Products Division. The following year he moved to Lancaster to begin a succession of marketing management assignments.

He served as general sales manager of Corporate Markets Sales Operations from 1974 to 1979, when his election as vice-president and general manager of Corporate Markets Sales Operations and International Marketing Services became effective. In early 1981 Helmer was elected group vice-president for Industry Products and Corporate Markets Operations.

Walker is a Navy veteran who began his career with Armstrong in 1951 following his graduation from the University of Illinois. He served in several cost accounting positions. Then, in 1955, he was named assistant controller of the Deltox Rug Company, Oshkosh, Wisc., at that time an Armstrong affiliate. Six years later he became vice-president and treasurer of Deltox. Returning to the parent company in 1963, he joined the Treasurer's Office. About a year later, he was appointed the company's general credit manager. In early 1965, the Board of Directors elected him assistant treasurer and in 1968 he became senior assistant treasurer.

He was elected treasurer in early 1974 and a vice-president of the company later that year.

UPPER SADDLE RIVER, NJ (JAN. 30) PR NEWSWIRE - Using an X.400 gateway, Western Union Corporation (NYSE: WU) has linked its EasyLink electronic mail service with The Pillsbury Company's internal electronic mail system

to enable Pillsbury to communicate with its brokers and trading partners nationwide.

The installation of the X.400 gateway is a natural progression for Pillsbury, which uses Soft-Switch software to integrate computers from several vendors in an electronic mail system. In October, Western Union announced that, through its Western Union 400 service, it can interconnect customers using Western Union and Soft-Switch electronic mail products.

Pillsbury uses the new Western Union 400 connection to transmit price changes, shipping information, new product announcements, and information about special promotions to approximately 75 brokers who sell Pillsbury food products to grocery stores nationwide. Future plans call for the addition to the network of approximately 100 brokers who deal with all of Pillsbury's products.

Western Union's 400 service supplies interconnection between the EasyLink network and X.400 electronic mail systems, both domestic and international enabling all EasyLink subscribers to communicate with X.400-compliant electronic mail systems anywhere in the world.

Western Union provides a broad range of messaging, financial and other services, both domestically and internationally, to meet specific needs of business customers and individual consumers. The company is the leading provider of public electronic mail services, which enable its business customers to reach more than seven million electronic mail, fax and telex users worldwide.

CAMDEN, SC (JAN. 30) PR NEWSWIRE - Builders Transport, Incorporated (NASDAQ: TRUK) announced today that one of its shareholders has filed a derivative lawsuit in the Delaware Court of Chancery seeking to invalidate the Employee Stock Ownership Plan ("ESOP") which the company's board of directors approved last November.

The company, its present directors and one of its former directors are named as defendants. The lawsuit purports to be brought as a class action on behalf of all of the company's shareholders.

The defendants deny that the adoption of the ESOP was improper in any respect, and they intend to defend the lawsuit vigorously.

On Jan. 29, 1990, a federal court in South Carolina denied the company's

request that two of its shareholders, David C. Walentas and Stanford M. Dinstein, he enjoined from acquiring additional shares of the company's stock prior to the trial of the company's claim that they have violated the federal securities laws.

In denying the company's request, the court relied heavily on corrective disclosure which Messrs. Walentas and Dinstein made after the litigation was commenced.

In a related development, on Jan. 19, 1990, a third defendant in the South Carolina litigation agreed with the company that he would refrain from making any effort to obtain confidential information belonging to the company. As a result, the company voluntarily dismissed its claims against that defendant.

Builders Transport is a leading, service-oriented truckload carrier that transports a wide range of commodities throughout the continental United States.

#90030p0426 01/30/1990 ~PR Newswire

PINEVILLE, LA (JAN. 30) PR NEWSWIRE - Central Louisiana Electric Company, Inc. (NYSE: CNL) reported operating results for the fourth quarter and full year ended Dec. 31, 1989, Scott Brame, president and chief executive officer, announced today.

Fourth quarter operating revenues amounted to $75,965,000, up from operating revenues of $68,476,000, reported in the final period of 1988. Net income, after preferred dividends, totaled $6,687,000, or 60 cents per share, compared with net income, after preferred dividends, of $5,458,000, or 48 cents per share, recorded in the fourth quarter of 1988. Fourth quarter earnings were higher mainly due to added revenue received as the result of extremely cold weather during the month of December.

For the year, operating revenues were $316,471,000, compared with operating revenues of $301,091,000 reported for 1988. Net income, after preferred dividends, totaled $39,884,000, or $3.55 per share, vs. net income, after preferred dividends, of $40,289,000, or $3.59 per share, in 1988. According to Brame, higher revenues in 1989 were due to a 3 percent increase in kilowatt-hour sales and to higher generating fuel prices, which have no effect on earnings since fuel costs are passed on to customers through a fuel adjustment clause. The positive income effect of higher sales and lower preferred dividend requirements was offset by higher operating expenses and increased interest expense.

Central Louisiana Electric Company operates solely in Louisiana as an electric utility serving 199,000 customers in 23 of the state's parishes.

CONTACT: David M. Eppler, vice president, or Kathleen F. Nolen, 318-484-7400, both of Central Louisiana Electric.

ROCKVILLE, MD (JAN. 30) PR NEWSWIRE - Sage Software, Inc. (NASDAQ-NMS: SGSI) has filed a registration statement with the Securities and Exchange Commission for 1,009,119 shares of common stock on Form S-3.

These shares emanate from the purchase of Polytron Corporation and were issued to the three founders of Polytron on April 25, 1989.

Under the terms of the Polytron purchase agreement, the shares were not eligible for registration until Jan. 1, 1990 and are subject to certain volume sales limitations. Sage plans to offer approximately 300,000 shares of the common stock through an underwriting or direct placement.

Thereafter, Sage's agreement with the Polytron founders restricts sales volume to the limits imposed by SEC Rule 144. Sage will not receive any proceeds from the sale of shares by the Polytron founders.

Sage specializes in development tools for users of IBM computers. Sage's worldwide headquarters are located at 3200 Tower Oaks Blvd. Rockville, Md. 20852.

#90030p0441 01/30/1990 ~PR Newswire

HOUSTON (JAN. 30) PR NEWSWIRE - Daniel Industries Inc. (NYSE: DAN) today announced a 27 percent increase in earnings for its first quarter ended Dec. 31, 1989.

The company reported net income of $1,656,000, or 16 cents per share, for the first quarter of fiscal 1990, up 27 percent, compared to $1,304,000, or 13 cents per share, for the first quarter last year. Consolidated revenues were $38,830,000, compared to $38,502,000 for the first quarter last year.

Revenues and operating income from the flow measurement segment were $22,767,000 and $3,800,000, respectively, for the first quarter of fiscal 1990, compared to $27,581,000 and $4 million in 1989. The demand for the company's traditional flow metering products remained strong, while the

cyclical nature of demand for large systems metering facilities worldwide affected first quarter revenues.

Revenues and operating income from the energy products segment were $16,063,000 and $1,150,000, respectively, for the first quarter of fiscal 1990 compared to $10,921,000 and $251,000 in 1989. The demand for the company's enhanced energy recovery products and the industrial demand for alloy stud bolts and nuts continued to be strong.

As of Dec. 31, 1989, the company's current ratio was 3.0 to 1.0, and working capital was $61 million. The consolidated backlog was $40,243,000.

Daniel Industries Inc. is a major international supplier of fluid measurement products and systems principally for oil and natural gas producers, transporters and refiners. The company also manufacturers and sells aloy stud bolts and gaskets, pipeline valves, gas lift equipment, flanges and steam generation packages.

MCCONNELLSBURG, PA (JAN. 30) PR NEWSWIRE - JLG Industries Inc. (NASDAQ-NMS: JLGI) today reported that it had completed the acquistion of U.S. Truck Cranes Inc. ("USTC"), a York, Pa.-based manufacturer of trolley-type and telescoping boom truck cranes and articulating cranes. During its fiscal year ended July 31, 1989, USTC generated approximately $9 million in revenues from equipment sales primarily to the construction industry.

As previously reported, JLG believes USTC will be an important contributor to its future growth. In commenting on the benefits of the acquisition, John L. Grove, JLG's chairman and chief executive officer, said, "We believe USTC's machines will fit well with JLG's line of products, particularly our boom truck cranes. Additionally, since USTC is currently utilizing only about one-third of its manufacturing capacity, we plan to move our boom truck crane production to its facility, thus providing capacity for other products at our McConnellsburg plant."

Grove also said that the proposed acquisition of D.L. Martin Co., which was announced earlier, is proceeding as planned and is scheduled to close in early March. D.L. Martin, located in nearby Mercersburg, Pa., reported 1989 revenues of approximately $11 million from the manufacture and sale of specialty hydraulic and automotive components.

JLG Industries Inc. is an international manufacturer and marketer of specialized hydraulic machinery, including mobile aerial work platforms and materials-handling equipment. Sales are made principally to independent distributors, which sell and rent the company's products to a broad customer base, including users in the industrial and construction markets.

The company is headquartered in McConnellsburg with additional manufacturing facilities in Fort Littleton and Bedford, Pa.; Cumbernauld, Scotland; and Port Macquarie, Australia.

WASHINGTON (JAN. 30) PR NEWSWIRE - The National Science Foundation (NSF) has designated Carnegie Mellon University (CMU) as one of the nation's three new Engineering Research centers (ERC), U.S. Rep. Doug Walgren (D-Pa.) said today.

Walgren, who chairs the Science Research & Technology Subcommittee responsible for the NSF, hailed the announcement, to be made Wednesday, Jan. 31, as "more great news for Pittsburgh as we become one of America's leading high tech centers."

Walgren said that the Engineering Research Center at CMU will focus on computer data storage systems, specifically on the speed and capacity of such systems.

"This center will increase the solid reputation Pittsburgh is already earning worldwide through the National Supercomputer Center and the Software Institute," Walgren said.

The suburban Pittsburgh congressman said that CMU would receive $1.97 million in the first year of ERC operation and total NSF support over the next five years may be as high as $14.6 million. The CMU project will be headed by professor Mark H. Kryder.

The other two Engineering Research centers will be at Mississippi State University and Montana State University.

Walgren is Pennsylvania's senior member of the House Science, Space and Technology Committee and has chaired the subcommittee responsible for the National Science Foundation since 1982.

#90030p0456 01/30/1990 ~PR Newswire

BENTON HARBOR, MI. (JAN. 30) PR NEWSWIRE - Whirlpool Corporation (NYSE: WHR) said today that it remains committed to proceeding with its amalgamation proposal with Inglis Limited of Canada, despite comments reported in the press and attributed to Stephan Jarislowsky of Jarislowsky Fraser & Co., Montreal. Under the proposal, approved by the boards of directors of Whirlpool and Inglis in December, Inglis would become a wholly-owned subsidiary of Whirlpool, and minority shareholders would receive $27.08 in cash per share for their Inglis shares. Whirlpool already holds 71.6 percent of Inglis.

Commenting on recent press reports about the price of the offer, Whirlpool North American Appliance Group Executive Vice President William Marohn said, "Whirlpool's not playing poker. We decided early on to make our best offer up front. This is it. The offer per share represents a significant premium to the highest price the stock has ever traded. It's also above the mid-point of the Burns Fry valuation range. We will not increase the offer, and we urge shareholders to vote for the proposal.

"We believe the amalgamation proposal would allow us to strengthen the operation through integration into the North American Appliance Group and to keep Inglis competitive in a very tough marketplace."

In a related announcement, Arthur Mingay, chairman of Inglis, said, "We believe that the price to be paid to minority shareholders under the proposal is fair. Our view is supported by an independent valuation prepared by Burns Fry limited and a fairness opinion of RBC Dominion securities Inc. and was reached after careful consideration by a committee of independent directors."

Mingay said that representatives of Inglis, Burns Fry and RBC Dominion Securities had met with representatives of Jarislowsky Fraser to discuss the price and other valuation issues and that he felt Jarislowsky's concerns had been adequately addressed. Mingay also said that more than 500,000 proxies have already been received, all of them in favor of the proposal.

Inglis manufactures and markets major home appliances as well as certain other related products.

Whirlpool is the world's leading manufacturer and marketer of major domestic appliances. Headquartered in Benton Harbor, Mich., the company manufactures appliances in 10 countries and sells them under nine brand names in 45 countries.

HOUSTON (JAN. 30) PR NEWSWIRE - Daniel Industries Inc. (NYSE: DAN) today announced a 27 percent increase in earnings for its first quarter ended Dec. 31, 1989.

The company reported net income of $1,656,000, or 16 cents per share, for the first quarter of fiscal 1990, up 27 percent, compared to $1,304,000, or 13 cents per share, for the first quarter last year. Consolidated revenues were $38,830,000, compared to $38,502,000 for the first quarter last year.

Revenues and operating income from the flow measurement segment were $22,767,000 and $3,800,000, respectively, for the first quarter of fiscal 1990, compared to $27,581,000 and $4 million in 1989. The demand for the company's traditional flow metering products remained strong, while the cyclical nature of demand for large systems metering facilities worldwide affected first quarter revenues.

Revenues and operating income from the energy products segment were $16,063,000 and $1,150,000, respectively, for the first quarter of fiscal 1990 compared to $10,921,000 and $251,000 in 1989. The demand for the company's enhanced energy recovery products and the industrial demand for alloy stud bolts and nuts continued to be strong.

As of Dec. 31, 1989, the company's current ratio was 3.0 to 1.0, and working capital was $61 million. The consolidated backlog was $40,243,000.

Daniel Industries Inc. is a major international supplier of fluid measurement products and systems principally for oil and natural gas producers, transporters and refiners. The company also manufacturers and sells aloy stud bolts and gaskets, pipeline valves, gas lift equipment, flanges and steam generation packages.

BUTTE, MT (JAN. 30) PR NEWSWIRE - The Montana Power Co. (MPC) (NYSE: MTP) today announced fourth-quarter net income of $23,285,000, or 47 cents per share (adjusted for a two-for-one stock split effective Jan. 10), a decrease of 11 cents per share. Fourth-quarter net income was $28,172,000 in 1988.

For the 12 months ended Dec. 31, MPC earnings rose 3 cents to $1.45 per share. MPC's net income available for common was $70,621,000 for the 12 months ended Dec. 31, 1989, compared to $68,072,000 a year earlier.

Increased sales of electricity to other utilities helped boost utility earnings by 22 cents per share during the fourth quarter of 1989. Utility operations contributed $1.12 per share this year, compared to 95 cents in 1988.

Losses associated with the company's Independent Power Group increased due to the establishment of a $19,900,000 provision for future losses on long-term sales of Colstrip Unit 4 power, after considering tax effects, resulting in total losses of 55 cents per share, compared to 28 cents per share a year earlier.

The company's Entech group gained 12 cents per share over 1988 results due to higher earnings from mining operations. Entech earned 88 cents per share in 1989, 76 cents per share in 1988.

Average shares outstanding for the quarter ended Dec. 31, 1989, were 49,222,000, after adjustment for the stock split, compared to 48,330,000 in the same period a year earlier. Average shares outstanding during the 12 months ended Dec. 31, 1989, were 48,830,000, compared to 47,896,000 in 1988 on the post-split basis.

WEIRTON, W.VA. (JAN. 30) PR NEWSWIRE - Members of the Independent Steelworkers Union have approved new 48-month labor contracts with Weirton Steel Corp. (NYSE: WS), the company announced.

A tabulation of the balloting, which was conducted by mail, was completed today.

The new pacts, which take effect as of Sept. 26, 1989, cover approximately 6,000 production and maintenance employees and about 850 unionized clerical employees.

William C. Brenneisen, vice president-human resources at Weirton Steel, said, "We negotiated fair and equitable agreements and are pleased that they passed. The agreements provide the support and flexibility necessary to continue our modernization effort."

The company also said negotiations on new contracts are continuing with the Independent Guard Union, a union representing plant security personnel and the Professional Unit of the ISU comprised of medical department personnel. In the aggregate, those units represent fewer than 100 employees.

TACOMA, WA (JAN. 30) PR NEWSWIRE - GK Carbonate, a unit of Georgia Kaolin Co., announced an agreement with Boise Cascade Corp. (NYSE: BCC), Boise, Idaho, to build a precipitated calcium carbonate (PCC) plant on-site at their St. Helens, Ore., paper mill. This 60,000 ton per year PCC facility is scheduled to be completed by April 1, 1990. The state of the art PCC facility will also supply Boise's paper mill in Vancouver, Washington.

GK Carbonate now has a total of three on-site PCC plants completed or scheduled to be constructed. Precipitated calcium carbonate is a white mineral pigment increasingly used as an additive for making alkaline or non-acid papers.

Richard D. Ryan, president of GK Carbonate, stated, "We are very pleased with this project. This is further evidence of the paper industry's confidence in GK Carbonate."

Georgia Kaolin, located in Union, N.J., is a leading supplier of kaolin clays for the paper and process industries.

DALLAS (JAN. 30) PR NEWSWIRE - Royal International Optical Corp. (NYSE: RIO) announced today that for the quarter ended Dec. 31, 1989, it had net revenues of $26,172,000 and net earnings of $398,000 or 6 cents per share. This compares to net revenues for the quarter ended Dec. 31, 1988, of $23,037,000 and net earnings of $956,000 or 13 cents per share. Net earnings for the nine months ended Dec. 31, 1989, were $3,509,000, compared to $5,175,000 for the like period in the prior year. Net earnings for the nine months ended Dec. 31, 1988, included $474,000 (7 cents per share) due to the cumulative effect of an accounting change.

The board today declared a 5 cents per share regularly quarterly dividend payable Apr. 16, 1990, to shareholders of record on Apr. 2, 1990.

Royal operates 648 retail optical stores in 35 states, compared to the 567 stores it operated at Dec. 31, 1988. Royal also manufactures, imports, and distributes optical frames.

#90030p0478 01/30/1990 ~PR Newswire

NEW BRITAIN, CT (JAN. 30) PR NEWSWIRE - "Net sales, earnings and earnings per share were all at record levels in 1989," reported Richard H. Ayers, chairman and chief executive officer of The Stanley Works. (NYSE: SWK). "Fourth quarter results were also records for these financial measures despite a slowing economy."

Net earnings for the year were $117.7 million, up 14 percent from $103.5 million earned last year. Earnings per share in 1989 were $2.71 on slightly more shares outstanding. This compares with $2.40 in 1988.

Net sales for the year were $1.97 billion, up 3 percent from 1988 sales of

$1.91 billion. The improvement in sales was the result of price increases partially offset by lower volume and unfavorable currency effects.

Gross profit margins increased as a percent of net sales from 34.4 percent in 1988 to 35.2 percent in 1989, as plans to reduce manufacturing costs succeeded. The United States tools businesses were particularly successful in reducing inventory levels. This produced a LIFO inventory gain of $8.4 million, or $.12 per share, which was offset to some degree by the higher costs associated with lower factory activity. Selling, general and administrative expenses as a percent of sales declined from 22.9 percent in 1988 to 22.8 percent in 1989, the lowest level in the past 10 years.

Interest-net expenses as a percent of net sales were reduced from 1.6 percent in 1988 to 1.3 percent in 1989 as a result of favorable cash flows from operations combined with the beneficial effect of cash from the Stanley Employee Stock Ownership Plans.

Other-net expenses increased from 0.9 percent of net sales in 1988 to 1.3 percent in 1989. The company realized a gain on the sale of a portion of its investment in the stock of Max Company, Ltd., Japan. This gain was more than offset by provisions made for environmental and legal contingencies, and plans for consolidation and closure of facilities.

The devaluation of Brazilian currency was largely responsible for foreign currency losses of $.11 per share up from $.06 per share last year. The effective tax rate for the year was 39.3 percent down from 40 percent in 1988.

Fourth quarter sales of $512 million were up 5 percent over the same quarter 1988. Net earnings were $33.3 million, up 10 percent. Earnings per share were $.77 per share, on slightly more shares, up from $.71 per share. Earnings for the quarter benefited from $4.4 million ($.06 per share) LIFO gain. Other-net expenses include provisions for consolidation and closure of facilities as well as environmental and legal contingencies. These other expenses were partially offset by a gain on the sale of a portion of Max stock. Foreign currency effect was unfavorable by $.04 in the fourth quarter compared with $.02 in 1988. The effective tax rate for the quarter was 40 percent.

Home improvement and consumer sales increased 2 percent in 1989 over the previous year. Operating profit increased 6 percent from 1988 on strong performances by hand tools, hardware and door systems. Operating profit as a percent of net sales was 12.8 percent compared with 12.3 percent last year.

Industrial and professional sales increased 5 percent for the year. Operating profit increased 8 percent from 1988 on strong performances by

Stanley-Bostitch and Stanley-Vidmar. Operating profit as a percent of net sales was 12.5 percent in 1989, up from 12.2 percent in 1988.

Ayers reported: "Five acquisitions made in third quarter 1989 are expected to make attractive contributions to sales and earnings in 1990 and beyond. These businesses will help us to achieve our strategic objectives for geographic, product line and market share growth. Careful balance sheet management enabled us to purchase these companies while maintaining total debt to total capital (39.1 percent at year-end 1989) in our target range of 35 percent to 40 percent."

"In second quarter 1989, we sold 2.9 million additional treasury and newly issued shares of common stock to the Stanley Employee Stock Ownership Plans (ESOPs). At the time of this transaction, we noted our plan to repurchase an equivalent number of shares on the open market. By year end, we had repurchased about 2.4 million shares. The long-term debt of the ESOPs was guaranteed by the company which resulted in a reduction of stockholders' equity of $95 million. As thousands of participating Stanley employees purchase stock through the ESOPs, the debt will be repaid and the reduction of stockholders' equity will be reversed. The combination of improved earnings and reduced equity resulted in a 17.2 percent return on average stockholders' equity."

FORT WORTH, TX (JAN. 29) PR NEWSWIRE - Robert H. McLean, chairman of the

board and president of Buffton Corp. (AMEX: BFX), announced today a net loss of $554,000, or 14 cents per share on revenues of $22,978,000 for its first quarter ended Dec. 31, 1989. For the same period last year, net income was $520,000, or 12 cents per share on revenues of $25,156,000.

In making the announcement, McLean stated, "Our earnings are being affected by the economic downturn in the northeast and southeast, as well as a seasonal slowdown in our PVC operations."

McLean further stated, "Our electronics businesses are being affected by a slowdown in the computer industry. We believe this softness will continue and possibly improve the beginning of our third quarter."

McLean further stated, "Because of the continuing poor market conditions in the PVC pipe and fittings industries and current softness affecting our electronics businesses, we are forecasting a loss for our second quarter. We do, however, see improvement in our earnings outlook after the second quarter."

McLean added, "We have implemented reductions in overhead at our corporate office, as well as at all of our operating subsidiaries. Production at our PVC pipe operations has been curtailed to reduce inventories and maximize cash flow."

Buffton Corp. is a diversified group of companies engaged in the manufacture of avionic, electronics, and plastic products. As previously announced, a Strategic Planning Committee of the board of directors has been appointed to evaluate certain business plan alternatives that may involve the sale of certain of these businesses.

SOUTH BEND, IN (JAN. 30) PR NEWSWIRE - Clark Equipment Co. (NYSE: CKL) today announced 1989 net income of $68.9 million, or $4.02 per share increased 50 percent from 1988 net income of $46.1 million, or $2.70 per share. Sales for the twelve months ended Dec. 31, 1989 were $1,391.9 million, up 9 percent from 1988 sales of $1,278.3 million.

In fourth quarter 1989, Clark earned $20.4 million, or $1.19 per share, an increase of 70 percent from $12.0 million, or $0.70 per share, in the prior-year period. Fourth quarter 1989 sales were $377.5 million, a 9 percent improvement from the $345.6 million sales of fourth quarter 1988.

The fourth quarter 1989 results include LIFO income of $3.3 million, offset by a $3.0 million reserve for engineering relocation costs that will be incurred during 1990 at Clark Components. In 1988, fourth quarter earnings included $3.9 million of LIFO income, $3.1 million for reserves to realistically value bonds from certain South American countries and a $2.0 million loss on the sale of two Mexican subsidiaries.

McKernan also said that VME, Clark's 50 percent-owned joint venture, produced record results for the year. ''During the past two years, VME has grown into a strong world-class competitor in the construction machinery business. Strengthened by its successful restructuring and strong markets, VME's net income contribution to Clark was $22.4 million, up from $13.1 million in 1988. Both years reflect $2.4 million of amortized goodwill on Clark's books related to the formation of the joint venture.''

Clark Equipment Co.'s business is the design, manufacture and sale of forklift trucks, construction machinery, transmissions for on-highway trucks, and axles and transmissions for off-highway equipment.

VANCOUVER, British Columbia (JAN. 30) PR NEWSWIRE - Robert G. Hunter, chairman of Continental Gold Corp. (NASDAQ: CNTVF; Vancouver: CNT.) announced today that the company's development team has commenced a $7,100,000 feasibility and government permitting program for the Mt. Milligan gold-copper project near Prince George, British Columbia. In addition he announced that Rio Algom Limited has agreed to purchase an additional 24,997 shares at a price of $10.00 per share pursuant to Rio Algom's pre-emptive right to participate in approximately 7.7 percent of all share issuances of the company.

The Mt. Milligan project is a Continental Gold Corp. 69.84 percent BP Resources Canada Limited 30.16 percent joint venture. Continental Gold is the operator. On-site, five drill rigs are completing condemnation, infill, delineation and bulk sample drilling. Off-site, mine, mill and feasibility engineering studies are underway. In the next few weeks the company will begin the British Columbia Government production permitting process with the submittal of the project's first formal document.

Mt. Milligan is the largest undeveloped gold-copper deposit in North America. A project mineral reserve in excess of 300 million tons in two deposits has been established by 310,000 feet of drilling in 406 holes. The current mineral reserve, which contains over 5 million ounces of gold and 2 billion pounds of copper should generate revenues in excess of $4 billion upon commercial production.

At a milling rate of 50,000 tons per day, the Mt. Milligan project will produce up to 400,000 ounces of gold and 100,000,000 pounds of copper on an annual basis. Established infrastructure, excellent deposit geometry, topography and metallurgy favorably combine at Mt. Milligan for large

scale, low cost open pit mine development.

Continental Gold Corp. has 7,957,799 shares outstanding and trades in Canada on the Vancouver Stock Exchange with symbol CNT and in the United States on NASDAQ with symbol CNTVF.

#90030p0503 01/30/1990 ~PR Newswire

TORONTO (JAN. 31) PR NEWSWIRE - Olympia & York Developments Limited (''Olympia & York'') announced that it made a proposal today for a ''going private'' transaction to the board of directors of GW Utilities Limited (''GW'')(AMEX: GWT) of Toronto whereby the public holders of the remaining equity interest in GW would receive Cdn. $36 per common share in cash. A special meeting of the shareholders of GW is expected to be held in the second quarter of 1990 to consider the proposed transaction. The purpose of the proposal is to afford the public shareholders of GW the opportunity to realize the value of GWs assets. The Cdn. $36 per common share represents an approximate 62.5 percent premium over the average closing price on The Toronto Stock Exchange during the past 20 trading days. The closing price of the common shares of GW on The Toronto Stock Exchange on Jan. 29, 1990 was Cdn. $21 per share. Olympia & York beneficially owns 35,088,437 common shares of GW, representing 89.33 per cent of the issued and outstanding common shares of GW.

The proposal will not be implemented unless the transaction is approved at a special meeting of the holders of the common shares of GW by a majority of the votes cast by the public shareholders of GW. The votes attaching to the shares held by Olympia & York will not be counted for the purposes of this ''majority of the minority'' vote. Completion of the transaction will be conditional upon receipt of any necessary regulatory approvals, finalization of definitive agreements and the absence of any material adverse change in the business, affairs or prospects of GW or any of its investments.

The board of directors of GW has agreed to consider the proposal.

In addition, the independent committee of GW has been authorized to engage an investment dealer to prepare an independent valuation of the common shares of GW. This valuation will be made available to the independent committee, the directors and the shareholders of GW and will be prepared in accordance with the policies of the Canadian securities commissions. It will not reflect a minority discount for the shares proposed to be acquired.

In addition, Olympia & York and GWU Holdings Limited (''GWU Holdings'') jointly announced that Olympia & York intends to sell all of the 35,088,437 shares beneficially owned by it to GWU Holdings at Cdn. $36 per share for an aggregate sale price of Cdn. $1,263,183,732. Completion of the sale is subject to receipt of all necessary regulatory approvals. GWU Holdings is a newly incorporated private corporation benefically owned, directly or indirectly, by members of the Reichmann family. The sale price for the shares to be sold to GWU Holdings will be satisfied by the payment of cash and the issuance to Olympia & York of a promissory note and Class A preference shares of GWU Holdings. Upon the sale of the GW shares to GWU Holdings, any agreements relating to the privatization of GW will be made by GWU Holdings or its wholly-owned subsidiary.

#90030p0504 01/30/1990 ~PR Newswire

FORT WORTH, TX (JAN. 31) PR NEWSWIRE - Joseph M. Grant, chairman and chief executive officer, announced that on Jan. 30, 1990, Texas American Bancshares Inc. (TAB) and its wholly-owned subsidiary, Texas American Services Inc. (TASI) closed a transaction, pursuant to an agreement announced on Jan. 3, 1990, in which TASI conveyed substantially all its assets to Team Bank, National Association (Team Bank). Simultaneously, Team Bank assumed essentially all of the liabilities of TASI. The purchase price paid by Team Bank to TASI was $30 million.

Pursuant to the terms of the transaction, TAB has agreed to a modification of the litigation currently pending in the U.S. District Court for the Northern District of Texas, in which TAB is suing the FDIC and others in connection with their seizure of certain of TAB's subsidiary banks on July 20, 1989. The litigation will be limited to the claims against the FDIC, and the relief sought will be limited to a maximum amount of $5 million. In addition, in accordance with such terms, TAB has released all other claims against the FDIC; and the FDIC, in both its corporate and receivership capacities, and Team Bank have released all claims they may have against TAB and its subsidiaries.

TAB also has signed a definitive agreement to sell two other wholly-owned subsidiaries, Texas American Life Insurance Co. and TABrokerage Inc., and certain other assets to Team Bank for $3 million. These sales are pending regulatory approval, but are expected to close on or before March 15, 1990.

In a related development, TAB announced that on January 30, 1990, the bankruptcy court in the Northern District of Texas, Fort Worth Division, entered an order compelling TAB to liquidate by transferring all of its assets to a liquidating trust created by order of the bankruptcy court. The trust will assume all of the obligations of TAB. By this action, the

outstanding shares of TAB's common stock will now evidence the beneficial interests of the shareholders of TAB in the liquidating trust. The liquidating trust will be maintained under the Bankruptcy Code and the supervision of the bankruptcy court for the benefit of creditors, interest holders, and other parties in interest in the TAB Chapter 11 proceeding, pending the confirmation of a plan of reorganization.

On Jan. 29, 1990, TAB filed a motion with the Bankruptcy Court stating its intention to submit a liquidating plan of reorganization by March 2, 1990.

#90030u0119 01/30/1990 ~United Press International

WASHINGTON (JAN. 30) UPI - President Bush and Vice President Dan Quayle got together Monday night with about 1,200 of their rich and powerful friends at the Kennedy Center for a gala anniversary blast of their first year in office.

Tony Bennett belted out ''I Left My Heart in San Francisco,'' Chubby Checker danced and sang, ''Come on baby, let's twist again,'' and Republican National Committee Chairman Lee Atwater strummed a guitar with blues legend B.B. King.

Bush and Quayle, joined by their wives, kept beat by clapping their hands.

White House Chief of Staff John Sununu bounced his feet, Sen. Alan Simpson R-Wyo., bobbed his head and Housing and Urban Development Secretary Jack Kemp nearly danced in his seat.

Yakov Smirnoff, the Russian-born comic, also got into the act by cracking a steady stream of one-liners.

''The chairman of the Republican Party plays a guitar! What a country!'' Smirnoff told the black-tie and pearled gathering that included members of Bush's administration, GOP lawmakers and RNC heavy-hitters.

Smirnoff said, ''In Russia, with glasnost, we now have free speech. But here, you have freedom after speech. It's a nice little feature.''

After all was said and done - a two-hour program that also featured singers Roberta Flack, Randy Travis, Franki Vallie & the Four Seasons and pianist Harry Connick Jr., Bush took center stage to thunderous applause.

He praised all the performers, including host Mary Hart, and gave a word of advice to Atwater, who recently cut a record with B.B. King.

''Lee, keep your day job,'' said Bush, drawing an awe-shucks look from Atwater and a howl from the crowd.

Bush used the occasion to officially ''welcome home'' Quayle from a just-completed, three-day, peace-keeping mission to Central America that the president ordered in wake of the U.S. invasion of Panama.

The president called it ''a very successful trip'' and the gathering agreed with another round of applause. The vice president, who arrived mid-way through the show, smiled and nodded.

The RNC hosted the Presidential Inaugural Anniversary Gala. Officials said about 800 in the crowd paid $1,000 each to attend. The others came as guests.

Bush said his first year in office, which he completed Jan. 20, was ''a banner year,'' noting his efforts to improve schools, combat crime and drugs and cleanup the environment.

''But the first year was, really, as I see it, just a start,'' Bush said. ''We have to achieve more in the years ahead.''

Slipping some politics into the evening affair, Bush, who earlier in the day proposed his fiscal 1991 budget to Congr rallying the crowd for a final burst of applause, said,
 ''Let's think of this era of peace and prosperity that made the '80s so special the news of the 1990s as well.''

#90030u0201 01/30/1990 ~United Press International
(JAN. 30) UPI - For the first time in a decade, the words ''dead on arrival'' were NOT heard from congressional budget leaders upon the unveiling of the fiscal year 1991 budget proposal. But it's clear President Bush's plan faces a struggle. Senate Democratic leader George Mitchell of Maine calls the nearly 307-BILLION dollars earmarked for the Pentagon- quote- ''unrealistically high.'' Other Democrats say the proposal displays a ''lack of leadership.''

Canadian military officials say rescuers are having trouble reaching the crash site of a Canadian jet fighter that went down on takeoff in the Northwest Territories. The plane went down Monday while trying to track an unarmed U-S cruise missile being tested over northern Canada. The fate of the pilot is NOT known.

Haiti's military government lifted a 30-day state of siege 21 days early Monday. In a communique read on national television, the government said the nine-day crackdown has gone far to end a ''crisis that was

handicapping the Haitian democracy.'' Left in effect by the announcement, however, were sweeping censorship rules put into effect last week by the Information Ministry.

Despite the lifting of the siege, Haitian opposition leaders are calling for a nationwide general strike Tuesday. They passed out leaflets in Port-au-Prince encouraging acts of civil disobedience- quote- ''until the departure of the dictator, General Prosper Avril .'' The leaflets urged Haitians to stop paying for electrical and telephone service and transportation fares.

#90030u0203 01/30/1990 ~United Press International

(JAN. 30) UPI - Nicaraguan President Ortega wants to pardon more than one-thousand jailed Contra rebels and 39 imprisoned former National Guardsmen. The Sandinista leader says he'll ask the National Assembly to free them before next month's scheduled national elections. Ortega says he's certain once the prisoners are released, they will successfully re-enter the country's political life.

A Maryland inventor has won his case against Ford Motor Company. A federal jury in Detroit agreed Monday with Robert Kearns's claims that the number-two automaker adopted his intermittent windshield wiper system without paying him for it. The jury will reconvene February 26th to establish how much Ford owes Kearns, who has filed suits against other carmakers... including G-M, Chrysler and a number of European and Japanese firms.

#90030u0260 01/30/1990 ~United Press International

(JAN. 30) UPI - St. John's Coach Lou Carnesecca felt before his team's Big East matchup Monday night with No. 7 Syracuse that his Redmen would have a chance to win if they could keep the score in the sixties.

Almost, Lou.

Almost was the operative word for the 19th-ranked Redmen, who yielded 70 points and blew several opportunities in the closing minutes, dropping a 70-65 decision to the Orangemen.

Billy Owens and Stephen Thompson scored 22 points each and the Orangemen

never trailed to post the win which knocked St. John's out of a first-place tie with surprising No. 14 Connecticut in the Big East.

If Syracuse, 15-3 and 6-3 in the conference, has a weakness shooting from the outside, it wasn't apparent in the first half.

Consecutive three-pointers by LeRon Ellis and Thompson put Syracuse up 29-22 with 8:25 to play in the first half, and leaving Carnesecca shaking his head.

''They say that that club can't shoot from the outside, then they come out and hit three or four three-pointers,'' he said. ''They were as hot as could be. We had to fight to stay in there.''

And fight they did. After trailing by nine early in the game, the Redmen hung tough. Led by Jayson Williams and Malik Sealy, St. John's closed within 40-36 at halftime.

St. John's, 17-4 and 6-3 in the Big East, closed to 61-59 with 4:05 to play but couldn't get the basket to tie or put them over the top. The Redmen had several opportunites in the closing stages, but missed several outside shots and committed costly turnovers.

Williams led the Redmen with 22 points and Sealy added 16.

The Orangemen, coming off a victory Saturday at Georgetown - their first at Georgetown since the Big East's inception in 1979-80 - once again were plagued by poor free-throw shooting, an Achilles heel that has cost them dearly in the NCAA tournament.

''We knew coming into this two-game road trip that it would be tough,'' Syracuse Coach Jim Boeheim said. ''We did a good job offensively in the first half, but we're still missing free throws. When Stevie (Thompson) finally got those two to go (with 5:38 to play), I knew we should be all right.''

Derrick Coleman, who scored just 7 points but grabbed 11 rebounds, said there was more than a few anxious moments down the stretch.

And as Syracuse is finding out, in the Big East you had better bring your shovel every night.

--- AROUND THE COLLEGE SCENE ---

Elsewhere in the Top 20 Monday night, No. 11 Illinois was upended by Iowa 69-67 and No. 12 Louisville crushed Southern Mississippi 105-88.

At Iowa City, Iowa, Les Jepsen made a driving lay-up with two seconds left

to give the Hawkeyes their second straight home upset of a ranked team in two weeks. The Hawkeyes, who beat No. 4 Michigan a week ago, improved to 10-8 and 2-6 in the Big Ten. Jepsen scored 18 points and grabbed a season-high 17 rebounds to lead the way. Marcus Liberty scored 20 points to lead the Fighting Illini, 15-4 and 5-4 in the conference.

At Louisville, Ky., Jerome Harmon scored 20 points and Tony Kimbro added 17 points and 9 rebounds to lead the Cardinals over the Golden Eagles. The Cardinals, 15-3 and 5-1 in the Metro Conference, placed seven players in double figures. Southern Mississippi, 11-7 and 2-3 in the league, was led by Clarence Weatherspoon with 22 points and 11 rebounds.

In other games, it was: Bucknell 74, Cornell 62; Delaware 70, Navy 51; Holy Cross 82, New Hampshire 59; Lafayette 74, Lehigh 69; Jacksonville 74, Fairleigh Dickinson 73; Maryland 89, Virginia Tech 80; Old Dominion 76, Richmond 74 in overtime; South Florida 68, Virginia Commonwealth 65; Bradley 70, Wichita State 64; DePaul 76, Miami 48; Fresno State 69, San Jose State 53; Utah 44, Colorado State 37 and San Diego State 68, Wyoming 59.

-30- 4008

#90030u0288 01/30/1990 ~United Press International

(JAN. 30) UPI - It's not often a team can shoot 37 percent from the floor and still beat the Los Angeles Lakers, but it becomes a lot easier when Magic Johnson isn't choreographing the offense known as ''Showtime.''

Willie Anderson hit two free throws, blocked a shot and a made a steal in the final 75 seconds Monday night, sparking the San Antonio Spurs to an 86-84 victory over the Lakers.

The victory was the first for the Spurs at the Forum in 15 games dating to Jan. 6, 1984. The Lakers, the last NBA team to lose its 10th game, saw a four-game winning streak snapped with only their second loss in 21 home games this season.

Los Angeles, 31-10, managed just one point above its season-low in scoring. Without Johnson, home with the flu, the Lakers committed 20 turnovers and hit just 43 percent of their shots. Replacement point guard Larry Drew had only 4 points and 8 assists.

''(Johnson) handles the ball so much and delivers it in spots the players know so well,'' Lakers Coach Pat Riley said. ''It would probably take a couple of days for us to get in sync (without Johnson).''

Still, the significance of beating the Lakers for the first time in more than six years wasn't lost on the San Antonio players.

''They'll say that Magic wasn't there, but they are still the best team in the league,'' Anderson said. ''They have a lot of heart. That's why every team shoots to be like them.''

Terry Cummings scored 20 points and rookie David Robinson added 19 points, 16 rebounds and 4 blocked shots as the Spurs avoided their first three-game losing streak of the year.

Despite shooting only 37 percent from the floor, San Antonio improved to 28-13 - the best record in franchise history at the halfway point of the season.

James Worthy, who had 32 points for the Lakers, hit a jumper with 2:30 left to tie it 82-82. But his pass was intercepted by Anderson, and that led to two free throws by Robinson that gave the Spurs the edge with a minute left.

Worthy tied it again with 40 seconds to play and the Lakers had a chance to go ahead, but Anderson swatted away Drew's layup with 16 seconds left.

San Antonio went without a timeout and Orlando Woolridge fouled Anderson with 6 seconds to play. Anderson's free throw made it 85-84.

Michael Cooper's inbounds pass was then picked off by Frank Brickowski, and Anderson added another free throw with one second remaining. Worthy was long with his potential game-tying jumper from 20 feet at the buzzer.

Anderson finished with 14 points. Byron Scott also had 14, all in the second half, for the Lakers.

--- AROUND THE NBA ---

Elsewhere in the NBA Monday night, Minnesota thrashed Sacramento 109-91, Chicago topped Atlanta 121-111 and Dallas hammered New Jersey 108-88.

Timberwolves 109, Kings 91

At Minneapolis, Randy Breuer scored 15 second-half points to ignite two surges that helped the Timberwolves top Sacramento. Minnesota, 8-33, snapped a nine-game losing streak and won for just the third time in their last 24 games. Wayman Tisdale scored 26 points and Rodney McCray added 20 points for the Kings.

Bulls 121, Hawks 111

At Chicago, Horace Grant and Scottie Pippen sparked an 18-0 first-quarter run that helped the Bulls snap Atlanta's three-game winning streak. Pippen finished with 20 points for Chicago, which moved within a game of

first-place Detroit in the Central Division. Cliff Levingston led Atlanta with 19 points.

Mavericks 108, Nets 88

At Dallas, Roy Tarpley and Derek Harper combined for 12 of the Mavericks' first 14 points in the final period in posting their sixth straight victory. Tarpley led the Mavericks with 23 points, while Harper finished with 20. The Nets, who lost for the seventh time in their last eight games were led by Sam Bowie with 13 points.

#90030u0291 01/30/1990 ~United Press International

LOS ANGELES (JAN. 30) UPI - New York Mets outfielder Darryl Strawberry was arrested on suspicion of assault with a deadly weapon during an argument with his wife, police said Monday.

Police were called to the Strawberrys' house in the Encino district early Friday morning on a domestic violence report, Sgt. Woody Baca said.

Lisa Strawberry, 25, told officers her husband slapped her face during an argument. She then grabbed a metal rod and hit her husband across the wrist and in the ribcage.

Darryl Strawberry then allegedly threatened his wife with a handgun, which was later recovered at the house, Baca said.

The weapon was a .25-caliber semiautomatic, Baca said.

Lisa Strawberry was not hurt in the incident. Her husband suffered bruises on his wrist and ribs, Baca said.

Strawberry, 27, was booked at the West Valley division station on suspicion of assault with a deadly weapon. He posted $12,000 bail and was released a short time later, police said.

Police Commander William Booth said he did not know when Strawberry would be arraigned, or the date he was scheduled to appear in court regarding his bail money.

''The last I heard, he was back with his wife living happily after,'' Booth said.

The couple had separated in 1987, and Strawberry recently was ordered to pay child support to a woman in St. Louis after blood tests revealed that he is the father of a child born in 1988.

#90030u0321 01/30/1990 ~United Press International
(JAN. 30) UPI - ALMANAC:

Today is Monday, Feb. 5, the 36th day of 1990 with 329 to follow.

The moon is waxing, moving toward full.

The morning stars are Mercury, Venus, Mars and Saturn.

The evening star is Jupiter.

Those born on this date are under the sign on Aquarius. They include British Prime Minister Robert Peel, founder of the London Police Force, in 1788; evangelist Dwight Moody in 1837; Scotsman John Dunlop, inventor of the pneumatic tire, in 1840; outlaw Belle Starr in 1848; American statesman Adlai E. Stevenson in 1900; actor John Carradine in 1906; novelist William Burroughs in 1914 (age 76); comedian-actor Red Buttons in 1919 (age 71) and baseball home-run king Hank Aaron in 1934 (age 56).

On this date in history:

In 1631, British clergyman Roger Williams arrived in Salem, Mass., seeking religious freedom. He founded the colony of Rhode Island.

In 1971, American astronauts Alan Shepard and Edward Mitchell of Apollo 14 walked on the moon for four hours.

In 1981, President Reagan, in a nationwide address, said the United States was in ''the worst economic mess since the Great Depression'' and called

for sweeping spending and tax cuts.

In 1986, world oil prices plunged toward $15 per barrel from $30 three months earlier, after OPEC failed to curb production. Prices dropped to $9 by the summer of 1986.

In 1987, the Dow Jones industrial average closed above 2200 for the first time.

In 1989, Radio Moscow announced the last Soviet soldier had left Kabul, Afghanistan.

A thought for the day: Evangelist Dwight Moody said, ''If I take care of my character, my reputation will take care of itself.''

-30- 1831
#90030u0324 01/30/1990 ~United Press International
(JAN. 30) UPI - ALMANAC:

Today is Tuesday, Feb. 6, the 37th day of 1990 with 328 to follow.

The moon is waxing, moving toward full.

The morning stars are Mercury, Venus, Mars and Saturn.

The evening star is Jupiter.

Those born on this date are under the sign of Aquarius. They include England's Queen Anne in 1665; statesman Aaron Burr in 1756; author-psychologist Walter Pitkin, author of ''Life Begins at Forty,'' in 1878; baseball great George Herman ''Babe'' Ruth in 1895; former President Ronald Reagan in 1911 (age 79); actress Zsa Zsa Gabor in 1923 (age 67); actor Rip Torn in 1931 (age 59); French film director Francois Truffaut in 1932, TV news anchorman Tom Brokaw in 1940 (age 50); and singers Fabian Forte in 1943 (age 47) and Natalie Cole in 1950 (age 40).

On this date in history:

In 1865, Gen. Robert E. Lee was appointed commander in chief of the armies of the Confederacy.

In 1943, Gen. Dwight D. Eisenhower was named commander of Allied expeditionary forces in North Africa. He later became World War Two Supreme Allied Commander in Europe.

In 1952, Princess Elizabeth became sovereign of Great Britain on the death of her father, King George VI. She was crowned Queen Elizabeth II on June

2, 1953.

In 1974, the Caribbean island of Grenada was declared independent and a member of the British Commonwealth.

In 1987, broad no-smoking rules took effect for 890,000 employees in 6,800 federal buildings nationwide.

A thought for the day: When Babe Ruth was asked in 1930 how he felt about making more money than the president, he replied, ''I had a better year than he did.''

#90030u0328 01/30/1990 ~United Press International

(JAN. 30) UPI - ALMANAC:

Today is Wednesday Feb. 7, the 38th day of 1990 with 327 to follow.

The moon is waxing, moving toward full.

The morning stars are Mercury, Venus, Mars and Saturn.

The evening star is Jupiter.

Those born on this date are under the sign of Aquarius. They include English statesman and writer Sir Thomas More in 1478; farm equipment manufacturer John Deere in 1804; English novelist Charles Dickens in 1812; Russian chemist Dmitri Mendeleyev, who devised the periodic table, in 1834; Austrian psychologist Alfred Adler in 1870; ragtime composer and piano player Eubie Blake in 1883; novelist Sinclair Lewis in 1885 and Olympic swimmer and actor Buster Crabbe in 1908.

On this date in history:

In 1940, British railroads were nationalized.

In 1956, Autherine Lucy, the first black admitted to the University of Alabama, was expelled after she accused school officials of conspiring in riots that accompanied her court-ordered enrollment.

In 1973, the Senate voted to set up a seven-member committee to investigate the break-in at Democratic National Headquarters in Washington D.C.'s Watergate complex.

In 1984, two American shuttle astronauts made the first untethered space walk.

In 1986, both Ferdinand Marcos and challenger Corazon Aquino claimed victory in the Philippine presidential election. Haiti's President-for-Life Jean-Claude Duvalier fled to France.

In 1989, an annual State Department report on international human rights accused Israel of mishandling the Palestinian uprising in the occupied territories.

A thought for the day: Author Sinclair Lewis wrote, ''People will buy anything that's one to a customer.''

#90030u0329 01/30/1990 ~United Press International
(JAN. 30) UPI - ALMANAC:

Today is Thursday, Feb. 8, the 39th day of 1990 with 326 to follow.

The moon is waxing, moving toward full.

The morning stars are Mercury, Venus, Mars and Saturn.

The evening star is Jupiter.

Those born on this date are under the sign of Aquarius. They include Civil War Gen. William Sherman in 1820; pioneer science fiction writer Jules Verne in 1828; actress Edith Evans in 1888; film director King Vidor in 1894; Chester Carlson, inventor of the Xerox copying process, in 1906; actress Lana Turner in 1920 (age 70) and actors Jack Lemmon in 1925 (age 65), James Dean in 1931 and Gary Coleman in 1968 (age 22).

On this date in history:

In 1587, Mary Queen of Scots was beheaded, charged with conspiring to murder England's Queen Elizabeth I.

In 1910, the United States became the 12th nation to join the international scouting movement.

In 1940, Nazis shot every 10th person in two Polish villages near Warsaw in reprisal for the deaths of two German soldiers.

In 1974, three American Skylab astronauts ended an 84-day orbital flight.

In 1987, a 60-day cease-fire ended between the Philippine army and communist rebels. Twenty-eight people had died in truce violations.

A thought for the day: Gen. William Sherman said, ''War is cruelty, and

you cannot refine it.''

(JAN. 30) UPI - ALMANAC:

Today is Sunday, Feb. 11, the 42nd day of 1990 with 323 to follow.

The moon is waning, moving toward its last quarter.

The morning stars are Mercury, Venus, Mars and Saturn.

The evening star is Jupiter.

Those born on this date are under the sign of Aquarius. They include Englishman William Talbot, a developer of photography, in 1800; inventor Thomas Edison in 1847; King Farouk, Egypt's last monarch, in 1920; actress Kim Stanley in 1925 (age 65); actor Burt Reynolds in 1936 (age 54) and Brazilian musician Sergio Mendes in 1941 (49).

On this date in history:

In 1858, French peasant girl Bernadette Sourbirous said the Virgin Mary appeared to her at Lourdes.

In 1945, President Franklin D. Roosevelt, British Prime Minister Winston Churchill and Soviet leader Josef Stalin ended their wartime conference at Yalta.

In 1965, U.S. and South Vietnamese planes made the first bombing raids on North Vietnam.

In 1970, Japan put a satellite in space - following in the footsteps of the Soviet Union, the United States and France.

In 1987, Corazon Aquino was sworn in for a six-year presidential term under the new Philippine constitution.

A thought for the day: Inventor Thomas Edison said, ''I have gotten a lot of results. I know 50,000 things that won't work.''

-30- 1485

#90030u0376 01/30/1990 ~United Press International

MOSCOW (JAN. 30) UPI - Azerbaijani nationalists held their grip on railroads linking the industrial southern republic of Armenia with the rest of the Soviet Union, forcing Armenian officials to announce drastic measures to avert a fuel crisis.

''The blockade has hit energy supplies the hardest. Most factories and plants stand idle, schools have no heat and there is no light in houses in the evening,'' the official news agency Tass said Monday. Food and raw materials were also reported in short supply.

The Interfax service of Radio Moscow, meanwhile, reported from Riga that representatives of the rival nationalist groups from Armenia and Azerbaijan planned to meet in the Latvian capital next week for talks.

Interfax said the talks would be mediated by officials from popular fronts in Estonia, Latvia and Lithuania and cover the Soviet intervention in the southern republics, as well as refugee and humanitarian questions.

Brokered by the Soviet army, the Armenian Popular Front last week agreed with Azerbaijani nationalists from the Azerbaijani enclave of Nakhichevan to pull forces away from the border. They also agreed to leave trains alone and settle missing civilian issues between them. That agreement appears to have held up.

In Armenia, Tass said food, fuel and raw materials headed for factories were critically short and no more than two or three days of fuel supplies were left at the Armenian oil-fired power station at Razdan and at the gas-fired station in the Armenian capital of Yerevan.

The agency said 188 trains with supplies for Armenia - one of the Soviet Union's most important industrial areas - were prevented by nationalists from traveling across neighboring Azerbaijan from the vital Caspian Sea port and railhead at Baku.

''The (Armenian) government has ordered limited use of energy at every enterprise and television transmissions have been cut,'' Tass said.

Armenia is geographically isolated and receives almost all its supplies by rail across Azerbaijan from the east. The railroad west through Georgia carries very little because of the difficult terrain.

The Armenian earthquake of 1988, ethnic troubles and strikes have all contributed to the weakening of the Armenian and thus the Soviet economy. The region is a center for the production of chemicals, automobiles, motor tires, farm machinery, electronics and lifts.

Armenia depends totally upon imported fuel and imports much of its staple food - milk, meat, sugar, butter and fish.

Moslem Azerbaijani and Christian Armenian communities in the southern republics have been locked in ethnic disputes and violence for more than two years, but the recent disturbances are the worst to confront President Mikhail Gorbachev.

About 24,000 army and Interior Ministry special troops were sent into Azerbaijan 10 days ago to halt the bloodshed, but ran immediately into violent resistance from militants of the secessionist Azerbaijani Popular Front.

In the Azerbaijani capital of Baku Monday, Tass said there was shooting overnight between troops and civilians but no one appeared hurt. The Izvestia newspaper said the situation was still tense and most factories were not working and transport was sporadic.

The agency said leaflets were being circulated urging strikes to protest

the Soviet occupation.

''These irresponsible calls are leading to a new spiral of passions and are directed at heightening tension,'' the military commandant of Baku, Vladimir Dubinyak, said in a statement Monday.

After a 10-day gap, oil drilling started again around Baku, but a spokesman for the local oil and gas association told Tass only 33 percent of wells in the area were operating and it would take up to three months to return to normal production.

Tass also reported Armenia, Azerbaijan and the disputed enclaves of Nakhichevan and Nagorno-Karabakh mostly quiet Monday, but said one man died and two others were wounded in the Armenian capital of Yerevan in an exchange of fire as soldiers tried to repossess a stolen armored car from civilians.

Soviet troops continued searching villages, towns and cities in the region especially in Azerbaijan, for weapons and arresting nationalist activists.

The Soviet authorities clamped a curfew on Baku but it was eased Sunday. At least 125 people died in violence in the city in the last 10 days - nearly 30 of them Soviet soldiers.

#90030u0399 01/30/1990 ~United Press International

CAPE CANAVERAL, Fla. (JAN. 30) UPI - An 11-ton science satellite rescued by the crew of the shuttle Columbia earlier this month appears to have suffered more wear and tear than expected during its 5.5-year exposure to the harsh environment of space, officials said Tuesday.

But such data is exactly what scientists with the Long Duration Exposure Facility - LDEF - project were looking for.

''I think there's a tremendous amount of work to do,'' said chief scientist William Kinard. ''There's a tremendous amount of data here.''

Columbia, carrying the Long Duration Exposure Facility satellite in its cargo bay, landed Jan. 20 at Edwards Air Force Base, Calif., to close out a record 11-day mission, the first of nine now planned for 1990.

Columbia was ferried back to the Kennedy Space Center last week atop a NASA jumbo jet and early Tuesday, engineers opened the spaceplane's payload bay doors, exposing the LDEF satellite to view for the first time since Columbia's crew plucked it from a failing orbit Jan. 12.

Late Tuesday, engineers planned to remove the satellite from Columbia for

a short trip to a nearby processing facility for a detailed examination.

Scientists are eager to begin inspecting the 12-sided, 30-foot-long satellite to find out what effect 5.5 years in orbit had on a variety of high-tech materials and other experiments.

Kinard was on hand early Tuesday as Columbia's clamshell-like payload bay doors were cranked open and he said the satellite appeared to have suffered more space ''weathering'' than anticipated.

''The general impression that I had, it's weathered a little bit more than I had expected,'' he told United Press International. ''Lots of discoloration, lots of fading, lots of the thermal coatings and whatever have been affected. A lot of the thin film specimens, a lot of them have completely vanished.''

LDEF was launched in April 1984 by the crew of the shuttle Challenger.

The $15 million satellite was built to do little more than serve as a carrier for 57 experiments involving dozens of materials in research primarily aimed at learning more about how to build longer-lived spacecraft.

NASA originally intended to retrieve LDEF after just 10 months in space, but the rescue mission was postponed because of a series of shuttle launch delays and, ultimately, the 1986 Challenger disaster.

In orbit more than four years longer than originally intended, officials say LDEF is a ''treasure trove'' of scientific data about the effects of long-duration spaceflight.

LDEF spent its time in orbit in a ''gravity gradient'' attitude, that is, with one end constantly facing Earth and one side constantly facing the direction of travel, allowing materials on the ''leading edge'' to be bombarded by highly reactive atomic oxygen in the outer reaches of the atmosphere.

When Columbia's crew rescued the satellite using the shuttle's robot arm, the effects of that continuous bombardment were clearly visible in the form of discoloration, ''weathered'' experiment panels and other defects, including impact damage caused by micrometeors.

Prior to Columbia's landing, scientists worried the stress and strain of re-entry and landing might cause additional damage to the LDEF experiments but Kinard said that did not appear to have happened and that Columbia's payload bay was relatively free of debris.

''I think the condition of it now is probably very similar to what it was

in orbit,'' Kinard said. ''I was amazed at how clean the payload bay floor looked.'' Once LDEF is removed from the shuttle's cargo hold, it will be transported to a special hangar-like facility at the Kennedy Space Center where it will be inspected and disassembled for analysis starting Feb. 3 or 4.

''At that point, we can really get up close and start inspecting (the experiments) tray by tray,'' Kinard said.

#90030u0400 01/30/1990 ~United Press International

WARSAW, Poland (JAN. 30) UPI - The left-wing successor to the Communist Party elected a 36-year-old as its chairman as part of its uphill effort to present a new energetic image.

Aleksander Kwasniewski received 1,049 delegate votes Monday in the closing hours of a special three-day Congress that dissolved the old Polish United Workers Party and replaced it with the Social Democracy Party after more than four decades of absolute rule in Poland.

Interior Ministry spokesman Wojciech Garstka, who put himself in the running only to offer some ''democratic opposition,'' received 63 votes and Leszek Jaskiewicz, a leader of another liberal faction in the party called the July 8 Movement, received 45.

Leszek Miller, a secretary of the old party, was approved for the position of second-in-command, general secretary, with 926 votes over three other candidates.

The new party said it would be based on the concept of parliamentary democracy and the rule of law in order to compete fairly with other emerging political parties in Poland.

The addition of fresh faces such as Kwasniewski's is expected to do little to bolster the defeatist and chaotic image the old party left behind. Among the delegates who signed on with the Social Democracy Party were many of the hard-liners who opposed reforms for so many years.

One splinter group led by former party chief of Gdansk, Tadeusz Fiszbach, has already announced formation of its own party, the Social Democrat Union, because of Social Democracy's refusal to break completely with the past. More than 100 delegates signed up, including 27 members of parliament.

Despite repeated calls for unity during the weekend, the delegates would get caught up in such issues as whether to continue to call each other ''comrade,'' to use the familiar Polish ''ty'' or ''you,'' or to use the

equivalent of ''Mr.'' and ''Mrs.''

Kwasniewski, a gifted speaker, has the support of President Wojciech Jaruzelski and former party leader Mieczyslaw Rakowski, who helped engineer his protege's rise swiftly through party ranks as an example of how youth can be effective in the party.

One communist official at the congress described Kwasniewski as ''the apple in the eye'' of Jaruzelski.

A former editor in chief of the communist youth newspaper, Sztandar Mlodych, Kwasniewski handled union problems during the historic round-table talks with Solidarity in 1989 and drew praise as a skillful negotiator.

It was the second communist party in the East Bloc to disband. Last October, the Hungarian Communist Party turned itself into a Socialist Party. In Czechoslovakia, the Communist Party will consider doing the same at a meeting of its Central Committee Feb. 17.

Before they disbanded, the Polish delegates took care to transfer its vast assets to the new one. The effort may be in vain, however, as most of those assets are expected to go back to the state.

After the communist takeover in 1948, hundreds of private businesses, estates and other property were misappropriated. A government commission has been established to determine whether the party has legal right to its properties, and if cannot provide the documentation, the assets will go to the state for further disposition.

#90030u0485 01/30/1990 ~United Press International

(JAN. 30) UPI - A powerful snowstorm buried northern New England early Tuesday, dumping up to 16 inches over parts of Vermont, while rainy weather dampened the Middle Atlantic states and skies cleared in the rain-soaked South.

Forecasters said the storm in New England dumped more than a foot of snow over western Maine, and snow and sleet in New Hampshire made driving conditions ''terrible,'' a state police dispatcher said.

In Vermont, where up to 16 inches of snow fell overnight, schools were closed and officials delayed the opening of state offices by two hours.

John Scott, a spokesman for the Vermont Department of Public Safety, said snow was falling at a rate of more than an inch an hour.

''If you have to travel, don't in Vermont,'' Scott said. ''It's just miserable driving, interstate speeds are about 30 to 35 tops, and that's taking your life in your hands.''

State police lowered the speed limit on the Massachusetts Turnpike to 40 mph because of heavy rain. Deep puddles slowed driving on many Bay State roadways. Heavy rain and sleet in the Massachusetts Berkshires turned back to snow early Tuesday, with total snowfall of between 5 to 10 inches in the past two days, the National Weather Service said.

Light rain and snow was reported across the mid-Atlantic region, where overnight lows ranged in the 20s and 30s. Rain dampened New Jersey and eastern Pennsylvania, while light rain mixed with snow was reported in West Virginia.

Light snow also was reported in western Pennsylvania, the NWS said.

A cold front that swept across the Southeast Monday, bringing heavy rain and high winds across much of the region, left evening skies clear and temperatures in the 30s.

A storm pelted eastern Georgia with golf-ball sized hail and high winds damaged a trailer park in the Ricmhond County town of Blythe, near the South Carolina line, sending six people to hospitals.

Patches of dense fog were expected across Georgia and other states in the region, with mostly sunny skies expected through Wednesday. Highs should reach the 60s across the South, except Florida, where afternoon highs should hit the 70s or low 80s.

Weather across the Midwest settled back into normal winter patterns Tuesday morning, with clouds across Wisconsin south through Illinois and Missouri and clear skies to the east in Michigan.

The weather service said temperatures in Missouri ranged from the upper 30s to 45 degrees at Joplin in the southwest part of the state. North through Illinois, temperatures cooled to the mid to upper 30s.

In the West, Oregonians braced for yet another bout of high wind and rain early Tuesday, the latest onslaught in a wild and windy January that has seen a string of storms march across the state.

A strong low-pressure center was was expected to be off the Oregon-Washington coast, causing winds to increase as it moved ashore. A high-wind warning was issued for the coast and Oregon's Willamette Valley, with more wind gusts to 60 mph expected.

Heavy snowfall was expected to continue over the Washington Cascades

during the day, with a foot likely by Tuesday night. Widespread snow also fell throught the night in eastern Washington.

In California, a vigorous weather front moved ashore Monday night, bringing moderate rain and gusty winds expected to spread over most of northern and central California.

-30- 3600

#90030u0489 01/30/1990 ~United Press International

(JAN. 30) UPI - Around the World... Around the Clock... the latest news from UPI...

White House Budget Director Richard Darman goes before the House Budget Committee this morning to defend yesterday's White House budget proposals. Democratic critics are already complaining that the budget pumps new funds into outer space and science projects, while cutting money for inner city and health programs.

Big winners in the Bush budget include NASA... S-D-I... science and math education... the war on drugs... and the Head Start program for pre-school poor children. Losers include urban mass transit... Amtrak... the school lunch program for middle-class students... and Medicare payments to doctors and hospitals.

A report says a Washington, D-C, employee has agreed to testify before a grand jury today that he was present when Mayor Marion Barry smoked crack cocaine. The testimony could lead to a perjury charge for Barry... who told a federal jury that he never used cocaine.

West German Chancellor Helmut Kohl says he will campaign in East Germany to help Christian conservative movements in the scheduled March elections. East Germany's pro-reform prime minister painted a grim picture of a breakdown of law and order in the country as more than 100-thousand people demonstrated last night for German re-unification.

East German Prime Minister Hans Modrow presented parliament with a gloomy economic report forcasting a four percent drop in East Germany's economic growth... because 350-thousand East Germans have left for West Germany. The report says 170-thousand jobs... mostly for technicians and skilled laborers... are unfilled.

#90030u0495 01/30/1990 ~United Press International
(JAN. 30) UPI - Canadian authorities are searching for the pilot of a jet fighter that crashed on take-off yesterday while trying to track a U-S cruise missile. The jet crashed in an area of far northern Canada that is always dark. Officials are hoping that the pilot ejected before the crash.

Federal agents are trying to figure out who mailed a briefcase booby-trapped with a loaded .22-caliber pistol to a federal prosecutor in New York who convicted top Asian heroin traffickers. Federal officials say it was sheer ''luck'' that the gun did NOT discharge when the package was opened.

President Bush received a thunderous standing ovation from religious broadcasters yesterday when he re-iterated his opposition to abortion and his support for a belief in God and religious-based child care. Bush celebrated his first year in office with a star-studded gala at the Kennedy Center last night.

Wisconsin state legislators are predicting that abortion opponents will prevail in two major abortion votes today. One bill dealing with parental consent for a minor's abortion and another dealing with the state's criminal abortion statute will be brought up for discussion.

Five-year-old Tony Bricker of Minneapolis is in stable condition after a postman came to his rescue. Police say the boy was playing with matches and set off a firecracker-like device that blew his hand off. Then the boy was attacked by his pit bull... trained to attack at the sound of gunfire. The postman ran into the house and got the boy to an ambulance.

-30- 1710

#90030u0539 01/30/1990 ~United Press International

MANILA, Philippines (JAN. 30) UPI - A Philippine air force T-33 trainer jet crashed shortly after taking off Tuesday, killing the flight instructor and student pilot aboard, an air force statement said.

The plane was taking off from Basa Air Base, 50 miles north of Manila, when it crashed at the end of the runway, the statement said. The cause of the crash was not immediately known and was being investigated.

Killed were flight instructor Capt. Angel Marie Pipo and his student, Lt. Artemio Protacio Jr., the statement said.

-30- 696

#90030u0602 01/30/1990 ~United Press International

(JAN. 30) UPI - Congress gets its first crack at the Bush budget today... Wisconsin legislators vote on two key abortion issues... more trouble for Washington Mayor Barry... and President Bush and Vice President Quayle celebrate their first year.

Bush administration budget director Richard Darman goes before a House Budget Committee hearing this morning to defend the president's fiscal

1991 budget.

And if yesterday's reaction to the proposed one-TRILLION, 230-BILLION-dollar package by Capitol Hill Democrats was any indication... Darman's welcome will NOT be warm.

The nearly 16-hundred-page budget calls for new funds for outer space and science projects... while cutting money for inner city and health programs.

Big winners in the Bush budget include NASA... the ''Star Wars'' missile defense system... science and math education... the Head Start program for pre-school poor children... the Stealth bomber... and the war on drugs.

The biggest losers are Amtrak... the school lunch program... low-income heating assistance... Medicare payments to doctors and hospitals... and the Pentagon.

House Budget Committee Chairman Leon Panetta of California called the budget ''a disappointment.'' In his words... ''This is a take-two-aspirin-and-call-me-in-the-morning budget instead of the major surgery we need to confront the deficit issue.''

Panetta is urging greater defense cuts than Bush proposed... as well as new taxes, contradicting a 1998 campaign pledge by Bush NOT to raise taxes.

Even some Republicans, who generally rally around a G-O-P president's budget plan, were disheartened. Senator Mark Hatfield of Oregon, the ranking Republican on the Senate Appropriations Committee... says the defense cut ''has NOT gone far enough.''

-30- 1947

#90030u0612 01/30/1990 ~United Press International

(JAN. 30) UPI - Opponents of abortion in Wisconsin expect to win two major abortion votes today... one of which could become a national test case.

Some supporters of legal abortion in the state assembly admit they doN'T have the votes to prevail today... but others refuse to predict the outcome.

One vote will be on whether to repeal a state law that makes abortion a criminal act. The law has NEVER been enforced because it was inconsistent with the Roe versus Wade decision. But abortion rights activists want it off the books in case new court cases allow the law to take effect.

The other bill would require a minor to get parental consent for an abortion.

Wisconsin Right to Life President Barbara Lyons says she expects 60 percent of legislators to vote on the anti-abortion side of the bills.

Party lines are NOT expected to be much of a factor because so many members of the majority Democratic party are opponents of abortion.

Another witness may come forward today against Washington, D-C, Mayor Marion Barry. A report says city employee James McWilliams has agreed to testify to a federal grand jury today that he was present when Barry used cocaine.

Barry has previously told a grand jury that he NEVER used cocaine. The report says today's new testimony would contradict Barry and could lead to perjury and felony charges.

The report says McWilliams has reached a plea bargain arrangement with prosecutors. He'll reportedly testify that he was with Barry when the mayor used cocaine and will enter a guilty plea to a misdemeanor charge of aiding and abetting drug possession.

Barry is being treated at a Florida substance abuse center. He was arrested January 19th after federal authorities said he was videotaped smoking crack cocaine at a hotel.

McWilliams is a former assistant attorney general of the Virgin Islands.

(JAN. 30) UPI - Defiant opposition leaders in Haiti are calling for a nationwide general strike today... one day after the Caribbean nation's military government ended a nine-day-old state of siege and immigration restrictions.

The opposition passed out leaflets in capital yesterday promoting acts of civil disobedience until the departure of General Prosper Avril . The leaflets urged Haitians to stop paying utility bills and transportation fares.

The streets of Port-au-Prince were calm yesterday and trade unions resumed operations under control of leaders who went into hiding last week.

Avril took control of Haiti in a 1988 coup by ousting another military leader, General Henri Namphy. Avril announced a 30-day state of siege January 20th... one day after a military officer's assassination.

The United States and other governments denounced Avril's measures, saying

they could jeopardize promised free elections in April to select a new civilian government.

The stars came out last night at the Kennedy Center to congratulate President Bush and Vice President Quayle on their first year in office.

Tony Bennett belted out ''I Left My Heart in San Francisco''... Chubby Checker danced and sang... and Republican National Committee Chairman Lee Atwater strummed a guitar with blues legend B-B King.

Bush told Atwater NOT to quit his ''day job.''

12-hundred guests and party big-wigs came to the one-thousand-dollar-a-plate gala... including Russian-born comedian Yakov Smirnoff. Smirnoff said reforms in the Soviet Union have brought freedom of speech... but that America allows freedom AFTER speech... which he said is a ''nice feature.''

Earlier in the day... Bush re-assured religious broadcasters of his support for the fight against abortion... for school prayer... and for religious-based day care. The broadcasters gave him a thunderous ovation. Bush told them he could NOT be president without a strong faith in God.

#90030u0634 01/30/1990 ~United Press International

(JAN. 30) UPI - A five-year-old Minneapolis boy has a quick-thinking postman to thank for saving his hand.

Officials say the youth, Tony Bricker... had his left hand was blown off by a powerful firecracker and was then bitten on the thighs by his pet pit bull, which was trained to attack at the sound of gunfire.

Bomb squad Sergeant David Estenson says the boy apparently had been playing with matches in an upstairs bedroom when an a homemade firecracker... three times more powerful than an M-80... went off in his hand.

The postman, Ken Soine says he had just had a sandwich when he saw one woman running down the street to a telephone and another saying, ''He's dead.''

Soine ran inside the house and found Bricker walking around.

Soine says he tied a tourniquet above where the boy's hand should have been... put pressure just above the elbow... and told one woman to find the fingers and put them on ice until paramedics arrived.

Bricker is listed in stable condition following surgery.

-30- 1175

#90030u0649 01/30/1990 ~United Press International

MINNEAPOLIS (JAN. 30) UPI - A 5-year-old boy whose left hand was blown off by a firecracker and who was attacked by his pet pit bull, which was trained to attack at the sound of gunfire, was saved by a letter carrier who heard a woman screaming for help.

U.S. Postal Service employee Ken Soine's was credited with saving the life of Tony Bricker, who was listed in stable condition following surgery.

''Clearly, Ken Soine did an outstanding job of first aid, undoubtedly saving the young boy's life by stopping the flow of blood with direct pressure on the wound,'' Sgt. David Estenson said.

Estenson, a member of the bomb squad, said the boy was apparently playing with matches in an upstairs bedroom with his younger siblings and ignited an illegal firecracker in his hand.

''At that time, his pet 3-year-old pit bull attacked him repeatedly, biting him on the inner thigh area,'' Estenson said. ''The dog had been trained to attack gunfire.''

Soine said he had just grabbed a sandwich at a convenience store down the street when he saw a woman running to a telephone booth.

''All of a sudden there was another gal, I believe the mother,'' Soine said. ''I thought she was saying, 'He's dead, he's dead.' That got my curiosity.

''There was another woman holding a baby and I decided to pull over that way and see what was wrong. She said he blew his hand off.''

He said he then spotted the boy.

''His hand was gone,'' Soine said. ''I decided to run inside. The kid was walking around. Nobody was taking charge of the situation. There were other little kids running around.

''I laid him down and grabbed a rag, and tied a tourniquet above where his hand should have been, and I put pressure just above the elbow. I yelled at the gal who was there to get a blanket and find his fingers and put them on ice.

''I put the folded blanket under his head and just held the little guy there until the ambulance arrived. He kept asking me to fix his hand. The

only thing I could say was that the doctor would fix it. I don't even know his name. I'm feeling kind of bad.''

Soine said the adults in the house did not know what to do.

''I couldn't believe what was going on. It was total chaos. There were three women and they didn't have enough common sense to blow their noses. You don't let this little guy go walking around bleeding to death,'' he said.

Estenson said the firecracker was believed to be about 3 inches long and 1 inch in diameter.

''The closest thing I could say is that it was least three times more powerful than an M-80,'' he said, referring to a powerful firecracker common in the United States.

Estenson said no charges had been filed but that the case was under investigation. The dog was put in quarantine.

#90030u0676 01/30/1990 ~United Press International

SOFIA, Bulgaria (JAN. 30) UPI - Bulgarian Communists began an extraordinary party congress Tuesday with the aim of speeding up internal reforms and avoiding the humiliation suffered by their counterparts elsewhere in Eastern Europe.

Unlike Communists in Poland and Hungary, the Bulgarian Communist Party is not seeking to disband or change its name, but to recast itself as a party committed to democratization and renewal while still embracing Marxist principles.

Reflecting the emphasis on fresh starts, 85 percent of the 3,000 delegates at the opening session had never attended a Communist Party congress before, the official BTA news agency said.

The leadership also has undergone dramatic changes since the last party congress in November. Longtime leader Todor Zhivkov, a neo-Stalinist hard-liner, was ousted along with his top aides and replaced by leaders who have embraced Soviet-style reforms.

The main items on the agenda for the three-day congress are the adoption of a ''Manifesto for Democratic Socialism in Bulgaria'' as well as a new party charter that is expected to spell out the party's commitment to democratic principles.

A draft version of the new charter defines the party as a ''Marxist

political organization, which has as its direct objective the (achievement of a) democratic and humane socialist civic society.''

Under the old charter, the party described itself as the ''vanguard of the working class and a universally recognized leader of the people in the struggle for socialism and communism.''

Under new Bulgarian leader Peter Mladenov, the party has already renounced its monopoly on political power, lifted restrictions on freedom of speech and assembly, ended official persecution of the Turkish-speaking Moslem minority and promised free elections in May.

The sweeping reforms, as demanded by a growing opposition movement, have enabled the Bulgarian Communists to avoid the fate of their less-flexible counterparts in Romania and other East Bloc countries.

The party is under increasing pressure for more radical reform. Saturday, the leadership of Bulgaria's largest independent trade union demanded the resignation of the communist government, which it said had led the country to the brink of economic disaster.

Although facing a serious loss of prestige because of the abuses and repression of the Zhivkov regime, the Communist Party remains the largest political force in the country and appears to have a broader base of support than in some Eastern European nations.

Party officials claim membership continues to grow, and a recent public opinion poll published by BTA suggested that 48 percent of Bulgarians still support the Communists.

Political observers said if the party can avoid infighting over the pace and direction of change and adopt reforms quickly enough to satisfy the public, it may survive the current period of turbulence with fewer losses than any Communist Party in East Bloc.

#90030u0741 01/30/1990 ~United Press International

MOSCOW (JAN. 30) UPI - The commander of the nuclear-powered cruiser Kirov said his vessel experienced a gas leak in a steam generation system but he denied reports of a nuclear accident, the official Tass news agency said Tuesday.

Capt. 2nd Class Vladimir Rogatin said the Kirov suffered a gas leak in one of the steam generation installations separate from the reactor apparatus, Tass said.

Rogatin did not give any specifics about what he called rumors of a

nuclear accident.

''The state of the vessel and its nuclear power installation is normal,'' Rogatin said in a radio interview, according to Tass. ''All crew members are alive and in good health.''

But Rogatin conceded, ''The cruiser's duty mission was called off ahead of time, because specialists found a gas leakage in steam installation No. 1.''

He insisted there was no nuclear accident. ''The gamma radiation is 17-20 micro-roentgens per hour, which is within the limits of natural background so there is no danger either for the ship or for the lives and health of the crew.''

The Kirov has a displacement of 23,000 tons and is one of three Kirov-class cruisers in service with the Soviet Navy since 1977. All carry surface-to-air and surface-to-surface missiles and are usually deployed with the northern or Pacific fleets.

A spokesman for Jane's Fighting Ships in London said the Kirov can carry 20 SS-N-19 missiles, each with a range of 340 miles. The spokesman said the missiles are believed to be nuclear but they alo could be fitted with conventional warheads.

Last spring and summer, Soviet nuclear sumbmarines suffered three accidents in three months with the most serious on April 7 when an Alpha-II sub caught fire and sank, killing 42 crew members.

#90030u0825 01/30/1990 ~United Press International

(JAN. 30) UPI - Stock prices closed higher in thin trading on the Tokyo Stock Exchange Tuesday in reaction to stable foreign exchange and credit markets.

The Nikkei Average of 225 selected issues, which jumped 299.63 points Monday, rose 41.97 points to 37,215.67. The narrower Tokyo Stock Exchange index of all listed major shares gained 4.46 points to 2,741.22.

An estimated 450 million shares changed hands, compared with 430 million shares Monday. Advances led declines 546 to 372, while 200 issues remained unchanged.

Trading began on a bullish note as investors engaged in widespread small-lot purchases encouraged by the stabilizing foreign exchange market. Analysts said active index-linked buying pushed up prices toward the end of the session.

Large-capital steels and shipbuildings such as Kawasaki Steel, NKK, and Ishikawajima-Harima Heavy Industries ended higher. Machinery issues and chemicals were also bought along with some foods. Electrical-related issues, such as Sony, TDK and Mitsubishi eased slightly.

On the trading floor, Kawasaki Steel paced the actives, followed by Ishikawajima-Harima Heavy Industries, Sumitomo Mining, Mitsubishi Heavy Industries and NEC.

Elsewhere in Asia, prices on the Hong Kong Stock Exchange closed slightly lower in light trading on the first trading day of the Lunar New Year.

The Hang Seng Index, which gained 12.47 points last Thursday before the market took a break for the New Year holiday, eased 8.06 points to 2,760.80.

Utilities gained 15.35 points, financials lost 13.67, industrials dropped 18.43 and properties slipped 5.82 points. Turnover was 519 million shares, compared with 523 million last Thursday.

"There was absolutely no interest in the market at all," said a senior broker with a local firm. "The market was very quiet all day," said another dealer.

Stocks closed higher in moderate trading on the Singapore Stock Exchange. The Straits Times Industrial Index, which lost 7.02 points last Friday, rose 28.61 points to 1518.14. The Singapore market was closed Monday for the Lunar New Year holiday

The narrower All Singapore Index climbed 10.21 points to 424.46. Volume amounted to 90 million shares, compared with 56.5 million shares traded last Friday.

Analysts said the market reacted favorably to the surge in foreign markets. On the trading floor, Singapore Airlines (foreign shares) paced the advancing issues, followed by Singapore Airlines (domestic), Overseas Chinese Banking Corporation (foreign shares) and Singapore Land.

United Overseas Bank (warrants) led the declining issues, followed by

Material Holdings, Prima Flour, Singatronics and United Overseas Bank (foreign shares).

In Australia, a gold-led rally boosted prices on the Sydney Sharemarket as investors returned following a three-day holiday break.

The All Ordinaries Index, which gained 9.5 points last Friday, climbed 11.2 points to 1695.8.

The resources sector, which includes gold shares, outperformed industrials. as the All Resources Index rose 18.1 points to 972.4, while the All Industrials Index was up only a fraction, 0.1 point to 2643.7.

Volume amounted to 113.6 million shares, compared with 166 million traded Friday. Advances led declines 211 to 130, while 254 issues remained unchanged. The Sydney Sharemarket was closed Monday for the Australia Day holiday.

Brokers said as the Gold Index shot up 65.2 points to 1962.5 as the top golds enjoyed a run of rising bullion prices and a falling Australian dollar. The price of gold bullion in Australia has risen six percent in the past eight days.

Among the top golds, BHP Gold rose five cents to 68 cents a share, Central Norseman added five cents to 85 cents, Kidston climbed 17 cents to $3.65 and Newmont gained seven cents to $1.22.

Elsewhere, News Corp. fell 40 cents to $12.50, BHP rose 21 cents to $10.05 ANZ Bank slipped six cents to $6.32, NAB Bank eased two cents to $6.80, and Westpac Bank lost four cents to $6.06.

-30- 4218

#90030u0840 01/30/1990 ~United Press International

LONDON (JAN. 30) UPI - Stock prices were narrowly higher at midday Tuesday in thin trading on the London International stock exchange.

The Financial Times 100-stock index, which gained 14.3 points Monday, was up 3.4 points to 2,332.2. The narrower top 30 industrial average was up 0.8 point to 1,864.7.

Volume amounted to around 190 million shares, compared with 210 million shares traded during the same period Monday.

Analysts said a survey by the Confederation of British Industry that it expects lower employment and weaker domestic demand over the next four months, had little impact on investors.

With little to spur the market, traders said the market remained struck in a stalemate as investors looked to New York for direction.

Among the most widely traded stocks, British Aerospace gained ten cents to $8.78 on news the French government had approved the merger of its guided weapons business with Thomson-CSF.

Elsewhere, buyout speculation helped push insurers Guardian Royal Exchange up ten cents to $18.08 and Sun Alliance up six cents to $5.35.

(JAN. 30) UPI - Budget Director Richard Darman goes before a House panel this morning to face the slings and arrow of outraged Democrats over President Bush's proposed one-point-two-TRILLION-dollar fiscal 1991 budget. Democrats are calling for larger defense cuts and increased funds for social programs. Democratic Senator Ernest Hollings called Bush's budget ''another fraud.''

The former U-S ambassador to the Philippines says the Bush administration's proposed reduction in the U-S military presence in Asia will NOT affect political stability in the region. Former U-S Ambassador to the Philippines Stephen Bosworth said in Manila that any dismantling of overseas U-S facilities will be gradual and will NOT leave a military vacuum.

NASA officials told U-P-I early this morning that the 11-ton science package rescued from orbit recently by the crew of the shuttle Columbia appears to have suffered more wear and tear than expected during its five-year stint in space. Chief scientist William Kinard cited ''lots of discoloration, lots of fading.'' The satellite's mission was to learn how materials are affected in space.

The new left-wing successor to Poland's Communist Party has elected a 36-year-old as its new chairman. Aleksander Kwasniewski was elevated in the closing hours of a three-day Congress, which was called to dissolve the old Polish United Workers Party. It's been replaced with the Social Democracy Party after more than four decades of absolute rule in Poland.

#90030u0853 01/30/1990 ~United Press International

(JAN. 30) UPI - Ball State University sociologists in Indiana have concluded that evangelist Pat Robertson's 1988 bid for the G-O-P presidential nomination left little impact on American politics. Sociology professor Steve Johnson says the group believes that despite the large amount of media attention Robertson received... ''most Americans do NOT

want a minister as president.''

Tens of thousands of Romanian factory workers filled Victory Square in Bucharest yesterday to rally in support of the provisional National Salvation Front government. Broken glass littered the streets as government supporters smashed shop windows. Police and soldiers stood by throughout the day and evening. Fistfights also were reported among the different political factions.

A rail blockade of Armenia by Azerbaijani nationalists is forcing Armenian officials to announce drastic measures to avert a fuel crisis. The Soviet news agency Tass says food, fuel and raw materials for factories are critically short. Armenian officials say NO more than two or three days of fuel supplies are left at two important power stations at Razdan and Yerevan.

An East German government report says nearly 350-thousand East Germans fled to the West in 1989... spelling a dismal economic outlook for 1990. As a result, there are 170-thousand unfilled jobs in East Germany... 68 percent of which are for technicians and other skilled laborers. The report says the country's economic growth is expected to decrease by as much as four percent.

#90030u0888 01/30/1990 ~United Press International

MANILA, PHILIPPINES (JAN. 30) UPI - President Corazon Aquino said Tuesday business confidence has returned to the Philippines after last month's bloody coup attempt with new investments already reaching almost 20 percent of this year's target.

Speaking before a gathering of businessmen, Aquino said investments in the first 23 days of this year totaled $688 million, or 18.7 percent of the Board of Investments' target of $4 billion for 1990.

At least 119 people were killed and more than 500 wounded in the Dec. 1-9 coup attempt, the sixth and worst uprising against Aquino, who was swept to power in a civilian-backed military revolt that ousted her late predecessor Ferdinand Marcos.

"Soon after the initial shock, business promptly bounced back. Total investments, by the end of 1989, rose to a record $3.3 billion," Aquino said. The 57-year-old president said even the business community has "involved itself in movements to prevent another power grab."

"To my detractors who would dare defy the rule of law merely to satisfy their lust for power, I say: I remain firmly in control of this government and intend to do so in accordance with our constitution," Aquino said.

Retired Gen. Rafael Ileto, Aquino's national security adviser, told reporters the arrest Monday of two active officers with top coup leader Brig. Gen. Edgardo Abenina in suburban Quezon city indicated the mutineers continued to have active members in the armed forces. Ileto said the capture of Abenina weakened "a little bit" the capability of mutineers to launch another uprising.

But the West Point-trained general and former defense secretary did not rule out the possibility of another rebellion, saying, "To attempt one is easy, but to succeed is difficult as you can see by their track record."

Nearly 1,900 officers and soldiers either surrendered or were captured following the December uprising, but officials said about 1,000 remained at large.

#90030u0936 01/30/1990 ~United Press International
BANGKOK, THAILAND (JAN. 30) UPI - A senior adviser to Prime Minister Chatichai Choonhavan has offered to resign his position in an illegal logging scandal that has shaken the coalition government, a cabinet minister said.

Kitti Damnerncharnwanit, a senator and adviser to the prime minister, has offered to resign from the advisory post after his reforestation company was charged with felling trees in a forest preserve, Agriculture Minister Sanan Kachornprasat told reporters Monday.

Sanan, who has been under attack for failing to stop the destruction of Thailand's forests, said he did not know whether Kitti would also leave his appointed seat in the Senate.

Kitti is the owner of a reforestation company called Kitti Gardens, which won permission to plant eucalyptus trees on a plot of about 730 acres of "deteriorated forest" in a preserve northeast of Bangkok. Police arrested company workers and charged them with felling trees in an additional 530 acres of forest preserve.

"This is a simple case of violation of the law and punishment will be carried out according to the law," said Sanan, who inspected the area Monday. The case, however, has triggered charges that government officials helped the politically well connected businessman and caused friction among parties in Chatichai's six-party coalition.

Some observers questioned why the Agriculture Ministry, which is in charge of the nation's forests, granted eight requests for commerical reforestation from Kitti Gardens and rejected all 136 other applications for similar projects in the same area.

Piya Anginan, deputy leader of Chatichai's Thai Nation Party, angrily called for Sanan's resignation and for Sanan's party, the Democrat Party, to leave the governing coalition.

Piya said he was responding to newspaper reports that Sanan had said Piya's criticism of the agriculture ministry was sparked by the ministry's refusal to grant Piya the right to some 8,000 acres of deteriorated national forest.

Chatichai became Thailand's first elected prime minister in July 1988 after a period of 12 years when the government was headed by former army commanders. He rode a booming economy through a relatively trouble-free first year in power, but in the past few months attacks on the government and friction among the coalition parties has gradually mounted.

Forest protection has become a particularly sensitive topic where verdant forests covered more than 50 percent of the country only 40 years ago. The percentage of forest cover is now believed to be less than 20 percent and that is fast disappearing.

The government ordered an end to all commercial logging last year after devastating landslides, blamed on deforestation, killed more than 300 people in November 1988.

Despite the ban, however, there have been persistent reports of continued logging either by villagers desperate for additional farmland or by politically well-connected companies using reforestation rights to cut trees in forest areas supposedly already deteriorated by illegal logging.

#90030u0959 01/30/1990 ~United Press International

DETROIT (JAN. 30) UPI - A federal court jury sided with a Maryland inventor who said Ford Motor Co. adopted his intermittent windshield wiper system without paying him for it. The case could ultimately affect more than two dozen carmakers worldwide.

The jury, which announced its decision Monday, will reconvene Feb. 26 to establish how much Ford owes to Robert Kearns. "There aren't enough zeroes" to calculate Kearns' potential damages, said an attorney for Toyota Motor Corp., one of the other firms sued by Kearns.

The amount Kearns realizes from the case will be limited, however, by U.S. District Judge Avern Cohn's ruling that he can claim a royalty only on each wiper, rather than demanding a share of Ford's profit. Cohn said Kearns failed to prove he could have made and marketed the wiper himself.

Kearns, his attorneys and Ford representatives said they were prohibited by a gag order issued in the case to comment on the verdict. But expert observers said an appeal by the No. 2 automaker was likely.

The intermittent wipers, now used around the world, allow the driver to set the intervals at which the blades sweep across the windshield. Kearns, a University of Detroit graduate who taught engineering at Wayne State University in Detroit, said he patented the device in November 1967. Ford began putting intermittent wipers on its cars in 1969 under what it claimed were its own patents.

Kearns, who now lives in Gaithersburg, Md., filed suit in 1978. Also named in Kearns' suits are General Motors Corp., Chrysler Corp., and a host of European and Japanese firms.

Cohn put the other cases on hold while the claims against Ford were argued. "It took true grit on the part of the inventor, going up against a very formidable opponent, and it took some degree of arrogance on the part of the auto firms," said Robert Merges, a patent expert at Boston University Law School.

"Given the fact that patents seem to be gaining momentum" in recent court decisions, "it was probably a mistake to litigate this all the way to the end," he said.

#90030u0991 01/30/1990 ~United Press International
BANGKOK, THAILAND (JAN. 30) UPI - Unionized dock workers brought Thailand's main port to a halt Tuesday as they began meetings and a slowdown in support of demands to prevent private companies from operating a new seaport.

About 500 dock workers attended a general meeting to protest the government's privatization policy at the new Laem Chabang port in Cholburi 80 miles east of Bangkok. The rest of the 5,000 union workers at Bangkok Port staged a slowdown, union leaders said.

Advisers of Prime Minister Chatichai Choonhavan led by Chatichai's son Kraisak, held talks with leaders of the six port workers unions. Laddawan Chuchoy, director of the combined unions, said the talks reached no conclusions.

She said the advisers would report to the prime minister before the government considers the demands. In the meantime, she said the meetings and slowdown will continue.

Laddawan said the number leaving their jobs to attend the meetings will be increased each day. "We are not on strike but we have called for a protest to demand our rights," said Laddawan.

She said the Port Authority of Thailand, the state enterprise which currently manages Bangkok Port, should also operate Laem Chabang port, which is to begin operations next year.

The union director said the unions felt the state enterprise, which enjoys good relations with the dock workers unions, would operate the port more efficiently and provide more income to the government than private operators.

She said she feared foreign companies would exploit Thailand in operating the port. The government, however, has decided that private management of at least part of the new port would be more efficient. Laddawan said seven foreign companies have been judged qualified to bid for operation of the

port.

Montree Pongpanich, Minister of Transport and Communications, said he had offered a compromise by allowing the state to operate half the port. He said the port authority may operate two wharves in Laem Chabang in competition with private companies operating the other two wharves. Laddawan said the union has rejected the compromise.

#90030u0994 01/30/1990 ~United Press International

OUAGADOUGOU, Burkina Faso (JAN. 30) UPI - Pope John Paul II left Burkina Faso for Chad Tuesday, calling on Catholics to maintain good relations with followers of other religions.

''The Gospel respects mankind and calls on them to go ever further in love for one's neighbor,'' the pope told about 30,000 people at an open-air mass in Bobo Dioulasso, the second largest city of Burkina Faso, 210 miles from the capital.

''This should inspire your meetings and your collaboration with your Protestant compatriots, with those who are faithful to the traditional religions and with the Moslems,'' the pontiff said. ''I encourage you to pursue the inter-religious dialogue in all clarity and friendship.''

The pontiff left Ouagadougou airport shortly after 2 p.m. for the Chadian capital of Ndjamena to begin the fifth and final leg of his trip.

In a farewell ceremony at the airport, the pope said his wishes for the people of Burkina Faso include ''a development that assures to everyone the dignity of life, the means to meet the needs of his family, the possibility to be trained and make his qualities fruitful.''

On Monday the pope appealed to the world's richer nations to share their resources to relieve the misery of millions of Africans.

''How would history judge a generation that has all the means to feed the population of the planet and would refuse to do so in a blind fratricide?'' the John Paul asked in the keynote speech at the headquarters of the seven-nation West African Economic Community.

The speech marked the 10th anniversary of an appeal John Paul made in Ouagadougou in May 1980 for aid to the drought-ridden Sahel region. The pope said he made that appeal because he ''wanted to make heard the cry of innocents cut down by death or whose survival was threatened.''

''The world must know that Africa is suffering from profound poverty,'' the pontiff said. ''The available resources are in decline, the land is

becoming sterile over immense surfaces, malnutrition is chronic for tens of millions of human beings, death carries off too many children.

''Is it possible that such a situation is not felt as a wound in the side of the entire humanity?'' the pope asked.

The speech wove a common theme into the pontiff's eight-day visit to five famine-ridden countries of West and Central Africa - the Cape Verde islands and the republics of Guinea-Bissau, Mali, Burkina Faso and Chad.

The countries are among the poorest in the world, ravaged by hunger due largely to drought.

''The appeal I renew today is addressed to the people of the world, especially to those of the North, who dispose of more human and economic resources,'' the pope said.

He challenged the wealthier nations to face up to their responsibilities. ''Should not the developed societies question themselves about the model they present to the rest of the world, about the needs they have created, and also the place of origin of the riches which have become necessary to them?'' he asked.

The pontiff said the wealthier nations could promote ''real development'' only through sharing with ''partners.''

''More than goods should be shared,'' he said. ''Know-how and scientific research should be shared, the traditions and riches proper to each should be respected. That is how development can really become a human and social operation.''

The pontiff arrived Monday in Ouagadougou for the fourth leg of his trip and was greeted by President Blaise Compaore.

Burkina Faso, which changed its name from Upper Volta in 1984, declared a national holiday to mark the visit, and banners in the dusty streets of the capital proclaimed: ''Welcome John Paul II, Great Friend of the Sahel.''

The pope's 1980 appeal in Ouagadougou led to the formation of the John Paul II Foundation for the Sahel, which administers funds contributed by churches in Europe and elsewhere. The foundation has pumped hundreds of thousands of dollars into the drought-ridden region.

#90030u0999 01/30/1990 ~United Press International

MOSCOW (JAN. 30) UPI - East German Prime Minister Hans Modrow met Tuesday

with Soviet leader Mikhail Gorbachev and later rejected the idea of his nation leaving the Warsaw Pact.

Modrow also said German reunification must not be rushed.

Modrow, who arrived late Monday for a one-day visit that also included a meeting with Prime Minister Nikolai Ryzhkov, said his discussions with the Soviet leadership centered on economic questions.

At a news conference at the Foreign Ministry, Modrow was asked about reunification of the two Germanys and Warsaw Pact membership. He quickly swept aside all questions of East Germany leaving the Soviet-led military alliance.

''The German Demcoratic Republic and the Soviet Union are allies within the Waraw Pact, which is an international legal document and cannot be canceled by either party,'' Modrow said. ''It must remain in force in the future. The treaty is the basis of our cooperation.''

He said he could not rule out the future possibility of the reunification of East and West Germany and said Gorbachev took the same position Tuesday.

But Modrow said his personal view was he did not favor reunification because ''it is clear that when we talk about reunification, we must also talk about the borders of the post-war period.''

Without naming West Germany, Modrow made it clear his objection was based on difficulties West Germany faced in recognizing the Oder-Neisse border in Poland.

But he did not rule out eventual reunification, saying, ''We must be cautious and we must not put down any time limit if we want to move forward and address the issue.''

Modrow restated his agreement with West German Chancellor Helmut Kohl on moving cautiously toward a confederation between East and West Germany.

But he stressed this could only take place in the context of Europe ''in developing our European home where people can live in peace with one another.''

Modrow praised Gorbachev's policy of perestroika reforms ''without which the democratization of my country could not have taken place.''

But he said he agreed with Gorbachev ''the fanning of the nationalities question could lead to uncontrollable developments and create fear among our neighbors.''

Modrow flew into the Soviet capital late Monday night after telling the East German parliament, the Volkskammer, of growing political tension in East Germany and demands for accelerated change.

In East Germany Tuesday, more than 200,000 people demonstrated in at least seven cities to protest communist policies, while the nation's interim coalition government tried to stem a growing political and economic crisis.

As the talks with Modrow started, Gorbachev was asked by an East German journalist about Soviet attitudes toward German reunification, the official Tass news agency said.

Gorbachev replied that developments in the world, in East Germany and the U.S.S.R. demanded deep understanding and an analytical approach.

''This problem is an important issue confronting European and world policy. Time itself is affecting this process and makes it more dynamic. One must act with reponsibility and not solve this important issue in the streets,'' Gorbachev said.

The Soviet Union, which suffered severely at the hands of Nazi Germany during World War II, created communist East Germany as a means to prevent a German attack and made the country a lynchpin of the Warsaw Pact. In the past, Moscow has expressed concern about the possible reunification of the Germanys.

Gorbachev said both East and West Germany had commitments and four parties had commitments in Berlin. Those powers are Britain, France, the Soviet Union and the United States, which divided up postwar administration of the city.

''This is a European process and all this must be combined in mutual interests without limiting the (individual) interests of any side,'' Gorbachev added.

#90030u1030 01/30/1990 ~United Press International

ORLANDO, FL (JAN. 30) UPI - A three-day trial is over, but a federal bankruptcy judge has made no ruling on Braniff Inc.'s right to 11 undelivered European-built jetliners that the company agreed to buy. Braniff agreed to buy the Airbus A320s before it filed for Chapter 11 bankruptcy protection on Sept. 28.

In a bankruptcy trial that ran Friday, Saturday and Monday, the marketing subsidiary of Airbus Industrie, a four-nation European consortium that builds planes, argued the purchase contract was voided by Braniff's bankruptcy. Attorneys for the Orlando carrier argued that the agreement remains valid.

At the end of testimony Monday, U.S. Bankruptcy Judge Timothy Corcoran III took the case under advisement. A ruling is expected next week.

None of the planes has been delivered to Braniff, which made its last commercial flight Nov. 7 and its last charter flight Christmas Eve. Braniff has fought to retain the right to buy the planes and hopes to sell or lease them or the contract. "The whole value of the A320 planes is to remarket them," said Ann Cook, a Braniff spokeswoman in Kansas City.

In November, Corcoran ruled that Braniff's bankruptcy did not free another European company, GPA Group PLC, of Shannon, Ireland, from its contract to lease Braniff 26 A320s. The A320 leases are considered to be among Braniff's most valuable assets.

Braniff currently has no A320s. GPA delivered five, but when Braniff failed to make payments, GPA sued, and Braniff agreed in December to return them. On Monday, Braniff agreed to surrender 20 Boeing 727s to BRNF Liquidating Trust, a Delaware leasing company, to which it owed $8 million.

And on Jan. 19, another leasing company, Polaris Aircraft Leasing Corp., repossessed seven Boeing 737-200s for non-payment that Braniff was storing at Orlando International Airport.

#90030u1061 01/30/1990 ~United Press International

FLORISSANT, MO (JAN. 30) UPI - The FBI will investigate allegations that the Police Department violated civil rights by stopping black motorists without cause, officials said Tuesday.

St. Louis FBI bureau spokesman Dick Herman said agents have been assigned to conduct interviews and gather complaints and other documents relating to accusations against the Florissant Police Department.

Allegedly, the department has systematically stopped and detained black motorists without cause, Herman said.

The information will be forwarded to the Department of Justice, which will determine if there is sufficient evidence to make a criminal case, Herman said.

Last week, Florissant Mayor James Eagan and Ina Boon, regional director of the NAACP, requested an FBI investigation.

Boon said her office had received numerous telephone calls complaining of police harassment in Florissant.

Eagan said he believed the investigation will not result in any criminal charges against the 88-man Police Department.

''I sure hope it settles the matter,'' Eagan said. ''There are a lot of rumors and statements being made that in my opinion are not true - harassment by the police officer is the one uppermost at the moment.''

Eagan also has ordered an internal investigation within the Police Department.

#90030u1114 01/30/1990 ~United Press International

TOKYO (JAN. 30) UPI - Japan welcomed a proposed reduction in U.S. defense spending Tuesday as a step toward peace but urged the United States to

maintain its strong military presence in Asia to assure stability in the region.

Defense Secretary Dick Cheney announced plans Monday to reduce defense spending by 2.6 percent and close 47 military bases, including three Air Force bases in South Korea.

''With this, the United States has put itself on the road to disarmament and detente,'' said Japan's Defense Agency Chief Juro Matsumoto. ''It is a turning point in the American attitude toward defense.''

But the Japanese Defense Agency has argued the reduction of tension in Europe has not reached Asia and, consequently, has sought to continue Japan's defense buildup.

Japan's proposed budget for fiscal 1990 includes a 6.1 percent increase in defense spending to $29 billion, or about 10 percent of the U.S. defense budget.

U.S. forces in Asia have protected Japan in the decades since World War II allowing Japan to keep its defense budgets to a minimum. But if the United States pulls back from Asia, Japan would have to rethink the role of its military.

''Postwar Japan and Korea have never known an Asia without the United States,'' said a Defense Agency official who asked not to be identified.

''If these cuts lead to a major U.S. pullout, we will have to reevaluate what is the appropriate level of defense to protect our nation,'' the official said.

''It is difficult to imagine Asia without the U.S. military,'' he said. ''The U.S. presence is indispensable in Asia.''

Other Japanese officials voiced their expectation cuts in U.S. defense spending would not mean a general pullback from the U.S. military mission in Asia.

''I think the United States will continue to maintain the appropriate level of military presence in the Asia-Pacific region,'' said Prime Minister Toshiki Kaifu's top spokeswoman Mayumi Moriyama.

''The United States has a strong commitment in the Asia-Pacific area and that will not change with this announcement,'' said a Foreign Ministry official.

In addition to the cuts in Korea, the United States is studying plans for the withdrawal of some troops from Japan, according to Japanese media

reports.

Cheney is considering a trip to Japan in February, when he will discuss the possible partial withdrawal of U.S. Marines from southern island of Okinawa and Iwakuni, a Marine base near Hiroshima in western Japan, the reports said.

#90030u1120 01/30/1990 ~United Press International

WASHINGTON (JAN. 31) UPI - Take a good look at your wrists. Are they square or rectangular? One researcher thinks the shape may hold the answer to your risk of developing a painful and potentially disabling condition.

Carpal tunnel syndrome, caused by pressure on a nerve running through a ''tunnel'' formed by tiny wrist bones, typically strikes people who move their hands in quick, repetitive motions - from poultry pluckers to pianists.

Water-buildup from pregnancy and nerve problems linked to an underactive thyroid or diabetes can also trigger the disorder, which can create severe pain and numbness in the hands.

But there must be more. While all people working a certain job move their hands in a similar fashion, only a relatively small fraction develop carpal tunnel syndrome.

An Ohio State University medical professor who has studied carpal tunnel syndrome for decades said his work shows wrist shape may be a crucial factor.

In a three-year study of about 200 workers at a large automobile manufacturing plant in the Midwest, Dr. Ernest Johnson found nearly 80 workers complained of tingling, pain or other symptoms that might signal carpal tunnel syndrome.

Electrical tests showed three-quarters of the 39 complaining workers with ''square'' wrists did indeed have nerve damage characterstic of carpal tunnel syndrome, while only one-quarter of the 41 workers with ''rectangular'' wrists tested positive for nerve damage.

Johnson's team defined a square wrist as one nearly as thick as it is wide. More precisely, the thickness measurement is about three-quarters of the width measurement or more.

Rectangular wrists - the most common type, according to Johnson - are substantially wider than they are thick.

The Ohio State study, published in the American Journal of Physical Medicine and Rehabilitation, follows up on Johnson's earlier observations that pregnant women suffering from carpal tunnel syndrome often had square wrists.

Other unpublished findings, also based on a recent study of auto plant workers, showed 99 of 100 people found to have ''square'' wrists at their time of employment went on to develop carpal tunnel syndrome, Johnson said.

The Ohio State researcher has not specifically looked at the mechanism underlying wrist shape's possible link to carpal tunnel syndrome.

Johns Hopkins University researchers in Baltimore say their study of 15 people uncovered no link between wrist shape and the amount of room in the carpal tunnel encasing the median nerve.

''In our work, we did not find a correlation between external wrist diameter and internal size of the canal,'' said Dr. Margit Bleecker, an associate professor of neurology.

Bleecker said the only way to determine the size of the carpal tunnel is to ''look'' inside the wrist with sophisticated techniques like computerized axial tomography (CAT) or magnetic resonance imaging (MRI).

But Johnson argues that the arrangement of tendons within the wrist may be more important in determining risk for the disorder than actual dimensions of the carpal tunnel.

The Ohio State doctor speculated the way tendons are laid out in square wrists, as compared with rectangular wrists, may put greater pressure on the median nerve and leave it vulnerable to injury,

The exact distribution of wrist shapes in the population is not known, Johnson said. But in his experience, the researcher has found more women appear to have square wrists then men, fitting in with the fact that more females are afflicted with carpal syndrome than males.

To those interested in determining their wrist shape, Johnson advises buying a caliper at a drafting or medical supply store.

Use the caliper to measure both width and height at the wrist crease closest to the palm, and then divide the thickness measurement by the width measurement. A ratio of .7 or higher indicates a square wrist - and possibly an increased risk for carpal tunnel syndrome, Johnson said.

The doctor emphasized wrist shape should never be the only factor used to diagnose carpal tunnel syndrome.

''It would be accurate enough to tell a person that if he is experiencing tingling in the hands, it might be a good idea to see a doctor,'' he said. ''But it could be something else, like a circulatory problem.''

#90030u1125 01/30/1990 ~United Press International

WASHINGTON (JAN. 30) UPI - Four senators received perfect scores Tuesday from the Chamber of Commerce for their votes on legislation considered key business issues in the 1989 session.

The four scoring 100 percent were Sens. Richard Lugar, R-Ind., Christopher Bond, R-Mo., David Boren, D-Okla., and Malcolm Wallop, R-Wyo.

The chamber listed the key issues as expansion of the law which requires contractors to pay wages set by federal government for work on government projects; minimum wage increase; natural gas decontrol; immigration law related to jobs; China sanctions; line item veto; and capital gains tax.

The lowest rating given was 25 and went to Sens. Dale Bumpers, D-Ark., David Pryor, D-Ark., Paul Simon, D-Ill., Wendell Ford, D-Ky., Paul Sarbanes, D-Md., Carl Levin, D-Mich., James Exon, D-Neb., Bill Bradley, D-N.J., and Howard Metzenbaum, D-Ohio.

In all, the chamber said that 39 senators and 206 House members received a rating of 70 percent of better and added the score reflected an improvement over 1988 when 31 senators and 161 members of the House scored 70 percent or better.

-30- 1308

#90030u1139 01/30/1990 ~United Press International

HOLLYWOOD (JAN. 30) UPI - ''Driving Miss Daisy,'' with Morgan Freeman at the wheel and Jessica Tandy in the back seat, cruised right past Tom Cruise and ''Born on the Fourth of July'' last week.

The modest little story of a black chauffeur and his Southern matron employer, while playing in a third fewer theaters, surpassed the big, gaudy Vietnam War picture in the weekly box-office standings.

''Driving Miss Daisy,'' showing on only 895 screens, chugged to the top of the ranks for the first time with a gross of $5.7 million and an impressive $6,375 per-screen average in its seventh week. It has now grossed $16 million.

An increase of some 500 screens and a boost from three Golden Globe Awards (for best actor, actress and comedy), helped the touching story of friendship between a cranky Jewish matron and her wise, deferential

chauffeur jump 116 percent over the previous week.

''Born on the Fourth of July,'' on the other hand, fell off 25 percent in its sixth week in ringing up a gross of $4.6 million on 1,311 screens. The per-screen average was $3,540. In six weeks in wide release it has amassed $39.1 million.

Dancing along in third place and dropping 17 percent was ''Tango & Cash,'' the violent Los Angeles cop buddy picture starring Sylvester Stallone and Kurt Russell.

''Tango & Cash'' nabbed $3.5 million last week in 1,575 theaters for a six-week total of $49.4 million.

Michael Douglas and Kathleen Turner continued to draw customers to see their outrageously violent divorce didos in ''The War of the Roses'' at 1,523 theaters.

Last week the black, black comedy with the horrific ending rang the cash registers to the tune of $3.2 million for an eight-week tally of $71.4 million. It was No. 4.

Richard Gere's new crooked-cop picture, ''Internal Affairs,'' couldn't seem to get untracked in its third week with a No. 5 gross of $3.1 million on 986 screens. It has grossed $15.6 million in three weeks.

An upbeat note in a time of traditional box-office doldrums was the fact that all the current top-10 pictures earned at least $1 million for the week.

On the other hand, theaters across the country took a beating on Super Bowl Sunday as tens of millions of people opted to stay home to watch the San Francisco 49ers blow out the Denver Broncos in a historic mismatch.

Still, the overall box-office receipts for the week in North America's 23,000 theaters was $81.4 million, up from record-setting 1989's $74.9 million for the equivalent week. So far this year domestic box-office grosses total $283.7 million as opposed to last year's $269.9 million.

The top 10, last week's gross, total gross, weeks in release:

1. ''Driving Miss Daisy,'' $5.7 million, $16 million, 7 weeks.
2. ''Born on the Fourth of July,'' $4.6 million, $39.1 million, 6 weeks.
3. ''Tango & Cash,'' $3.5 million, $49.4 million, 6 weeks.
4. ''The War of the Roses,'' $3.2 million, $71.4 million, 8 weeks.
5. ''Internal Affairs,'' $3.17 million, $15.6 million, 3 weeks.
6. ''Tremors,'' $3.15 million, $7.8 million, 2 weeks.
7. ''Always,'' $2.4 million, $34.1 million, 6 weeks.

8. ''Steel Magnolias,'' $2.3 million, $64.1 million, 11 weeks.
9. ''The Little Mermaid,'' $2.1 million, $68 million, 11 weeks.
10. ''Back to the Future 2,'' $1.7 million, $109.8 million, 10 weeks.

#90030u1146 01/30/1990 ~United Press International
GENEVA, SWITZERLAND (JAN. 30) UPI - Major trading nations agreed Tuesday on a March 15 deadline for making tariff reduction offers at the Uruguay Round trade liberalization talks.

The Uruguay Round began in 1986 within the framework of the General Agreement on Tariffs and Trade and is scheduled to be concluded by the end of this year. European Community delegates have warned recently that negotiations were dragging and the entire exercise could be threatened.

GATT spokesman David Woods welcomed the firm March 15 deadline for tariff reduction offers as "a considerable step forward." It was also agreed that participating countries should meet April 18 to review and assess each other's offers and effort to make demands for improvements by April 30. One of the basic Uruguay Round objectives is an average 30 percent reduction of all tariffs on imports.

Earlier this month it was agreed to make offers and demands by May on free trade in the service industry sectors like insurance and banking, with a draft framework accord in that area completed by July 20.

There was still no fixed negotiating schedule for the vital agricultural sector, however, with the United States and European Community at loggerheads over E.C. subsidies to farmers.

(JAN. 30) UPI - Czechoslovakia's Interior minister says the threat of a coup against the provisional government exists from elements of the recently dissolved internal security forces. Last Friday, the Ministry ordered army units to re-inforce regular civil police patrols to soothe rumors of a coup attempt.

The Soviet news agency Tass says the subject of German reunification came up as journalists questioned Soviet President Gorbachev during his talks today in Moscow with visiting East German Prime Minister Modrow. Gorbachev replied that one must act with reponsibilty and NOT solve the issue ''in the streets.''

Israel's ambassador to Denmark says Israeli and East German envoys began sensitive discussions yesterday on the possibility of resuming diplomatic relations. East Germany refuses to accept any moral responsibility for the Nazi Holocaust in which an estimated six-Million Jews were killed.

Police in South Africa fired teargas and rubber bullets to disperse a crowd of blacks demonstrating against a boycott-breaking tour by English cricket players. Protest organizers say 69 people were arrested. Police say NO injuries were reported in last night's incident.

Christian sources in Lebanon say a U-S-made car once owned by executed Romanian President Ceausescu was sold secretly to a Lebanese in the Christian sector of Beirut. An informed source says the UNidentified owner of the 1969-model black Cadillac wants to avoid any publicity about the sale.

GREENWOOD, SC (JAN. 30) UPI - Sara Lee Corp. said Tuesday it planned to build an $80 million knitting plant that would employ about 600 people in an area hurt by the loss of thousands of textile jobs in the 1980s.

The facility, to be built off U.S. Highway 25 between Ware Shoals and

Greenwood, will be part of Sara Lee's Hanes Knit Products Group, based in Winston-Salem, N.C., and is a leading producer of men's and boys' underwear, T-shirts, and sweatsuits. The Greenwood County plant will produce fabric for Hanes Printables, executives said.

Construction on the 500,000-square-foot building is scheduled to begin in late March, and production is expected to commence in March 1991. Company officials said plans include a second phase that would increase the total investment to $150 million and bring the employment potential to 1,000.

"With our current and projected growth, a new textile plant is vital to our expansion efforts," said Jack Ward, chief executive officer of Sara Lee Knit Products. "We were attracted to this site in Greenwood County because of the availability of the work force, job training support, water and wastewater treatment capacity."

The announcement provided a major boost for Greenwood County, which lost 900 textile jobs in 1985 when Riegel Textile Corp. closed its Ware Shoals plant. Three years earlier, Riegel had cut 850 jobs at the facility.

The Hanes group employs about 20,000 workers at 33 plants, most of them in North Carolina, Virginia, and Georgia. It held 24 percent of the men's and boys' underwear market at the end of 1989, according to Sara Lee's annual report.

WASHINGTON (JAN. 30) UPI - Five senators said Tuesday it was ''outrageous'' that the Army has decided not to award the Combat Infantryman's Badge to women who were in combat during the invasion of Panama.

Sens. Howard Metzenbaum, D-Ohio, Kent Conrad, D-N.D., Thomas Daschle, D-S.D., Quentin Burdick, D-N.D., and Paul Simon, D-Ill., registered their protest in a letter to Army Secretary Michael Stone.

''We believe it is outrageous that the Army refuses to acknowledge the service under fire of these female soldiers,'' they said.

The senators added, ''Men and women American soldiers fought side by side in Panama for the first time in history.

''We understand the Army is firm in its objection to women in combat,'' they said. ''But women were in combat in Panama, and deserve full recognition of their accomplishments and courage in behalf of the American people. They should be given the Combat Infantryman's Badge.''

Under Army policy, women are prohibited from serving in combat units. An Army spokesman said the Combat Infantryman's Badge is only awarded to those who serve in the infantry - a combat position. The spokesman said women soldiers are able to receive other medals, however.

The women soldiers who came under fire during the invasion of Panama were assigned to a military police unit.

''The contention that they were assigned to a military police unit rather than an infantry unit is irrelevant given the fact that soliders from both units were engaged in life-threatening combat situations,'' the senators said.

GENEVA (JAN. 30) UPI - A U.N. Human Rights Commission report said Tuesday violent death and corruption is out of control in Guatemala and the government is powerless to protect the people.

The report was presented to the commission's 46th annual session by special investigator Hector Gros Espiell of Uruguay.

Assassinations and other violent deaths continue unabated and ''reflect a situation of uncontrolled violence. The government has neither the power nor the authority necessary to guarantee the exercise of human rights,'' the report said.

''It exists in fear as a prisoner of forces which it cannot control.

''Guatemala represents a tragedy and a terrible problem which has not been resolved and for which there is no outlook for an early solution,'' Gros Espiell reported.

He said the illiteracy rate is 42 percent, unemployment 46 percent and 85 percent of the population live in poverty.

The country is plagued by drug trafficking and traffickers, government and rebel violence and corruption.

On the ''rare occasions'' when there is an official investigation, it is quickly abandoned because of threats, he said.

BERN, SWITZERLAND (JAN. 30) UPI - The Swiss government said Tuesday it provisionally returned as incomplete a Romanian request for aid in tracing funds believed hidden in Switzerland by the late dictator Nicolae Ceasescu.

But Swiss bank accounts held by Ceausescu and his family will remain frozen pending receipt of evidence the funds funds exist, a Justice Ministry official said. Romanian authorities and exile groups say Ceausescu stashed $100 million to $400 million in Switzerland, much of it in gold.

Swiss banking secrecy laws bar banks from making any disclosures except by a court order - issued only if a requesting government gives proof of activity which would also be criminal in Switzerland. It must prove the accounts exist and that the funds in them were ill-gotten.

Swiss authorities just before Christmas provisonally ordered banks to block until Jan. 31 any Ceausescu family accounts pending a formal Bucharest request for legal assistance. Such a request arrived Monday but was determined to be legally inadequate, the Swiss spokesman said.

"Naturally any accounts that may exist will remain frozen to give Romania additional time to present its request in due and proper form," he said. But recovering funds can take years of expensive legal fighting.

In the case of monies deposited by late Philippine president Ferdinand Marcos and Haitian dictator Jean-Claude "Baby Doc" Duvalier, disclosure requests were made in 1986. Lower courts in Switzerland ordered disclosure but lawyers for the Marcos and Duvalier families appealed. Even if state appeal courts uphold the previous decision, appeals can be made all the way up to the Swiss Supreme Court.

Ceausescu and his wife, Elena, were executed on or about Christmas Day by the Romanian provisional government formed after his overthrow.

#90030u1202 01/30/1990 ~United Press International
EAST BERLIN (JAN. 30) UPI - Former hard-line communist leader Erich Honecker was released from investigative custody Tuesday, a day after being jailed to await trial on charges of treason and official corruption.

Wolfgang Vogel, a lawyer representing the ailing former leader, said an East Berlin court rejected an appeal by East Germany's prosecutor general to keep Honecker in custody.

Vogel would not say when Honecker was released or where he was taken.

Honecker was taken into investigative custody Monday after his release from the East Berlin hospital where he underwent surgery to remove a malignant kidney tumor.

But Dieter Plath, a spokesman for the East German general prosecutor's office, said Tuesday a judge late Monday refused to issue an arrest warrant for Honecker, apparently because of the disgraced former leader's failing health.

The detention of Honecker, who faces charges of high treason, was criticized by his doctors and also by leading West German politicians.

Egon Bahr, a leader in West Germany's opposition Social Democratic Party, said Tuesday that Honecker's arrest ''violated humanitarian principles.''

''There is no doubt that Honecker should be made to answer for his deeds '' Bahr said. ''But putting him in prison, while satisfying those seeking revenge, is not in keeping with the principles of a constitutional state.''

Honecker, 77, was ousted Oct. 18 after a peaceful pro-democracy movement swept the country. He and several other old guard leaders have since been accused of abuse of power and corruption.

Friedrich Wolf, a lawyer representing Honecker, said said there appeared to be a sharp split in opinion between prosecutors and the judiciary over whether Honecker should be detained until he goes on trial in March.

''Prosecutors are apparently intent on satisfying the anger of the people and are insisting that he be held,'' Wolf said.

Wolf said defense attorneys were surprised by the judge's initial decision not to issue the warrant.

''I never thought I would find a judge in East Germany that would turn down an arrest warrant against Honecker,'' he said.

Wolf said Honecker was suffering from ''general depression'' after his incarceration.

Honecker was placed under house arrest in December at the height of a scandal over corruption and abuses of power by former communist leaders.

The revelations incensed the East German population and fueled stronger calls for the communists to be stripped of all political power.

On Monday, more than 200,000 people demonstrated in at least seven East German cities to protest communist policies, as the nation's interim coalition government struggled to prevent further political and economic collapse.

In the city of Leipzig, more than 120,000 people turned out for the now usual Monday night demonstrations. Marchers chanted anti-communist slogans and called for the immediate reunification of East and West Germany.

Rallies were also held in Dresden, Karl-Marx-Stadt, East Berlin, Halle, Schwerin, Cottbus and other cities.

About 85,000 people marched through the streets of Karl-Marx-Stadt chanting slogans ridiculing the Communist Party and waving West German flags.

Workers in several cities also staged brief warning strikes to protest the slow pace of reforms.

Earlier Monday, East German Prime Minister Hans Modrow warned against further labor unrest, which he said would only deepen the nation's economic crisis.

The reform-minded leader outlined plans for the formation of a caretaker, non-partisan government to stand until the nation's first free elections in 40 years are held March 18.

The agreement to form the new government, which will also include members of the country's fledgling opposition, was worked out Sunday during round-table negotiations.

Free elections were to be held May 6, but a mounting political crisis forced Modrow's increasingly shaky government to move them up.

''Considering the questionable ability of the present cabinet to govern - due to increasing political destabilization - the change of election dates appears reasonable,'' the Communist Party daily Neues Deutschland said in a commentary Tuesday.

East Berlin's Berliner Zeitung newspaper also approved of the move to reschedule the elections, saying that the country ''has become hardly governable.''

Leaders of East Germany's Christian Democratic Union party on Tuesday accused the Social Democrats of engineering the change to take advantage of the chaotic political developments.

The Social Democrats have gained widespread public support in recent weeks.

The 10-week old communist-led administration has come unde sharp attack for failing to keep up the pace of reform inaugurated after a popular uprising last fall forced the resignation of the country's hard-line communist leadership.

In an address to Parliament Monday before leaving for Moscow for talks with Soviet leaders, Modrow painted a bleak picture of the nation's economic and political situation.

He said the country faced growing social unrest and that the economy had

deteriorated sharply due to the mass exodus of East Germans to West Germany.

Modrow said that almost 350,000 East Germans had migrated West in 1989 and that 170,000 jobs were vacant as a result of the exodus.

West German figures released Monday indicated that 50,000 East Germans had left for the West in January alone.

#90030u1312 01/30/1990 ~United Press International

WASHINGTON (JAN. 30) UPI - Teachers union leader Albert Shanker told a Senate committee Tuesday it is becoming impossible to find enough qualified teachers for the nation's schools and said higher salaries will not solve the problem.

''Even if we raise salaries, make conditions much better, we do all sorts of incentives, there is no way from a demographic point of view of providing a competent and able classroom teacher in each of our 2.4 million classrooms,'' said the president of the 725,000-member American Federation of Teachers.

Shanker testified before the Senate Labor and Human Resources Committee on bills introduced by Sens. Edward Kennedy, D-Mass., and Claiborne Pell, D-R.I., that would use financial incentives to encourage students to become teachers.

Shanker supported the bills but suggested the shortage of qualified teachers should prompt Congress to consider alternatives to the ''outmoded model'' of one teacher per classroom, such as a greater use of technology or hiring resident and intern teachers in a system similar to that used in a hospital.

''There is not a single classroom in the United States that doesn't have some adult standing in front of the kids. But the fact is that large numbers of these adults ... not only would not be employed as teachers in any other industrial country in the world, but they wouldn't be admitted to college in many places. Now we're just kidding ourselves,'' he said. ''We say there is no shortage because there is somebody in the classroom.''

The union leader said the nation will have to replace 1.3 million teachers by the mid-1990s and to do so it will be necessary to recruit ''23 percent of each college graduating class for the next several years.''

But Shanker said only 3 percent to 5 percent of Americans leave high school with the necessary reading and math skills to become teachers,

creating the danger that wider recruitment efforts would lead to the hiring of more unqualified people.

''We're going to have increasing numbers of people who just can't cut it '' he said. ''You need programs that recognize we will not be able to maintain self-contained classrooms.''

Shanker said that finding qualified minority teachers is an even greater problem and suggested programs that would send school aides to college so they can become teachers.

#90030u1331 01/30/1990 ~United Press International

SANTIAGO, CHILE (JAN. 30) UPI - In a spectacular escape, 50 political prisoners - some accused in the 1986 assassination attempt against President Augusto Pinochet - fled jail through a carefully constructed 300-foot tunnel Tuesday.

Police said six escapees were captured shortly after the breakout detected about 2:30 a.m. A seventh was caught by prison guards because he was too big to pass through the tunnel and became stuck at the mouth of it.

''All are highly dangerous criminals and that reason, the situation is extremely grave,'' said Col. Christian Labbe, government secretary general.

The prisoners built a tunnel about 1 1/2 feet high and some 300 feet from the Santiago Public Jail beneath a street to an unused railroad station, police said. The jail is near the center of the city and eight blocks from the presidential palace.

Most of the escapees were members of the Manuel Rodriguez Patriotic Front, an armed branch of the Communist Party. Military prosecutors had sought death sentences for some of the prisoners for their role in the Sept. 7, 1986, attack on Pinochet's caravan that left five bodyguards dead.

In a call to a radio station, a person identifying himself as a spokesman for the escapees said, ''After years of unjust imprisonment, of systematic violation of the right to due process, of scorn and violation of all our rights and brutal tortures, today we recovered our freedom.''

In a second statement to Santiago news media, five of the escapees said 24 prisoners helped dig the tunnel, starting in early 1989.

The tunnel went between the street next to the jail and a subway line underneath and was equipped with a system of electrical lighting and ventilation and a ''rail'' system to remove the dirt from excavation, the statement said.

The statement said the 24 who built the tunnel went through first and it was then available to any who wanted to follow.

''We reiterate that the 24 original members of the operation are in perfect condition and safe,'' said the statement. ''Freedom is a right,

achieving it is an obligation of all patriots and revolutionaries.''

Labbe said the escapees were also involved in importing illegal arms and an October 1988 attack on a police station in which an officer was killed. One escapee, identified as Alfredo Malbrich Baltra, could have information on other arms caches in Chile, he said.

''This makes the situation delicate,'' Labbe said.

Police immediately launched a massive search for the escapees. They used helicopters and some streets were blocked off and vehicles stopped as part of the search.

Pinochet is to hand over power March 11 to President-elect Pcio Aylwin, the opposition candidate who won a Dec. 14 election. Aylwin has promised to free political prisoners almost immediately with the exception of those who participated in acts of violence during Pinochet's 16-year rule.

Human rights groups say there are some 500 political prisoners in Chile, including 130 they say participated in the attack on Pinochet.

#90030u1384 01/30/1990 ~United Press International

HENDERSONVILLE, NC (JAN. 30) UPI - A jury Tuesday considered whether the owner of a summer camp for rich kids molested two youngsters as charged or is himself the victim of tall tales told by boys who didn't want to return to camp.

Jones Yorke Pharr III, 41, is accused of taking indecent liberties with two 10-year-old boys who attended Camp Falling Creek in nearby Tuxedo, N.C. The boys are best friends who attend private school in West Palm Beach, Fla.

They testified last week that Pharr took them skinny dipping late at night shined a flashlight on their genitals as they jumped from a dock into the water, then invited each of them on separate occasions to share his sleeping bag, during which the alleged molestations occurred.

The stories told by the two boys were nearly identical to events described by two other 10-year-olds, one from Phoenix, Ariz., and one from Baltimore Md.

Pharr, however, denied all the accusations. He took the stand in his own defense and said he may have tickled the boys but never touched their genitals and never rubbed himself against them as they claimed.

The jury heard closing arguments Monday afternoon and began deliberations Tuesday in the trial that has sharply divided this Blue Ridge Mountain community.

Pharr, who is married and the father of three, is a grandson of the founder of Stowe-Pharr textile mills and a deacon in the local Presbyterian Church.

But District Attorney Alan Leonard told jurors Pharr used his position as camp owner to gain access to young boys.

''He's been working on this for years - refining and polishing his method of getting at children,'' said Leonard. ''On behalf of these four boys, put an end to this conduct that in all likelihood is going to continue if something is not done.''

Leonard reminded the jurors to disregard Pharr's wealth and community status when considering the testimony against him.

''A person could be a pillar of the community and get away with it right

underneath everybody's noses,'' he said. ''The most dangerous wolf can come in sheep's clothing.''

A spectator loudly objected to that comment, shouting out, ''I don't have to listen to this speculation and innuendo.'' A bailiff escorted the man from the courtroom.

Pharr's lawyer, Bob Long Jr., told jurors nearly 6,000 boys have attended the camp since Pharr bought it in 1971 and no other youngsters have accused him of taking indecent liberties. He suggested the boys fabricated their testimony.

''It is a curious coincidence that two boys from the same neighborhood, who went to the same school in the same grade since kindergarten would share a common story,'' he said.

But Leonard noted all four boys, and not just the two from Florida, testified Pharr molested them.

''If you were going to make up a story about being molested so you wouldn't have to go back to camp, why would you pick the owner and not a counselor or the cook?'' Leonard asked. ''That's like getting caught buying cocaine near the White House and accusing George Bush of selling it to you.''

NEW YORK (JAN. 30) UPI - There are skeptics who predict The National, a sports newspaper making its debut Wednesday, has about as much chance of making it as the Denver Broncos had at beating the San Francisco 49ers in the Super Bowl.

Frank Deford, the upbeat, charismatic editor of the new tabloid that will first hit the streets in New York, Chicago and Los Angeles, is out to prove them wrong.

''The (criticism) I hear all the time is that there isn't any need for this,'' said Deford, a star writer and editor at Sports Illustrated magazine for 27 years who jumped ship to head The National. ''Sure, it's not a cure for baldness, but interest in sports is continuing apace.''

Deford, Publisher Peter O. Price and The National's principal backer Emilio Azcarraga, a Mexican media entrepreneur, are betting heavily that the six-day-a-week paper - with a start-up cost of $25 million to $30 million - can successfully ride the wave of sports fanatacism that washes over the land.

''With a population that is bound together by national competition, national champions, national interest and national media ... a U.S. sports daily is a natural for a people so devoted to sports,'' mused Deford in a promotional letter mailed to advertisers.

With Wednesday's publication of 200,000 copies, priced at 50 cents and distributed through the same network as The Wall Street Journal, the speculation will end and the true test begin.

Deford said The National will publish a 48-page premiere issue containing 12 pages of advertisements and 36 pages of news, including editorial and ''people'' pages - the latter to be filled with gossipy tidbits from the world of sports.

The National is aiming for a Detroit debut in the spring, and to be available in a total of 15 markets by year's end.

Although some of the paper's inside pages will be the same in each market, The National's front page and local sport sections will be tailored to the interests of regional readers, Deford said.

In this respect, Deford sees The National as another local paper out to do battle with major metropolitan dailies - a point he believes many people so far have misunderstood.

''About 25 percent of the paper will be local,'' he said. ''But if there was a big local story one day the entire news hole would be filled up with local news.''

Deford conceded readers in New York and Chicago won't get all the scores from games played the night before on the West Coast, but he insisted The National is competitive with its daily newspaper rivals in that regard.

''If we can equal or approximately equal local newspaper deadlines we will blow them away with everything else that we have,'' said Deford.

Indeed, Deford has hired - reportedly at virtually unheard of six-figure salaries in the skinflint world of journalism - some of the biggest guns in sports writing, including Scott Ostler of The Los Angeles Times, Peter Alfano of The New York Times and Van Mackenzie of the Atlanta Constitution.

To rein in statistics enthusiasts, The National will have its own copyrighted format for sports minutiae.

So far, Deford said, advertising support - a critical issue to the success of any publication - has exceeded expectations, although observers said special introductory deals could be a big factor in that.

''It's customary for a new publication to practically give away advertising, so I'd take it with a grain of salt,'' said J. Kendrick Noble an analyst with PaineWebber Group Inc.

But John Reidy of Drexel Burnham Lambert Inc. said the paper should benefit from its carefully executed business plan - and the deep pockets of Azcarraga, whose patience may need to prove almost as great as his wealth.

''We've expected to go five years and spend $100 million before we turn a profit,'' said Deford.

''A national sports paper has worked in every other country in the world. As a betting man, I like those odds.''

#90030u1439 01/30/1990 ~United Press International

DERRY, PA (JAN. 30) UPI - Police patrols in Derry are being conducted in a pickup truck that was once used to plow snowy streets.

Derry, a borough of 3,300 people about 40 miles east of Pittsburgh, has removed its two police cruisers from service. Patrols are being conducted by three part-time police officers in a 1-ton pickup.

The 1988 blue Ford was transferred to the police department from the borough's street department. A slight adjustment was made to the truck for police patrols - its snowplow was removed.

The pickup was forced into service Jan. 19 when it was determined both police cruisers were unsafe and needed expensive repairs, Derry Council Public Safety Chairman Jeffrey Stumpf said.

The police department is renting the truck from the street department for $305 a month while approval is awaited to purchase a new police cruiser through a joint state purchasing program. Stumpf said the $14,969 cruiser could be delivered late next month.

''The truck was purchased with state liquid fuels money, which can't be spent on the police department,'' Stumpf said. ''But we learned that as long as we leased it for a reasonable amount it was legit. Right now, we have $305 a month going from our general fund into our liquid fuels fund. It's all staying in the borough.''

Derry's marked police cruiser, a 1987 Plymouth Grand Fury with 58,751 miles, needs a new transmission and other repairs estimated at $2,478, Stumpf said. The borough's unmarked cruiser, a used 1979 Chevrolet Impala bought two years ago with 70,000 miles on it, needs engine work, he said.

Some borough officials have suggested repairing the Chevrolet and selling the Plymouth.

''Then what we'd have is a 1979 Chevrolet Impala with a rebuilt engine,'' said Stumpf. ''How could we authorize putting $2,800 in an 11-year-old car?''

Meanwhile, the three officers continue to patrol Derry's streets in the pickup truck - minus the snowplow.

#90030u1462 01/30/1990 ~United Press International

NEW YORK (JAN. 30) UPI - Super Bowl XXIV was the most watched television event of the week, viewed by a whopping 63 percent of TV viewers, but not even Joe Montana could lift CBS out of the cellar in the ratings race, it was reported Tuesday.

CBS estimates that 109 million viewers saw all or part of the game, down only 2 million from last year despite the fact that this year's match was a blowout.

On the upside for for CBS - Super Bowl XXIV carried enough of its audience over to the debut of the new series, ''Grand Slam,'' to provide a good audience sampling and give the action show a ranking of 15th for the night.

It was CBS's bad luck that the game was so predictably lopsided, which resulted in the lowest rating since Super Bowl III in 1969.

Each rating point in 1990, however, represents many more households than it did two decades ago. Technically, Super Bowl IV in 1970 out-rated Super Bowl XXIV, 39.4 to 39.0. But last Sunday's game had almost twice as many viewers as the estimated 59,190,000 who watched Kansas City beat Minnesota 20 years ago.

This also marks only the third time that the network airing the Super Bowl did not win the week - NBC managed it in 1979 and 1981. It also is only the second time the Super Bowl network was third for the week - dating back to NBC in 1979.

The Broncos were not to blame for all of CBS's troubles last week. The network tried some stunting, most of which did not work. On Monday it ran a popular theatrical movie, ''Cocoon,'' which tied for 54th. The big winner was the American Music Awards on ABC, which came in 10th for the week.

On Tuesday, the TV movie ''So Proudly We Hail'' ranked 66th, on Wednesday the network did well with a Hallmark Hall of Fame TV movie, ''Face to Face '' which tied for 29th. Thursday ''48 Hours'' presented a special 90-minute profile of Paul McCartney, which ranked 57th. On Friday CBS deserted ''Dallas'' for Bucharest and ''Daughter of Darkness, which came in 51st.

Then there was ''Super Bowl Saturday,'' which came in 74th on a list of 79 shows. On Saturday, NBC's regular lineup was so strong its overall rating of 17.5 with a 31 share was 29 percent above the combined ratings of ABC and CBS.

NBC won the ratings race for the week ending Jan. 28 with a 15.0 rating and a 24 share, according to the A.C. Nielsen Co. ABC took second place with a 13.2 rating and a 21 share, while CBS was third with a 12.8 rating and a 21 share.

The 19-week-old season-to-date ratings show NBC with a 14.8 rating and a 25 share, ABC with a 13.0 rating and a 22 share, and CBS with a 12.8 rating and a 21 share.

In the evening news ratings, ABC's ''World News Tonight'' with Peter Jennings continued as No. 1 with a 12.0 rating and a 21 share. ''NBC Nightly News'' with Tom Brokaw came in second with an 11.1 and a 20 share and ''CBS Evening News'' with Dan Rather slipped to the cellar with a 10.3 rating and a 18 share.

Each ratings point represents about 921,000 households and a share is the percentage of TV sets tuned to a particular show.

The top 10 programs for the week ending Sunday, Jan. 28, according to the A.C. Nielsen Co., were:

1. Super Bowl XXIV (CBS)
2. Super Bowl Postgame (CBS)
3. (tie) The Cosby Show (NBC)
4. Cheers (NBC)
5. Roseanne (ABC)
6. Different World (NBC)
7. Golden Girls (NBC)
8. Empty Nest (NBC)
9. Wonder Years (ABC)
10. American Music Awards (ABC)

#90030u1468 01/30/1990 ~United Press International

WASHINGTON (JAN. 30) UPI - Treasury Secretary Nicholas Brady dismissed as ''goofy'' Tuesday a Democratic proposal to cut Social Security taxes, but agreed it has raised a valid point about the true size of the federal budget deficit.

Selling the tax and savings provisions of President Bush's day-old fiscal 1991 budget, Brady suggested the Social Security tax cut would mark a retreat from earlier work to ensure the long-term solvency of the retirement system.

After a bipartisan accord in 1983 ''removed the idea from all Americans' minds'' that the system might someday go broke, Brady said, it would be ''the height of folly'' to repeal the mechanism devised to ensure future

benefits will be paid.

The target of his criticism was a politically charged idea by Sen. Daniel Moynihan, D-N.Y., to roll back payroll tax increases now generating reserves to pay the benefits of baby-boom generation retirees beginning around 2010.

At the heart of the plan is what to some had been an overlooked reality: that surpluses from the Social Security tax are not being placed in an account for safe keeping, but are being lent to the Treasury to help cover the deficit.

Last year, the deficit reported by the administration was some $55 billion higher when the Social Security subsidy was excluded. The figure continues to rise and has thrown an unexpected twist into an election-year budget battle.

''I think it's goofy to take a system that's sound, in which the American people believe, in which we have an orderly way to pay for the benefits that ultimately are going to come, and change that,'' Brady said. ''Now, if you want to separate the deficit argument, that's different.''

Brady asserted that Moynihan ''has mixed up'' two different issues: the actuarial soundness of the Social Security system and the way the Social Security tax surplus is used to show a lower deficit.

''I think it's a legitimate point of view to say that that deficit, looking at it without the Social Security surplus, should be said to be bigger. And in fact it is, if yoy want to look at it that way. That hasn't got a thing to do, in my mind, with changing the taxing mechanism that provides the solidity in Social Security,'' he said.

Bush has called the Moynihan proposal a ''charade'' intended to give Democrats an excuse for raising other taxes to offset the shortfall in financing that would be lost if Social Security tax revenue was removed from the deficit calculations.

Rather than sever the Social Security link altogether, the administration has proposed using surplus revenues from the payroll tax after 1993 - when the law calls for the budget to be balanced - to begin paying off the national debt.

Though that still raises the specter of additional future indebtedness once baby-boomer benefits come due, the administration contends a reduction in the $2.2 trillion debt that existed at the end of 1989 would spur private investment and have other favorable effects on the economy.

Brady discounted the prospect for ''any tradeoffs'' under which Bush would

accept a reduction in Social Security taxes, which would most benefit middle- and lower-income Americans, for passage of his proposed cut in the capital gains tax, which is seen as a boon to wealthier Americans.

The administration projects the capital gains cut could pump $4.9 billion into the Treasury next year as people sell stocks, bonds, real estate and other eligible investments to take advantage of the lower tax rate. Over time, critics contend the tax cut would cause a net loss of revenue as profits that would have been treated as income are taxed instead at the lower capital gains rate.

Claiming ''a lot of enthusiasm'' for the proposal on Capitol Hill, where Senate Democrats last year succeeded in stopping Bush's push on capital gains, Brady promoted it as one of three tax-related elements of an administration initiative to promote savings and investment.

The other two major parts of the proposed Savings and Economic Growth Act are:

-A plan that would enable people with annual incomes of up to $60,000 to contribute up to $2,500 a year to savings accounts yielding tax-free interest if held for seven years.

-A plan that would permit early withdrawal, without the usual 10 percent penalty, of up to $10,000 from Individual Retirement Accounts for first-time home purchases.

#90030u1478 01/30/1990 ~United Press International

LONDON (JAN. 30) UPI - Stock prices closed lower in light trading Tuesday on the London International stock exchange, depressed by a lack of genuine investment activity.

The key Financial Times 100-stock index, which gained 14.3 points Monday, closed off 6.9 points at 2,321.9. The narrower top 30 industrial average slipped 10.9 point to 1,853.0.

Volume amounted to around 492 million shares, compared with 419 million shares changing hands Monday.

On the economic front, the Confederation of British Industry reported in its latest survey that British manufacturing employment is expected to decline over the next four months due to falling orders and company efforts to maintain productivity growth.

Analysts said the survey had little impact on investors.

Among the most widely traded stocks, buyout speculation helped push insurers Guardian Royal Exchange up 11 cents to $18.09 and Sun Life up 56 cents to $21.60.

In the property sector, Laing Properties climbed 30 cents to $9.58 on the Chelsfield stake, while speculative demand sent Percy Bilton 48 cents higher to $7.28.

Redland gained 17 cents to $9.15 as investors speculated the recent heavy storms over Britain would increase sales.

Among the day's other active issues, Sock Shop eased 17 cents to 95 cents a share, Christie International gained 15 cents to $4.92 and Aim Group tumbled $1.12 to $3.28 on poor earnings outlook.

Elsewhere in Europe, prices on the Frankfurt Stock Exchange closed mixed in directionless trading.

The German Stock Index inched up 1.35 points to 1,812.90.

#90030u1483 01/30/1990 ~United Press International

TAMPA, FL (JAN. 30) UPI - Manuel Noriega's personal banker and four other bank officers charged with laundering drug money knew the deposits were drug profits but worked under a policy that stressed not looking to closely at where the money came from, a prosecutor said Tuesday.

Assistant U.S. Attorney Michael Rubinstein said Noriega banker Amjad Awan, 37, and the others laundered drug money for the Bank of Credit and Commerce International not for money, but to further their careers at the bank.

When Awan was told by an undercover customs agent that his clients included ''some of the biggest drug dealers in South America,'' Awan replied, ''It's not any business of mine who your customers are,'' Rubinstien said.

Awan, who for more than a decade administered $23 million kept by Noriega and the Panamanian government in BCCI accounts, four other bank officials and two Colombians were indicted in Tampa in October 1988 on 32 counts of money laundering and one count of conspiring to smuggle drugs. Each faces a maximum penalty of life in prison without the chance of parole.

The indictment, which alleged that $32 million in drug profits were laundered throughout the world, followed a two-year U.S. Customs Service sting dubbed Operation C-Chase.

Two divisions of Luxembourg-based BCCI also were indicted and pleaded guilty Jan. 16 to laundering $14 million in cocaine profits. As part of a plea bargain, the bank agreed to forfeit the money and cooperate with prosecutors. The bank also was placed on five years probation.

One of the Colombian businessmen, Gonzalo Mora Jr., has pleaded guilty to all 33 counts and is awaiting sentencing.

The other defendants are bank officers Akbar A. Bilgrami, 36; Sibte Hassan 32; Syed Aftab Hussain, 37, and Ian Howard, 40, and Medellin, Colombia, businessman Rudolf Armbrect, 34.

''The evidence will show that the motive in this case was not that the defendants wanted to put money in their own pockets,'' Rubinstien told a 12-member federal jury. ''But these defendants did it for the bank ... they did it to further their careers in the bank.

''There was definitely a clear and well defined policy stressing that officers take as many deposits as you can, as fast as you can, and don't look to closely at where it came from.''

Rubinstien said that Special Agent Robert Mazur, an undercover officer who spearheaded the sting, told each of the defendants that the money was coming from Colombian drug kingpins who demanded confidentiallity and no ties to certificates of deposit that BCCI officers were setting up as part of the laundering operation.

Mazur, who used the alias Musella, told Awan, ''You must promise me that the certificates of deposit be kept absolutely confidential ... my clients are some of the biggest drug dealers in South America,'' Rubinstien said. ''Mr. Anwar's answer was, 'It's not any business of mine who your customers are.'''

The sting began in early 1986 when Mazur and another agent met with Mora, pretending to seek banking contacts in the United States, Rubinstien said.

Following the meeting, Mazur was contacted by Hussain, an office manager for BCCI in Panama, who first suggested to Mazur that the drug profits be converted to certificates of deposit in Panama and Luxembourg because of their strict confidentiality banking laws.

A total of eight indictments were returned nationwide as a result of Operation C-Chase, charging more than 80 people with laundering drug money.

The indictment said drug profits filtered into BCCI's Tampa branch from collection sites in Houston, Chicago, Los Angeles, Miami, Detroit, New York and Philadelphia.

At the time of the indictment, BCCI was the seventh-largest privately held financial institution in the world, with nearly $20 billion in assets and more than 400 offices in 73 countries.

#90030u1552 01/30/1990 ~United Press International

WASHINGTON (JAN. 30) UPI - The soil conservation programs written into the 1985 farm policy law are reducing the threat of cropland erosion, but many farmers do not believe they will be penalized if they break the rules a study said Tuesday.

The study also documented disagreements over how to preserve wetlands - the so-called swampbuster rule - and said the success of the conservation programs will be tested over the next few years.

Although officials from the Soil and Water Conservation Society, which conducted the study, declined to make recommendations on how to fine-tune the programs, they said they wanted Congress to retain them in the farm policy law being written this year.

''Based on our evaluation, we can say that the United States stands on the threshold of eliminating soil erosion as a severe problem on much of the nation's cropland,'' said Max Schnepf, director of the study. ''We may accomplish a greater measure of erosion control in the next five years than we have achieved in the preceding 50 ... It is clear the next few years are crucial.''

The conservation programs created in 1985 marked the first time Congress linked farm program goals and environmental goals. Farmers run the risk of losing federal benefits if they fail to practice conservation or if they convert wetlands or highly erodible land to crop production.

The requirements were implemented through the ''swampbuster,'' ''sodbuster'' and conservation compliance programs. The Conservation Reserve, which has become the largest crop land retirement program ever, pays farmers to take highly erodible land out of production.

In general, the study, which included visits to 1,000 farms in 22 states, showed the programs have been successful and enjoy widespread support among farmers although erosion reductions may not be quite as large as the government has forecast. The study found some problems for the Agriculture Department in checking compliance.

Most farmers indicated they could meet the conservation compliance reqirement - writing a plan to limit soil losses on highly erodible land and implementing it - with little impact on farm profitability. Most chose plans that would leave more soil-saving crop residue on the surface,

rather than expensive methods such as contour farming or building terraces.

However, ''22 percent of the respondents said they do not expect to lose federal farm program benefits if they are unable to achieve compliance or choose not to be in compliance,'' the report said, ''while another 28 percent said they did not know if they would lose benefits.''

''People apparently are questioning (the government's) resolve, judging by this response,'' Schnepf said.

Support for the swampbuster rule ''appears to be more tenuous'' than for the other programs, the study said, because farmers - especially in the prairie ''pothole'' region of the northern Plains - have a different idea of what is a wetland than the law does.

Farmers view wetlands as meaning marshes but environmentalists say the definition includes the potholes, small, low-lying areas that flood in the spring and provide a nesting area for waterfowl.

''This difference creates a situation that will be difficult to resolve,'' Schnepf said.

#90030u1555 01/30/1990 ~United Press International

LONDON (JAN. 30) UPI - Western eagerness to invest in Central and Eastern Europe could undermine economic growth in the Third World, particularly Latin America, and transform Warsaw Pact nations into powerful competitors to several Asian producers, a report said Wednesday.

"Unless they save more, Western developed countries are in danger of robbing Pedro to pay Pavel," the Economist Intelligence Unit said in its report, "World Outlook 1990."

The EIU, a subsidiary of The Economist magazine and a leading publisher of international business and economic information, said Western investment and other efforts to bolster fledgling markets in Central and Eastern Europe came when Latin America is "desperately in need of resources from abroad."

Many Western firms are trying to operate in Warsaw Pact nations to exploit a well-educated and cheap labor force, and assist East Bloc governments in their moves to introduce market reforms after decades of centralized economic management.

The report outlined several factors that gave a bleak prognosis of the economies of Latin America for 1990. It predicted the gross domestic product will grow "in real terms" by a mere 2.8 percent in Mexico, two

percent in Argentina and 1.5 percent in Brazil. "These are not disastrous figures in themselves, but they are depressing in the light of what happened in the 1980s," the report said.

It estimated Peru's GDP will drop three percent during 1990, bringing it to a level 30 percent below its 1980 figure. Argentina will be nearly 24 percent worse off in 1990 than it was in 1980, Mexico will have dropped ten percent, and Brazil's per capita GDP will barely regain the level it reached one decade ago, the report said.

The EIU predicted the combined imports of Peru, Mexico, Brazil, and Argentina will reach $48.6 billion in 1990, 10.6 percent less than their 1980 value. The decline is greater in volume since the dollar price of manufactured goods in world trade rose 27 percent during the same period, it said.

"When all due allowance is made for the contribution of faulty domestic policies and unfavorable conditions for foreign investment, Latin America's economic performance remains a black spot for the world economy as a whole, and a drag on world trade," the report said.

It said the emergence of Central and Eastern European market economies would have an impact on developing countries in Asia which now produce similar exports.

"The comparative advantage of Eastern Europe's fledgling democracies will lie in the export of low-cost labor-intensive manufactures, precisely the area in which the more dynamic of the developing countries see their salvation," the report said.

Newly industrializing countries such as Taiwan and South Korea may not be affected because they now manufacture high technology. But unless the market grows more rapidly, Eastern Europe exports could pose a threat to Thailand, Malaysia, the Philippines, and Indonesia, which are seeking to take over the market for producing cheap consumer goods, the report said.

"There is not much virtue in the West preaching free markets successfully to the East if the North denies the same principles to the South; A zero sum game would result," it said.

The EIU said negotiations of the General Agreement on Trade and Tariffs scheduled for next December were now more important if balanced world trade was to be maintained and the changes in Central and Eastern Europe accommodated.

Until then, the report warned that the European Community's adherence to "its obsolete Common Agricultural Policy" - a system of agricultural pricing rules and subsidies - poses "the greatest single threat to the

success of (GATT) negotiations."

-30- 3989

#90030u1557 01/30/1990 ~United Press International

WASHINGTON (JAN. 30) UPI - Senate Democrats proposed a broad economic aid program Tuesday for the emerging democracies of Eastern Europe and said in time it could be extended to the Soviet Union.

Sen. Claiborne Pell, D-R.I., chairman of the Foreign Relations Committee, and two committee members, Sens. Joseph Biden, D-Del., and Paul Simon, D-Ill., called for lifting the trade and investment restrictions of the Jackson-Vanik law against the Soviet Union because of the communist nation's new policy of open emigration and political reform.

''No one anticipates or advocates extensive economic aid to the Soviet Union,'' Pell said in an understatement of congressional sentiment.

The political reforms in Eastern Europe are the result of the non-interventionist policy of Soviet President Mikhail Gorbachev. Gorbachev pressed for democratic and economic reforms at home, and the Soviet satellite nations of Eastern Europe raced ahead of the Soviet Union in implementing them.

President Bush has proposed $300 million in economic assistance for Eastern Europe, and Pell said the amount could be raised to $511 million at least.

''This kind of action is clearly our most cost-effective form of 'defense spending,''' Pell said.

All three senators said the Pentagon budget should be the source of the additional money - other members of Congress are targeting it as well for other favorite programs. The administration is resisting such raids, saying further defense cutbacks must await comprehensive arms control and troop reduction agreements with Moscow.

The senators' proposal is patterned on the types of trade and investment assistance provided in 1989 to Poland and Hungary, extending it to Czechoslovakia, East Germany, Bulgaria, Romania, and Yugoslavia. It is conditioned on free-market economies and democratic reforms in those nations.

The bill gives the White House discretion on which programs should be installed, but specifically calls for $80 million in food aid for Romania and $10 million to assist the East European countries in developing democratic systems and free elections.

The bill calls for the United States to participate in a European reconstruction and development bank for Eastern Europe, with an initial contribution of $250 million; $44 million for Peace Corps activities in the region; and $5 million to promote the involvement of retired business executives in management programs.

The bill calls on Bush to report to Congress by May 1 on what elements of the program could serve U.S. interests by promoting democratic reforms and a market-based economy in the Soviet Union.

The bill will go through an extensive review in the Senate and House, to be meshed with proposals of the administration and congressional Republicans.

-30- 3003

#90030u1561 01/30/1990 ~United Press International

(JAN. 30) UPI - Bulgaria's leader opened a party congress in Sofia this morning by calling for the separation of powers of the Communist Party and state. Peter Mladenov also urged unity in a party hit by disagreements over the pace of reform. Bulgaria's Communist Party... unlike Communists in Poland and Hungary... is NOT trying to disband itself or change its name.

Israel lashed out at contentions that Jewish immigrants are being used to force out Palestinians in the Israeli-occupied West Bank and Gaza Strip. Prime Minister Yitzhak Shamir issued a statement saying that immigrants are free to live withing Israel's pre-1967 borders or in Jewish settlements in the occupied territories. Soviet officials in Moscow told an Israeli consular delegation that that Soviet Union opposes settlement of immigrants in the occupied lands.

Police in Winston-Salem, North Carolina, say a family dispute turned violent, leaving two people dead. Neighbors were shocked to see Henry Simon chasing his wife and seven-year-old son from their house. Simon fatally shot his wife on a neighbor's lawn before turning a handgun on himself. The couple's son was heard screaming- ''Daddy, please don't shoot me, too.'' The child was NOT harmed.

BUCHAREST, ROMANIA (JAN. 30) UPI - The embattled interim Romanian government retained control of the nation Tuesday and sent home, to promises of more food and better wages, thousands of miners and factory workers who had flocked to the capital to face off with anti-government demonstrators.

''We need you at work. Please go home,'' interim President Ion Iliescu told a pro-government crowd from the balcony of the ruling National Salvation Front's headquarters as tensions began to subside early Tuesday.

By later in the day, Bucharest had surrendered to an eerie silence as the front appeared to regain control over the capital following a two-day power battle pitting pro- and anti-government demonstrators against each other.

Both sides claim responsibility for the revolution that overthrew the communist government last month. It is likely the power battle between government and opposition leaders will continue, though not in the form of street demonstrations, the opposition said.

The National Salvation Front, the provisional government composed of former dissidents but also led by a number of longtime communists, had been the target of angry demonstrations since it announced its decision last week to constitute itself as a party and field candidates in the May elections.

The front has also been accused, by dissidents from within and without, of continuing to govern the nation and retain its grip on power in the Stalinist style of ousted dictator Nicolae Ceausescu.

Opposition party supporters failed in an attempted takeover of the front's headquarters in Victory Square on Sunday. The failure may be attributed to the front's call for a mass show of support from around the nation, broadcast on television Sunday night. Opposition leaders have claimed the one-sided broadcast was undemocratic and could have led to violence.

Thousands of miners and factory workers bused in from throughout the country to confront the demonstrators returned to their homes Tuesday after Iliescu appeared at 12:45 a.m. on the balcony of the government building.

The front has been courting support from miners, promising food on tables and better wages.

As streetlights and spotlights fell on signs depicting the tombstones of opposition leaders, front supporters wearing helmets and holding torches gave deafening cheers as the president thanked them for their support.

The workers were told that a train would leave to take them home at 2 a.m. They responded to the order, walking to the train station as strains of the new national anthem, ''Wake Up, Romania,'' played over loudspeakers.

The National Peasants Party headquarters was still being heavily guarded on Tuesday. Earlier in the week, party leader Corneliu Coposcu had been

forced to flee in an armored car when pro-front supporters stormed the building.

A National Liberal Party spokesman, Mihai Dumitrescu, said there would be no more demonstrations. Instead, he said, all opposition parties would join together to ask the NSF to refrain from fielding candidates in the elections.

He welcomed Aurel Dragos Munteanu's resignation from the front. The resignation came following criticism of Munteanu's dual role as front spokesman and president of the Council of Romania Free Television and Radio.

About 150 pro-front supporters gathered Tuesday outside the national television station in Bucharest.

Inside, Munteanu said he knew nothing of the demonstration beyond the doors. Nor did he know whether the attempted takeover of the NSF headquarters on Sunday had been reported on Romanian Television.

Many Romanians have complained that television has been taking a pro-front stance in broadcasts.

''The information is terrible,'' said Avamil Bedin, 22. ''Through television, the country recieves pro-front information. But in Bucharest, we see other things, and we are confused.''

The print media has also been criticized by journalists and the public.

Cristian Toma Mocanu, a journalist for The Truth in Bucharest, vowed to quit the newspaper, which he said no longer printed the truth.

''It is communism under another name,'' he said.

Meanwhile, former Communist leaders on trial for assisting genocide heard a spate of accusations Tuesday from the soldiers they once commanded.

Former Minister of Internal Affairs Tudor Postelnicu; Party Secretary Emil Bobu; the vice president of the Council of State, Manea Manescu, and Deputy Prime Minister Ion Dinca have pleaded guilty to giving orders which led to the death of 689 people between Dec. 17 and 22. Thousands of demonstrators were reportedly killed by communist forces in the days leading to the overthrow of the Ceausescu regime.

The commander of the Patriotic Guards, Corneliu Pircalabescu, said Tuesday that one man who refused to follow such orders, Gen. Vanile Milea, had committed suicide.

''He told me to tell his wife and children that 'Ceausescu told me to shoot people and I cannot do it,''' the commander said.

The court had previously been told that the general had been assassinated.

The former leaders appeared anxious and wary as they stood before the soldiers in the Bucharest Military Academy.

Manescu and Bobu were with Ceausescu when he unsuccessfully tried to flee the country by helicopter on Dec. 22. Ceausescu was executed by firing squad three days later.

Bobu, who had previously been a prosecutor in military trials, said, ''Cruel fate has put me in this moment. My attitude was more condemnable because I knew the law and did not respect it.''

#90030u1615 01/30/1990 ~United Press International

NEW YORK (JAN. 30) UPI - A Texas Air Corp. shareholder has filed insider trading charges against a Boston investment company that sold its entire 12.6 percent stake in the carrier on the eve of an announcement Texas Air would have to give up 40 percent of bankrupt Eastern Air Lines.

The class action suit against Loomis, Sayles & Co. was filed in U.S. District Court in Manhattan Monday accusing the Boston company of using nonpublic information when it sold about 5.3 million shares in Texas Air Jan. 24.

The stock closed at $7.375 per share, "the day before Eastern presented its unfavorable third reorganization plan at the Jan. 25" creditors' meeting, the suit said.

When Eastern met with the committee of unsecured creditors to outline its proposed reporganization plan, about 1.2 million shares of Texas Air were traded with a closing price of $7 per share, the suit said.

"The specific terms of Eastern's proposed reorganization plan were disclosed late in the afternoon of Jan. 25," the court papers said. "Following disclosure of the fact that, among other things, Texas Air would be forced to give up 40 percent of Eastern, the price of Texas Air plunged further." It said the stock dropped to as low as $5.25 per share and closed at $6.125 per share.

"The sudden and swift sale by Loomis of its entire 12.6 percent stake in Texas Air, the day before the company disclosed adverse information about its Eastern Subsidiary, in of itself raises a strong inference that Loomis had misappropriated and was in posession of information about the terms of

Eastern's reorganization plan prior to disclosure of such information to the public," the suit said.

Also named as defendants in the suit were The New England Mutual Life Insurance Co., G. Kenneth Heebner, Robert Kemp, and "John Does I to X." Heebner was identified in the papers as a portfolio manager of Loomis, Kemp as president and chief executive officer of Loomis and the insurance company as the parent of Loomis.

The John Does "are persons presently unknown to plaintiff which provided Loomis, Heebner, and Kemp with the material nonpublic information at issue " said the suit, assigned to Judge Kevin Duffy.

#90030u1629 01/30/1990 ~United Press International

NORTH MIAMI BEACH, FL (JAN. 30) UPI - Police recovered $485,000 and arrested six suspects in the robbery of almost a million dollars from an armored car in a heist staged by a Wells Fargo guard, officials said Tuesday.

The FBI and local police began investigating when Kerry D. Robinson, 23, a Wells Fargo Armored Service Corp. guard, reported that he was robbed of $900,000 Jan. 18. Robinson was allegedly robbed just after he picked up four bags containing the cash from First Union Bank in Hollywood, said FBI agent William Gavin, who is in charge of the FBI's Miami office.

Robinson, of Fort Lauderdale, told police he had been robbed at gunpoint in the bank parking lot by a man dressed in a Wells Fargo guard uniform, officials said.

The armed robber actually was Robinson's brother, Ritchie, L. Robinson, 22 of Pompano Beach, Gavin said. Five others, acting as lookouts and drivers joined the Robinsons in the plan to take the money and hold onto it for a while, Gavin said at a news conference in which stacks of the recovered cash were displayed for reporters.

''Robinson's story just seemed very, very suspicious,'' FBI agent Michael H. Boyle said. When a guard reports a robbery, ''he automatically becomes a suspect, and it's usually easy enough to eliminate him as a suspect,'' he said.

Pompano Beach police were alerted when some of the suspects and their families went on a spending spree, paying cash for expensive cars, clothes and jewelry after the robbery, Pompano Beach Lt. Dave Cassell said.

''Several deviated from the plan and started spending the money,'' Hollywood police Lt. Claude Covino said.

The Robinsons were arrested between Jan. 20 and 25, along with Levertis ''Tootie'' Byrd Jr., 23, Michael J. Ervin, 24, and Maurice A. Mathews, 21, all of Pompano Beach, and Gerard Sapp, 23, of Hollywood.

All were charged with larceny and aiding and abetting, and each would face a maximum penalty of 20 years in prison if convicted.

Police still were looking for a seventh suspect, Gary Roberson, 22, of Pompano Beach. Roberson, suspected of being a driver in the heist, may have left Florida with as much as $100,000, Gavin said.

''They had planned this for some time,'' Cassell said. ''The guard had been employed for about a year and a half, and they had been planning it for most of that time.''

Much of the money was recovered from hiding places in the homes of relatives and parents of the suspects, Cassell said.

''Some of it was hidden in pantries,'' he said.

The relatives, some of whom knew about the robbery but cooperated with authorities, will not be charged, he said.

''The fact that they did go on a spending spree and the fact it was an inside job made it easier'' for investigators to solve the case, Boyle said.

''The loot taken is a much better score than the average bank robbery,'' Boyle said.

#90030u1639 01/30/1990 ~United Press International

MINEOLA, NY (JAN. 30) UPI - Investigators probed two mysteries Tuesday in the Avianca jetliner crash that killed 73 people - what caused Flight 52 to plow into a Long Island hillside and how much cocaine was being smuggled by passengers.

In Washington, James Kolstad, acting chairman of the National Transportation Safety Board, said the investigation into what caused last week's disaster was focused on fuel planning by the flight crew, as well as radio communications and weather.

On Long Island, Nassau County police said a second survivor had apparently swallowed condoms filled with what was believed to be cocaine.

Drug officials earlier said the Bogota-to-New York flights, particularly

those that stop in the drug-smuggling capital of Medellin - used to be known among agents as ''Air Cocaine.''

Almost five days after the crash, federal authorities were still trying to figure out why the Boeing 707 jetliner went down Thursday in a wooded area of Cove Neck on Long Island Sound about 17 miles northeast of John F. Kennedy International Airport, killing 73 of the 158 people aboard.

The jet, flying in high wind and heavy rain, had aborted a first landing approach to Kennedy after falling below its proper glide path and was flying toward another approach when it crashed.

Kolstad, testifying at a Senate confirmation hearing Tuesday, said investigation was focusing on ''crew preplanning'' that might have led to a fuel shortage.

He said the agency is also investigating weather and communications between the Avianca crew and controllers at the New York Control Center and a radar tracking center.

Kolstad, stressing that ''it is inappropriate to draw conclusions,'' told the Senate panel the Avianca crew first reported the plane was low on fuel ''before they made their first approach.''

''It was relayed that, 'We are low on fuel and cannot make it to our alternate,''' Kolstad said.

Officials have reported there were 81,000 pounds of fuel aboard the jet when it left Medellin, the one stop for the plane for the flight from Bogota. They said they were checking to see whether that amount of fuel was enough if the plane was put into a long holding pattern.

In the drug smuggling investigation, Nassau County police said officials at the Nassau County Medical Center in East Meadow told police that Antonio Zuluaga, 46, of Columbia had passed 14 condoms containing a white powder resembling cocaine late Monday and early Tuesday.

Zuluaga was the second survivor of the flight found to have swallowed packets of what was believed to be cocaine. Surgeons found four packets in another man's intestine when they operated on him Friday at the North Shore University Hospital in Manhasset.

Doctors said X-rays showed there could be a least another pound of cocaine in the unidentified patient's body. They said they were afraid to operate for fear one of the condoms would break, giving him an overdose that could kill him.

Police said no charges had been filed in either case.

Drug smugglers who use this method are called ''mules,'' and authorities said they could earn up to $500 to $1,000 per trip.

Monday, NTSB member Lee Dickinson said tapes of cockpit conversations revealed that crew members never used the word ''emergency,'' but said they needed ''priority'' when making their second landing attempt after aborting the first.

When pilots declare a ''fuel emergency,'' the situation is considered very serious and the plane is given priority to land over all other waiting planes.

The air traffic control manual has no listing under terminology for a fuel ''priority,'' though it does list a declaration of a ''fuel minimum,'' which is considered an advisory that an emergency could arise, Dickinson said.

He said investigators planned to question Avianca officials on how they instructed their pilots to handle emergencies.

''We have to determine what is meant by a 'priority' and what is meant by an 'emergency,''' he said. ''In this investigation, so far, we have no knowledge of an emergency, we haven't heard that word.''

#90030u1647 01/30/1990 ~United Press International

WARSAW, Poland (JAN. 30) UPI - Cardinal Jozef Glemp, the head of the Roman Catholic Church in Poland, was admitted to a hospital intensive care unit Tuesday for an undisclosed ailment, a hospital source said.

''His health condition is the kind of condition of patients who are in the intensive care unit,'' the source said, while refusing to give details.

A church spokesman said Glemp was taken by ambulance from his palace to the hospital.

''It is a serious problem,'' he said.

Glemp, 61, has been the head of the powerful Polish church since 1981, following the death of Cardinal Stefan Wyszynski.

#90030u1658 01/30/1990 ~United Press International

LONDON (JAN. 30) UPI - More than $25 billion will be spent during the next decade to upgrade overstressed air traffic control systems in many nations,

and passengers should benefit from governments shifting investments away from military and into civil aviation, a leading industry magazine said Tuesday.

Jane's Airport Review also reported that both Washington and Moscow had offered their military navigation systems for use by civilian airlines under a new trend in which radars would be phased out and planes will mostly be guided by satellite.

The bimonthly publication estimated more than $25 billion would be spent during the 1990s on various aviation control systems because authorities had "redoubled their efforts to cope with international air traffic congestion."

It said major expansion programs were underway in the United Kingdom, the United States, West Germany, France, Spain, Sweden, Belgium, Ireland, Netherlands, Canada, and Taiwan. Upgrades were also likely in several East European nations and Greece, the magazine said in its survey of 48 countries.

It reported the new equipment will give aircraft more accurate and comprehensive navigation, and could effectively reduce the flight-time between destinations by allowing planes to go directly from point to point.

"In the congested skies above Europe there is now the real possibility of aircraft being able to fly from origin to destination without having to follow dog-legs in the narrow, crowded air corridors regulated by national organizations," the magazine explained. The massive spending surge is necessary to cope with increased passenger loads, currently expanding by five percent annually.

Jane's said civilian authorities were now starting to benefit from a switch in emphasis by governments and the electronics industry from military to civil aeronautic programs. The U.N.-run International Civil Aviation Organization had accepted that military satellites could supercede radars, it said.

However, the magazine reported that a shortage of air traffic controllers plagues the industry in many parts of the world, with a dropout rate of between 40 to 60 percent among student controllers in Europe.

Jane's said the problem was rooted in low pay for the high-pressure job, and suggested privatization of air traffic control facilities could generate the revenue required for capital investment and higher salaries.

#90030u1688 01/30/1990 ~United Press International

BY VERNON SCOTT

HOLLYWOOD (JAN. 30) UPI - How's this for casting: Sir John Gielgud, dubbed by Her Majesty a knight, and Molly Ringwald, Valley Girl extraordinaire?

It's as novel a duo as Sir Laurence Olivier and Marilyn Monroe in ''The Prince and the Showgirl'' in 1957.

Olivier and Monroe at least were roughly members of the same generation, despite the gap in their talent and experience.

Gielgud, a towering theatrical figure of our time, is a snappy 85. Ringwald, a delightfully fey newcomer, is, ''fer shure,'' a tender 21.

Gielgud, steeped in Shakespeare and the classics, has starred in ''Richard III,'' ''Julius Caesar,'' ''Becket.''

Among Molly's credits are ''Sixteen Candles,'' ''Pretty in Pink,'' ''The Breakfast Club.''

Despite the span of years, the distance of continents and oceans, not to mention experience, John and Molly are together at last in ''Strike It Rich.''

For what it's worth, the Gielgud-Ringwald connection is not romantic, much less sexual.

The British knight plays a wealthy businessman who is befriended by the Valley Girl who plays the wife of English actor Robert Lindsay.

Adapted from Graham Greene's ''Loser Take All,'' the film was directed by Britain's James Scott.

Actually, Ringwald was cast for her role before Gielgud was considered for the authority figure in the film.

Scott had no trouble bringing together such dissimilar stars, thanks, he says, to Gielgud's flexibility and Ringwald's professional discipline.

''Gielgud's character is based on Sir Alexander Korda,'' Scott said. ''He's an international guy, an eccentric. People hate him, but Molly's character is drawn to him.

''They don't have a lot of scenes together, but they are vitally important to the story.

''Molly held John somewhat in awe. Gielgud is a total eccentric.

''I first met with them at lunch, and at that point there was some casting that hadn't fitted into place. Gielgud was cast to play a smaller part, while Alec Guinness was scheduled to play the part that Gielgud eventually played.

''Unfortunately, Guinness had to pull out. Different actors were being considered. I had made the introductions, but Gielgud hadn't taken in who Molly was. He knew nothing about her.

''He turned to me and asked, 'And who's playing the girl?'

''I explained it was Molly, sitting right beside him. He said, 'Oh, forgive me. I'm so sorry.' That's how he is, sort of remote. But he carried it off.

''As we discussed the part vacated by Guinness, Sir John said, 'I wouldn't mind having a go at it myself.' He was putting himself forward.

''I told him, 'That's interesting, but I don't quite see you in the part. Perhaps, I could get round to it.'

''He suggested he read for the role. I asked, 'Why would you want to play the part?'

''He answered, 'It's much more showy, isn't it.'

''So we had a reading with Molly sitting in. It was most extraordinary, there we were auditioning Sir John Gielgud. But he was so humble and professional it didn't occur to him.

''He rose to the occasion and did the part very well. Molly was wide-eyed by the audition. She loves acting and the theater and it was great for her to be working with Shakespearean actors like Gielgud and Lindsay.

''If indeed Molly is a Valley Girl, there's nothing that says a Valley Girl can't act. She isn't classically trained, but in the last year or so she's been making the transition from high school girls to mature young women.

''I believe her most recent pictures were 'She's Having a Baby' and 'Fresh Horses.' I don't know how they were received, but they were not teenage roles.

''There are many demands on her in 'Strike it Rich' and she measures up very well. This picture is a rite of passage for her. She loves Graham Greene and it was that aspect of this film that made her respond to the script. She was looking for a romantic part.

''Molly lights up the screen. She has a completely instinctive approach to the camera, quite different from Gielgud and Lindsay.

''Molly was 20 when she did this film and she had already done 13 pictures. For Lindsay it was only his second picture. Gielgud is in a different category. So, it was very interesting working with all three.

''Lindsay wanted to improvise as he did in the theater, but you can't do that in movies. It was a nightmare for Molly, who was right on the nose every time. She's got a sense of timing that makes it easy for everybody. She knows exactly what bit will be used in the final film.

''I must say the scenes between Molly and Gielgud played as well as any director could expect. The two of them got along incredibly well.''

#90030u1732 01/30/1990 ~United Press International

ANCHORAGE, AK (JAN. 30) UPI - Jury selection began Tuesday in the criminal trial of fired Exxon Valdez skipper Joseph Hazelwood, but the judge objected to key defense questions about a captain's responsibility, juror drinking, and the case's impact on the oil industry and the state of Alaska.

Before defense lawyers started quizzing prospective jurors, Judge Karl Johnstone announced that certain proposed jury questions - submitted by lawyers in advance - were off limits.

Defense lawyer Dick Madson wanted to ask each potential juror, "Do you believe that a captain is always responsible for what happens to his ship regardless of what he himself may have done?"

Superior Court Judge Karl Johnstone banned that question in prohibiting defense lawyers from asking 17 of their 70 questions, but let another similar question stand: "Do you believe that a captain of an oil tanker should be criminally responsible for the actions of crew members?"

Hazelwood, 43, of Huntington, N.Y., was captain of the Exxon Valdez when it hit well-known Bligh Reef last March 24 and spilled nearly 11 million gallons of crude oil into Prince William Sound, the biggest spill in U.S. history.

Hazelwood was not operating the vessel at the time and had given his crew instructions to return to tanker lanes - from their detour around icebergs - before encountering the reef. No crew members are charged in the case and allegations against Hazelwood focus only on his own conduct.

Hazelwood is charged with operating the tanker while intoxicated, reckless endangerment, negligent discharge of oil, and criminal mischief - three misdemeanors and a felony that carry maximum penalties of seven years, three months in jail and a $61,000 fine.

Ninety prospective jurors were briefed Tuesday on proceedings. Thirty per day are being quizzed to find 12 impartial jurors to judge Hazelwood plus three alternates - a process that may take two weeks.

Prosecutors prepared an even longer list of 112 questions for jurors. Some questions from both sides were distilled into a three-page questionnaire jurors filled out before court.

In addition to basic background questions, jurors had to say why they came to Alaska, whether they belong to any environmental groups, how often they drink alcohol, and if they have suffered as a result of the Exxon oil spill or even benefited, perhaps by obtaining a lucrative spill cleanup job.

Madson wanted to delve deeper into jurors' outlook, philosophy, and drinking, but Johnstone nixed many such questions. Some of Madson's proposed questions, especially about responsibilities of a skipper, offered a strong hint at positions the defense might take.

And Madson sought to learn at the outset whether prospective jurors believed "that the oil spill may just be an accident as opposed to a criminal act." Madson wanted to ask, but Johnstone wouldn't let him, whether each potential juror felt "that as a citizen of Alaska you are a victim of the oil spill."

Madson also wanted to find out whether would-be jurors thought the outcome of the case might have an impact on the oil industry in Alaska, the nation's largest oil-producing state, and whether an acquittal would be a blow to the prestige of Alaska. Johnstone nixed those, too.

Johnstone also stopped defense lawyers from asking potential jurors whether they ever consumed alcoholic drinks before driving. Hazelwood's blood showed an illegal alcohol content after the spill, but defense lawyers have insisted alcohol played no role whatsoever in the wreck of the Exxon Valdez.

One issue that the judge and lawyers for both sides agreed should be explored thoroughly was how the flood of publicity has affected potential jurors' thinking about Hazelwood and his role in the events.

CHICAGO (JAN. 30) UPI - President Bush's proposal to impose transaction fees on the nation's commodities markets "will be the straw that breaks the camel's back," Chicago Board of Trade President Thomas R. Donovan said Tuesday.

Under a plan outlined in the budget proposal Bush sent to Congress Monday, commodities and futures traders would be charged 11 cents per transaction to cover the cost of federal regulation of the futures industry.

But Donovan said the proposal inevitably would send investors to foreign futures markets. "This will be the straw that breaks the camel's back in terms of our competitive position against foreign futures markets," Donovan said.

The CBOT is the biggest futures market in the world, but Donovan noted its share of the global market has declined from 38.4 percent in 1988 to 27.6 percent at the end of last year, despite a 65 percent increase in trading volume.

"The additional burden such transaction fees would place on the CBOT will only enhance the appeal of doing business with exchanges in London, Tokyo, or Paris, to name but a few," Donovan said. "We are not crying, 'Wolf!!' when we raise the issue of foreign exchanges competing against us," he said.

"It was demonstrated beyond all doubt during the stock market crash in (October) 1987," he said. "When our U.S. Treasury bond futures hit their price limits as investors fled to the security of government instruments, the business went immediately to the bond futures traded at the London International Financial Futures Exchange, where no price limits are in force. "Transaction fees will just as surely send our business abroad," Donovan warned.

CBOT Chairman Karsten Mahlmann denounced the proposed transaction fees as "double taxation," noting the industry already funds the congressionally mandated National Futures Association, an industry self-regulatory body.

Under the Bush administration proposal, the new transaction fee would be used to fund expanded enforcement activities of the Commodities Futures Trading Commission, the federal agency that oversees the operations of commodities and futures exchanges. According to budget documents, the administration would begin collecting the fee beginning Oct. 1. It would raise about $41.4 million.

Mahlmann said the fee would most severely affect traders who trade only for their own personal accounts, and it is those traders who give the market liquidity, accounting for 75 percent of all trades.

"Farmers and others who depend on our markets for their precision price discovery but do not directly participate would see these markets severely inhibited by transaction fees," Mahlmann said.

"Because of the additional costs the fees would impose, fewer users would participate, thus impairing the markets' efficiency as a price discovery mechanism," he said.

The Chicago Mercantile Exchange, the nation's second-largest commodities exchange, also was wary of the proposed fee. "The futures industry is cognizant of the administration's need for additional sources of revenue and has been working with Congress on language in pending CFTC legislation designed to help defray the incremental costs of operating the CFTC," the exchange said in a statement released late Monday.

"While the CME is prepared to take on some of the costs of the regulatory process, the present proposal goes far beyond the congressional intent and will require a great deal of scrutiny," the statement said. It said the CME would study the proposed fees and "make our views known during the legislative process."

#90030u1807 01/30/1990 ~United Press International

CHICAGO (JAN. 30) UPI - Soybeans and grain futures closed lower Tuesday on the Chicago Board of Trade, with a report that Soviet leader Mikhail Gorbachev may resign as Communist Party General Secretary adding late pressure to prices.

A later Soviet media report denied the claim.

Soybean and wheat futures opened slightly higher, but around midday turned lower.

Trading activity in beans was extremely light which permitted commission houses and cash-connected selling to push prices lower. The nearby March contract took the biggest hit.

Talks that Romania and Yugoslavia have been in the market for U.S. beans in recent days limited losses.

Late commission house sales left corn lower. Earlier in the day, commercial selling offset professional and fund-type demand. ADM Investor Services sold 1 million bushels while Farmers Commodities also sold March corn.

Professional and commission house selling overcame commercial demand, which waned after the open, to leave wheat mainly lower.

At the close, corn was off 1/2 to off 1 1/4, wheat was off 1 to off 2 3/4, soybeans were off 1 3/4 to off 5 and oats were off 1/4 to off 1 cent.

#90030u1823 01/30/1990 ~United Press International
WARSAW, POLAND (JAN. 30) UPI - Another Lenin statue bit the dust in Eastern Europe Tuesday.

The official Polish news agency PAP said ''unknown perpretrators, using steel cables and construction gear,'' pulled down a monument to V.I. Lenin in the mountain town of Poronin where the former Soviet leader spent several months in exile.

Police were investigating the incident, which PAP described as an ''act of hooliganism.''

Polish television showed the black, larger-than-lifesize metal statue lying on the ground with a steel cable around its neck. Two policemen stood guard nearby.

Several monuments to Lenin have been destroyed or defaced by Polish youths in the past few months, and in recent weeks the local citizens of Poronin had called for the removal of the statue.

The citizens, who had formed a committee, also wanted to turn a nearby Lenin museum into a peasant cultural center.

The director of the museum said the statue will not be placed back on its pedestal until the matter is resolved. For the time being, the toppled Lenin will be housed in a museum storage room, he said.

In May 1913, Lenin and his wife were expelled from Russia by the czar and went to live in the foothills of the Tatra Mountains, where he continued to conduct his revolutionary activities in Poronin and in nearby Krakow.

During Soviet President Mikhail Gorbachev's visit to Poland in 1988, he made a point to visit the Lenin Museum.

#90030u1855 01/30/1990 ~United Press International

CAPE CANAVERAL, FL (JAN. 30) UPI - An 11-ton science satellite rescued by the crew of the shuttle Columbia earlier this month appears to have suffered more wear and tear than expected during its 5.5-year exposure to the harsh environment of space, officials said Tuesday.

But such data is exactly what scientists with the Long Duration Exposure Facility - LDEF - project were looking for.

''I think there's a tremendous amount of work to do,'' said chief scientist William Kinard. ''There's a tremendous amount of data here.''

Columbia, carrying the Long Duration Exposure Facility satellite in its cargo bay, landed Jan. 20 at Edwards Air Force Base, Calif., to close out a record 11-day mission, the first of nine now planned for 1990.

Columbia was ferried back to the Kennedy Space Center last week atop a NASA jumbo jet and early Tuesday, engineers opened the spaceplane's payload bay doors, exposing the LDEF satellite to view for the first time since Columbia's crew plucked it from a failing orbit Jan. 12.

Engineers planned to remove the satellite late Tuesday from Columbia for a short trip to a nearby processing facility for a detailed examination.

Scientists are eager to begin inspecting the 12-sided, 30-foot-long satellite to find out what effect 5.5 years in orbit had on a variety of high-tech materials and other experiments.

In Houston, Columbia commander Daniel Brandenstein said, ''Before we can make a whole lot out of this (wear and tear to the satellite), I think we have to know and understand what we're really seeing.''

''I think it does certainly bring home the point we have to take a good look at anything we build for long duration in space,'' he said. ''LDEF is the best thing that could have happened to us.''

Kinard was on hand early Tuesday as Columbia's clamshell-like payload bay doors were cranked open and he said the satellite appeared to have suffered more space ''weathering'' than anticipated.

''The general impression that I had, it's weathered a little bit more than I had expected,'' he told United Press International. ''Lots of discoloration, lots of fading, lots of the thermal coatings and whatever have been affected. A lot of the thin film specimens, a lot of them have completely vanished.''

LDEF was launched in April 1984 by the crew of the shuttle Challenger.

The $15 million satellite was built to do little more than serve as a carrier for 57 experiments involving dozens of materials in research primarily aimed at learning more about how to build longer-lived spacecraft.

NASA originally intended to retrieve LDEF after just 10 months in space, but the rescue mission was postponed because of a series of shuttle launch delays and, ultimately, the 1986 Challenger disaster.

In orbit more than four years longer than originally intended, officials say LDEF is a ''treasure trove'' of scientific data about the effects of long-duration spaceflight.

LDEF spent its time in orbit in a ''gravity gradient'' attitude, that is, with one end constantly facing Earth and one side constantly facing the direction of travel, allowing materials on the ''leading edge'' to be bombarded by highly reactive atomic oxygen in the outer reaches of the atmosphere.

When Columbia's crew rescued the satellite using the shuttle's robot arm, the effects of that continuous bombardment were clearly visible in the form of discoloration, ''weathered'' experiment panels and other defects, including impact damage caused by micrometeors.

Prior to Columbia's landing, scientists worried the stress and strain of re-entry and landing might cause additional damage to the LDEF experiments but Kinard said that did not appear to have happened and that Columbia's payload bay was relatively free of debris.

''I think the condition of it now is probably very similar to what it was in orbit,'' Kinard said. ''I was amazed at how clean the payload bay floor looked.'' Once LDEF is removed from the shuttle's cargo hold, it will be transported to a special hangar-like facility at the Kennedy Space Center where it will be inspected and disassembled for analysis starting Feb. 3 or 4.

''At that point, we can really get up close and start inspecting (the experiments) tray by tray,'' Kinard said.

KARACHI, Pakistan (JAN. 30) UPI - Youths fought gunbattles and fired indiscriminately on passersby Tuesday in an upsurge of ethnic violence in Hyderabad that left at least 10 people dead and 15 injured, police said.

Authorities imposed a curfew and deployed troops to quell the unrest in Hyderabad, 80 miles northeast of Karachi, in Sind province.

Police said a quarrel Tuesday between a group of youths from the native Sindhi community and Mohajir migrants from India escalated into an armed clash in which two people were killed and six injured.

The unrest spread to other areas of the city and gunmen in a moving car sprayed bullets on pedestrians in a Mohajir-dominated area, killing six people and injuring nine, police said.

They said snipers killed another two people in separate incidents.

Hundreds of people have died in communal violence in Sind province in the past three years.

The native Sindhis resent the wealth gained by many of the Mohajirs, whose families came to Pakistan from India following the partition of the subcontinent in 1947.

HONOLULU (JAN. 30) UPI - Super Bowl quarterbacks Joe Montana of San Francisco and John Elway of Denver have withdrawn from Sunday's Pro Bowl at Aloha Stadium because of injuries, officials said Tuesday.

Montana, who led the 49ers to their fourth title in nine years last Sunday and Elway both cited sore elbows as their reasons for withdrawing, the Pro Bowl said.

Two other Super Bowl players also withdrew because of injuries from the annual all-star game.

Denver inside linebacker Karl Mecklenburg injured his left knee in the bowl game and was scheduled for arthroscopic surgery Tuesday. 49ers wide receiver John Taylor reported a sprained ankle.

Elway will be replaced by Dave Krieg of Seattle, and Mark Rypien of the Washington Redskins will replace Montana. The other AFC quarterback is Warren Moon of Houston, and Mark Carrier will take Taylor's place on the NFC squad.

Earlier, quarterbacks Boomer Esiason of Cincinnati pulled out with rib and toe injuries, and Don Majkowski of Green Bay cited personal reasons for his decision not to play in the all-star game.

#90030u1914 01/30/1990 ~United Press International

NEWPORT, RI (JAN. 30) UPI - An alcohol-treatment center published the memoirs this month of Billy Carter, the beer-guzzling, good ol' boy brother of former President Jimmy Carter who spent his last years speaking about his battle with alcoholism.

''Billy: Billy Carter's Reflections On His Struggle With Fame, Alcoholism and Cancer,'' was released by Edgehill Publications, an arm of Edgehill

Newport, an alcohol-treatment center.

Clients of the center have included Massachusetts first lady Kitty Dukakis wife of former presidential candidate Michael Dukakis.

Carter wrote the book with his wife, Sybil, and Ken Estes, a spokesman for the National Association of Addiction Treatment Providers.

Carter first appeared on the national scene as the beer-swilling operator of a gasoline station in Plains, Ga., spewing redneck philosophy during the 1976 presidential campaign.

The book portrays an intelligent man who realized the media was building his image as a Southern redneck. He used that image to gain notoriety and eventually cashed in on it for endorsements and television appearances.

Carter wrote that he made more money from endorsements and appearances in one year than his brother's $200,000 salary as president.

Billy Carter's wife recently told the Providence Journal-Bulletin that at times President Carter did nothing newsworthy and the media would look to his outspoken brother for material. Many reporters looked for anything that might embarrass the president, she said.

''I don't think Jimmy had a chance to succeed,'' Billy wrote. ''He was a Southerner and an outsider in Washington, and the Northern press still thinks we lynch blacks, wear overalls and go barefooted down here. If Jimmy had done some of the things Reagan has done, they would have wanted to impeach him.

''I've sometimes wondered what life would have been like if Jimmy had been re-elected in 1980. But I try not to think about it too much,'' he wrote. ''Four years might not have been enough for Jimmy, but it was enough for me.''

Sybil Carter said Billy decided to write his book after he was treated for alcoholism. He became serious about the project after learning he had cancer of the pancreas, she said.

Carter acquired a reputation as a small-town Southern boy who loved his beer. There was even a beer named after him - ''Billy Beer'' - and he jokingly said you had to be an alcoholic to drink it. Although he was often shown drinking beer, in private he preferred vodka. Sometimes he drank as much as a gallon a day, according to his memoirs.

He admitted he was an alcoholic in the late 1980s and underwent treatment at Long Beach Naval Hospital in California.

Edgehill's medical director, Dr. Bill Griffith, was part of Carter's treatment team in Long Beach. Carter spent the remaining nine years of his life sober. He and his wife toured the country lecturing about alcoholism.

He died of cancer in 1988.

-30- 3178

#90030u1935 01/30/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (JAN. 30) UPI - Black youths erected burning barricades and hurled stones in a second day of clashes with police in the central city of Bloemfontein Tuesday during protests against a boycott-breaking tour by English cricket players.

Police also fired tear gas to break up a squatters march led by prominent anti-apartheid cleric Allan Boesak near Cape Town Tuesday and reported four deaths in an upsurge of political unrest elsewhere, including one black man who died while in police custody.

In Bloemfontein, police clashed with demonstrators for a second day over the arrival of the controversial English cricket team touring the country despite an international boycott of sporting contacts with South Africa until apartheid is abolished.

At least 45 people were arrested Tuesday morning, pushing to 114 the number arrested in 24 hours in the area.

Police said they fired tear gas and rubber bullets to disperse youths throwing stones and barricading streets of the black township of Manguang on the outskirts of the provincial capital city. On Monday night, police used similar tactics to break up a township meeting about the tour.

In a bid to defuse tensions, cricket tour organizer Ali Bacher sought and received magisterial permission for the anti-tour demonstrators to stage a protest outside the ground where the second match of the tour was under way Tuesday.

Securing formal permission for the rally succeeded in averting another confrontation between the protesters and police, who have pledged to break up all unauthorized protests.

Protesters have blamed the South African Cricket Union for organizing the English team's tour. The boycott is considered one of the most effective anti-apartheid measures. Cricket, one of South Africa's most popular sports, is usually played in outdoor stadiums and is similar in some ways to American baseball.

Demonstrations against the cricket tour have contributed to what the chief

police spokesman, Gen. Herman Stadler, Tuesday described as a general rise in political unrest in the country over the past month.

Stadler said the easing by President Frederik de Klerk of restrictions on anti-apartheid demonstrations and raised expectations of reform also had contributed to the upsurge in unrest.

''There has been a definite escalation,'' he said. ''Expectations are created, and people are inclined to come to the fore and apply pressure.''

Stadler also said police had warned the public to avoid entering the downtown area of Cape Town on Friday when a major protest is planned to coincide with de Klerk's scheduled address to parliament on his racial reform program.

Police formally notified protest organizers that the march called to demand the immediate release of jailed-for-life black nationalist Nelson Mandela and the abolition of the racially segregated parliament would be considered illegal unless a rally permit is obtained.

The Rev. Allan Boesak, president of the World Alliance of Reformed Churches, said rally organizers had no intention of requesting formal permission for what they considered a basic right to protest.

Boesak, who was briefly overcome by police tear gas Tuesday while leading a march by some 250 squatters facing eviction on the outskirts of Cape Town, said he feared bloodshed on Friday if police prevent the parliament protest.

''I am filled with foreboding,'' he said. ''If this is the way people react to a small group of people in a little, out of the way place, what are they going to do on Friday?''

A police unrest report Tuesday reported three killed and 10 wounded in violence over the past 24 hours, including an incident in a black township near the central city of Bethlehem reminiscent of the bloody unrest that engulfed the country in 1984 and 1985.

Police said they opened fire, killing a woman and a youth, to break up a mob of blacks hurling petrol bombs at the homes of the township mayor and a local policeman. The police said the attack caused serious damage.

Police also said a 20-year-old black prisoner died in the back of a police vehicle as he was being taken to a police station in the province of Natal. A statement said the man had resisted arrest but was overpowered and placed in the back of the vehicle. He was found dead on arrival at the police station.

''The possibility that he died of suffocation due to strangulation with a shoe lace is being investigated,'' a statement said.

#90030u1937 01/30/1990 ~United Press International

SANTA MONICA, CA (JAN. 30) UPI - A police chief's son accused of strangling five women during an 18-day murder spree in 1984 was sentenced Tuesday to die in the gas chamber for his convictions in three of the slayings.

Superior Court Judge Robert Thomas formally imposed the death sentence on Dean Philip Carter, 34, after relatives of several of the slain women urged him to do so.

''I think he should be strangled,'' Helen Cullins, the mother of murder victim Janette Cullins, said prior to sentencing. ''That's the way he killed my daughter.''

Carter, a native of Nome, Alaska, who worked as a television cameraman in that state, was convicted last July by a Superior Court jury of three counts of first-degree murder and two counts each of rape and burglary.

Carter, the adopted son of a former police chief in Alaska, was also convicted of special circumstance allegations that qualified him for a possible death sentence.

At the conclusion of the penalty phase of his trial in August, jurors recommended that he die in the California gas chamber at San Quentin Prison.

In so doing, the jury rejected a defense plea to recommend that Carter be sentenced to state prison for life without the possibility of parole, the only other possible punishment he faced.

''He's one of the most evil people I've ever seen, an absolutely awful, non-human being,'' said Deputy District Attorney Marsh Goldstein, who prosecuted Carter.

''If you believe society has the right to impose the death penalty ... then this is the case where it should be applied,'' he said.

It is not likely however that Carter will be executed anytime soon. Death penalty convictions are automatically appealed in California, a process that normally takes years. Once the state court appeals are exhausted, Carter can appeal in the federal court system.

Carter was convicted of strangling Jillette Mills, 24, and her roommate,

Susan Knoll, 33, and stuffing their bodies into the bedroom closet of their Culver City apartment in April 1984. He was also convicted of raping Mills.

In addition, he was found guilty of raping and strangling Bonnie Anne Guthrie, 24, of West Los Angeles, that same month.

Carter still faces trial in San Diego County for allegedly strangling Cullins, 25, of Pacific Beach, and in Oakland for strangling Tok Chum Kim, 37, also in April 1984.

All five slayings occurred during an 18-day period that month.

Police said Carter knew all his victims, most of whom he had met in bars and restaurants.

''He's a very smooth-talking individual,'' said Richard Haas, an investigator in one of the rape cases. ''He could meet somebody and sell himself in a very brief time.''

Carter previously was sentenced to 56 years in state prison for raping and terrorizing a 22-year-old Ventura woman in March 1984.

Prosecutors and probation officials cannot pinpoint a motive for Carter's crimes. But they point to a troubled childhood - including his illegitmate birth, alcoholic parents and juvenile deliquency - and a broken marriage that ended in estrangement from his twin sons, as possible motivating factors.

Carter at one one time was investigated in connection with the so-called ''Green River'' serial murders in Washington state, but later was eliminated as a suspect in that case.

#90030u1943 01/30/1990 ~United Press International

LOS ANGELES (JAN. 30) UPI - Pacific Enterprises, parent of Southern California Gas Co. and Thrifty Corp., reported Monday a slight increase in fourth-quarter earnings to $42 million, or 57 cents a share, up from $41 million, or 62 cents a share, for the 1988 quarter.

Earnings per share for the 1989 quarter were reduced by the higher number of common shares issued for acquisitions and higher dividends on preferred stock, the company said.

Fourth-quarter revenues were $1.8 billion, up from $1.6 billion for the 1988 quarter.

Analyst Foster Corwith of Dean Witter Reynolds said the earnings were about 5 cents a share under expectations, although operating income from Southern California Gas, the nation's largest natural gas utility, was unchanged at $55 million.

Operating income for the retailing segment, which inlcudes the Thrifty, Pay 'N' Save and Bi-Mart general merchandise stores and three sporting goods chains, was $11 million, off from $14 million for the year-ago quarter.

Operating income for the company's interstate pipeline operations was $1 million, off from $3 million for the 1988 quarter.

Interest expense after income taxes was $30 million, off from $34 million for the year-ago period.

For 1989, earnings were $211 million, or $3.05 a share, off from $222 million, or $3.51 a share, in 1988. Revenues for 1989 were $6.8 billion, up from $5.9 billion for 1988.

James Ukropina, chairman, said higher interest costs cut 1989 earnings as a result of financing costs for acquisitions in 1988. Those purchases, along with previous acquisitions, have come under some criticism for cutting into earnings, but shareholders last year voted down a union-backed candidate who ran on a platform of opposing such policies.

Interest expense after income taxes for 1989 was $120 million, up from $106 million for 1988.

Southern California Gas reported 1989 operating income of $215 million, up from $204 million for 1988. The retailing segment had 1989 operating income of $68 million, up from $66 million.

Corwith said Pacific Enterprises continued to post a strong cash flow, which he said is critical to the company since it is a high-yield stock.

The 1989 cash flow was $9.64 a share, off from $9.70 a share in 1988.

Pacific Enterprises stock was off 12.5 cents Tuesday in early afternoon trading on the New York Stock Exchange.

Corwith said the stock, which traded at as high as $53.75 a share last year, has been depressed because of worries that interest rates may rise, making high-yield stocks less attractive.

''The company is looking pretty attractive, because the stock has been hurt largely by external factors,'' Corwith said.

DALLAS (JAN. 30) UPI - A housewife who made a career out of clipping refund coupons was convicted along with a co-defendant Tuesday in a $2 million scheme to distribute counterfeit coupons.

Connie Arvidson, 34, of Boca Raton, Fla., was found guilty on two counts of mail fraud and one count of conspiring to commit mail fraud. She was acquitted on three other counts.

The jury that deliberated for five days also found David Keith Rees, 40, of San Antonio, guilty on a single count of mail fraud.

Sentencing for the two was tentatively scheduled for March 23 before U.S. District Judge Sid Fitzwater. Each count carries a maximum possible sentence of five years in prison and $250,000 fine.

Another co-defendant, James Floyd Richards, a San Antonio man allegedly hired by Dees to print the coupons, was acquitted on all charges.

Arvidson was accused of buying, trading and using fake coupons allegedly printed in Texas. She maintains did not know the coupons were fake and refused to accept a plea bargain offer from federal prosecutors last year.

Arvidson does admit being addicted to a hobby that prompted her to climb into trash dumpsters in search of discarded refund coupons.

She is known as something of a coupon queen, having clipped and traded her way to acquiring a nose job and breast surgery. She also made a down payment on a $40,000 BMW with coupons.

The case grew out of the Postal Service investigation of ''refunders,'' people who earn money through coupons or rebates or swap them through a nationwide network.

#90030u1952 01/30/1990 ~United Press International
HOUSTON (JAN. 30) UPI - A mail bomb packed with large nails and concealed in a small package addressed to a minister injured his daughter Tuesday when she opened it in the office of a non-denominational church with a national following.

Lisa Osteen, 30, the daughter of the Rev. John Osteen, pastor of Lakewood Church, was in fair condition at Ben Taub Hospital. She suffered flash burns, cuts and bruises in the 11 a.m. explosion.

''She's okay. She's going to be fine,'' Lisa Osteen's sister, April, said at the hospital. ''Nothing can hurt us. We've got Jesus on our side.''

The package was addressed to John Osteen, whose sermons are broadcast across the country. But Osteen, whose church is referred to as the ''Oasis of Love,'' told reporters he had not received threats recently.

''We've had no threats of any kind,'' he said.

''She was not severely injured,'' Osteen said of his daughter. ''She's going to be all right. We just thank God she was protected and we know the angels of God watched after her and our prayers protected her. The devil did his best, but his best was not enough.

''We're just going to go on and do the Lord's work. We'll pray for those who have done this. We know that they're sick, they need help.''

Other workers at the church, with a membership of about 10,000, said they heard a loud pop and then screams.

''We did have apparently a pipe bomb that came in a small package in our regular mail that was picked up at the local post office today,'' said a church worker. ''As is normal procedure, Lisa opened the package. There was an explosion.''

Jesse Gallardo, head of security at the church, said the pipe bomb contained 3- to 4-inch nails and was concealed in a white package.

The blast was being investigated by the FBI, Bureau of Alcohol, Tobacco and Firearms, Houston Police Department and postal inspectors.

Osteen had the package sitting on her lap when the bomb went off, and suffered burns and contusions to her abdomen and thighs. She remained conscious throughout the ordeal.

''It was a dangerous device,'' said police Sgt. J.C. Mosier. ''It was a

miracle she wasn't hurt worse.''

Lakewood Church, on Houston's east side, is one of the largest churches in the city.

Federal agents said they do not believe the mail bomb was related to recent deadly bombings in the Southeast.

''We don't know of any connection between this incident and those that occurred on the East Coast,'' said ATF spokesman Phillip Chojnacki. ''This probably will be treated as an unfortunate routine bombing.''

The Houston incident followed one day the mailing of a booby-trapped briefcase containing a loaded pistol to an assistant U.S. attorney who prosecuted top Asian heroin traffickers in New York City.

The package, addressed to Assistant U.S. Attorney Catherine Palmer, was opened at the U.S. District Court building in Brooklyn but the .22 pistol failed to fire.

There was no evidence to link either the New York or Houston cases to mail bombings that killed a Birmingham, Ala., federal judge and a Savannah, Ga. lawyer in December, FBI officials said.

''According to preliminary reports from the scene, there are few, if any, similarities between this explosive device and those devices involved in the Demember incidents,'' said FBI spokesman Tom Moore in Birmingham.

Judge Robert Vance of 11th U.S. Circuit Court of Appeals was killed Dec. 16 at his suburban Birmingham home by a package bomb. Two days later, Savannah, Ga., attorney and City Councilman Robert Robinson died when a mail bomb exploded in his office.

A mail bomb was intercepted by mail room workers at the 11th U.S. Circuit of Appeals headquarters in Atlanta Dec. 18 before it went off. The following day, the NAACP office in Jacksonville, Fla., was shipped a package bomb that never exploded.

#90030u1956 01/30/1990 ~United Press International

RAMONA, CA (JAN. 30) UPI - Casey Tibbs, a nine-time world champion rodeo cowboy, has died after a bout with cancer. He was 60.

Tibbs, who died Sunday, was a legend among rodeo riders and fans during and after his heyday on the professional circuit in the 1950s. A statue of the cowboy graces the entrance to the Professional Rodeo Cowboys Hall of Fame in Colorado Springs, Colo.

He remained a familiar figure at rodeos across the nation even though he had not ridden professionaly for years. The annual Casey Tibbs Roundup rodeo is held every May in Ramona.

''Anytime Casey's name was announced there was a lot of excitement in the audience,'' said J.R. Watt, president of the Fort Worth Stock Show rodeo. ''He was so good at what he did, and the way he dressed caught people's attention.''

Tibbs was known for his bushy moustache and colorful purple shirts, but he built a reputation as one of the best ever in the grueling bronco-busting event.

''It was like (he was) floating,'' a friend, Rusty Richards, said. ''He seemed to almost hover above the horse.''

Tibbs is survived by his fiancee, Suzanne Creps of Reno, Nev., a daughter, two brothers and two sisters.

A memorial service was set for Friday. Burial is to take place Monday in Fort Pierre, S.D.

#90030u1969 01/30/1990 ~United Press International

NEW YORK (JAN. 30) UPI - The hospital where a doctor with AIDS claims she caught the deadly virus from an infected needle violated its own rules on the disposal of infectious waste, her lawyers claimed Tuesday.

Lawyers for Dr. Veronica Prego presented as evidence in her $175 million lawsuit against the city, hospital and others, a sign posted in Kings County Medical Center about how to dispose of infected needles.

The rules on the sign required that used ''syringes and needles be placed in containers in the patients' rooms'' for later disposal.

Prego and other doctors have testified that there were no such containers in patients' rooms and that health care workers had to walk down a long hallway with needles in their hands to dispose of them.

State Supreme Court Justice Aaron Bernstein permitted lawyers for the Argentine doctor to show the jury a sign they say was posted on the night Prego pricked her finger on an AIDS infected needle left in a pile of debris in a patient's room.

Lawyers defending the city and hospital disputed claims the sign was in place at the time of the accident and pointed to the deposition of Dr.

Joyce Fogel, also a defendant in the case, who said she was not sure if that sign was posted in January 1983, when Prego was stuck.

''This witness testified the sign was not in place,'' defense lawyer Stanley Friedman said. ''It's just another blind alley thrown up (by Prego's lawyers.)''

Prego's lawyer, Diane Wilner, said the Health and Hospital Corp. itself had produced the sign when Wilner's firm subpoenaed all signs in place in that part of the hospital in 1983.

''It is our position that the sign existed, and the judge has found that it was in place,'' said Wilner's partner, Susan Karten.

Prego, 32, is suing the city's Health and Hospital Corp. as well as two other doctors. In her landmark suit, she claims that the hospital was negligent because there were no needle disposal units next to the bedside of patients infected with AIDS.

Monday, defense attorneys tried to attack the testimoney of an AIDS expert who said Prego was most likely infected with the virus by a carelessly discarded needle, pressing him on whether she could have acquired the virus during sex years earlier.

The witness admitted Monday under harsh cross-examination the infection could have taken place earlier than the doctor claimed.

#90030u1980 01/30/1990 ~United Press International

TAMPA, FL (JAN. 30) UPI - Manuel Noriega's personal banker and four other bank officers charged with laundering drug money knew the deposits were drug profits but worked under a policy that stressed not looking too closely at where the money came from, a prosecutor said Tuesday.

During opening statements in the defendants' federal trial, Assistant U.S. Attorney Michael Rubinstein said Noriega banker Amjad Awan, 37, and the others laundered drug money for the Bank of Credit and Commerce International not for money, but to further their careers at the bank.

According to Rubinstein, Awan was told by an undercover customs agent that his clients included ''some of the biggest drug dealers in South America '' and he replied, ''It's not any business of mine who your customers are.''

Awan's attorney, however, later told the 12-member jury that his client had a ''good faith belief'' that he was not involved in laundering drug profits and that the prosecution was trying to find him guilty by his association with Noriega.

Awan for more than a decade administered $23 million kept by the military strongman and the Panamanian government in BCCI accounts. He and four other bank officials and two Colombians were indicted in Tampa in October 1988 on 32 counts of money laundering and one count of conspiring to smuggle drugs. Each faces a maximum penalty of life in prison without the chance of parole.

The indictment, which alleged that $32 million in drug profits were laundered throughout the world, followed a two-year U.S. Customs Service sting dubbed Operation C-Chase.

Two divisions of Luxembourg-based BCCI also were indicted and pleaded guilty Jan. 16 to laundering $14 million in cocaine profits. As part of a plea bargain, the bank agreed to forfeit the money and cooperate with prosecutors. The bank also was placed on five years probation.

One of the Colombian businessmen, Gonzalo Mora Jr., has pleaded guilty to all 33 counts and is awaiting sentencing.

The other defendants are bank officers Akbar A. Bilgrami, 36; Sibte Hassan 32; Syed Aftab Hussain, 37, and Ian Howard, 40, and Medellin, Colombia, businessman Rudolf Armbrect, 34.

''The evidence will show that the motive in this case was not that the defendants wanted to put money in their own pockets,'' Rubinstein said. ''But these defendants did it for the bank ... they did it to further their careers in the bank.

''There was definitely a clear and well-defined policy stressing that officers take as many deposits as you can, as fast as you can, and don't look to closely at where it came from.''

John P. Hume, Awan's defense attorney, said his client routinely filed paperwork on all deposits and where they went, indicating that the former manager of BCCI's branches in Panama was not trying to hide the money.

Awan ''had a good faith belief that he was not engaged in illegal money laundering,'' Hume said.

The lawyer said the prosecution was trying to prove Awan guilty by his association with Noriega, who was deposed in the U.S. attack on Panama last Dec. 20.

Awan became involved with Noriega ''at a time when General Noriega was a friend of the United States,'' Hume said.

In the late 1970s, Noriega was sent a letter of praise by U.S. drug agents Hume said. ''In 1983, then Vice President Bush met with General Noriega, and also in 1983, CIA Director (William) Casey met with General Noriega. ... In 1985, (White House aide) Lt. Col. Oliver North and (Vice) Admiral John Poindexter needed help to fund the Contras and they came to General Noriega.

''What did my client know about General Noriega that the U.S. government didn't know?'' he said.

Poindexter, who was national security adviser during the Reagan administration, was North's supervisor. North was fired by the White House and convicted in the Iran-Contra scandal.

Rubinstein said that Special Agent Robert Mazur, an undercover officer who spearheaded the sting, told each of the defendants that the money was coming from Colombian drug kingpins who demanded confidentiality and no ties to certificates of deposit that BCCI officers were setting up as part of the laundering operation.

Mazur, who used the alias Musella, told Awan, ''You must promise me that

the certificates of deposit be kept absolutely confidential ... my clients are some of the biggest drug dealers in South America,'' Rubinstein said. ''Mr. Anwar's answer was, 'It's not any business of mine who your customers are.'''

The sting began in early 1986 when Mazur and another agent met with Mora, pretending to seek banking contacts in the United States, Rubinstein said.

Following the meeting, Mazur was contacted by Hussain, a branch manager for BCCI in Panama, who first suggested to Mazur that the drug profits be converted to certificates of deposit in Panama and Luxembourg because of their strict confidentiality banking laws.

A total of eight indictments were returned nationwide as a result of Operation C-Chase, charging more than 80 people with laundering drug money.

The indictment said drug profits filtered into BCCI's Tampa branch from collection sites in Houston, Chicago, Los Angeles, Miami, Detroit, New York and Philadelphia.

At the time of the indictment, BCCI was the seventh-largest privately held financial institution in the world, with nearly $20 billion in assets and more than 400 offices in 73 countries.

#90030u1984 01/30/1990 ~United Press International

WASHINGTON (JAN. 30) UPI - The U.S. government protested to the Romanian provisional government about the intimidation of political opposition parties by Communists and former Communists.

The protest, according to State Department spokeswoman Margaret Tutwiler, grew out apparent attempts by the National Salvation Government to overpower some of the opposition parties.

''We are deeply troubled by what appears to be active intimidation of legitimate organizations which are seeking a legitimate, independent role in Romania's new order,'' Tutwiler said.

She was referring to demonstrations by NSF groups against opposition parties such as the Naitonal Peasant Party and the Liberal Party.

She said the U.S. Embassy in Bucharest protested the actions by the NSF and ''asked that the right of all political groups to peaceful protest be fully protected.''

Secretary of State James Baker, due to go to Moscow next week, had been considering a stop in Bucharest, according to officials, but the

continuing demonstrations have made such a trip unlikely. Baker will stop in Prague, Czechoslovakia, next week on his way to Moscow, the State Department has announced.

Richard Schifter, assistant Secretary of State for Human Rights, is in Bucharest, meeting with officials of the Romanian NSF.

''He has been forcefully stating our concerns,'' Tutwiler said.

#90030u1986 01/30/1990 ~United Press International

BEIRUT, LEBANON (JAN. 30) UPI - The Christian Phalange Party leader

withdrew from President Elias Hrawi's government Tuesday, dealing a sharp blow to Lebanese reconciliation efforts, political sources and a leading newspaper reported.

The political sources said party chief George Saadeh delivered his resignation as minister of posts and communications to Prime Minister Selim Hoss. The Christian Phalangists are the only Christian political faction supporting the Christian president.

The leading newspaper, An-Nahar, said the Phalange Politburo decided Monday ''after a great deal of hesitation'' to withdraw from the government because Hrawi has failed to establish a national unity government.

The party's vice president, Munir Hajj, said the party still supported the Arab League-sanctioned peace accord worked out by a majority of Moslem and Christian Lebanese lawmakers, which led to Hrawi's election as president.

Hajj said Saadeh was resigning because the main powers in Christian east Beirut, Gen. Michel Aoun and the head of the Lebanese Forces militia, Samir Geagea, have refused to join the Hoss Cabinet.

''The Hoss Cabinet has ceased to be a national reconciliation body,'' Hajj said.

Aoun, who has rebuffed the Taif agreement for failing to ensure a quick Syrian troop withdrawal, has refused to step down and has pledged to oppose Hrawi until all Syrian soldiers leave Lebanon. Aoun still controls 15,000 troops stationed in the Christian enclave.

The development on the political front came as military sources said gunmen loyal to Geagea opened fire on Aoun's troops who attempted to take control of a school in the area of Furn Al Shubbak and the soldiers returned the fire.

Later, the violence developed into a street battle that raged for more than one hour. Witnesses said blasts of gunfire sent panicked civilians scurrying for cover, as roaring tanks rolled on asphalt streets and many businesses closed.

The military sources said four people were wounded in the violence, including one army soldier.

Later in the day, Aoun threatened he would resort to shoot-to-kill policy in case his troops were attacked by gunmen in the Christian enclave.

Aoun, in a televised statement, said, ''I declare today that I will not tolerate armed protests any more. Today, my men attempted to reopen a

school that was used as a barracks for a long time, but the gunmen refused and opened fire.

''As of now, any one who would try to gain anything with the rifle would only get the loss of his life,'' Aoun said, hinting that his men will open fire to kill in case they were attacked again.

Aoun has also threatened to cut water and electricity to the Moslem part of the capital. Aoun has accused Hrawi's government of launching ''a war of starvation'' and imposing a financial siege against the Christian enclave.

Aoun threatened to counter every measure by Hrawi's government. ''We will face a gun for a gun, starvation for starvation, thirst for thirst and electricity for darkness.''

While Saadeh's resignation appeared to be a major setback for Hrawi's government, Phalange sources said the move could help ease the growing tension in east Beirut and promote resumption of talks with Aoun.

The sources said the Phalange Party will try to maintain its ties with Hrawi's leadership.

Aoun earlier barred Saadeh and other Christian deputies who attended the Taif meetings from returning to east Beirut.

#90030u2006 01/30/1990 ~United Press International

BOSTON (JAN. 30) UPI - This just in from the cola wars: Televised taste tests notwithstanding, practically no one can tell the difference between Diet Coke and Diet Pepsi.

That was the word Tuesday from academia, where four groups of psychology students at Williams College in Williamstown recently put television taste tests to the test of science and found them wanting.

One group tested 80 Williams students and concluded that ''an insignificant number of subjects could consistently tell the difference between Diet Coke and Diet Pepsi,'' the college said.

More than one-third of those who thought they liked one brand better ''actually preferred the other diet cola in the test,'' the study added.

''This allows advertisers to say that 30 or 50 percent of those who said they preferred one product actually prefer another,'' said Paul R. Solomon the psychology professor who oversaw the research.

''It's a true statement,'' he added, ''but misleading since all it means is that people just can't tell the difference.''

The cola makers' reaction to the Williams finding that there's no discernible distinction?

Coca Cola did not respond. Pepsi's spokesman, Tod MacKenzie, was skeptical. ''I think you'd find that most consumers out there would differ '' MacKenzie said.

#90030u2011 01/30/1990 ~United Press International

(JAN. 30) UPI - Four senators got high marks from the Chamber of Commerce for their voting records on key business legislation in the last session. Senators scoring 100 percent were Republicans Richard Lugar of Indiana, Christopher Bond of Missouri, Malcolm Wallop of Wyoming and Democrat David Boren of Oklahoma. A key issue the chamber listed was expansion of a law requiring contractors to pay wages set by the government for work on federal projects.

Another setback to reconciliation efforts in civil war-weary Lebanon. The head of Lebanon's Christian Phalange Party reportedly will withdraw soon from the Syrian-backed government of President Elias Hrawi . The resignation would bring the departure of the only Christian political faction supporting the Christian president. Elsewhere, factional clashes were reported today in East Beirut.

Chilean police say 50 prisoners escaped from jail... some of them inmates accused in a 1986 assassination attempt on President Augusto Pinochet. Police say seven convicts were arrested after the escape was discovered. The inmates escaped through a one and one-half-foot high tunnel dug 300 feet from the Santiago Public Jail under a street to an unused railway station. Most were members of an armed branch of the Communist Party.

The Coast Guard says a sailboat crowded with Haitian refugees sank in rough seas, and two of the migrants may be missing. 48 Haitians were rescued by a Coast Guard cutter, including four people injured when the vessel sank during the weekend, 400 miles southeast of Miami, Florida. Immigration agents are trying to determine the original number of passengers on board, but refugees say two people are missing. The refugees are being returned to Haiti today.

NEW YORK (JAN. 30) UPI - The heart of the prosecution's assault case against reputed Mafia boss John Gotti - a secret tape recording of him allegedly ordering underlings to ''bust up'' a union leader - was played Tuesday for jurors wearing earphones.

The panel of seven men and five women donned the bulky black headphones and listened to a series of conversations in which Gotti, the reputed head of the Gambino crime family, tried to determine who was responsible for trashing a mob-linked restaurant that was built with non-union labor.

Once he determined it was John O'Connor, the business agent for Local 608 of the Carpenters Union, Gotti informed his underlings, ''We're gonna, gonna bust him up,'' according to a government-prepared transcript.

The conversations were secretly recorded in the winter of 1986 at Gotti's alleged Queens headquarters, the Bergin Hunt and Fish Club. Most of the tapes are muffled and all of them are studded with profanity.

O'Connor was shot four times in the buttocks on May 7, 1986, as he entered the union headquarters in Manhattan.

Gotti, 49, and a co-defendant, Anthony Guerrieri, 60, a reputed Gambino soldier, are charged with assault and conspiracy. A third defendant, Angelo Ruggiero, a reputed Gambino capo, died of natural causes in December.

As the jury prepared to hear the tapes, the Dapper Don was paid a courtroom visit by actor Ray Sharkey, who played a gangster in the television show ''Wiseguy.'' Gotti joked and laughed with Sharkey and then continued to listen to the felony case against him.

On a Feb. 12, 1985, tape, Gotti is heard determining that O'Connor ordered hundreds of unionized carpenters to rip apart the Bankers and Brokers

Restaurant in Battery Park City. The reputed Godfather is then told that O'Connor was not at the restaurant to witness the destruction.

''I don't believe that,'' said Gotti, according to the transcripts. ''I don't believe no shop stewards would take it upon themselves no more than I believe ... that my mother'' would be sexually involved with ''Ronald Reagan.''

In another conversation recorded hours after O'Connor was shot, Gotti's brother, Gene, is heard breaking the news that the labor leader had been shot.

''John O'Connor's been shot four times. They hit him in the legs. ... I heard it on the news. It went off just like that,'' Gene Gotti said.

''Oh, yeah,'' Ruggiero said.

''Heh, heh, heh. Heard it on the news,'' Gene Gotti said.

WASHINGTON (JAN. 30) UPI - Ronald Reagan must turn over to his former national security adviser portions of his personal diaries about the Iran-Contra scandal, a federal judge ruled Tuesday.

U.S. District Judge Harold Greene had privately reviewed portions of the Reagan diaries and ruled that large portions are not relevant to John Poindexter's defense.

But other parts of the diaries are relevant, Greene said, ordering Reagan to turn them over to Poindexter's lawyers by Feb. 5. The relevant entries were written in 1985 and 1986.

Poindexter is scheduled to begin trial Feb. 20 on five felony charges related to the Reagan administration's worst scandal.

But Reagan could now make a claim of ''executive privilege'' in an effort to keep his diaries secret, potentially delaying Poindexter's trial.

87oindexter plans to defend himself by testifying that Reagan knew about - and approved - his activities on behalf of the rebel Nicaraguan Contras at a time Congress had banned such aid. The assistance to the Contras came from the proceeds of secret U.S. arms sales to Iran.

''Upon its review of the Reagan diary excerpts, the court has concluded that some, but not all, the diary entries produced in response to the various subpoena categories are relevant to defendant's claim'' that

Reagan authorized Poindexter's actions, Greene ruled.

In Los Angeles, Reagan's spokesman, Mark Weinburg, refused to comment on the judge's order to the former president.

Poindexter first demanded the diaries last November and also has demanded that Reagan be required to testify in Poindexter's defense. The judge has not yet ruled on whether Reagan will have to appear in his courtroom.

The Poindexter trial also could be delayed by lengthy legal wrangling over the protection of ''national security'' because of concern by the Bush administration over the disclosure of some material in a public trial.

Included in the diary excerpts that Reagan must turn over, Greene ruled, are entries involving:

-A ''successful'' trip Poindexter took to Central America in December 1985 and ''a somewhat ambiguous comment arguably indicating that the former president knew of defendant's activities on behalf of the Contras.''

-A report on meetings in December 1985 ''with various high officials, including Poindexter, to discuss the sales of arms to Iran.''

-A notation that ''addresses briefly the issue of proceeds from these sales.''

Diary notations in late April 1985 ''describe President Reagan's apparently successful effort to persuade a Central American government to release to the Contras a shipment of arms that had been seized by the military of that nation,'' Greene said, and they must be turned over to Poindexter.

The judge allowed Reagan to keep secret many other entries dealing with efforts to win support for the Contras among foreign leaders. Most of the entries are ''too general and unspecific'' to be turned over, Greene ruled because they do not prove ''the notion of a quid pro quo.''

Diary entries about Reagan's concerns for American hostages in the Middle East and contacts with their families also ''are too general'' for Poindexter's purposes and do not have to be turned over, Greene ruled.

None of those entries, the judge said, ''sheds any light on the question of what President Reagan may have known about the diversion'' of arms sales profits for use by the Contras.

Greene also said a diary entry about a Reagan conversation with CIA Director William Casey also does not have to be turned over to Poindexter because it does not suggest activities by the National Security Council on

behalf of military or paramilitary Contra assistance, prohibited by Congress under a law known as the Boland Amendment.

In one part of his opinion, Greene noted that ''President Reagan produced a brief entry regarding a certain top secret and extremely sensitive activity of the United States government.''

The judge said the undisclosed ''activity'' was not relevant to Poindexter's defense and it could remain secret.

ROCHESTER, N.Y. (JAN. 30) UPI - The year that ended with the ultimate New Year's party atop the Berlin Wall also was the ''Year of the Dullard,'' the compiler of the annual ''10 Dullest Americans'' list said Tuesday.

The 1989 list includes Roseanne Barr, Arsenio Hall, Rep. Barney Frank, D-Mass., and Sony Chairman Akio Morita.

They and six other folks deemed dull received congratulatory letters from J.D. Stewart's organization, International Dull Folks, Unlimited.

Stewart never explained how the Sony chairman made it onto the dull Americans list.

Stewart, who calls himself IDFUN's ''Chairman of the Bored,'' said Tuesday last year hit new highs for low trivial pursuits and personalities.

Stewart, an employee of Eastman Kodak Co., complained 1989 was ''The Year of the Dullard. Dull acts abounded everywhere in the country, particularly on network television.''

Members of the latest annual list are divided into two categories: the self-explanatory Dull Brain Award and the dubious Dull Lifestyle Award.

As Stewart states in his congratulatory letter to the recipients, Dull Brain honorees probably are not ''incurable or totally beyond hope, and should bear in mind that even a stopped clock is right twice a day.''

Dull Lifestyle awardees are reminded they represent the ''billions of good anonymous, dull people who go about their business, day after day, keeping the fabric of society sewn together.''

The Dull Brain Awards:

1) Roseanne Barr - ''a complete blah.''
2) Danny DeVito - ''The only reason he manages to keep his head

above water is that wood floats.''
3) Arsenio Hall - ''How can you accuse him of being scatterbrained? He hasn't any brains to scatter.''
4) J. Danforth Quayle - ''Quayle always has a chip on his shoulder. It's a splinter from the wood above it.''
5) Television character Teddy Z - ''a blueprint if you were building an idiot.''

The Dull Lifestyle Awards:

1) Connie Chung - ''(About NBC) she changed her mind but it didn't work any better than the old one.''
2) Nancy Reagan - ''Her so-called book 'My Turn' is a ... complete bore.''
3) Leona Helmsley - ''The Lady Macbeth of the lodging industry.''
4) Barney Frank - ''He's in the middle of a scandal that has dismayed both the Democratic Party and the gay rights movement.''
5) Akio Morita - ''Sony's chairman ... a longstanding critic of American management ... should be deported.''

NEW YORK (JAN. 30) UPI - The New York Daily News is gearing up to begin formal talks with the first of its ten labor unions, starting a round of bargaining that could save or sink the nation's largest circulation daily metropolitan newspaper.

Negotiations were set to start Wednesday between newspaper officials and representatives of the International Typographical Union Local 6, authorities said.

The formal bargaining session, the first with the newspaper's ten unions, was expected to initiate a round of talks that both sides agree could determine the survival of the ailing 71-year-old tabloid.

Other talks with the newspaper's mailers union were scheduled to start on Thursday and with the drivers union on Friday. The union contracts, which cover some 3,000 employees ranging from photographers to printing press operators to reporters, are set to expire on March 30.

George McDonald, president of the Allied Printing Trades Council, the union's umbrella organization, said that although the newspaper's written proposals "looked like a setback," the union was hopeful about the formal talks.

The News - which last year was slightly unprofitable despite its 1.2 million readers, the largest circulation for a metropolitan daily in the country - has said it plans to seek cuts in jobs and tens of millions of dollars in other labor costs.

"My own feeling is until I see them across the table I feel optimistic," McDonald said. "We sent out proposals too. I suppose they laugh at ours. We laugh at theirs."

A spokesman for the News said tabloid executives were also looking forward to progressive talks with the unions. "We feel optimistic. We're going to work for a settlement," said the newspaper spokesman, John Canpi.

But despite the fact that both sides want to avoid a strike, it is widely believed the talks between the newspaper and its unions will erupt into an ugly and protracted battle.

The tabloid's executives claim union featherbedding and anachronistic work rules have cost the company dearly, eating up nearly 50 percent of the News' entire revenue, or double what most newspapers pay.

The News, which has lost about $115 million during the past decade, would need to save more than $100 million each year annually to compete with the industry standard, newspaper executives say.

The paper says it also wants more control over the company's staffing, especially hiring and the right to take disciplinary action. To support its stance, the News even hired King & Ballow, a Nashville law firm that specializes in tough labor negotiations is described by civil liberties groups as a "union buster."

EXETER, NH (JAN. 30) UPI - A man who claims he taped radio conversations that provide evidence of dangerous working conditions at the Seabrook nuclear power plant turned over 202 tapes Tuesday to federal regulators.

Fred Anderson said he gave two Nuclear Regulatory Commission representatives about 300 hours of tapes of conversations among Seabrook plant operators recorded between Jan. 1, 1989, and Jan. 13 of this year.

Anderson, a local businessman, said he brought a borrowed scanner to the Seabrook town dump one day in late 1988 to monitor an emergency warning test and inadvertently picked up transmissions from the nuclear plant's control room. He began to listen and record control room transmissions 24 hours a day in his office and at home.

Anderson claims he taped conversations which indicate that one worker at the plant, which has yet to receive an NRC full-power license, drank alcohol before coming to work and another employee may have become contaminated by radioactivity.

''I believe that significant safety concerns need to be resolved before a full-power license can be granted,'' he wrote the commission. If the problems are not resolved, he said, ''I believe that the plant will have many unplanned shutdowns, which could affect public safety.''

Plant spokesman Ron Sher denied the allegations and said Anderson only heard one side of the conversations and misinterpreted them.

The tapes were discussed and dismissed by NRC officials Jan. 18 at the final commission pre-licensing hearing, Anderson said.

A week ago, the NRC subpoenaed Anderson, ordering him to hand over copies of the tapes. An NRC spokesman said Tuesday the commission will decide whether the tapes raise any questions about plant safety.

''I'd be very surprised if this does any more than delay the approval of the license,'' Anderson said.

The Seabrook plant originally was scheduled to open in 1981 at a cost of $1 billion for two reactors. One reactor was abandoned and the plant owner New Hampshire Yankee, is awaiting an NRC decision on whether the facility now estimated to cost $6 billion, will receive a full-power operating license.

#90030u2134 01/30/1990 ~United Press International

MEMPHIS, TN (JAN. 30) UPI - First City Federal Savings Bank will become a commercial bank Thursday, sidestepping the 1987 Congressional moratorium on thrift-to-bank conversions, said Charles Ogilvie, First City president.

First City applied to convert its savings bank charter to a commercial bank charter in 1987, but was stopped by a congressional moratorium on conversions after the savings and loan industry ran into trouble.

Ogilvie had contended that First City was exempt from the moratorium. In August, the way was cleared for the change when a special amendment to the 1989 thrift bailout law was passed by Congress.

The amendment, proposed by Sen. Jim Sasser, D-Tenn., allowed First City to become a bank without paying exit fees to the Savings Association Insurance Fund or entrance fees to the Federal Deposit Insurance Corp. Ogilvie said the language of the amendment was so specific it probably only applies to First City.

Ogilvie said the primary reason for the conversion is that the thrift wanted to lend more money to businesses. Regulations forbid a savings bank from exceeding a ten percent limit on its total loans to commercial customers.

First City will go from a federal savings bank to a state savings bank, then a state commercial bank and a national bank, all steps to be completed in one day Thursday. It will also convert its unitary savings bank holding company into a one-bank holding company.

John Buchman, deputy director of the Office of Thrift Supervision in Washington, said that one other thrift has been allowed to become a bank

since the moratorium on conversions was instituted. The bank is Barnett Federal Savings Bank in Georgia, which changed about two weeks ago, Buchman said. However, Buchman said that unlike First City, Barnett must stay in the savings insurance fund for five years.

Ogilvie estimated the three-year process cost about $100,000 in legal fees and related costs, but said that amount probably is less than First City would have had to pay in extra premium costs and penalties if it had tried to become a bank under current laws affecting most thrifts.

First City, which opened in 1986, had assets of $30 million at the end of 1989. The company posted a $38,000 loss last year, due to adding $250,000 to loan loss reserves to meet the requirements of federal regulators.

#90030u2156 01/30/1990 ~United Press International

WASHINGTON (JAN. 30) UPI - Gen. James Lindsay, head of Special Operations Command, disagreed Tuesday with Defense Secretary Dick Cheney's decision to cancel the V-22 Osprey aircraft program and said it would limit U.S. commando capability.

''I want something that can go about 750 miles deep, put people in and later on pick them up and bring them back,'' Lindsay said. ''I need a platform of some kind that will permit me to infiltrate deep and, more importantly, extricate deep.

''Now, if the V-22 is finally canceled, as it appears it may be, then I'll have to acquire something else,'' he said.

The country's top military commando said he ''argued very hard'' to Cheney and the Defense Resources Board for the V-22, a revolutionary tilt-rotor aircraft that takes off and lands like a helicopter but flies like a plane.

''I had my day in court more than once ... and I lost,'' Lindsay said at a breakfast meeting with defense reporters.

Asked if the loss of the V-22 would detract from the capability of his commandos, Lindsay replied, ''Yeah, you could put it that way.''

Cheney, told of the general's remarks, had little sympathy for Lindsay. ''When you lose, you lose. We can't afford the V-22. It's nothing personal '' he said during an interview with wire service reporters.

For the second consecutive year, Cheney proposed in his defense budget the cancellation of the V-22 - a politically popular Marine Corps program that Congress insisted on keeping alive last year with $255 million in research money.

The Pentagon has invested $2.5 billion in the program and has six aircraft built, some undergoing flight tests. The Pentagon had planned to buy 602 Ospreys at a cost of $27 billion.

Lindsay said he needs some sort of aircraft that would allow his commandos to infiltrate a region and get people out quickly, noting that such a craft would have been ideal for the failed U.S. rescue mission in Iran in 1980.

''I need something that's reasonably fast ... it can't be a helicopter,'' he said. ''I need more agility.''

In his discussions with the Pentagon's civilian leaders, Lindsay said he was told he will have to make do for such missions with helicopters and what's called the ''Fulton'' retrieval system.

''That's where you go in with a C-130 (cargo plane) with a hook out the back end and a guy puts a balloon up and you pick him up and pull him into plane,'' Lindsay said, adding they are working to pick up four people at once.

''But that's not a very efficent way of doing business,'' he added. ''I need something better than that.''

On other issues, Lindsay disclosed he had recommended that a full U.S. invasion force be taken down to Panama on Dec. 20 rather than sending in a small Special Forces group to ''surgically'' remove Gen. Manuel Antonio Noriega.

''The real power structure in Panama was the PDF (Panama Defense Forces,'' Lindsay said, adding that he was concerned that taking out Noriega would simply result in an ascension to power of ''a new thug.''

''That influenced me to recommend that we 'safe-side' it and go on the higher side'' with more troops, he said. ''The bottom line was we decided ... to take down the PDF, in other words, as opposed to just removing Noriega.''

He also rejected criticism of the number of casualties sustained by U.S. Special Forces during the invasion.

''I had 4,000 some people involved there and I took 11 killed and 129 wounded. I don't know if that's high or low,'' Lindsay said. ''One is too high as far as I'm concerned. But when you look at the nature of the missions involved, almost hand-to-hand fighting ... in a situation like that, you're going to take some casualties.''

Of the 11 dead, he said, five Army Rangers were killed after parachuting onto an enemy-held airfield, two pilots were killed when their plane was shot down in daylight and four Navy SEALS (Sea, Air and Land) were killed by armored vehicles while they were trying to disable Noriega's personal aircraft.

BALTIMORE (JAN. 30) UPI - A former savings and loan chairman believed to be living lavishly in Europe has been indicted along with two other thrift officers in an alleged scheme to steal $106 million from depositor accounts, prosecutors said Tuesday.

Tom Billman, who was chairman of the now-defunct Community Savings and Loan, was indicted by a federal grand jury on 20 counts of racketeering, conspiracy and mail fraud, Maryland U.S. Attorney Breckinridge Willcox said.

The indictments, unsealed Tuesday and capping a three-year investigation, allege the scheme diverted $28.8 million from Community to Billman alone and $14 million to his wholly owned company, Crysopt Corp. of Delaware.

The state placed Community in conservatorship in September 1985 in the wake of Maryland's thrift crisis, freezing $332 million in 27,000 savings accounts.

Two other officers also were named in the indictment on charges of mail fraud, wire fraud and criminal conspiracy in the alleged scheme, prosecutors said.

Clayton McCuistion, 47, of McLean, Community's former president, and former legal counsel Barbara McKinney, 49, of Alexandria, Va., were charged along with Billman and Crysopt with diverting a total of $106 million from Community depositors.

The cash was funneled into the thrift's parent company, Equity Programs Investment Corp., through loans that were not expected to be repaid, and into the defendants' personal accounts, the indictment alleged.

Willcox said authorities believe Billman - thought to be the largest beneficiary in the multiple thefts from Maryland savings and loan in the 1980s - is living a lavish lifestyle in Europe, allegedly on some $20 million from Community accounts.

''We intend to pursue Tom Billman and bring him to justice,'' the prosecutor said. ''Although we have evidence that he intends never to return to the United States, I am confident that some day, somewhere, we will catch up with him.''

Willcox also announced a $200,000 reward for information leading to Billman's arrest and his extradition to Maryland. A federal arrest warrant was issued for Billman in December 1988, but authorities have not been able to find him.

If caught and convicted on the charges, Billman faces up to 115 years in prison and fines of $4.75 million and forfeitures of up to $28.8 million.

McCuistion and McKinney face up to 70 years each in prison and $3.25 million in fines, and Crysopt could be fined up to $500,000 and a $14 million forfeiture.

In May 1985, reports of fraud and theft at some of Maryland's largest savings and loan triggered a run by depositors that forced the state to step in and insure some 100 thrifts.

#90030u2195 01/30/1990 ~United Press International

BETHESDA, MD (JAN. 30) UPI - The Food and Drug Administration should widen use of the AIDS-fighting drug AZT to include thousands of AIDS-infected people who have yet to get sick, an advisory panel said Tuesday.

The FDA committee unanimously recommended AZT's labeling be changed to encompass certain people infected with the AIDS-causing human immunodeficiency virus, HIV, but who show no signs of the deadly disease.

Despite their healthy outward appearance, patients should have slightly depressed immune systems - less than 500 T-4 cells per cubic millimeter of blood - before they are started on the often-toxic drug, the panel said.

FDA approval would officially endorse a practice started by many AIDS doctors in August after the National Institutes of Health reported AZT could slow disease progression in some HIV-infected people without symptoms of AIDS.

At that time, NIH officials estimated that about 600,000 of the 1 million to 1.5 million Americans infected with HIV might benefit from AZT treatment. It can take 10 years or more from the time a person is infected with HIV until he or she develops symptoms of AIDS.

AZT, or zidovudine, which is made by Burroughs Wellcome Co. of Research Triangle Park, N.C., is the only government-approved drug to directly attackthe AIDS virus. AZT is not a cure for AIDS, but has been shown to prolong the lives of people with AIDS and advanced AIDS-related complex.

No survival benefit was shown in giving AZT to HIV-infected people without symptoms, although they developed AIDS or the related complex at about half the rate of a control group during the two-year study.

''The difference is small, but for an affected individual it is an extremely important gain,'' said Dr. Fred Valentine of New York University Medical Center, a member of the FDA's Antiviral Drugs Advisory Committee.

Jim Eigo of New York's AIDS Coalition to Unleash Power, or ACT-UP, said

the recommended FDA action ''should make AZT more available to those patients who are out of the loop of information.''

An FDA decision approving use of AZT earlier in the course of AIDS also would force insurance companies and state-run Medicaid programs to pick up the bill for such treatment, Eigo said. Many public and private insurers refuse to pay for off-label uses of drugs.

The 12-member advisory panel expressed concern about possible problems with toxicity and drug resistance that might arise from starting AZT before a person becomes seriously ill.

But most members agreed that the immediate benefits of AZT appear to outweigh unknown, longer-term risks.

''I think having time when you are healthy, time when you are working is better than having time ... when you have really gotten sick,'' said Dr. John Richard Graybill of Audie Murphy Memorial Veterans Hospital in San Antonio.

Earlier this month, the FDA halved the recommended dose of AZT in response to research that showed lower levels of the AIDS drug work as well and are safer than the original dose.

#90030u2221 01/30/1990 ~United Press International
NEW YORK (JAN. 30) UPI - The dollar soared against major world currencies in New York trading Tuesday, gaining up to four pfennigs on the West German mark in frantic dealings, following a report that Soviet President Mikhail Gorbachev may resign his second post as Communist Party secretary.

The dollar was marking time in afternoon trading when Cable News Network said Gorbachev was considering resigning as Communist Party general secretary while keeping his presidential job. The apparent tactical move would put pressure on the party to get behind his perestroika reform program.

East European reforms have boosted the deutsche mark and related currencies against the dollar. But the U.S. unit more than once has rallied on rumors and reports the Soviet leader would step down or be ousted.

The report produced a "giant upward spurt" by the dollar against the mark and other key currencies, said Andrew Hodge, vice president for corporate trading with Bank Brussels Lambert. "It certainly has been a wild ride."

"We have reproven the theory that the dollar is a safe-haven currency," said Lilliana Nealon, a foreign exchange vice president with Union Bank of Switzerland in New York. "It really took off."

Nealon said the dollar sprinted from about 1.6750 deutsche marks to a high of 1.7150 in around 20 minutes of wild trading. Participants who had been betting on a dollar decline rushed to cover short positions.

Late in the New York trading session the dollar was quoted at 1.6950 marks up from 1.6765 marks the day before. The dollar also moved up on the Japanese currency, trading at 146 yen against 143 late Monday.

Though the Gorbachev report was "obviously a tradable event," Hodges said, it may not have a lasting market effect even if borne out by events. Gorbachev could emerge with greater clout through distancing himself from the party apparatchiks who have obstructed his program.

In earlier trading the dollar was marginally braced by comments of Federal Reserve Board Chairman Alan Greenspan. He told Congress that the U.S. economy is in a "temporary hesitation," not a recession. He also had stern words on the need to slash the budget deficit.

In New York the British pound rose to $1.6675 from $1.6805. Other dollar

rates: 1.5030 Swiss francs, up from 1.4815; 5.7725 French francs, up from 5.6959; and 1,263.50 Italian lire, up from 1,247.75.

European trading ended before the Gorbachev report aired, but the dollar was mostly higher. It ended in Frankfurt at 1.6780 German marks, up from Monday's 1.6760, and in Zurich at 1.4880 Swiss francs, also up from 1.4825.

The dollar closed in Paris at 5.7000 French francs, ahead from 5.6820 and in Milan at 1,248.50 Italian lire against 1,244.05. But it was unchanged in Brussels at 35.05 Belgian francs. In London, the pound closed higher at $1.6810 against $1.6795.

Republic National Bank in New York closed cash gold at $418 an ounce, off from $419.25 Monday. The New York Commodity Exchange settled gold at $418.10, off from $419.10. In Zurich gold fell to $417.50 an ounce from $418.50, but in London it rose to $419 from $418.75.

Republic closed cash silver at $5.23 an ounce, up from $5.225. Comex spot silver declined to $5.207 an ounce from $5.215. Zurich silver closed unchanged at $5.25 an ounce. London silver was off at $5.23 an ounce against $5.24.

#90030u2244 01/30/1990 ~United Press International

(JAN. 30) UPI - Erich Honecker is NO longer behind bars, but the former East German leader's attorney is NOT saying where the hard-line communist was taken. Honecker was jailed yesterday pending his trial on charges of treason and corruption. But an East Berlin court today rejected a prosecutor's request that Honecker remain in custody. In related news, East German Prime Minister Hans Modrow is heading home following a 24-hour visit to Moscow.

A Washington, D-C, city official pleaded guilty today to a misdemeanor drug charge involving Mayor Marion Barry. James McWilliams was released on his own recognizance, then headed to another court to testify before a federal grand jury investigating alleged drug use by the mayor. Barry... arrested on cocaine charges earlier this month... is being treated at a substance abuse clinic in West Palm Beach, Florida.

The Ohio Highway Patrol is investigating two shootings possibly related to a strike call by the Independent Truckers Association. Police say one trucker's hands were cut when his driver's side window was hit by gunfire today in Pike County. Another trucker was slightly injured in a similar shooting last night. It was NOT immediately clear if the bullets were connected to the nation-wide call for a strike to protest fuel costs and low freight hauling rates.

At least two crew members on a Greek merchant ship drowned and 17 sailors are missing after the vessel sank as fierce winds and rain battered the British Isles. British Coast Guard officials say three helicopters and a plane are searching the turbulent seas for the M-V Theofano, a cement-carrying ship last contacted 75 miles south of London. The tempest that hit southwest England yesterday was the second major storm to strike the region in one week.

WASHINGTON (JAN. 30) UPI - U.S. raw steel production dropped 2.4 percent in 1989 to 97.48 million tons, as demand dropped in a slowing economy, the American Iron and Steel Institute said Tuesday.

Last year's raw steel production was below the 99.92 million tons in 1988, which had been the highest figure since 1981. Mill shipments of finished products in 1989 were 84 million tons, approximately the same as in 1988.

Steel demand slowed down during the second half of the year, especially in the automobile industry, said AISI spokesman Sheldon Wesson.

The institute noted that while U.S. production of raw steel in recent years was below the record-setting years of the early 1970s, the industry now produces more finished steel per ton of raw steel.

Last year, the ratio of steel shipments to raw steel production was estimated at a little over 86 percent, compared with about 71 percent in the late 1970s, as a result of the industry's modernization.

The industry operated at 84.1 percent of production capacity in 1989, down from 89.2 percent in 1988. Capacity, however, was 115.9 million tons last year, up from 112 million tons in 1988. The AISI recently estimated 1990 capacity at 116.6 million tons.

Production on continuous casters, another index of mill modernization, rose to 63 million tons, a record 64.6 percent of total production, from 61.2 million tons in 1988, the institute said.

Raw steel produced in electric furnaces during 1989 was 34.62 million tons 35.5 percent of the year's total, down from 36.85 million tons, or 36.9 percent of the period's total, for the previous year.

Indiana remained the largest steel-producing state in 1989, wity 20.84 million tons. Ohio was second with 16.45 million tons, and Pennsylvania was third, with 11.89 million tons.

Production in December was 7.22 million tons, at 73.3 percent of capacity, down from 7.39 million tons in November, and from 7.95 million tons in December 1988, at 83.8 percent of capacity, the institute said.

WASHINGTON (JAN. 30) UPI - The overall quality of the U.S. wheat crop dropped slightly in 1989 with 56 percent of the tested wheat graded U.S. No. 1, the Federal Grain Inspection Service said Tuesday.

In the previous year, 64 percent of samples were graded as U.S. No. 1 wheat. The 1989 results were based on 13,363 test samples.

Farmers harvested 2.04 billion bushels of wheat last year.

Soft red winter wheat showed the most decline in quality last year. Only 27 percent of the samples received one of the top two grades, compared to 76 percent in 1988. Low test weight was the primary deficiency. Farmers grew 548 million bushels of soft red winter wheat.

The major wheat variety, hard red winter, showed little change. Last year, 61.4 percent of the samples rated as U.S. No. 1. A year earlier it was 61.5 percent. Hard red winter wheat accounted for 34 percent of the 1989 crop.

Officials said 77 percent of the hard red spring wheat samples were U.S. No. 1 rated last year, up 10 points from 1988.

Durum wheat samples won a U.S. No. 1 rating 71.2 percent of the time, compared to 82.7 percent in 1988.

There was a 16-point drop in the number of white wheat samples receiving the U.S. No. 1 grade. Last year, 44 percent got the top grade.

#90030u2290 01/30/1990 ~United Press International

WASHINGTON (JAN. 30) UPI - The Senate unanimously approved limited

economic sanctions against China Tuesday for its crackdown on the pro-democracy movement and sent the legislation to President Bush for his signature.

Bush vetoed the bill in November because of objections to an unrelated legislative restriction resulting from the Iran-Contra scandal. The House stripped the offending section out of the bill and sent it to the Senate, which did not vote on the matter before adjourning last session.

The bill authorizing $4.7 billion for operations of the State Department, U.S. Information Agency, and other programs, was approved 98-0.

The measure provoked none of the bitter debate last week in Congress about Bush's veto of a bill that would have placed into law protections against the deportation of Chinese students.

Bush put the protections into effect by executive action and said the bill would have damaged his efforts to press the Beijing leadership to ease its repressions of the movement for economic and political reforms in the world's most populous nation.

Opponents said the executive order was no gurantee against sending an estimated 36,000 students home to political persecution.

The White House accepted the legislative sanctions because the bill allows Bush to suspend them if he finds it is in the national interest or if he decides that the Chinese government is making progress on political reforms.

Bush, in his successful fight to defeat the veto of the Chinese student's bill, said that China is making progress on political reforms, including the lifting of martial law.

Bush has already lifted some of the sanctions called for in the bill, including issuing licenses for the export of three communications satellites to be launched by China and allowing the Export-Import Bank to issue loans and guarantees for U.S. exports to China.

The bill still blocks activities by the Overseas Private Investment Corporation with China; suspends licenses for the export of military and crime control equipment; forbids nuclear energy cooperation; and suspends various trade programs.

Bush vetoed the original bill because of a provision that would have made it a criminal offense for a government employee to seek money or material assistance from a foreign government or from an individual in support of an activity barred by law.

Such action was a major abuse in the 1986 Iran-Contra scandal, in which Congress said aides to President Ronald Reagan obtained millions of dollars from Saudi Arabia and Brunei in support of the Nicaraguan Contra guerrillas after Congress barred any U.S. aid to the rebels.

Bush said the provision was an improper encroachment on the president's authority to conduct foreign policy.

(JAN. 30) UPI - The Justice Department says 20-Million dollars in ''liquid assets'' of Manuel Noriega have been frozen in six countries. Officials say Austria became the sixth nation to freeze banks accounts of the ousted Panamanian dictator. U-S officials charge that the funds are associated with Noriega's alleged illegal drug activity. Noriega's British banks accounts and those in Switzerland, France, West Germany and Luxembourg have been frozen.

The U-N Human Rights Commission says the government of Guatemala is powerless to protect its people amid all the violence and corruption. The U-N report issued in Geneva, Switzerland, charges that Guatemala is a nation of ''uncontrolled violence'' where officials have ''NEITHER the power NOR authority to guarantee the exercise of human rights.'' It notes that on those occasions when an invesigation is launched it is usually abandoned because of threats.

Five senators say they are outraged that the Army is NOT awarding its Combat Infantryman's Badge to women who came under fire in Panama. The Democratic lawmakers registered their complaint to Army Secretary Michael Stone, saying the female fighters deserve to be recognized. The women who came under fire were part of a military police unit... NOT considered to be a combat role by the Army.

Kuwait's leaders want to restore the emirates' legislature after dissolving the last one in 1986. Newspapers in Kuwait quote Prime Minister Sheikh Saad al Abdullah al Sabah as saying the government wants to avoid the ''negative practices'' of the previous legislature, but he refused to elaborate. The premier says recent pro-democracy protests in Kuwait threaten the country's stability.

#90030u2305 01/30/1990 ~United Press International

MANAGUA, Nicaragua (JAN. 30) UPI - Nicaragua's election campaign is focusing on the country's shattered economy, with both sides claiming only they can beat persistent four-digit inflation and prevent total ruin.

With about a month to run in the campaign, virtually every stump speech and political debate these days touches on the economy. Television ads highlight candidates touting their recipe to fight the economic decline.

Inflation in 1989 was a whopping 1,700 percent, down from the mind-boggling 1988 rate of 33,000 percent. The economy shrank by 3 percent as measured by its gross domestic product, and more than 35 percent of Nicaraguans are either unemployed or underemployed.

In mid-January, the National Opposition Union, the principal challenger to the ruling Sandinista Front, unveiled a sweeping economic plan that it claimed would halt inflation in two months and reverse the economic trend.

Campaign strategists for the UNO, as the coalition is known, say opinion polls tell them an overwhelming majority of Nicaraguans cite the economy as their main concern.

Most independent polls give President Daniel Ortega an edge over Violeta Chamorro, the UNO candidate and publisher of the opposition newspaper La Prensa, although the margin ranges from very small to commanding depending on the poll.

The Feb. 25 elections are for president and vice president, 96 National Assembly seats and hundreds of local council posts.

The UNO economic plan, which independent economists say promises the moon but is somewhat short on details, was drafted by Francisco Mayorga, a respected U.S.-trained economist working for Chamorro.

Mayorga claimed he could halt inflation in weeks with a plan of government austerity and by cutting back on frivolous government expenses.

The Sandinista Front immediately launched a counteroffensive, trying to debunk the Mayorga plan as impossible and claiming success for the government's own economic plan.

''The campaign has definitely become a fight over who can run the economy better, the UNO or the Sandinistas,'' said a Western diplomat who asked that his name not be revealed. ''That is the one issue the UNO feels they

can challenge the Sandinistas on.''

Ortega on Jan. 18 accused the UNO and La Prensa of trying to stir up the economic issue in order to undermine the government and said U.S. diplomats were masterminding the UNO campaign.

In a televised evening debate that made front-page news in the next day's newspapers, Mayorga squared off against Sandinista economist Edmundo Jarquin to debate his plan.

Both sides claimed victory, although foreign observers gave Jarquin the edge on debating style.

Sandinista officials also scheduled news conferences to back their own anti-inflation plan, now just over a year old. Foreign economists say the Sandinista plan, based on government austerity and fiscal restraint, was successful in avoiding hyper-inflation, but still must go a ways before the economy gets back to normal.

''We're not offering our people the fantasy of saying wages are fine, but we have turned things around,'' said Planning Minister Alejandro Martinez Cuenca, outlining a modest gain in real wages in 1989.

Martinez Cuenca said the government would continue its anti-inflationary policies and set a ''realistic'' goal of 3 percent growth for 1990.

About Mayorga's plan, Martinez Cuenca said, ''Let's hope no one asks him where he got the idea he could fix the economy like that because he sure didn't learn that at Yale or in the real world.''

Martinez Cuenca and Jarquin insist that Nicaragua's economic problems are due primarily to a U.S. economic blockade imposed in 1985 and to the cost of the U.S.-funded Contra war. They say the government has done admirably given the problems it has faced.

Mayorga and UNO economists accuse the Sandinista Front of gross mismanagement and economic incompetence and say they can count on massive U.S. aid that would finance economic reconstruction if they are elected.

#90030u2343 01/30/1990 ~United Press International

WASHINGTON (JAN. 30) UPI - Sen. Jay Rockefeller, D-W.Va., chairman of the Pepper Commission on comprehensive health care, said Tuesday the ''most moral'' thing the panel can do is offer a plan that the president and Congress will accept.

The bipartisan congressional commission is scheduled to report March 1 on the twin problems of providing health care for the up to 37 million Americans without health insurance and making long-term care available to all.

In a speech before the American Association of Retired Persons, Rockefeller said there are some on the 15-member commission named for the late Rep. Claude Pepper, D-Fla., who would like to ''junk'' the entire health insurance system.

''Some people say let's have national health insurance. A lot of people say that,'' he noted.

But Rockefeller, who repeatedly declined to give details on the panel's

plans, warned it was unlikely ''in the current climate'' that Congress and the president would approve a proposal for a new, very expensive system.

''There is some sense by some of us that the most moral thing to do is what we can get passed, what can work,'' he said. ''And that may mean that what we do is we take the current process ... which is employer based or job based, and that we work from that.''

Rockefeller said the panel remains committed to a ''comprehensive'' program, which he predicted would include ''a terrific solution'' for long-term care.

He added that a long-term program would not only be for elderly, noting that some 40 percent of those needing custodial care are under age 65.

Congress appears likely to wait for the commission, whose members were appointed by President Ronald Reagan and leaders of Congress, to issue its report before taking up any major health care proposals this session.

#90030u2355 01/30/1990 ~United Press International

WASHINGTON (JAN. 30) UPI - A House subcommittee chairman warned Tuesday that if Congress puts unreasonable environmental requirements into the new farm policy law, farmers may refuse to participate, risking ''great damage'' to the environment.

The warning came during a discussion by House Agriculture Committee leaders of their ideas for the new farm bill. Farmers already face regulations requiring them to practice soil conservation or risk loss of program benefits.

Rep. Glenn English, D-Okla., chairman of the conservation subcommittee, said his panel would see if changes in agricultural practices are needed. There have been suggestions the government should take stronger steps to prevent water pollution by farm chemicals.

''I think we've got to keep in mind that the farm program is a voluntary program,'' English said. ''We've got to make certain that whatever program we (adopt) makes it possible and encourages our family farmers to participate. ... To do otherwise could drive farmers out of the farm program, in which (case) there could be, without question, great damage'' to the environment.

English said conservation efforts in the 1985 farm law have been worthwhile, but some ''adjustments'' might be made in programs that penalize farmers for converting wetlands or highly erodible land to cropland.

The chairman of the grain subcommittee, Rep. Dan Glickman, D-Kan., said he opposed any further cuts in crop subsidy rates. Rep. Jerry Huckaby, D-La., said his subcommittee would seek an extension of the so-called marketing loan for cotton and rice.

Other leaders said they wanted to continue the ''market-oriented'' policies of the current farm policy law.

#90030u2363 01/30/1990 ~United Press International

(JAN. 30) UPI - In becalmed world oil markets, prices drifted downward Tuesday and found scant direction even from a late report that Mikhail Gorbachev might resign as chief of the Soviet Union's Communist party.

West Texas Intermediate, the benchmark U.S. crude, dropped 34 cents on the New York Mercantile Exchange to $22.46 a barrel after hitting a low on the day of $22.36 a barrel.

''I didn't think there was any real news in the market today,'' said Robert Baker, senior energy analyst with Prudential-Bache Securities Inc. in New York.

''Monday prices were up solidly for no reason. Today they were down for very little reason,'' Baker said.

Prices may have slipped because traders expected the weekly survey of the oil industry's American Petroleum Institute later Tuesday to show inventories continued to rise last week, Baker said.

Released after the Merc closing, the API report showed U.S. gasoline stocks last week increased by more than 7 million barrels and heating oil inventories rose nearly 5 million barrels.

Unleaded gasoline, which had been down more than a penny a gallon early in the day, finished up on the Merc with a scant decline of 0.09 cent to 62.73 cents a gallon.

Home-heating oil ended the day on the Merc at 60.51 cents a gallon, down 0.60 cent.

Randall Rothenberg of Dean Witter Reynolds' International Energy Futures Group in New York said the report in mid-afternoon that Gorbachev might resign ''did cause some movement up'' in crude prices. The Soviet Union is the world's largest oil producer.

Cable News Network reported from Moscow that Gorbachev is considering

resigning as general secretary of the Communist Party.

CNN said, however, that if Gorbachev resigned as chairman of the party, he would keep his post as Soviet president and continue to run the country.

''It's not a black and white issue as to what a resignation of Gorachev would mean to the world oil markets,'' Rothenberg said.

He noted, however, that the dollar increased in value relative to other currencies on world money markets, making oil more expensive since it is priced in dollars.

The Soviet Union reported Thursday that its 1989 oil production fell 340,000 barrels a day to 12.14 million barrels daily.

U.S. industry sources also projected that Soviet output would decline another 300,000 barrels daily in 1990 because Gorbachev had diverted new capital investment in oilfields to consumer goods to allay increasing public discontent over the failure of his economic policies to produce results.

Soviet oil exports, which earn a major portion of the nation's foreign hard currency, dropped 200,000 barrels in 1989 to 3.9 million barrels daily, partly as a result of economic uncertainties and domestic needs, the sources said.

Rothenberg said there may be downward pressure on WTI prices from reports that cargos of North Sea Brent are enroute to the United States to take advantage of higher U.S. prices.

Sarah Edman, coordinator of planning and analysis for Conoco Inc., the Du Pont subsidary in Houston, agreed the WTI squeeze should soon be alleviated by Brent cargoes from Europe, where refiners have begun to slacken their refinery runs as the heating oil production season draws to a close.

The WTI market has been temporarily tight because of problems in the U.S. Gulf Coast pipeline to the Cushing, Okla., Midwest terminal, she said.

Otherwise, ''we see the world crude market oversupplied right now,'' Edman said.

On the U.S. Gulf Coast spot market, WTI was being quoted at $22.45 a barrel, down 35 cents.

On the European spot market, Britain's widely traded North Sea Brent was being quoted at $19.90 a barrel, down 15 cents.

The United Arab Emirates' Dubai light - the key OPEC Middle East crude from the Middle East and mainly exported to the Far East - eased down 5 cents to $16.80.

#90030u2417 01/30/1990 ~United Press International
WASHINGTON (JAN. 30) UPI - Against a background of growing political problems for Soviet President Mikhail Gorbachev, Secretary of State James Baker postponed next week's trip to Moscow by one day because of an important meeting of the Soviet Communist Party, the State Department said Tuesday.

The delay in the meeting between Baker and Soviet Foreign Minister Eduard Shevardnadze coincided with a report by Cable News Network that Gorbachev is considering resigning as general secretary of the Communist Party.

CNN reported from Moscow that if Gorbachev resigned as chairman of the party, he would keep his post as Soviet president and continue to run the country.

The report that Gorbachev was considering resigning the chairmanship could not be independently confirmed. White House spokesman Marlin Fitzwater said he had ''no information'' on the matter.

White House Chief of Staff John Sununu told reporters that the administration was seeking to verify the report and said, ''If it's true, assess its implications.''

''It's not going to change the perception I think we have of President Gorbachev,'' Sununu said. ''We would like to understand the details of what's involved and what's implied if such a change has taken place, and frankly, at the time we're talking here, I don't know if it is correct.''

A senior administration official, speaking on the condition he not be identified, said, ''It might mean there's a move toward pluralism in mind. It might mean there's a problem. It might be a plus. And very frankly, you can create scenarios on both sides.''

A State Department official said there was no direct connection between the report and the Baker postponement. ''We just thought it would make sense to give him some breathing space,'' the official said.

State Department spokeswoman Margaret Tutwiler, announcing the postponement by one day said, ''This suggestion was made by the United States. It simply makes more sense to have the Soviets complete their plenum (of the Central Committee of the Communist Party) before beginning this important ministerial (meeting).''

According to the new schedule, Baker will arrive in Moscow Feb. 7 and he and Shevardnadze will meet in Moscow Feb. 8-9, instead of Feb. 7-8.

Sen. Richard Lugar, R-Ind., a senior member of the Senate Foreign

Relations Committee, said he doubts that Gorbachev will surrender the party post.

''I am inclined to believe Gorbachev will resist giving up authority,'' Lugar told reporters. ''The whole trend of his career has been to clear away rivals, the consolidation of authority.

''Thus far he has had a fairly good batting average of prevailing.''

Senate Republican leader Robert Dole of Kansas criticized Democrats who have called for cuts in the defense budget because of Gorbachev's policies.

''If anyone is foolish enough to gamble with our national defense based on the political life and death of one man, Mikhail Gorbachev, then we are in deep trouble,'' Dole told the Senate. ''We want Gorbchev to succeed, but there are no gurantees (he will).''

Before arriving in Moscow, Baker is scheduled to go to Prague, Czechoslovakia, for about one day, but Tutwiler said that the exact schedule is still going through changes.

Soviet sources in Washington said that one possible scenario is that Gorbachev ''will throw the party to the winds'' and try to run the country from his government post as president. That scenario is based on Gorbachev's difficulties last year in getting the Central Committee of the Communist Party to accept his economic reforms.

The Soviet sources said that the scenario is a long-shot possibility, but they also suggested that the report of Gorbachev's plans may be an internal political device, designed to bring the party into line behind his leadership, or face the possibility of the party losing its political primacy.

In Eastern European reform programs, such as in East Germany, Hungary and Czechoslovokia, the Communist Party has lost its leading role, and in some cases has been virtually obliterated.

There has been speculation in Washington and Eastern Europe that Gorbachev may be on the edge of political defeat because of internal dissension within the party and because of potentially explosive nationality problems in the Baltic states and the southern regions of the Soviet Union.

Baker and President Bush have both said that it is in the interest of the United States that Gorbachev's economic restructuring policies succeed.

Baker and Shevardnadze are to lay the groundwork for the June summit meeting in Washington. Baker has said that one and possibly two further meetings with Shevaradnadze would be required before the summit.

The two foreign ministers are expected to finish up the major changes in treaties cutting back conventional forces and strategic weapons, as well as discussing regional issues such as Afghanistan and the Middle East.

#90030u2432 01/30/1990 ~United Press International

NEW YORK (JAN. 30) UPI - Prices of RJR Nabisco Inc. junk bonds regained some altitude Tuesday after plummeting in the two previous sessions, easing fears of a crash in the market for such high-yield, high-risk securities but leaving some in doubt as to the airworthiness of many junk bonds.

RJR Holdings Capital's 13.71 percent convertible pay-in-kind debentures of 2009 gained nearly 3 points to end at 68 1/2. Its 13.71 percent PIK debentures of 2007 gained nearly 4 points to end at 63 1/2.

The corporate bonds fell by 20 3/4 and 14 7/8 points, respectively, on Friday and Monday after Moody's Investors Services Inc. downgraded the firm's debt rating to B-3 from B-2, indicating a heightened risk level. But Standard & Poor's Corp., another firm, left its rating unchanged.

RJR, a major food and tobacco conglomerate, emerged heaped with debt from the highly publicized $25 billion leveraged buyout engineered last year by Wall Street investment firm Kohlberg Kravis Roberts & Co. It has sold off assets to lighten its debt burden and meet heavy interest payments.

The head of one securities firm's high-yield trading desk said the market for the RJR junk bonds had a firmer tone even if the 2009 bond remained off by 15 points from last week. ''We saw some buying in the marketplace '' he said. ''The lower prices have brought in some buy interest.''

He said institutional investors were bottom-fishing but that individuals and mutual funds were still selling or standing pat.

Analyst Kurt Feuerman of Drexel Burnham Lambert was sanguine as to the future of RJR in particular and junk bonds in general.

''There's a lot of nervousness in the market,'' he said. ''But the important thing to look at in RJR is the operating fundamentals which are strong.'' Its operating cash flow exceeds interest payments, he said.

As to junk bonds more generally, he said there is an oversupply in the market because troubled savings and loan associations have been obliged to sell off junk bond portfolios they assembled in the 1980s boom.

But junk bond analyst David Goldman of Nomura Securities International

looked at the situation from a different perspective.

The RJR decline ''signals deeper troubles for the junk bond market because RJR is a stable cash-flow vehicle,'' he commented. If high-quality RJR bonds could be downgraded, cash-poor companies could have deeper woes - as was recently demonstrated by the Campeau Corp. bankruptcy.

But another Wall Street junk bond specialist, who spoke on condition she not be named, argued that the market was ''blindsided'' by the Moody's upgrade, panicked and overreacted by selling heavily.

She acknowledged, though, ''It does bring up a problem with RJR, which is that there's just so much debt out there.'' As much of the company's paper ended up in the hands of former stockholders, it could be an unstable element until it settles down in institutional portfolios, she said.

Goldman speculated that the Moody's downgrade may have resulted from scrutiny of RJR's ability to meet the cost of bond guarantees scheduled over the next few years. But Feuerman said that if RJR can repeat its strong showing of 1989 it should have no trouble meeting all obligations.

#90030u2446 01/30/1990 ~United Press International

HENDERSONVILLE, NC (JAN. 30) UPI - A jury Tuesday found the owner of a summer camp for wealthy children guilty of molesting two youngsters who said the man took them skinny dipping then assaulted them during overnight outings.

The jury deliberated more than eight hours before returning Tuesday night with the verdict against Jones York Pharr III, grandson of a North Carolina textile giant.

Pharr, 41, was found guilty on two counts of taking indecent liberties with two 10-year-old boys who attended Camp Falling Creek in nearby Tuxedo N.C. The boys are best friends who attend private school in West Palm Beach, Fla.

They testified last week that Pharr took them skinny dipping late at night shined a flashlight on their genitals as they jumped from a dock into the water, then invited each of them on separate occasions to share his sleeping bag, during which the alleged molestations occurred.

The stories told by the two boys were nearly identical to events described by two other 10-year-olds, one from Phoenix, Ariz., and one from Baltimore Md.

Pharr, however, denied all the accusations. He took the stand in his own

defense and said he may have tickled the boys but never touched their genitals and never rubbed himself against them as they claimed.

The jury heard closing arguments Monday afternoon and began deliberations Tuesday in the trial that has sharply divided this Blue Ridge Mountain community.

Pharr, who is married and the father of three, is a grandson of the founder of Stowe-Pharr textile mills and a deacon in the local Presbyterian Church.

But District Attorney Alan Leonard told jurors Pharr used his position as camp owner to gain access to young boys.

''He's been working on this for years - refining and polishing his method of getting at children,'' said Leonard. ''On behalf of these four boys, put an end to this conduct that in all likelihood is going to continue if something is not done.''

Leonard reminded the jurors to disregard Pharr's wealth and community status when considering the testimony against him.

''A person could be a pillar of the community and get away with it right underneath everybody's noses,'' he said. ''The most dangerous wolf can come in sheep's clothing.''

A spectator loudly objected to that comment, shouting out, ''I don't have to listen to this speculation and innuendo.'' A bailiff escorted the man from the courtroom.

Pharr's lawyer, Bob Long Jr., told jurors nearly 6,000 boys have attended the camp since Pharr bought it in 1971 and no other youngsters have accused him of taking indecent liberties. He suggested the boys fabricated their testimony.

''It is a curious coincidence that two boys from the same neighborhood, who went to the same school in the same grade since kindergarten would share a common story,'' he said.

But Leonard noted all four boys, and not just the two from Florida, testified Pharr molested them.

''If you were going to make up a story about being molested so you wouldn't have to go back to camp, why would you pick the owner and not a counselor or the cook?'' Leonard asked. ''That's like getting caught buying cocaine near the White House and accusing George Bush of selling it to you.''

#90030u2454 01/30/1990 ~United Press International

DETROIT (JAN. 30) UPI - General Motors Corp.'s management has apparently given the go-ahead to build the next generation of its Chevrolet Camaro and Pontiac Firebird cars, a trade publication reported Tuesday.

GM, which has a policy against commenting on future product programs, would most likely introduce the sporty cars as 1993 or 1993-1/2 models, replacing the current design that has carried on largely unchanged since 1982, said Automotive News, a weekly publication.

The apparent approval diminishes chances of the program being cut by GM's efforts to trim overall costs by about $1 billion.

Reports Monday said the giant carmaker has decided to delay replacement models for its Oldsmobile Toronado and Buick Riviera coupes by one year, until 1994. Earlier this year, GM acknowledged that its next generation Corvette would be delayed by about two years, to 1995.

But GM must still decide how many Camaro and Firebird cars to build, what engines will power them, and where to build them, the reports said.

Sources indicate the front runner is GM's plant in Ste. Therese, Quebec, which now builds the mid-sized Oldsmobile Ciera and Chevrolet Celebrity wagons.

A feasibility study by GM to prodiuce the cars at that plant has been extended until March, said Norm Labrie, head of Canadian Auto Workers union local 1163.

Research consultants doing work for GM said that while Ste. Therese is considered the likely choice, there are other plants still under consideration, like the now closed Fiero and mid-sized car plants in Pontiac, Mich.

Both reports suggest the future of GM's Van Nuys, Calif., plant, where the Camaro and Firebird cars are currently built, may be in jeopardy.

No alternate product has been slated for the 4,000 workers currently at the Southern California plant, which has been down since Dec. 22 for an early changover to facelifted 1991-models of those cars.

The new generation Camaro and Firebird will most likely retain rear-drive and be built with a combination of plastic and steel panels covering a metal space frame, reports said.

#90030u2466 01/30/1990 ~United Press International
WASHINGTON (JAN. 30) UPI - A city employee who reportedly has said Mayor Marion Barry smoked crack cocaine in 1988 pleaded guilty to a narcotics charge Tuesday and then testified for two hours before a federal grand jury investigating the mayor.

James McWilliams pleaded guilty before a federal magistrate to a misdemeanor count of aiding and abetting ''another person'' in the use of crack cocaine on Dec. 19, 1988, when Barry allegedly used the drug with former city worker Charles Lewis at a downtown Ramada Inn.

U.S. Attorney Jay Stephens said McWilliams' guilty plea and testimony was part of a plea bargain, and called it ''another significant step'' in the continuing probe of Barry.

''He entered that plea. He acknowledged his culpability and guilt with respect to a Dec. 19 (1988) incident at the Ramada Inn, and the government will proceed on that basis,'' Stephens said.

Stephens would not detail McWilliams' testimony to the secret panel. The Washington Post, citing anonymous sources, reported Tuesday that McWilliams had agreed to tell the grand jury he was in the hotel room as Barry and Lewis smoked crack cocaine.

Such testimony could lead to felony charges of perjury and obstruction of justice against Barry, who already faces a misdemeanor charge of cocaine possession after his Jan. 18 arrest at another downtown hotel.

Barry's arrest ''constituted one step in an ongoing investigation,'' Stephens said. ''Today's action, today's guilty plea by Mr. McWilliams, also constitutes another significant step in that ongoing investigation.''

McWilliams and his lawyer, Mark Tuohey, refused comment. Last year Barry testified before the same grand jury that he never used illegal drugs with Lewis. Lewis, who since has been convicted of cocaine distribution, has testified that Barry and he smoked crack at the Ramada Inn.

Barry, 53, is now at a substance abuse clinic in Florida after being arrested at the Vista International Hotel, where, according to the FBI, he was videotaped smoking crack. If convicted of cocaine possession, he could be sentenced to a year in jail and fined $100,000.

Before Barry's arrest, McWilliams, 57, a former assistant attorney general of the Virgin Islands and now an official of the D.C. Department of Public Works, had refused to testify voluntarily before the grand jury about the Ramada Inn incident.

McWilliams entered the guilty plea before U.S. Magistrate Deborah Robinson and was released on his own recognizance. He then testified before the secret grand jury panel for about two hours.

McWilliams' sentencing was set for April 4. He could face a maximum penalty of one year in jail and a $100,000 fine.

WUSA-TV has quoted anonymous sources as saying the tape shows Barry and Rasheeda Moore, the ex-model who lured him to the hotel in cooperation with the FBI, having sex.

Asked about this report, Stephens said, ''The tape ... depicts incidents which we would be comfortable showing to a jury here in the District of Columbia. I believe it is something which would not offend jurors in this city except to the extent which the conduct which led to the underlying charges might be offensive to them.''

Stephens also said Barry's lawyer, R. Kenneth Mundy, would be allowed to view both the original tape and an enhanced version.

The sting by the FBI and members of the D.C. police Internal Affairs Division that led to Barry's arrest was a result of a federal probe that began 13 months earlier with the Ramada Inn incident, which Stephens called the ''triggering event.''

On Dec. 22, 1988, Barry was seen entering Lewis's room at the Ramada Inn by city police, who had Lewis under surveillance for allegedly offering cocaine to a maid in exchange for sex.

A police raid on Lewis's room was aborted after Barry was seen, leading to later allegations of a police coverup. Barry has acknowledged visiting Lewis several times in December 1988 at the hotel, but has frequently denied using or seeing drugs at the Ramada Inn.

The Post reported that McWilliams, a longtime friend of Lewis, told federal prosecutors he was present at the Ramada Inn and saw Barry and Lewis enter the bathroom together. From the context of their conversation, it was clear they entered the bathroom to smoke crack, the newspaper's sources said.

Mundy said he did not feel McWilliams' testimony could lead to perjury charges against Barry because he did not see crack cocaine ''nor did he see any of the other persons in the room indulge in cocaine use.''

Barry's spokeswoman, Lurma Rackley, released a statement denouncing leaks to the media and Barry's ''trial by press.''

''Given the past conduct of federal officials and the print and broadcast

media, we can expect to see a parade of people - whether they are credible or not - coming out of the woodwork to 'make deals' with federal officials or 'tell their stories' of time they supposedly spent in Mayor Barry's company in the past few years,'' the statement said.

Moore testified before the federal grand jury last week. She spent time with Barry and Lewis in the Virgin Islands, and Lewis had testified the three used cocaine there. If she has corroborated that testimony, it could strengthen possibilities of a perjury indictment against Barry.

Lewis and Moore are convicted felons. McWilliams is considered a more credible witness.

#90030u2468 01/30/1990 ~United Press International

STAMFORD, CT (JAN. 30) UPI - Guinness Import Co. announced Tuesday it has reached an agreement to acquire All Brand Importers Co. and several of the Hartford company's premium imported beers for $21 million.

The proposed acquisition would make Guinness one of the three top beer importers in the United States, Guinness said.

Guinness is part of the worldwide brewing business of Guinness. All Brand Importers is 51 percent owned by Grand Metropolitian and 49 percent by Whitbread and Co.

The premium beer brands that will be added to Guinness Import's portfolio are Moosehead Premium Canadian Lager and Moosehead Light from Canada, Mexican lagers Dos Equis, Sol and Superior; Clausthaler non-alcoholic malt beverage from West Germany, and Pilsner Urquell lager from Czechoslovakia.

Guinness imports Guinness stout, Harp lager, Bass Ale, Kaliber non-alcoholic brew, and in the Northeast, Guinness Gold lager.

The acquisition would more than double the case volume of Guinness Import Co. and increase annual retail sales to more than $300 million, officials said.

#90030u2493 01/30/1990 ~United Press International

ADAK ISLAND, AK (JAN. 30) UPI - A U.S. Fish and Wildlife Service research vessel overturned in a storm after the crew radioed for help, and searchers found one crewman but three others were unaccounted for, the Coast Guard said Tuesday.

An unidentified crewman from the vessel was found walking on the shores of

Adak Island, where the federal wildlife agency maintains a station, and was taken to a Navy hospital on the island, Coast Guard spokesman Ed Moreth said in Juneau. A search continued for three other missing crew members.

The 25-foot Kittywake broadcast a distress signal Monday night when high winds and blowing snow began battering the vessel and the ship's anchor would not hold. A wave crashed through the cabin window as the skipper radioed.

A Coast Guard search plane found the overturned vessel about midday Tuesday. A life raft and four survival suits were spotted nearby.

Navy planes and tugs also joined the search.

Adak Island is about half way out the 1,100-mile long Aleutian Island chain. Most Aleutian islands are part of the Alaska Maritime National Wildlife Refuge, which has an office on Adak. Adak also is home to a Naval Air Station.

In another rescue, the Coast Guard Tuesday rescued six fishermen whose 110-foot crab boat hit rocks in the Pribilof Islands in the Bering Sea. The six crewmen were hoisted off the American Star, based in Seattle, by helicopter during 40-mph winds and 10-foot seas.

#90030u2541 01/30/1990 ~United Press International

PEORIA, IL. (JAN. 30) UPI - A woman who told authorities masked gunmen abducted her two daughters in separate kidnappings three years apart was convicted of murder Tuesday in the death of her 6-week-old daughter, whose body was found in a trash can.

Paula Sims, 30, Alton, Ill., sat nearly emotionless as the verdicts were read,wincing briefly and shaking her head as she gazed at the table, her hands folded in her lap.

The Peoria County jury of eight men and four women found Sims guilty of murder, concealing a homicide and interfering with the investigation into the death of her daughter, Heather Lee Sims.

Sims was slow to stand and leave the courtroom after jurors rejected her claim a masked gunman knocked her unconscious April 29 in her Alton home and made off with the infant while her 1-year-old brother slept upstairs.

Heather's nude body was found in St. Charles County, Mo., on May 4, wrapped in a garbage bag. An autopsy showed she suffocated.

The trial was moved from Alton, near the Missouri border, to central Illinois because of pretrial publicity.

Sims's account of the kidnapping and killing was nearly identical to the one she gave Jersey County investigators three years earlier, when she reported 13-day-old Loralei had been kidnapped. The body of a baby was found near the Sims home and though never positively identified, investigators have said it was probably Loralei.

Prosecutors plan to seek the death penalty in a two-step sentencing hearing to begin Wednesday.

Defense attorney Donald Groshong would not comment following the 10 hours of deliberations, but the prosectors said they were pleased with the verdicts and thanked the Peoria County jury.

''We think the people of Madison County owe the jurors of Peoria County a great deal for the job that they did,'' Madison County Assistant State's Attorney Don Weber said. ''I just thank God that justice was done.

#90030u2562 01/30/1990 ~United Press International
(JAN. 30) UPI - It's NOT yet clear whether former President Reagan will be required to testify at John Poindexter's forthcoming Iran-Contra trial. But a federal judge in Washington today ruled that the ex-president will have to turn over portions of his personal diaries for use in his former national security adviser's defense.

The F-B-I was called to a NON-denominational church in Houston where a mail bomb apparently containing nails exploded today, injuring the pastor's daughter. Police say the 30-year-old women who opened the package is hospitalized in good condition. It was NOT immediately clear who the package was addressed to.

More troubles for Washington, D-C, Mayor Marion Barry. A city official reportedly told a federal grand jury today that he was with Barry when the mayor allegedly smoked crack cocaine with a former city worker in December 1988. The panel is investigating Barry's purported drug use.

Treasury Secretary Brady says a Democratic proposal to cut Social Security taxes is- quote- ''goofy.'' Brady says he doesn't see any reason to change a system he calls ''sound.'' But, Brady concedes that Democrats have a point that the deficit would be larger without Social Security tax surpluses.

Federal Reserve Chairman Alan Greenspan says the chances of a recession during the next six months have decreased... but the nation is NOT out of

the woods yet. Greenspan says inflation is now at an ''unacceptable'' level of four-point-five percent and represents the biggest recession danger.

-30- 1699

#90030u2612 01/30/1990 ~United Press International

DEXTER, ME (JAN. 30) UPI - The roof of a department store collapsed under the weight of more than a foot of newly fallen snow Tuesday, injuring at least three people inside, and rescue workers searched for more possible victims in the wreckage, officials said.

At least six people were reported inside Reny's department store on Main Street in Dexter, about 15 miles northwest of Bangor, when the building's flat roof caved in at about 4:30 p.m.

The manager of a nearby hardware store said firefighters were in the three-story, brick department store to check the leaking roof when the collapse occurred.

A fierce winter storm dumped 17 inches in the Dexter area and up to 28 inches on parts of northern New England Monday night and Tuesday morning. Police and firefighters blamed the collapse on the weight of the snow.

Robert McReavy, executive director of Mayo Regional Hospital in nearby Dover-Foxcroft, said two women and a man were pulled from the three-story brick building and treated at the hospital for an injured hand, a broken leg and a possible head and neck injury.

''We have three accident victims with an average age of 19 to 26,'' he said. ''There were six people in the building altogether. I've been told this by ambulance drivers.''

Police could not immediately say how many people were in the building at the time of the accident or how many had been injured. Rescue workers used dogs to search the wreckage for any more possible victims, said Gary Currier, a dispatcher with the Penobscot County sheriff's office.

Witnesses said the building groaned, part of the roof collapsed to the ground and the front of the store fell in, with portions landing on a fire truck. At least 50 rescue workers were at the scene, digging through the wreckage for any more victims.

Richard Pfirman, manager of Tilson's True Value hardware store about 100 yards down the street, said his store shook when the department store collapsed. ''We felt the floor vibrating and there was quite a roar,'' he said. ''We thought it was our own roof unloading snow.''

Pfirman said firefighters had been called to inspect the building earlier in the day because of a leaky roof, and some firefighters were in the building when the collapse occurred.

''They had to leave quickly because they felt the building shake,'' Pfirman said. ''Part of the building fell on the street and sidewalk and sheared off an overhang, and it caused some damage to a firetruck parked outside.''

Another witness, Jerry Townsend, told CNN television the collapse sounded like thunder. He said other witnesses had told him authorities were trying to evacuate the building before the accident occurred.

''I was bent over making a phone call, dialing, and I heard ... like thunder and I looked up and I watched three windows disappear into the building and the roof collapse and the debris falling down into the street '' Townsend said.

Currier said the storm may have kept shoppers at home. ''I hope so,'' he added.

The department store, believed to be nearly 100 years old, is situated in an older section of the town of about 4,000 residents and is connected by a walkway to another building which did not collapse.

-30- 3465

#90030u2622 01/30/1990 ~United Press International

(JAN. 30) UPI - The General Accounting Office says the agency in charge of disposing of insolvent savings and loans is ''highly susceptible to fraud, waste and abuse.'' The congressional watchdog agency lists the Resolution Trust Corporation as among the 14 agencies and programs that should be audited and reviewed.

East German leader Hans Modrow says the reunification of the two Germanys could occur, but NOT anytime soon. Before leaving Moscow for home, Modrow said each side must be ''cautious'' and patient- quote- ''to move forward and address the issue'' of reunification. Modrow met with Soviet President Gorbachev today.

In East Berlin, government prosecutors were unsuccessful in their attempt to keep former hard-line communist chief Erich Honecker behind bars until his trial for crimes against the state. Honecker was jailed yesterday, but he was freed when a judge ruled that Honecker's physical condition was ''too frail.''

Poland's prime minister today told members of the Council of Europe that he supports the notion of a European confederation. While addressing the

group's parliamentary assembly in Stasbourg, France, Tadeusz Mazowiecki refused to endorse the idea of German reunification. After his speech, Mazowiecki submitted Poland's request to join the council.

Soviet President Gorbachev has suffered another setback- this time in the heart of the Russian republic. The Tass news agency says the regional Communist Party leadership of Volgograd has stepped down after three days of protests calling for its ouster.

#90030u2685 01/30/1990 ~United Press International

MIAMI (JAN. 30) UPI - A member of the International Court of Justice said Tuesday that Manuel Noriega will not be able to petition the court privately on his prisoner of war status, but a defense lawyer said there are other options if necessary.

The deposed Panamanian dictator's lawyers have declared that he is a prisoner of war under the Geneva Convention and thus should be sent to a neutral country or housed in a POW camp. They have refused to recognize U.S. District Judge William Hoeveler's jurisdiction in the case and have said the world court must decide Noriega's status.

But Keba Mbaye, vice president of the ICJ, told United Press International Tuesday that the body will not be able to hear Noriega's case ''because the statute of the court says that it can only handle disputes between states, which are brought by states.''

Reached in the Netherlands, Mbaye, a native of Senegal, said the jurisdiction of the ICJ is valid only if both countries in a dispute accept the jurisdiction of the court.

''The United States withdrew from the court's jurisdiction after a case several years ago between Nicaragua and the United States. America does not now recognise compulsory jurisdiction,'' Mbaye said.

The U.S. withdrawal from jurisdictional acceptance of the ICJ would mean that even if Noriega were able to bring his case before the court, the United States would not be bound by court decisions.

Frank Rubino, one of Noriega's lawyers, said his client is a prisoner of war and will remain so unless a ''competent tribunal,'' strips him of that status.

Rubino, who wrote a 26-page motion on the POW issue, said the world court was one of several options. He said there were others that would be pursued before going to the ICJ.

''It's a viable option, but I didn't say that was where I was going first '' he said. ''There are a lot of options and I don't think I'm going to put my finger on one now and say that's the way to go.''

He said the best defense scenario would be for Hoeveler to honor the POW motion's request and acknowledge that he has no jurisdiction to hear the Noriega case. Hoeveler has said he will leave a decision on the POW issue to the Justice Department.

If Hoeveler agreed with the motion, the prisoner of war would then be transferred to a third country, Rubino said.

''Ultimately the United States would announce the cessation of hostilities in Panama and the general would be in a third country,'' he said. ''He then has to be released from the third country and obviously we hope that third country does not have an extradition treaty with the United States.''

Hoeveler said Noriega probably would be tried in Miami even if he is a POW as the defense claims. ''Just because he is found to be a prisoner of war would not rule out the government's ability to bring him to trial,'' the judge said.

Rubino argued that could not happen because, except for war crimes, a POW cannot be tried on any charges filed before his capture.

A Justice Department spokesman in Washington said the government plans to submit a written repsonse to Noriega's demands Wednesday.

The Bush administration insists that because Noriega is in government custody, he is subject to trial on drug-conspiracy charges in U.S. District Court in Mimai, which could being him a maximum penalty of 145 years in prison and a $1.1 million fine.

Hoeveler said the Army and the executive branch must decide whether Noriega is a prisoner of war. He said he will rule only on whether his court has jurisdiction to try Noriega.

''That is the $64,000 question,'' Hoeveler said. ''The executive branch of the government may determine that he is a prisoner of war, and prosecutors

may argue that he can still be brought to trial - that Noriega is also a prisoner of the U.S. marshals.''

#90030u2747 01/30/1990 ~United Press International

BEVERLY HILLS, Calif. (JAN. 30) UPI - The board of Hilton Hotels Corp., which has been up for sale for the past six months, met Tuesday to discuss the bids and whether to accept one of them.

Hilton officers refused to comment on the meeting.

Analysts had initially expected offers for the chain, which has more than 270 hotels, to go as high as $6 billion, or $120 a share, and the price of Hilton stock topped $115 a share in August.

But with declines in real estate values and the junk bond market, interest in acquiring Hilton has been light and the stock price has plunged. It fell $2.25 Tuesday to $57.75 a share on the New York Stock Exchange, after a drop of $4.50 a share on Monday.

The company said last week that it would meet this week to consider its alternatives. Analysts said the announcement indicated that the offers are probably far under the company's asking price.

Hilton owns 14 hotels, including the Waldorf Astoria in New York and the Las Vegas and Flamingo Hiltons, manages 34 others and franchises the rest.

#90030u2987 01/30/1990 ~United Press International

(JAN. 30) UPI - Secretary of State Baker postpones Moscow trip for a day amid unconfirmed reports Soviet President Gorbachev is considering resigning as Communist Party chief... Battle of Budget opens on Capitol Hill... Federal judge orders Ronald Reagan to turn over portions of his personal diaries. U-P-I has it all, next:

Secretary of State Baker is delaying a trip to Moscow by one day amid unconfirmed reports of possible changes in the Soviet Union.

The State Department says Baker is postponing next week's visit due to an important meeting of the Soviet Communist Party.

The announcement comes amid unconfirmed reports that Mikhail Gorbachev may resign as Communist Party chief. The Soviet president is said to be considering giving up his title of General Secretary of the Communist Party to vent his frustration over resistance to his domestic reforms.

The White House says it canNOT confirm a Cable News Network report that Gorbachev may resign his party position while retaining his post as president. Spokesman Marlin Fitzwater says he has ''NO information'' on the matter.

There has been speculation in Washington and Eastern Europe that Gorbachev's political future is threatened by ethnic strife and internal divisions.

The schedule change means Baker will meet with his Soviet counterpart next Thursday and Friday, instead of Wednesday and Thursday. Baker and Eduard Shevardnadze were expected to lay the groundwork for a June summit in Washington.

Baker is scheduled to make a stop Prague, Czechosolvakia, and possibly Bucharest, Romania, before he arrives in Moscow.

Resignations were a reality today in the Russian republic of Volgograd, about 600 miles southeast of Moscow. The regional Communist Party leadership quit today, responding to three days of protests by tens of thousands of residents demanding its ouster.

-30- 2045

#90030u3027 01/30/1990 ~United Press International

(JAN. 30) UPI - One day after submitting his fiscal 1991 budget, President Bush is being portrayed by critics as playing a partisan game that does NOT regard domestic priorities or changing global politics.

House Budget Committee Chairman Leon Panetta bluntly told Budget Director Richard Darman that the Bush budget lacks credibility. Despite Darman's protests, Panetta continued his criticism, saying the five-pound document included- quote- ''a discouraging difference between words and action.''

Also citing disappointment in the numbers proposed by Bush are two groups presenting cities and local officials- the U-S Conference of Mayors and the National League of Cities.

Both groups contend that urban areas and domestic policies in general have been the first and most significant targets for Republican administrations.

Their charges are supported by the Center for Budget and Policy Priority.

An analysis of the budget by the group indicates that- quote- ''four-fifths of all program spending reductions would come from the domestic side of the government.''

Democrats on Capitol Hill also are frustrated by Defense Secretary

Cheney's effort to close stateside U-S military bases.

California Democrat Barbara Boxer said savings from the plan would amount to only 700-Million dollars over the next several years, while fellow Democrat Patricia Schroeder charged that the losses would hit Democratic districts disproportionately.

Former national security adviser John Poindexter may have scored a victory in his attempt to defend himself on five felony accounts relating to the Iran-Contra scandal.

U-S District Judge Harold Greene today ruled in Washington, D-C, that former President Reagan must turn over certain diary entries written in 1985 and 1986 to Poindexter's lawyers.

Greene's decision is based on an assessment that the entries are relevant to Poindexter's claim that Reagan was aware of his activities on behalf of the Nicaraguan Contra rebels at a time when such aid was banned by Congress.

Poindexter's trial is scheduled to begin on February 20th. Reagan possibly could prevent the release of his diaries by claiming ''executive privilege.''

-30- 2381
#90030u3049 01/30/1990 ~United Press International
(JAN. 30) UPI - A Houston, Texas, pastor's daughter is hospitalized in stable condition after opening a package concealing a pipe bomb.

Officials say the bomb apparently contained large nails and was addressed to the Reverend John Osteen, pastor of the NON-denominational Lakewood Church. Osteen... whose sermons are broadcast across the country... says he has NOT received any death threats recently.

Workers at the church that boasts a membership of about 10-thousand say the package came in the regular mail, which Lisa Osteen usually opened.

The F-B-I is investigating the blast, which came one day after the delivery of a bobby-trapped briefcase to an assistant U-S attorney in New York. Yesterday's package was opened... but the .22-caliber pistol inside failed to fire.

Officials say there's NO evidence to link either case to the rash of deadly mail bombings that federal authorities are investigating in the South.

A prosecutor says Manuel Noriega's banker operated on a policy of taking

as many deposits as possible, without looking too closely at where they came from.

The deposed Panamanian leader's personal banker and four other bank officers face charges of laundering drug money. Two Colombians also are charged in the case, one of whom has already pleaded guilty.

The indictments... filed in Tampa, Florida... allege that 32-Million dollars in drug profits were laundered throughout the world.

In Miami, Noriega's attorneys say they will ask the World Court to declare their client a prisoner of war.

But the judge hearing Noreiga's drug case says the ousted ruler probably still would stand trial in Miami, even if he were declared a P-O-W.

A Justice Department spokesman in Washington says the government plans to submit a written response to Noriega's P-O-W demands tomorrow.

-30- 2003

#90030u3057 01/30/1990 ~United Press International

(JAN. 30) UPI - East German prosecutors today failed in their attempt to keep former communist leader Erich Honecker behind bars prior to his criminal trial for crimes against the state.

The state-run news agency says Honecker's freedom before his forthcoming trial was based on an East Berlin court's decision that the 77-year-old Honecker ''was too frail'' to be jailed.

The ruling could strengthen defense claims that Honecker is too sick to stand trial on charges of treason and official corruption.

Honecker was taken into custody yesterday upon his discharge from a hospital after undergoing surgery to remove a malignant kidney tumor.

Meanwhile, East Germany's interim leader visited Moscow.

After meeting with Soviet President Gorbachev, Prime Minister Hans Modrow told reporters that his country will NOT abandon the Warsaw Pact.

He also credited changes in East Germany to the more tolerant political philosophy held by Gorbachev.

-30- 1117

#90030u3076 01/30/1990 ~United Press International

(JAN. 30) UPI - A tense stand-off eased in Romania today with the interim

government in control.

The National Salvation Front sent home thousands of miners and factory workers who flocked to the capital to face off with anti-government protesters. Interim President Ion Iliescu told the pro-government crowd- ''We need you at work. Please go home.''

An eerie silence overtook Bucharest following the two-day power struggle between pro- and anti-government demonstrators. Both sides are claiming responsibility for the revolution that overthrew the communist government last month. Opposition leaders say it's likely the struggle will continue, though NOT in the form of street demonstrations.

The National Salvation Front is accused by critics of trying to govern in the same Stalinist style of executed dictator Nicolae Ceausescu.

Three senate Democrats have come up with a novel ''defense spending'' plan.

Senators Claiborne Pell of Rhode Island, Joseph Biden of Delaware and Paul Simon of Illinois say one of the most effective ways to spend defense dollars is to provide economic aid to the emerging democracies of Eastern Europe.

Based on the aid sent to Poland and Hungary, the Foreign Relations Committee members would extend assistance to Bulgaria, Czechoslovakia, Romania, East Germany and Yugoslavia.

Their bill allows the White House some latitude as to how a possible 511-Million dollars would be spent, except for 80-Million dollars in Romanian food aid and another 10-Million dollars toward holding free elections.

The Democrats also say aid could go to the Soviet Union if it can be shown that such assistance would serve U-S interests.

-30- 1850

#90030u3447 01/30/1990 ~United Press International

(JAN. 30) UPI - The White House says it has ''NO information'' on a report that Mikhail Gorbachev may resign as general secretary of the Soviet Communist Party... but retain his title of president.

Regardless, the State Department says Secretary of State Baker is delaying by one day a trip to Moscow next week due to an important meeting of the Soviet Communist Party.

The Kremlin is ruling out negotiations with the main Azerbaijani nationalist group, saying it's run by extremists. A senior Soviet official

does say the Popular Front has some legitimate demands.

Few details are available, but a hospital source on Warsaw says the head of the Roman Catholic Church in Poland has been admitted to an intensive care unit. A church spokesman says an ambulance took Cardinal Jozef Glemp from his palace to the hospital.

In Anchorage, Alaska, jury selection is under way in the trial of fired Exxon skipper Joseph Hazelwood, who faces criminal charges in the nation's worst oil spill. The process is expected to take as long as two weeks.

Winter storm warnings remain in effect through the evening for parts of Maine due to what the National Weather Service terms a ''monster storm.'' Residents in northern New England are busy shoveling following the downfall of as much as 28 inches of snow.

A federal grand jury in Washington, D-C, heard two hours of testimony from a former city worker allegedly in a position to refute Mayor Marion Barry's denial before the same panel of having smoked cocaine. Earlier today, the man pleaded guilty to drug charges.

Federal agents in Florida say a drug sweep during Sunday's Super Bowl netted NO arrests but it appears they didn't come up empty-handed. Customs agents say 114 pounds of cocaine drifted onto Boca Raton beaches yesterday in 52 plaster molds shaped like loaves of bread.

Salvadoran officials say President Cristiani was scheduled to fly to the United States today to meet with the U-N secretary general. He's also slated to meet with President Bush and congressional leaders.

-30- 2231

#90030u3512 01/30/1990 ~United Press International

(JAN. 30) UPI - Lawmakers on Capitol Hill say they doubt the authenticity of a report that Soviet President Gorbachev is considering stepping down from his post as the Communist Party's general secretary. Indiana Republican Senator Richard Lugar discounts the story, saying he believes- quote- ''Gorbachev will resist giving up authority.'' The State Department says Secretary of State Baker has postponed by one day his trip to Moscow next week.

The Bush administration today protested what State Department spokeswoman Margaret Tutwiler says- quote- ''appears to be active intimidation of legal organizations'' by Romania's interim government. Tutwiler says the protest to the National Salvation Front stems from that group's harassment of opposition parties.

A spokesman for former President Reagan offered NO comment to a federal

judge's ruling in Washington that requires Reagan to turn over portions of his personal diaries relevant to the Iran-Contra scandal. The decision could be good news for former national security adviser John Poindexter if the entries contain information that Reagan knew about his covert activities on behalf of the Nicaraguan rebels. Poindexter faces five felony charges.

William Bennett says the Bush administration's war on drugs is paying off. The federal anti-drug director cited a decline in overall drug use in recent years while speaking to the National Press Club in in Washington.

A man convicted of strangling five women during an 18-day murder spree in 1984 was sentenced to die in the gas chamber in Santa Monica, California. The mother of one of Dean Carter's victims says he should be strangled, because- quoting- ''that's the way he killed my daughter.''

Poland's official news agency says police are investigating an ''act of hooliganism'' that toppled a statue of Lenin. The larger-than-life metal statue was found lying on the ground with a cable around its neck in a mountain town where the former Soviet leader spent several months in exile.

-30- 2188

#90030u3825 01/30/1990 ~United Press International

(JAN. 30) UPI - New Jersey Governor Jim Florio says- quote- ''this won't be another Valdez situation.'' Referring to the Alaska oil spill disaster, Florio reasserted that Exxon will pay for the cleanup of a 500-thousand-gallon oil spill that occurred earlier this month. Florio says he's even more determined that Exxon take care of the spill after a state investigation showed the pump facility-based spill occurred because of human error.

Wisconsin Democrat Les Aspin says weapons such as the B-2 stealth bomber and the ''star wars'' defense system are likely projects to be whittled down. Aspin is critical of the military budget, saying it ''essentially lacks a theme.''

A top military official is upset by Defense Secretary Cheney's decision to cancel the V-22 Osprey aircraft program. Cheney insists there is NOT enough money for the revolutionary tilt-rotor plane, which lands and takes off like a helicopter. But General James lindsay, head of Special Operations Command, says the Osprey is necessary to get his commandos in and out of enemy territory quickly.

Winter storm warnings were continued through this evening for central and eastern Maine because of a massive storm that belted northern New England

with up to 28 inches of snow. The storm moved away from the Maine coast today and forecasters say it's headed toward Nova Scotia. There's concern of flooding in Massachusetts, which received a heavy rainfall from the storm.

-30- 1760

#90030u4008 01/30/1990 ~United Press International

(JAN. 30) UPI - Rescue workers are using dogs to search the wreckage of a Dexter, Maine, department store after its roof collapsed this afternoon... injuring at least three people. Police did NOT know how many people were in the building at the time of the accident. Authorities say the roof fell in under the weight of newly fallen snow. Dexter is located about 15 miles northwest of Bangor.

A bill approving limited economic sanctions against China for its crackdown on last year's pro-democracy movement is sitting before President Bush, awaiting his signature. The Senate today unanimously approved the legislation, which Bush vetoed last November because of objections to an unrelated legislative restriction that was included in the measure.

There's NO word if former President Reagan will declare ''executive privilege'' to avoid a federal court ruling requiring him to turn over parts of his personal diaries to his former national security adviser. John Poindexter has been pressing for disclosure of the diaries as a means of proving Reagan authorized Poindexter's role in the Iran-Contra scandal. Poindexter faces five felony charges for aiding the Nicaraguan Contra rebels when such actions were congressionally banned.

Soviet sources in Washington say a report that President Gorbachev is contemplating resigning his post as Communist Party general secretary may be nothing more than an internal political device. The sources say Gorbachev may have hatched the plan as a means to bring the Communist Party into line behind his leadership, or face the prospect of losing political primacy.

-30- 1787

#90030u4052 01/30/1990 ~United Press International

(JAN. 30) UPI - Lawyers for deposed Panamanian dictator Manuel Noriega are are having little success gaining converts to their contention that he's a prisoner of war, and so cannot be tried for criminal charges in a U-S court. Today, an official for the International Court of Justice told U-P-I the body cannot rule on Noriega's so-called P-O-W status. The Justice Department says it will respond to Noriega's demands tomorrow.

Police in Monroe, New York, are trying to determine what caused a loaded

schoolbus to run off the road this afternoon and strike a tree. 14 of the nearly 50 kindergarten and first-grade students aboard the bus were injured in the crash... four seriously. The bus driver also was hurt. The accident occurred about 40 miles northwest of New York City.

Operation Rescue founder Terry Randall is free from jail- thanks to an anonymous donor who paid his two-thousand-dollar fine. Randall received the fine and a two-year jail term in Atlanta last October for blocking the entrance of a women's clinic. Shortly after his release today, the anti-abortion activist headed to Washington, D-C, to address a group of religious broadcasters.

A Dallas federal jury today convicted a so-called ''coupon queen'' on two counts of mail fraud and one count of conspiring to commit mail fraud. Connie Avidson of Boca Raton, Florida, was acquitted of three other counts relating to what federal prosecutors say was a two-Million-dollar scheme to distribute phony coupons. Arvidson... who admits to being addicted to clipping coupons... has maintained she did NOT known the coupons were fake.

-30- 1778

#90030u4241 01/30/1990 ~United Press International

(JAN. 30) UPI - A department store roof collapses in Maine... the Senate approves economic sanctions against China... the details of those stories and much more coming up next from the world-wide wires of United Press International.

At least 50 rescue workers from several communities are in Dexter, Maine, searching for more victims following the partial collapse of a department store roof under the weight of newly fallen snow.

There were NO immediate reports of any deaths. But at least two women and a man were hurt in this afternoon's cave-in. There's a possibility others were trapped under the debris.

A hospital official says one victim has a hand injury... the second a broken leg... and the third may possibly have head and neck injuries.

Witnesses say the roof fell to the ground and the facade of the three-story department store also caved in. Jerry Townsend says he- quote- ''watched three windows disappear into the building and the roof collapse'' as debris fell into the street.

A nearby storeowner says firefighters were in Reny's department store to check the leaking roof when the collapse occurred. Richard Pfirman says the firefighters left the building quickly after feeling it shake just before the cave-in.

Authorities blame the collapse on a New England storm that dumped 17 inches of snow in Dexter, 15 miles northwest of Bangor.

Lawmakers on Capitol Hill returned once again to the issue of placing sanctions against China for its brutal repression of a pro-democracy movement last year.

However, today's activities inspired none of the vitriol or bitterness that took place last week as the two chambers tried to override President Bush's veto of a ban against returning Chinese students when their visas expired.

By a unanimous vote, the Senate approved limited economic sanctions against Beijing and forwarded the package to the White House for the president's signature.

Bush rejected the measure last year because it had a provision that would've have made it a crime for a government employee to seek money or material support from a foreign government or from an individual in support of an illegal activity.

The House subsequently removed the Iran-Contra-based provision from the legislation.

-30- 2459

#90030u4254 01/30/1990 ~United Press International

(JAN. 30) UPI - A broadcast report indicates mounting internal difficulties may lead Soviet President Gorbachev to step down from his post as head of the Communist Party.

The unconfirmed report indicates that while Gorbachev would resign as party chairman, he would maintain his position as the Soviet Union's president.

White House Chief of Staff John Sununu told reporters the Bush administration is trying to determine the validity of the report. In his words- ''We would like to understand the details of what's involved and what's implied if such a change has taken place.''

Soviet sources in Washington say the report may be a ploy by Gorbachev to bring dissident elements of the party behind his leadership or face the consequences of the loss of political primacy.

Secretary of State Baker is to head for Moscow next week to meet with his Soviet counterpart, Eduard Shevardnadze.

Defense Secretary Cheney suggests he'd be open to compromise concerning

his list of 69 military bases to be closed or reduced.

Cheney says the list ''can be changed''... and he adds that he would NOT rule out agreeing to a Democratic proposal for creation of a base-closure commission.

The defense secretary also strongly denies charges by congressional Democrats that his list is a ''political'' one. The only motive is- in his words- ''to do the best job we can of squeezing the defense budget.''

The head of the House Armed Services Committee says he'll introduce legislation to create a bipartisan base closing commission. Wisconsin Democrat Les Aspin says the commission is needed because the facilities studied for closure are slanted 4-1 against Democrats.

Colorardo Democrat Pat Schroeder charges Cheney produced- quote- an ''unbalanced, partisan hit list.''

Cheney says Democrats are playing what he calls a ''petty kind of game'' that doesn't serve anyone's interest.

-30- 2084

#90030u4280 01/30/1990 ~United Press International

(JAN. 30) UPI - The turmoil in Eastern Europe and actions aimed at easing the situation continue today.

Bloody demonstrations continued for a seventh straight day in Yugoslavia's Kosovo province where ethnic Albanians are demanding more autonomy. Protesters and riot police exchanged gunfire there today.

Romania's embattled interim government withheld its tenuous grasp on power after President Ion Iliescu calmed demonstrators with promises of more food.

Bulgarian leader Peter Mladenov opened a crucial party congress by calling for reforms in his nation's Communist Party. Mladenov pointed to the failure of communist parties in other countries where reform didn't come fast enough.

East German Prime Minister Hans Modrow met with Soviet President Gorbachev in Moscow. Upon his return to East Berlin, Modrow rejected the idea of East Germany leaving the Warsaw Pact.

An East german judge today decided to free former leader Erich Honecker from jail where he was being held on corruption charges. The judge cited Honecker's failing health.

The left-wing group born from the ashes of Poland's Communist Party unveiled a new, energetic image with the election of a 36-year-old as its new leader.

And in the Soviet union, a senior official has ruled out negotiating with the leaders of rioting Azerbaijani nationalists.

-30- 1505

#90030u4308 01/30/1990 ~United Press International

(JAN. 30) UPI - If the first day of jury selection in the criminal trial of fired Exxon Valdez skipper Joseph Hazelwood is any indication of how the case will fare in Anchorage, Alaska, expect a lengthy trial.

Superior Court Judge Karl Johnstone figured the process of choosing a panel will take two weeks.

Among the grilling prospective jurors faced today were questions of why they came to Alaska, whether they belong to environmental groups, if they drink alcohol and if they suffered or benefited from the huge oil tanker spill last March.

Johnstone did NOT, however, allow defense attorneys to delve into whetherprospective jurors have ever operated a vehicle after drinking, or whether a captain is always responsible for what happens despite his own actions.

Prosecutors contend an intoxicated Hazelwood left the Exxon Valdez in the hands of an unqualified mate in a treacherous stretch of waters.

-30- 1073

#90030u4396 01/30/1990 ~United Press International

(JAN. 30) UPI - Rescuers in Dexter, Maine, are using dogs to search for more possible victims in the wreckage of a department store where part of a roof caved in this afternoon. At least three people were hurt. Police blame the collapse on the weight of more than one foot of newly fallen snow.

President Bush has before him a measure that, if he signs it, would impose limited economic sanctions on China for its crackdown on the pro-democracy movement. The legislation was approved unanimously by the Senate today.

A report says a shipment of Soviet helicopters arrived in Nicaragua in the past few days aboard a Soviet freighter. U-S officials are quoted as saying they view the delivery as a violation of Soviet President Gorbachev's pledge NOT to sent more weapons to Nicaragua.

The news report says the matter will be raised when Secretary of State Baker meets Soviet Foreign Minister Shevardnadze in Moscow next week. Baker has postponed the trip by one day because of an important meeting of the Soviet Communist Party.

The delay in the meeting between Baker and Shevardnadze coincided with a report that Gorbachev is considering resigning as general secretary of the Communist Party. The report could NOT be independently confirmed.

A federal judge in Washington says former President Reagan must turn over to John Poindexter, his ex-national security adviser, portions of his personal diaries about the Iran-Contra scandal. NO comment from Reagan on today's ruling.

The 30-year-old daughter of a Houston minister was hospitalized in ''very good'' condition after being injured today by a mail bomb sent to her father's church. One police officer says it was a ''miracle'' she wasn't hurt worse.

-30- 1893

#90030u4408 01/30/1990 ~United Press International

(JAN. 30) UPI - Demonstrators in central South Africa erected burning barricades and clashed with police for a second day today. The protests were sparked by the arrival of an English cricket team on tour despite an international boycott of sporting contacts with South Africa until apartheid is ended.

Pakistani officials in a provincial city 80 miles northeast of Karachi imposed a curfew and deployed troops to quell ethnic unrest. Earlier today youths fought gunbattles and fired on passersby... killing at least 10 people.

A general strike called by opposition groups in Haiti to protest a sweeping political crackdown by the military government appeared to fizzle today. The streets of the capital, Port-au-Prince were as crowded as usual.

Searchers in Canada's Northwest Territories have recovered the body of a Canadian pilot whose jet fighter crashed while tracking an unarmed U-S cruise missile being tested over northern Canada yesterday.

An Illinois woman who said masked gunmen abducted her two infant daughters in separate kidnappings three years apart was convicted today in the death of one of the babies. Prosecutors plan to seek the death penalty in a sentencing hearing to begin tomorrow.

The owner of a North Carolina summer camp for wealthy children was convicted today of molesting two youngsters. The boys testified last week

they were assaulted by the man during overnight skinny dipping outings.

This just in from the cola wars: a study by psychology students at Williams College in Williamstown, Massachusetts, finds practically NO one can tell the difference between Diet Coke and Diet Pepsi in blind taste tests. NO comment from Coca Cola. A Pepsi spokesman was skeptical about the findings.

-30- 1909

#90030u4578 01/30/1990 ~United Press International

(JAN. 30) UPI - Authorities have called off the search for more victims in the wreckage of a Dexter, Maine, department store. They say they're satisfied NO one else is still inside. Three people were injured when the roof and front wall of the three-story brick building collapsed today under the weight of more than one-foot of freshly fallen snow. The manager of a nearby store says firefighters were checking a leak in the building's roof when the accident occurred.

An unconfirmed report says Nicaragua has received within the past several days a shipment of Soviet-made helicopters. Intelligence sources are quoted saying the M-I-17 choppers were shipped to the port of Corinto aboard a Soviet freighter. As recently as December's superpower summit in Malta, Soviet President Gorbachev pledged NOT to send weapons to Central America.

The acting head of the National Transportation Safety Board told a Senate panel today that federal investigators are focusing on three elements regarding last week's crash of a Colombian jetliner. James Kolstad says the probe is concentrating on fuel planning by the flight crew... radio communications with regional air traffic controllers... and weather. 73 people died when the Boeing 707 plowed into a Long Island hillside.

Opening statements were made today in Tampa, Florida, at the criminal trial of Manuel Noriega's personal banker. And instead of minimizing Amjad Awan's relationship with the deposed Panamanian dictator, his lawyer trumpeted it... saying government prosecutors are trying to prove his client guilty merely by association. Federal attorneys, however, say Awan and four other bank officers laundered drug money to advance their careers.

-30- 1874

#90030u4599 01/30/1990 ~United Press International

(JAN. 30) UPI - Black youths in the central South African city of Bloemfontein clashed with police for a second day today during protests against a tour by English cricket players. The youths tossed stones and erected burning barricades because of their displeasure over the tour, which breaks an international sports boycott of South Africa. Police fired

tear gas and rubber bullets to disperse the demonstrators.

Israeli officials are denying Soviet charges that Soviet Jews immigrating to Israel are being forced to live in settlements in the occupied West Bank and Gaza Strip. The Israeli Foreign Ministry rejects charges that Soviet Jews are being exploited in a plan to use them to push Palestinians out of the territories. It says the new immigrants are free to choose where they live.

A spokeswoman for G-P-U Nuclear Corporation, which runs Pennsylvania's Three Mile Island nuclear power plant, says the utility has reached a ''huge milestone.'' She says workers have completed a four-year effort to remove the fuel that melted down during the nation's worst nuclear energy accident. She says the cleanup confirms that the reactor was NOT breached by the intense heat generated by the partial meltdown on March 28th, 1979.

An organization known as International Dull Folks Unlimited has released its annual list of the ''10 Dullest Americans.'' The group sent congratulatory letters to its honorees... which include actress Roseanne Barr, talk show host Arsenio Hall and Sony Chairman Akio Morita among others. The group's chairman, J-D Stewart, also declared 1989 the ''Year of the Dullard,'' saying it hit new highs for low trivial pursuits and personalities.

-30- 1851

#90031b0006 01/31/1990 ~Business Wire

DAYTON, OH (JAN. 31) BUSINESS WIRE - The Mead Corp. announced Wednesday that it is actively seeking potential buyers for Dataline Inc. of Toronto.

Dataline, a provider of real-time Canadian and U.S. stock market and other financial information services, was acquired in 1987 by Mead Data Central Inc., a wholly-owned subsidiary of Mead.

Dataline's revenues in 1989 were approximately $17 million (Canadian). Dataline's principal product is CANQUOTE(TM), a real-time stock, options and futures quote service.

''We purchased Dataline to gain access to real-time technology for our LEXISR and NEXIS(R) online information services,'' said Jack W. Simpson, president of Mead Data Central. ''Since we acquired Dataline two years ago, we have made considerable investment in real-time technology -- an investment that has benefitted, and will continue to benefit, both companies.''

''For example, we have already been able to make real-time stock quotes available directly to LEXIS/NEXIS subscribers. In turn, Dataline's next generation technology, which will be introduced later this year, will

provide a solid platform for future growth,'' Simpson said. ''Having realized our objectives, we believe that a sale of Dataline will be in both companies' best interests.''

Dataline is based in Toronto, with sales and service offices in Calgary, Halifax, Montreal, Ottawa, Vancouver and London, England. The company has approximately 110 employees. In addition, 20 individuals working in Dataline's offices are employed by Mead Data Central.

The sale of Dataline will be handled by Gerald W. Bialka, manager, corporate development, for the Mead Corp., Courthouse Plaza Northeast, Dayton, Ohio, 45463.

The Mead Corp. (NYSE:MEA), based in Dayton, Ohio, is a leader in forest products, electronic publishing and color imaging.

#90031b0015 01/31/1990 ~Business Wire

SARASOTA, FL (JAN. 31) BUSINESS WIRE - Omni Films International Inc. (NASDAQ:OFII) Wednesday announced that it has entered into an agreement with a Dutch group for installation of the first ESI-3D system at an amusement park in the Netherlands.

Under the terms of the agreement, OMNI will install a complete ESI-3D system including projection equipment, screen and OMNI's six-channel surround sound system. Shipment of the ESI-3D system is scheduled for March 1990.

Total contract sales have now reached $5.1 million for the new fiscal year which began on Oct. 1, 1989.

The Dutch sale was a result of the company's recent presentation at Interschau, an amusement and theme park trade show, in Stuttgart, West Germany.

Fred Hollingsworth III, president, stated ''European interest is very strong in OMNI's 70mm large screen cinema systems. We have the potential to close several more contracts from the interest generated at the show.''

Included in the Dutch agreement is the lease of OMNI's first 3-D film entitled ''The Magic Reef.'' The film depicts the splendor and beauty of the underwater world in OMNI's magnificent 3-D, 70mm format. An additional

film lease of ''The Magic Reef'' was entered into with a Family Entertainment Center in Paris.

OMNI's annual meeting will be held on Feb. 12, 1990 at 2 p.m., at the Barnett Bank Center, located at 240 South Pineapple in Sarasota.

An Open House will be held immediately after the annual meeting at 3:30 p.m. to 5 p.m. at OMNI's offices at 5696 Pinkney Ave. in Sarasota. The Open House will allow shareholders, financial professionals and the public to see company facilities and allow them to ride Motion Master, OMNI's ''wave of the future'' high capacity motion simulator.

Omni Films International specializes in the design, sale and installation of five separate and distinct 70mm wide-screen cinema systems, and produces, distributes and licenses 70mm films for these systems. Since inception, Omni has delivered approximately 200 of its cinema systems to locations in 53 countries, incuding every continent except Antarctica. Omni is traded on the NASDAQ system under the symbol OFII.

POMONA, CA (JAN. 31) BUSINESS WIRE - Plans to discontinue printed-wiring-board manufacturing operations here were announced Wednesday by Xerox Corp.

Some 240 employees will be affected, 140 industrial staff, or production workers, and 100 managerial, professional and administrative personnel.

The company's withdrawal from printed-wiring-board production is part of a continuous effort to reduce manufacturing costs.

''After considerable study, we have determined that our Pomona facility can't be competitive with outside suppliers who specialize in the business '' said Eric L. Steenburgh, senior vice president and general manager, manufacturing operations, for Xerox.

He said the company is seeking a buyer for the Pomona operation. If a buyer can't be found, the plant will be closed about the middle of the year and efforts will be made to place employees in other Xerox locations and in local industry.

LOS ANGELES (JAN. 31) BUSINESS WIRE - Carolyn L. Hislop has been appointed staff vice president, quality and manufacturing management, for Hughes Aircraft Co.

Hislop, a 20-year veteran with Hughes, was formerly assistant manager of the company's missile operations division in Tucson, Ariz. In her new post she succeeds Virgil R. Rodriguez, who retired after 31 years with the company.

Before taking the Tucson position, where she was responsible for several major missile production programs, Hislop had been general manager of Hughes Optical Products Inc. in Des Plaines, Ill. Earlier, she served with both the company's Radar Systems Group and Electro-Optical and Data Systems Group in a number of key production management positions.

A native of North Platte, Neb., Hislop received her bachelor of science degree in industrial engineering from Arizona State University and a master of business administration from Northwestern University.

TEMPE, AZ (JAN. 31) BUSINESS WIRE - UDC-Universal Development L.P. (NYSE:UDC) Wednesday reported record 1989 and fourth quarter revenues, net income and earnings per share.

For the year, UDC reported a record net income of $51.4 million, a 26 percent increase above 1988's $40.8 million. Revenues rose to $407.6 million, up 23 percent above last year's $331 million. Earnings per common share rose to $4.85 from last year's $3.80, an increase of 28 percent.

New home sales for 1989 totaled $410.1 million for 2,491 homes, 19 percent above last years $344.9 million for 2,263 homes.

UDC's backlog of homes ordered but not yet closed was a record $124.7 million for 785 homes, an 18 percent increase above the 1988 year-end backlog of $105.9 million for 684 homes.

Closings of homes during 1989 grew 24 percent to $391.3 million for 2,390 homes, compared with the prior year's $316.3 million for 2,122 homes.

For the fourth quarter of 1989, net income was $20.5 million, 23 percent

greater than the prior fourth quarter's $16.7 million, on revenues of $152.6 million, compared with $123.7 million during the prior comparable quarter. Earnings per common share for the three-month period rose 45 percent to $2.32 from $1.60.

Fourth quarter records included closings of $147.3 million for 873 homes, 23 percent above 1988's comparable quarter total of $119.3 million for 761 homes.

Record fourth quarter sales in Phoenix and the Southeast were offset by softness in the California market.

During the fourth quarter, sales declined to $56.6 milion for 374 homes, down 13 percent when compared with 1988's fourth quarter total of $64.7 million for 398 homes.

UDC builds quality upscale family and adult residential communities in the Sun Belt, with operations in Arizona, California, Florida, Georgia, North Carolina and South Carolina. Its common and preferred shares are traded on the New York Stock Exchange.

SHERMAN OAKS, CA (JAN. 31) BUSINESS WIRE - HemaCare (NASDAQ:HEMA, HEMAU, HEMAW) announced Wednesday the appointment of George H. Fekas as vice president, sales and marketing.

In this capacity, Fekas becomes HemaCare's ''in-house blood and plasma industry consultant,'' evaluating HemaCare's existing business groups as well as developing new corporate strategies.

Fekas brings extensive and diverse blood and plasma industry experience to HemaCare. Most recently, he was administrator of the West Tennessee Regional Blood Center in Jackson, Tennessee. Prior to that, he held various management positions at Blood Systems Inc. in Arizona, and Somerset Laboratories and Ortho Diagnostic Systems Inc. (Johnson and Johnson companies), both in New Jersey.

His experience spans feasibility studies, strategic planning, market development, start-ups, sales management and product distribution. As HemaCare grows and diversifies, Fekas' experience in the blood and plasma industries becomes increasingly valuable.

HemaCare has been a leading provider of hemapheresis-derived products and services since its inception in 1979. In addition to providing mobile therapeutic hemapheresis services to hospitals, the company also provides autologous blood services and hemapheresis- derived blood component products designed to reduce patient risk of contracting hepatitis, AIDS and other diseases potentially transmitted by blood transfusions.

Its subsidiary, MD Laboratories Inc., operates three specialized plasma

centers which provide rare antibodies to vaccine, diagnostic reagent and other biological manufacturers. The company is licensed to perform clinical trials and eventually commercialize a human plasma-based AIDS treatment. HemaCare also operates a clinical laboratory division providing reference laboratory services to hospitals, clinics and physicians.

SAN MATEO, CA. (JAN. 31) BUSINESS WIRE - Bay View Federal Bank, a Federal Savings Bank Wednesday announced the retirement of Richard St. Lezin, senior executive vice president and chief operating officer.

St. Lezin's retirement, which will be effective April 30, marks the end of a 37 year career with Bay View Federal.

Throughout his career at Bay View, St. Lezin has held a number of executive management positions, including chief operating officer, corporate secretary, loan division manager and administrative vice president. His areas of expertise include real estate finance, banking operations, mortgage banking, management and credit extension and business management.

In his duties as chief operating officer, he has assisted the chief executive officer in management affairs and provided direction for the daily activities of bank operations. In addition, St. Lezin has directed the activities of Bay View's wholly owned subsidiary, Bay View Financial Corp., for a number of years.

In announcing St. Lezin's retirement, Robert E. Barnes, president and chief executive officer of Bay View Federal said: ''Richard St. Lezin's contributions to Bay View Federal span a long period of challenge and change, both at Bay View and in the savings and loan industry. His experience and expertise will be missed.''

St. Lezin has also served as a director of the Savings Association Mortgage Co. (SAMCO), chairman of the Low Income Housing Subcommittee of the California Savings and Loan League, chairman of the California Savings and Loan League liason committee with the California Real Estate Association and chairman of the California Savings and Loan League Lending Procedures Committee. A native of San Francisco, St. Lezin is married and the father of four children.

St. Lezin plans to pursue a number of personal interests following his

retirement.

Bay View Federal Bank, the sole subsidiary of Bay View Capital Corp., has $3 billion in assets. Its 25 branches and five loan offices primarily serve the San Francisco Bay Area.

#90031b0066 01/31/1990 ~Business Wire

HOUSTON (JAN. 31) BUSINESS WIRE - Panhandle Eastern Corp. Wednesday reported income from continuing operations of $69.5 million for 1989.

Net income was $29.2 million, or 41 cents per share, which includes an extraordinary charge caused by early retirement of certain acquisition debt and a loss from discontinued operations totaling $40.3 million in the fourth quarter.

These results compare with a 1988 net loss of $157.1 million, or $2.86 per share, primarily attributable to a take-or-pay settlement and contract reformation charge of $244.0 million after tax.

Earnings for 1989 benefited from Texas Eastern's operating income of $249.1 million for eight months. However, financial results suffered the negative effects of interest expense incurred in the Texas Eastern acquisition. The shares issued for the acquisition increased the average number of shares outstanding by 31 percent, from 55.0 million shares for 1988 to 71.9 million shares in 1989.

Fourth quarter 1989 income from continuing operations equaled $41.2 million. After the extraordinary charge from early debt retirement and the loss from discontinued operations, net income for the fourth quarter was $0.9 million, or 1 cent per share.

These results compare with a fourth quarter 1988 loss of $17.7 million, or 31 cents per share, which included a $51.3 million after-tax reserve for a possible customer refund. Fourth quarter 1989 results include Texas Eastern's operating income of $90.4 million.

Although not included in Panhandle Eastern's 1988 results, for comparative purposes, Texas Eastern's restated operating income for the fourth quarter 1988 was $69.3 million. The improved performance was primarily related to revenues from increased natural gas transportation service volumes.

Consolidated operating results in the fourth quarter showed the first favorable effects of Panhandle Eastern Pipe Line Co.'s transition to

seasonal rates when higher winter peak rates became effective Nov. 1.

President and Chief Executive Officer Philip Burguieres said, ''In addition to improving financial results during 1989, the four natural gas pipelines increased throughput by 12 percent, moving 2.2 trillion cubic feet (Tcf) of natural gas. Deliveries to the pipelines' market areas totaled 1.8 Tcf, or an estimated 10 percent of natural gas consumed in the United States.

''Panhandle Eastern more than doubled its peak-day pipeline capacity in 1989 with the acquisition of Texas Eastern, tremendously enhancing the company's business potential. The combination of Panhandle Eastern's diverse gas supply and Texas Eastern's growing market area has created the nation's premier interstate natural gas transmission system.

''On that foundation, we plan to lead the industry by providing the highest quality service at competitive prices. These goals, we believe, will generate increased profitability and stockholder value over the long term.''

Panhandle Eastern Corp. operates one of the nation's largest interstate natural gas pipeline systems, providing natural gas to the Midwest and Northeast markets.

DARIEN, CT. (JAN.31) BUSINESS WIRE - EXECUTONE Information Systems Inc. (NASDAQ:XTON), announced a restructuring of its organization.

Michael Yacenda has been promoted to executive vice president and chief operating officer of the direct and independent distribution business. In this position Yacenda will be responsible for the company's sales, marketing, manufacturing, operations and customer support. Yacenda has been vice president-finance and chief financial officer of EXECUTONE since July 1988.

Formerly, he served as vice president of ISOETEC from December 1983 to July 1988. Jim Stirling has been named vice president of marketing and will be responsible for marketing programs, distributor sales, sales training and product marketing. For the past 18 months, Stirling has been a regional sales manager for EXECUTONE.

Prior to that, he served as vice president of marketing for the Jarvis

Corp. Additionally, responsibilities for the company's direct sales organizations are being split between vice presidents Nicholas Visser and Frank Rotatori.

Glenn Fitchet has been named vice president and general manager of Vodavi Communications Systems, a division of EXECUTONE. Fitchet has been vice president-marketing and manufacturing of EXECUTONE since July 1988. Prior to that, he served as a vice president of Vodavi Technology Corp.

Alan Kessman, president and chief operating officer, stated, ''This organization change is part of an evolutionary process whereby the company is responding to our business needs and changing market conditions in a constructive and efficient way. This reorganization will allow me to concentrate on pursuing the company's strategic direction, particularly in the areas of new product development, marketing strategy, growth areas and customer service.

EXECUTONE Information Systems Inc. designs, manufactures, sells, installs and services voice and data communications equipment for businesses with under 200 desktops and is the leading supplier of specialized hospital communications equipment. EXECUTONE also provides products and services to the public communications marketplace.

Products are sold under the EXECUTONE, ISOETEC, and INFOSTAR brand names through a nationwide network of direct sales and service offices and independent distributors.

SAN FRANCISCO (JAN. 31) BUSINESS WIRE - Wells Fargo & Co. (NYSE:WFC) announced that it has signed a definitive agreement with Nikko Securities Co. Ltd. of Tokyo to form a joint venture that will operate the first large-scale global investment management firm focused on quantitative investing.

The agreement was signed Monday, Jan. 29 in Tokyo.

As announced last June, Wells Fargo agreed to contribute its subsidiary, Wells Fargo Investment Advisors, and its Wells Fargo Bank Advisors Trust division to the joint venture in exchange for approximately a 50 percent interest in the joint venture and $125 million in cash. Based on receiving $125 million, Wells Fargo expects to realize a pre-tax gain of about $110 million.

The agreement is subject to regulatory approvals and certain other closing conditions. The joint venture is expected to be formed in early 1990.

#90031b0086 01/31/1990 ~Business Wire

DALLAS (JAN. 31) BUSINESS WIRE - Maxus Energy Corp. (NYSE: MXS) reported a loss for the fourth quarter of 1989 of $4 million, or after preferred dividends, a loss of 17 cents per common share, compared with a loss of $14.6 million, or 29 cents per common share, in the fourth quarter of 1988.

Sales for the quarter were $160.7 million compared to $129.4 million in the 1988 fourth quarter. Cash flow from continuing operations increased 64 percent to $37.8 million in the 1989 fourth quarter compared to $23 million in the fourth quarter of 1988.

Fourth quarter 1989 reflects a provision for taxes of $17.4 million vs. the previous year's favorable tax benefit of $48.7 million.

On a pretax basis, fourth quarter 1989 income exceeded the previous year's quarter by $76.7 million. Contributing to this improvement were better

prices, lower interest expense, lower depreciation, depletion and amortization and a net gain of $34.8 million on the sale of 10 percent of the Northwest Java contract area.

Partially offsetting this, exploration costs for the quarter were up $10.6 million due to dry hole costs and geological and geophysical costs reflecting increased exploration activity.

For the year, Maxus reported a loss of $31 million, or after preferred dividends, a loss of 86 cents per common share, compared with a loss of $131.6 million, or $1.99 per common share, in 1988. The 1988 results included a one-time cumulative adjustment of $70 million to reflect a change in the accounting for income taxes as required by Statement of Financial Accounting Standards No. 96.

Sales for 1989 were $603.5 million, compared to $574.9 million in 1988. Cash flow from operations for 1989 was up 10 percent to $161 million compared to $146.8 million in 1988.

Commenting on fourth quarter results, C.L. Blackburn, chairman and chief executive officer said:

''Worldwide crude oil and liquids production was 59,721 barrels per day (bpd), up from the fourth quarter level of 58,147 bpd in 1988. These production volumes increased as a result of bringing on the Intan A platform in June of 1989. The production increase was partially offset by the loss of production from the sale of 10 percent of the Northwest Java contract area in Indonesia and the sale of our Canadian subsidiary.

''Total Indonesian crude oil entitlements increased to 47,865 bpd compared to 40,462 bpd in the fourth quarter of 1988. U.S. crude oil production decreased to 10,273 bpd compared to 11,721 bpd in the 1988 fourth quarter, due primarily to asset sales.

''The average worldwide price received for crude oil was $17.52 per barrel compared to $12.25 per barrel in the fourth quarter of 1988.

''U.S. natural gas prices also increased in the fourth quarter to $1.77 per thousand cubic feet (mcf) compared to $1.73 per mcf a year ago. U.S. gas production for the fourth quarter was 263 million cubic feet per day (mmcfpd) compared to 261 mmcfpd a year ago.''

Dallas-based Maxus Energy is one of the largest independent oil and gas exploration and production companies in North America.

WASHINGTON (JAN. 31) BUSINESS WIRE - Waxie Maxie Quality Music Co. announced Wednesday that, at its special meeting of shareholders held this morning, over 94 percent of the Waxie Maxie shareholders voted for the acquisition of the company by LIVE Entertainment Inc. (NASDAQ:LIVE).

As a result of the acquisition, Waxie Maxie will become a subsidiary of LIVE and its shareholders will receive approximately $20.90 per share of Waxie Maxie common stock.

The closing of the acquisition is anticipated to occur in February 1990.

Waxie Maxie operates 33 company-owned stores in Maryland and Virginia that sell compact discs, records, tapes, videotapes and related accessories and also rent prerecorded videotapes. Sales for the fiscal year ended July 31 1989, were $23.9 million. Waxie Maxie was represented in this transaction by Ladenburg, Thalmann & Co., a New York-based investment bank.

LIVE, with headquarters in Los Angeles, is a diversified distributor and retailer of a broad variety of entertainment software products. Through its Strawberries Records, Tapes & CDs division, LIVE operates 87 retail stores throughout the Northeastern United States. Formed in 1976, Strawberries has grown to be the largest audio software specialty retailer in New England.

Strawberries and Waxie Maxie together will form LIVE's Specialty Retail Division.

LIVE also includes International Video Entertainment (IVE), the nation's leading marketer and distributor of home video programming, and Lieberman Enterprises, a Minneapolis-based rackjobber of records, CDs, video and audio tapes and personal computer software.

#90031b0093 01/31/1990 ~Business Wire

BEAUMONT, TX (JAN. 31) BUSINESS WIRE - Gulf States Utilities Co. said Wednesday (Jan. 31) that, as the result of a six-month organizational study, 72 management employees are being laid off and 50 more unfilled management positions are being eliminated.

In announcing the latest in a series of actions taken to cut costs and streamline operations in recent years, GSU also said it is:

-- Starting discussions with union representatives about 45 bargaining unit positions that are to be eliminated.

-- Reducing by 145 the number of contract workers used for maintenance, janitorial and other support activities, including non-safety-related jobs at the River Bend plant site.

-- Eliminating a layer of management in many departments and merging, shifting or abolishing work units as needed to improve efficiency.

The company said it would save $12.9 million in annual labor costs as a result of the personnel actions.

Taking into account all GSU and contractor positions that are being eliminated, whether filled or vacant, the company's authorized work force will be reduced by 312. With 167 fewer GSU positions, the company's regular work force will total 4,940. In 1986, the company reduced its work force significantly when more than 300 employees took early retirement.

As part of the organizational study that began last August, supervisory employees filled out questionnaires about their work that were analyzed and used by company officers to examine their respective departments from top to bottom. Levels of management, spans of supervisory control and types of work performed in each area and position were reviewed in detail.

Most of the 72 management employees leaving the company held supervisory and professional positions. Company officials said great care was taken in the organizational study to make certain the River Bend nuclear plant's outstanding safety record would be protected.

All of the departing management employees are being given a two-month paid administrative leave plus severance pay dependent on how long they worked for the company. They will be paid for unused vacation time and provided medical coverage for six months at the same rate they had been paying. Laid-off management employees who are 50 years old or over and have worked for GSU at least 10 years may elect to also take early retirement. In addition, the company will provide an array of outplacement services designed to help them find jobs as quickly as possible.

The 50 vacant management positions being eliminated resulted from carefully managed attrition.

#90031b0109 01/31/1990 ~Business Wire

ST. LOUIS (JAN. 31) BUSINESS WIRE - UtiliCorp United (NYSE:UCU) Wednesday announced to shareholders and members of the St. Louis financial community that it has achieved records in consolidcated net income, operating income primary earnings per common share and operating revenues.

''In 1989, we continued to position ourselves for long-term growth while also posting improved financial results,'' said UtiliCorp Chairman and President Richard C. Green Jr. ''It was a very significant year in many respects.''

In 1989, net income increased 18 percent to $48.3 million, compared to $40.9 million a year earlier. Operating income was $86.9 million, up 13 percent from 1988 operating income of $77.2 million.

Primary earnings per common share were $2.04 versus $1.98 in 1988, and operating revenues were $732 million, up 9 percent from $673 million in the prior year. All 1989 results are preliminary and subject to audit.

Average common shares outstanding increased from 19.4 million in 1988 to 20.9 million in 1989. Dividends on convertible preference stock issued in May 1989 also reduced earnings per common share for the year.

For the fourth quarter ended Dec. 31, 1989, the company recorded net income of $13.9 million and revenues of $237 million, compared to net income of $10.7 million and revenues of $187 million in the 1988 quarter.

Primary Earnings per common share were $.56, versus $.49 in the prior year's period.

Year-to-year gains are attributed to strong gas sales and transportation to industrial customers, rate relief, increasing contributions from non-regulated businesses and cost effective management of divisional operations. Financial results exceeded earlier estimates primarily because of the impact of extremely cold weather in December.

UtiliCorp's Peoples Natural Gas, Northern Minnesota Utilities and Michigan Gas Utilities divisions benefitted from continued demand from key industrial customers. Rate increases at the company's Missouri Public Service division and West Kootenay Power subsidiary boosted 1989 results.

PSI and UtilCo Group, two of UtiliCorp's non-regulated busineses, substantially increased contributions to consolidated net income. Combined the two subsidiaries contributed approximately 14 percent of 1989 consolidated net income.

PSI has greatly expanded its natural gas marketing, gathering and transportation activities over the past three years. In 1989, PSI contributed net income of $5.3 million, approximately doubling its 1988 contribution. Earlier this month, PSI and a partner company sold five jointly owned oil and gas properties and related production facilities.

PSI received approximately $31.4 million from the sale which has been reinvested in other reserves. The sale is expected to contribute approximately $5 million to first quarter net income.

UtilCo Group, a subsidiary specializing in the development, ownership and operation of independent power projects, had 1989 net income of $1.3 million, compared to about breakeven results in 1988.

UtilCo Group is engaged in a long-term strategy of developing, owning and operating electric generation facilities throughout the country. It presently has interests in 12 projects, five of which are in their two-year startup phase or are in the final stages of construction.

Green noted that UtiliCorp will continue this year to pursue mergers and acquisitions of gas and electric utilities throughout the U.S. and Canada.

The company completed the acquisition of a Michigan natural gas utility in May 1989 and a West Virginia gas utility earlier this month. The

acquisitions added another state to UtiliCorp's service territory and an additional 143,000 customers.

''We don't intend to veer away from the growth strategy that has brought us this far,'' Green said. ''We will continue to look for utility properties that further balance our operations in terms of geography, product and climate.''

UtiliCorp spent approximately $100 million in 1989 on various construction projects, including the life extension of a 490 megawatt power facility serving Missouri Public Service. Capital spending is expected to increase to $124 million this year and total $700 million over the next five years.

Based in Kansas City, UtiliCorp provides electric and gas service in eight states through its divisions, Missouri Public Service, Peoples Natural Gas Michigan Gas Utilities, Northern Minnesota Utilities, Kansas Public Service and West Virginia Power.

West Kootenay Power in British Columbia is a Canadian subsidiary. PSI and UtilCo Group are non-regulated subsidiaries specializing in utility and energy related enterprises.

#90031b0125 01/31/1990 ~Business Wire

HOUSTON (JAN. 31) BUSINESS WIRE - Santa Fe Energy Partners L.P. reported a fourth quarter net loss of $6.5 million, or 14 cents per unit, compared with a loss of $21.4 million, or 58 cents in the fourth quarter of 1988.

For the full year 1989, the partnership had a loss of $4.5 million, or 11 cents per unit, compared with a loss of $29.9 million, or 85 cents per unit in 1988. Special charges of $.9 million for the planned February 1990 relocation to Houston of the Tulsa, Okla. district office and $.7 million for voluntary employee separation costs were recorded in the fourth quarter of 1989.

The 1988 results included special charges of $14.5 million for expected losses on sales of marginal properties and $1.9 million for the relocation of the Amarillo, Texas administrative offices to Houston.

Oil prices during the fourth quarter averaged $16.94 per barrel, compared with $12.01 in the fourth quarter of 1988. Gas prices improved steadily during the quarter but averaged only $1.72 per thousand cubic feet, compared with $1.77 in the fourth quarter of 1988.

Oil and gas production were lower than in the 1988 fourth quarter, averaging 12,600 barrels of oil and 72.8 million cubic feet of gas per day compared with 12,700 barrels of oil and 88.3 million cubic feet of gas per day in the 1988 period. Several offshore platforms were placed on production late in the fourth quarter and should increase future gas production.

Fourth quarter revenues were $29.5 million, up from $28.5 million in the same period for 1988. Operating expenses decreased 28 percent to $36.1 million, down from the $50.1 million reported a year earlier. The higher operating expenses in 1988 were largely the result of the special charges discussed above.

Cash provided by operating activities was $13.9 million for the quarter and $59.1 million for the year, compared with $20.8 million and $64.9 million in the respective periods of 1988. The partnership received an additional $28 million in the fourth quarter of 1989 under a 1988 agreement with an institutional investor involving the sale of a net profits interest in certain properties. The partnership received $12 million under this agreement in 1988.

A cash distribution of 72 cents per unit was paid to unitholders on Nov. 15, 1989 and another 72 cents per unit quarterly distribution will be paid on Feb. 15, 1990 to unitholders of record on Dec. 29, 1989. The partnership announced its intention to pay a cash distribution of 20 cents per unit per quarter during 1990, based on the outlook for this year.

Santa Fe Energy Partners L.P. is an affiliate of Santa Fe Energy Resources Inc., the Houston-based oil and gas operating company of Santa Fe Pacific Corp. The partnership units are traded on the New York Stock Exchange using the symbol SFP.

Torrance, CA (JAN. 31) BUSINESS WIRE - Sunrise Medical Inc. (OTC:SNMD) reported record sales, net income and earnings per share for the second quarter of fiscal 1990.

Sales increased 12 percent to $40,904,000, net income jumped 63 percent to $880,000, while earnings per share gained 58 percent to 19 cents from 12 cents a year ago.

For the first half, net income rose 50 percent to $1,740,000, while earnings per share increased to 38 cents from 26 cents, a gain of 46

percent.

Revenues grew at 11 percent to $80,149,000. The company closed out calendar 1989 at $160 million in sales, $4.2 million in net income, and 93 cents in primary earnings per share (89 cents fully diluted), having achieved record sales and profits for each of the four quarters versus the prior year.

The company also announced the sale on January 26, 1990 of the operating assets of Performance USA, the last of four physical therapy and fitness companies to be sold as part of a divestiture program announced in August, 1988.

The aggregate net proceeds to be realized from sale of the four businesses are in line with expectations and consistent with the accounting reserves already established.

Sunrise also announced new product introductions that mark its entry into two important markets:

-- The Guardian Caremate Disposable Waste System, a self-sealing bag and powder packet designed to be used on a daily basis with bedside commodes.

-- The Quickie P-300 power wheelchair, with special features such as a programmable microprocessor controller designed specifically for the high level quadriplegic. The product offers superior power and range to the competition by utilizing a direct drive transmission system.

Sunrise Medical designs, manufactures and markets internationally, medical products used in the rehabilitation, homecare, extended care and hospital settings, with special focus on the disabled and geriatric patients. Products include prescription manual and power wheelchairs, crutches and patient aids, healthcare beds and furnishings, and specialty mattresses used for the prevention and management of pressure sores.

CITY OF INDUSTRY, CA (JAN. 31) BUSINESS WIRE - Despite difficult crops characterized by small-sized oranges and damage by frost, wind, and hail, Sunkist Growers Inc. set new records during its 1989 marketing season, Sunkist President Russell L. Hanlin reported to growers at the cooperative's annual meeting in City of Industry.

Total revenues of $931 million exceeded last year's revenues by $44

million. Payments to members also reached an all-time high - at $679 million, a six percent improvement over 1988 results.

Sunkist marketed 75 million cartons of fresh citrus compared with 73 million cartons in 1988, and processed 525,000 tons into a variety of juice and peel products compared with handling 539,000 tons the previous year.

Fresh fruit sales accounted for $716 million, products sales amounted to $183 million, and $32 million accrued from other business activities. Slightly more than one-third of the revenues resulted from overseas sales.

Hanlin attributed much of the excellent overall results to the repositioning of Sunkist's products group, explaining that when Sunkist moved six million cartons of fruit per year out of processing and into the more lucrative fresh fruit markets, it left the products group greatly undersupplied and in a difficult competitive position.

"However," said Hanlin, "by reorganizing, cutting costs, reducing juice inventories to a 60-day reserve and implementing a rapid-pay pooling plan, in 1989 Sunkist generated some of the best products earnings in the industry."

Hanlin noted the success recorded by Sunkist Real Estate Inc., a subsidiary formed in 1988 to stem the flow of membership due only to financing. The company has, to date, approved loans bringing more than 5,500 new acres into Sunkist, including a new packinghouse, and retaining 2,000 acres which likely would have been sold outside the system.

"The bottom line," he said, "is that marketing results, not competitive financing, now determine the shape of the industry." During 1988, Hanlin said, Sunkist also expanded its marketing advantage, with a program to reduce operating costs without compromising fundamental marketing capabilities.

By trimming programs, combining or eliminating jobs, and consolidating offices, Sunkist reduced its 1989 combined administration, marketing and advertising assessments 19 percent, from 63 to 51 cents per carton.

"Sunkist's competitive performance in the first half of 1989 convinced both Sun Pacific and Arlington Heights (the totality of the volume in Pure Gold) to join the Sunkist system, annually bringing in eight million cartons of new fresh fruit volume," Hanlin said.

#90031b0145 01/31/1990 ~Business Wire

TULSA, OK (JAN. 31) BUSINESS WIRE - Memorex Telex, the largest systems supplier to the airline industry worldwide, has landed a contract which will be worth many millions of dollars from Galileo, Europe's leading computerized reservations and travel information consortium.

Memorex Telex, which operates in 27 countries, will have the opportunity to provide personal computers and software products to thousands of travel agents worldwide as part of a deal which will give travel agents access to the new Galileo system, based in Swindon, U.K.

Memorex Telex also has established a staging center in Europe to test and distribute equipment selected by Galileo distributors for travel agents. It will also undertake software installation and user training, as well as providing worldwide servicing and maintenance.

For Memorex Telex, it is the company's second recent big win in the airline market. In December it was appointed by Societe Internationale de Telecommunications Aeronautique to develop a software package that will automate many airport operations. Known as CUTE 2, the software system will reduce passenger delays and enhance airline security.

Commenting on the Galileo award, Giorgio Ronchi, president and chief executive officer of Memorex Telex, said: ''The contract was won because of our ability to provide comprehensive support, software design, competitive products and technical systems support. We are justly proud to have been selected for such a prestigious project.'' He added that: ''Galileo represents a giant leap in travel technology and will undoubtedly enable travel agents and airlines to improve their services to customers.''

Memorex Telex, one of the world's largest suppliers of computer equipment and accessories, has revenues of over 2.2 billion dollars. The company operates in 27 countries around the world, with distributor links in another 50 markets.

Among the company's products are disk and tape storage devices, communications equipment such as terminals, controllers, printers, intelligent workstations and systems, local area networking products and services, airline reservations systems, and a comprehensive range of computer supplies and products.

KANSAS CITY, MO. (JAN. 31) BUSINESS WIRE - Harmon Industries Inc., of Blue Springs, Mo., the nation's most fully integrated supplier to railroad companies, reported higher sales and lower earnings for the year ending Dec. 31, 1989.

Results for the fourth quarter were mixed when compared to 1988.

For the year, sales increased from $64.6 million in 1988 to $73.3 million in 1989. Net earnings decreased from $2.5 million, or 55 cents per share, in 1988, to $1.2 million, or 25 cents per share, in 1989.

For the fourth quarter, sales were up from $15.6 million in the fourth quarter of 1988 to $18.4 million for the quarter ending Dec. 31, 1989. Earnings for the fourth quarter were down slightly from $332,000, or 7 cents per share, in 1988, to $319,000, or 7 cents per share, in 1989.

''The results for the fourth quarter were significantly better than the third quarter,'' said Robert E. Harmon, chairman and president of Harmon Industries.

He further commented: ''The fourth quarter results benefitted from the receipt of a litigation settlement as more fully described in the footnotes to the earnings statement. Also included are change orders which reversed some of the loss on long-term contracts that was recognized in the third quarter.''

The company reports that Cedrite Technologies Inc. is now producing reconstituted railroad ties around-the-clock. Production continues to increase and the installation of the second press currently is on schedule with an anticipated start-up date late in the first quarter of 1990.

Harmon further reported: ''We know there is a long-term need for the recycling of crossties through the Cedrite process. Our challange is to continue to make production as efficient as possible.''

Phoenix Data Inc., which manufactures scientific high-speed data acquisition and test measurement systems, continues to suffer because of a lack of sales which are dependent on the military and aerospace industries. Cut-backs in federal spending are causing projects to be delayed.

Harmon Industries Inc. is traded in the over-the-counter market and is quoted on the NASDAQ National Market System under the symbol HRMN.

For further information, please contact Vincent D. Burget, Vice President-Corporate Affairs, Harmon Industries Inc., P.O. Box 1570, Blue Springs, MO 64015. The telephone number is 816/229-3345.

#90031b0167 01/31/1990 ~Business Wire

CLEVELAND, OH (JAN. 31) BUSINESS WIRE - Leaseway Transportation Corp. today reported that it has successfully negotiated an extension of its current $257 million senior debt facility. The revolving credit portion of the senior debt facility, which had been scheduled to expire December 31, 1989, had previously been extended on a short-term basis by the company's bank group. The new extension, granted January 25, will expire June 29, 1990. Under the extension, the company agreed to make monthly payments of principal and interest on both the revolving credit and term loan portions of the facility.

''This extension is a positive event for Leaseway,'' said Richard A. Damsel, chairman and chief executive officer of the transportation and distribution company. ''It provides us with additional flexibility as we seek a new, long-term senior credit facility.''

''Even though the extension is not, by itself, a solution to the issue of replacing the senior debt facility, we are very pleased with this development,'' Damsel said. ''Coupled with the replacement of the company's prior liability insurance program on January 1, 1990, by a new program with Old Republic Insurance Company, the bank extension is the second significant achievement in recent weeks in our ongoing efforts to resolve several issues that faced the company at the end of 1989,'' he added.

Regarding the company's efforts to restructure $192.5 million of 13.25 percent Subordinated Debentures due August 1, 2002, Damsel said that Leaseway is continuing to seek a deferral of the debenture interest payment originally due on February 1, 1990. Progress was made with the steering committee for the debenture holders, but because of recent changes in debenture ownership, agreement to defer the interest payment could not be obtained by the company.

''Although discussions continue, the company will not make the February 1 interest payment to the debenture holders,'' Damsel said.

''Payment at this time would deplete needed cash resources and would not be consistent with the terms of the agreement that was reached by the company and its senior bank group,'' he added.

Under the terms of the debentures, Leaseway has until March 2, 1990, to cure the non-payment of the February 1 interest charge. The company hopes

to reach a longer term solution with the debenture holders before that time.

''The new insurance coverage, the senior debt extension, and the non-payment of debenture interest will provide additional time for Leaseway to continue its efforts to effect a comprehensive capital restructuring,'' Damsel said. ''Additionally, these actions will provide the company with the necessary cash resources to assure our customers, vendors, and employees that Leaseway will continue to be a leading provider of physical distribution services,'' Damsel concluded.

Leaseway Transportation is a group of companies providing high-quality, cost-effective transportation and physical distribution services to manufacturers, distributors, and retailers.

OAKLAND, CA (JAN. 31) BUSINESS WIRE - Civic BanCorp, (NASDAQ:CIVC) the holding company for Civic Bank of Commerce, announced it has raised $7,250,000 in additional capital through a public offering of 537,000 shares of common stock.

The sale price per share of the common stock was $13.50. The offering brings the total number of outstanding shares to 2,272,223.

Net proceeds after anticipated expenses and underwriter's discount will be approximately $6.7 million. The net proceeds will be applied to restoring the $7 million in cash that was used by the bank to purchase Meridian National Bank from First Interstate Bank of California on Jan. 1.

The offering was underwritten by Keefe, Bruyette, & Woods Inc. in San Francisco.

Civic BanCorp is the largest bank holding company in Oakland and CivicBank of Commerce one of the largest independent banks in the East Bay with assets over $330 million.

At Sept. 30, 1989, Civic BanCorp reported consolidated assets of $233.8 million, deposits of $208.4 million and shareholders' equity of $19.1 million.

At Sept. 30, 1989, Meridian National Bank had assets of $105.3 million, deposits of $99.0 million and shareholders' equity of $5.5 million.

NEW YORK (JAN. 31) BUSINESS WIRE - Michael E. Marcovsky, the Los Angeles entertainment and media entrepreneur and chairman of Gold 'N M Communications, Wednesday was named chairman of the board of The Nostalgia Network as part of a board realignment of the five-year-old cable television channel.

The realignment, which saw the board expanded from a five-seat board occupied by four directors to a seven-seat board Wednesday, came after the Jan. 30 announcement that Gold 'N M Television Inc. had purchased 3,416,330 shares of outstanding common stock, in addition to preferred stock and warrants from shareholders in the company.

Named to fill the new vacancies were Charles V. Bush, president of Marnel Investment Corp., a Los Angeles-based investment banking firm, and Nyhl L. Henson, president of NAC Productions, a Gold 'N M Communications television and film production company.

Gold 'N M Television made the stock purchases from Sam Oolie, who resigned his chairmanship of The Nostalgia Network Wednesday, and Morton Salkind, also a board member. Both Oolie and Salkind will remain seated on the board. Other remaining board members are John Janas, president of The

Nostalgia Network, and David Wargo.

Marcovsky stated that he ''stands ready to provide the capability in the form of working capital and other resources of financing to continue the growth and build the viability of the network for cable operators, advertisers, viewers and, of course, shareholders.''

Marcovsky said that he would be ''taking the next few weeks'' to evaluate the channel and, working with existing management, ''formalize a plan'' for Nostalgia's future.

The Nostalgia Network Inc. operates The Nostalgia Channel, a 24-hour, basic-cable television service reaching more than 7 million subscribers in 43 states that targets the fast-growing age-45+ demographic group by offering a variety of entertainment, lifestyle and informational programming.

#90031b0202 01/31/1990 ~Business Wire

ST. LOUIS (JAN. 31) BUSINESS WIRE - During February and March, MCI residential customers in Southwestern Bell Telephone's (SWBT) service area in Arkansas, Kansas, Missouri, Oklahoma and Texas will start getting--and paying--one monthly phone bill instead of two.

That's because their MCI long-distance charges will be included with their SWBT bill for local service.

Currently, MCI customers receive separate telephone bills each month--one for long-distance and one for local service.

The new arrangement results from an agreement between the two companies that allows SWBT to provide billing and collection for MCI's residential customers throughout SWBT's five-state region.

''We're pleased that MCI customers will now be able to have their long distance and local charges reflected on only one bill,'' said Dan Crawford president-MCI Southwest. ''We're proud to be partners with Southwestern Bell for this important step forward.''

Claude West, vice president-sales operations for Southwestern Bell Telephone, said the new billing arrangement gives MCI customers a more convenient way to pay for their local and long-distance service. ''It also provides a brand-new revenue stream for Southwestern Bell and represents our commitment to new business opportunities.''

Southwestern Bell Telephone is a wholly owned subsidiary of Southwestern Bell Corporation and provides network exchange service for nearly 9 million customers in Missouri, Arkansas, Kansas, Oklahoma and Texas.

MCI is the second largest long-distance provider, supplying a full range of voice and data telecommunications services to businesses, residences and government agencies.

DALLAS (JAN. 31) BUSINESS WIRE - Southwest Airlines, the airline with headquarters at Dallas Love Field, has announced a program designed to give its customers one free companion ticket for each roundtrip flown having a cost of $78 or more (minimum $39 fare each way).

Dubbed the Valentine Partner Pass, the program is available to Southwest's Company Club members and allows them to accumulate up to four passes. Southwest officials said that while reservations for the free travel are required, seats for the program are not limited nor are there stay-over requirements.

In making the announcement, Donald G. Valentine, vice president-sales and marketing for Southwest, said, ''All our customers have to do is be a Company Club member, fly between Feb. 1 and March 15, 1990 and they will receive one free roundtrip companion ticket for every roundtrip that they pay for having a fare of $78 or more (minimum $39 fare each way).''

''The free companion ticket can be used by the companion of choice to accompany the Company Club member when the member flies at full fare from April 16 through May 23, 1990, or Sept. 5 through Oct. 31, 1990.''

Valentine added that every time the Company Club member travels during the applicable times and he has his card validated, the company will automatically credit the flight to his account and mail the Valentine Partner Passes to the Club member during the second week of April.

''In addition,'' Valentine said, ''current Company Club awards will continue in effect and will be in addition to the Valentine Partner Pass program.''

#90031b0225 01/31/1990 ~Business Wire
CHICAGO (JAN. 31) BUSINESS WIRE - James R. Boris has been named chairman, president and chief executive officer of Kemper Securities Holdings Inc. (KSH), the newly formed holding company for Kemper Financial Companies Inc.'s securities businesses.

The announcement was made by Thomas R. Anderson, chairman and chief executive officer of Kemper Financial Companies Inc.

In his new position, Boris will direct the activities of the Kemper Securities Holdings Inc.: Bateman Eichler, Hill Richards Inc., based in Los Angeles; Blunt Ellis & Loewi Inc., based in Milwaukee; Boettcher & Company Inc., with headquarters in Denver; Lovett Underwood Neuhaus & Webb Inc., with headquarters in Houston; Prescott, Ball & Turben Inc., based in Cleveland; Kemper Clearing Corp., with headquarters in New York, and Kemper Capital Markets, based in Chicago.

According to Anderson, Boris will continue as chairman and chief executive officer of INVEST, a post he was named to in May of 1989.

Anderson also said that John (Jack) R. Bolin, who has served the last two

years as president and chief executive officer of Kemper's Broker-Dealers Division, has decided for personal reasons to return to Southern California, where he will play a role in the continuing growth of Bateman Eichler, Kemper's West Coast firm that he previously headed prior to coming to Chicago.

''Jack will become a managing director of Bateman, assisting Richard J. Capalbo, president and chief executive officer of Bateman, in the growth of the firm in the San Diego area,'' said Anderson. ''I want to thank Jack for his leadership during the past several years and express my sincere appreciation for his direction and guidance in the formulation of Kemper's network of regional firms.

''Jim is one of the securities industry's most accomplished executives and has demonstrated strong leadership ability throughout his career,'' said Anderson. ''It is clear that he is the right individual to lead Kemper Securities Holdings Inc. into the 1990s.

''Our regional brokerage firms have a home court advantage in that they are well established and dominant companies in their geographic areas. One of our major goals in the 1990s is to preserve and enhance the regional identities of our brokerage firms and continue to pursue new opportunities in trading as well as merchant and investment banking.

''By so doing, we can capitalize on the specific strengths inherent to each firm, and at the same time benefit from their combined distribution capabilities and significantly improve the profit contribution to Kemper '' Anderson said.

Currently, KSH's brokerage firms employ more than 1,900 registered representatives, making them collectively the 11th-largest force in the United States.

Prior to joining Kemper Financial Companies, Boris was an investment banker and consultant retained by several companies, primarily in the financial services industry.

Before that, Boris was an executive vice president and a director of PaineWebber Inc., where he was responsible for the Domestic Branch Group. Previously, he was an executive vice president and board member of Shearson Lehman Brothers Inc., serving as director of the Financial Services Division with responsibility for origination, marketing and administration of packaged investment products and services.

In the past, Boris has also served as a director of PaineWebber Properties Inc., IDS Life Insurance Company of New York Inc., and the Finalco Group Inc., as well as various civic organizations.

Kemper Financial Companies is the holding company for the financial services units of the Kemper Corp. Included in those units are Kemper Financial Services Inc., a major investment management and financial products company; Kemper Investors Life Insurance Co. (KILICO); and Kemper Securities Holdings Inc.

JACKSONVILLE, FL (JAN. 31) BUSINESS WIRE - Insituform Southeast Corp. (NASDAQ:ISEC) announced record revenues of $14.31 million for the nine months ended Dec. 31, 1989, as compared to revenues of $11.46 million for the same period last year, an increase of 25 percent.

Net income for the nine month period ended Dec. 31, 1989, was a record $955,000, 24 cents per share, as compared to $946,000, 24 cents per share, for the same period last year, an increase of 1 percent. For the quarter ended Dec. 31, 1989, revenues were $4.80 million and net income was $328,000, 8 cents per share, as compared to revenues of $4.41 million and net income of $363,000, 9 cents per share, for the same period last year, an increase of 9 percent and a decrease of 10 percent respectively.

Insituform Southeast president James J. Baird Jr., said, ''The company continues to perform well. The third quarter results compare favorably with the results of last year's third quarter which set a record for revenue up to that time. We were particularly pleased since most of the third quarter revenue was achieved from sales of small diameter Insitupipe which is less costly per foot, therefore requiring greater effort to produce higher revenues. We were able to install over 70,000 linear feet of Institupipe during the third quarter, an increase of 68.1 percent compared to the same quarter last year. Insituform projects were located in all parts of our territory, further reflecting increased penetration of our market area. With the strong performance during the first three quarters, along with our project backlog of approximately $10.5 million, we believe that the company is on schedule to produce a fiscal 1990 as planned.''

Insituform Southeast is engaged primarily in the business of protecting the environment by solving water and wastewater sytem problems for industry and government. The company is the leading supplier of non-disruptive pipeline reconstruction in Alabama, Florida, Georgia, North Carolina and South Carolina and is the exclusive licensee of the Insituform Process in those states. In addition, the company owns 42.5 percent of Insituform Midsouth, a general partnership which is the

exclusive licensee of the Insituform Process in Tennessee, most of Kentucky and northern Mississippi.

VANCOUVER, BRITISH COLUMBIA (JAN. 30) BUSINESS WIRE - Mutual Resources Ltd. (VcSE:MTR.) reports that Teck Corp. has recommenced drilling on the company's Dixie Lake property, located 15 miles south of Red Lake, Ontario.

In the current program, Teck will test the continuity of the 88-4 Zone with approximately 5,000 feet of drilling. Teck is planning to drill an additional 3,000 feet to test geophysical conductors elsewhere on the 141-claim property. Hole DL-28, which is in progress, will intersect the gold-bearing 88-4 Zone at a depth of approximately 700 feet beneath hole DL-9, which encountered 0.45 ounces of gold per ton across 9.3 feet.

To date, Teck has completed 27 holes on the Dixie Lake property and outlined a geological reserve of 420,000 tons grading 0.13 ounces of gold per ton.

Teck can earn a 60 percent property interest, subject to a 3 percent net smelter returns royalty, by spending $2 million in exploring the property by August 1993, and making all underlying cash payments to the property vendors.

SAN FRANCISCO (JAN. 31) BUSINESS WIRE - The Federal Home Loan Bank of San Francisco on Wednesday announced that the monthly weighted average cost of funds index for Eleventh District savings institutions for December 1989 is 8.476 percent.

The index for November 1989 was 8.595 percent.

Changes in interest rates on adjustable-rate mortgage loans offered by many savings institutions and commercial banks are tied to changes in the index.

The cost of funds index reflects the interest rates paid by savings institutions in Arizona, California and Nevada on their various sources of

mortgage money.

The monthly index is announced on or near the last working day of the month. The bank cannot guarantee the announcement of the monthly index on an exact date.

LOS ANGELES (JAN. 31) BUSINESS WIRE - Air Canada on Thursday, Feb. 1, becomes the first airline in the world to serve business class passengers a meal when they not the airline want it.

The airline's executive and first-class customers will be able to dine at their leisure when they order a special ''flex-meal,'' consisting of a multi-course lobster platter.

The special flexible meal is available on all flights of four hours or more and can be served any time after takeoff up to 30 minutes before landing.

''Our customer research has shown that passengers strongly prefer having more control over their environment, particularly in the area of meal service,'' said James R. Gould, Air Canada's general manager, Western U.S.A. ''The new flexible meal is part of our drive to provide exceptional customer service. It allows passengers more freedom to work, relax or sleep when they prefer.''

Air Canada will continue to offer its regular meals in addition to the new flexible meal service.

The airline is also introducing improved wine selections, a wider variety of reading materials, new electronic audio headsets and linen-covered pillows in executive and first class.

In economy class, which Air Canada refers to as hospitality class, the airline is introducing hot towel service and, for the health conscious, a wider variety of juices and mineral water. Full bar and beverage service remains free of charge.

Air Canada offers nonstop service to Toronto and Calgary from both Los Angeles and San Francisco.

SAN FRANCISCO, CA (JAN. 31) BUSINESS WIRE - Matson Navigation Co. has awarded a $129 million contract to National Steel and Shipbuilding Co. to build a 713-foot containership for Pacific Coast-Hawaii service.

It is the first contract for a large ocean-going commercial ship to be awarded to any United States shipyard since 1984.

The diesel-powered vessel with capacity for 1,650 containers (24-foot equivalent units) is scheduled to be delivered to Matson by the San Diego shipyard in June 1992.

C. Bradley Mulholland, Matson executive vice president and chief operating officer, said: ''This new vessel continues Matson's dedication to providing the most efficient and reliable transportation service to Hawaii. Addition of the ship will increase Matson's fleet to nine in the Pacific Coast-Hawaii trade and will provide adequate capacity to meet the needs of the trade until the late '90s.''

Richard Vortman, NASSCO president, said: ''We are extremely pleased and proud to have won this contract in today's competitive environment. This new containership not only represents significant new work for NASSCO, but being the first commercial ship contract awarded in the U.S. in five years, it also reaffirms NASSCO's past position of being the preeminent commercial shipbuilder in this country.''

Engineering and design work will begin immediately and construction will start in January 1991. The vessel, 42,600 displacement tons, will have a 105-foot beam and 34 1/2-foot draft when fully loaded, with a service speed of 22 1/2 knots.

The construction of this new ship at its peak will employ approximately 700 NASCCO workers and increase NASCCO's total employment to approximately 4,000. This contract will bring the workload to approximately 50 percent of NASSCO's capacity. NASSCO's backlog is in excess of $650 million and also includes the Navy Fast Combat Support Ship program, the Exxon Valdez repair job and ongoing ship repair work for the U.S. Navy and commercial customers.

STOUGHTON, MA (JAN. 31) BUSINESS WIRE - Reebok International Ltd., the U.S. division, and Chiat/Day/Mojo New York, have agreed Wednesday to terminate their three-year relationship, May 1, 1990.

''Chiat/Day/Mojo's work on the Reebok account over the past three years has been critical to helping us achieve and maintain our leadership position in the category,'' commented Frank J. O'Connell, president of Reebok International Ltd., U.S. division.

''However, with our restructure into performance and lifestyle units, it is an opportune time to conduct a review of the business.'' Reebok has identified the agencies that will be invited to particpate in the business review.

''Under these circumstances, we feel it is in the best interest of the agency not to participate in the review. Our dedication and loyalty speaks for itself,'' added Jane Newman, president of Chiat/Day/Mojo New York.

The account was assigned to Chiat/Day/Mojo in 1987 when it maintained billings of $8 million. Current expenditures for Reebok are $40 million in U.S. advertising with C/D/M and an additional $30 million in related promotional expenses.

The agency is currently shooting 1990 advertising for Reebok and will continue to work for 90 days. No lay-offs are expected to occur at Chiat/Day/Mojo as a result of the announcement.

Reebok International Ltd. and its subsidiaries design and market high-quality athletic and casual footwear and apparel worldwide.

WEST HOLLYWOOD, CA (JAN. 31) BUSINESS WIRE - BKLA Bancorp, holding company for Bank of Los Angeles, Wednesday announced the best financial performance in its history, with net income for the year ended Dec. 31, 1989, rising 190.8 percent to $1,195,000, compared with $411,000 for 1988.

Earnings per share were $1.06 primary and $1.02 fully diluted, compared with 36 cents primary and diluted last year.

The healthy profit performance of the West Hollywood, Calif.-based company stemmed largely from a 10.2 percent gain in net interest income to

$9,757,000, from $8,850,000, a year ago.

Also contributing to the company's advance was its ability to hold non-interest expense to a minimal increase over 1988.

Meanwhile, the assets of BKLA Bancorp and Bank of Los Angeles rose to $173,090,000, from $166,308,000, last year.

In view of BKLA's strong 1989 earnings, the company's board of directors on Jan. 30 declared a 10 percent stock dividend for shareholders of record as of Feb. 15, with distribution on or about Feb. 28.

Looking ahead, the company believes it can sustain its earnings growth in the first quarter of 1990 and beyond.

Its subsidiary, Bank of Los Angeles, was founded in 1982. The bank markets business and retail financial products from regional offices in West Hollywood, Beverly Hills and Hollywood.

BKLA Bancorp common stock, symbol BKLA, is traded on the NASDAQ National Market System and on the Western OTC.

COSTA MESA, CA (FEB. 1) BUSINESS WIRE - Archive Corp. (NASDAQ:ACHV), a leading manufacturer of tape drive products, Wednesday announced that its wholly owned subsidiary, CAC Corp., has extended its all-cash tender offer for all outstanding shares of common stock of Cipher Data Products Inc. until 12 midnight New York City time on Wednesday, Feb. 14.

The tender offer was previously scheduled to expire on Wednesday, Jan. 31. All other terms of the offer remain unchanged. The extension will provide time to receive additional tendered shares and to satisfy other conditions of the tender.

Archive also announced that as of 5 p.m. California time on Wednesday, Jan. 31, 11,359,537 shares of Cipher common stock had been tendered pursuant to the tender offer and not withdrawn. When added to the 675,000 shares already owned by CAC Corp., these shares represent approximately 83 percent of the outstanding shares based on outstanding shares reported in Cipher's most recent public filing.

Founded in 1980, Archive today is a leading manufacturer and supplier of computer data products to original equipment manufacturers and resellers.

Archive and Maynard Electronics, an Archive company, offer a complete selection of 1/4-inch cartridge, cassette and 4MM/8MM helical scan tape drives, subsystems and software for DOS and Apple computer systems.

Archive and Maynard provide economical computer data backup for fixed-disk drives and perform additional functions such as program loading, software distribution, data exchange and archival storage.

SAN JOSE, CA (JAN. 31) BUSINESS WIRE - Novellus Systems Inc. (NASDAQ:NVLS) Wednesday reported record revenues and earnings for the fourth quarter and year ended Dec. 31, 1989.

Net sales for the quarter were $14,604,000, an increase of 66 percent over 1988 fourth-quarter sales of $8,805,000. Net income for the quarter was $3,317,000, or 49 cents per share, up from a net income of $1.93 million, or 34 cents per share, for the fourth quarter of 1988.

The 1988 results include a tax-loss carryforward credit of $551,000, or 10 cents per share.

Net sales for the year ended Dec. 31, 1989, were $50.98 million, an increase of 120 percent over 1988 sales of $23,224,000. Net income for the year was $11,248,000, or $1.74 per share, compared with net income in 1988 of $3.64 million, or 71 cents per share. The 1988 results include a tax-loss carryforward credit of $1,095,000, or 21 cents per share.

Novellus President Bob Graham said: ''1989 marked many major milestones for Novellus. We had a secondary stock offering in May raising about $11.5 million. We opened a subsidiary, Nippon Novellus in Japan. We shipped our 100th system in November. We passed $50 million in sales. In addition, 1989 marked the second year in a row we generated cash from operations. Although we remain cautious about 1990 we are optimistic about Novellus opportunities.''

Backlog at Dec. 31, 1989, was $19,833,000, compared with a backlog of $20,457,000 at the end of 1988.

Novellus Systems manufactures, markets and services advanced automated wafer fabrication systems worldwide for semiconductor manufacturing and development.

ANAHEIM, CA (JAN. 31) BUSINESS WIRE - Babcock Display Products Inc. Wednesday announced that it has entered into an agreement with Samsung to jointly develop a large panel dc plasma display for use in several applications: monitors, computers, etc.

Development of the display will take place at Babcock's facility in Anaheim, located a mile from Disneyland.

Under terms of the agreement, Babcock and Samsung will jointly develop both the glass and electronics to create a state-of-the-art high resolution 640 x 480 pixel display. The display unit will feature 16 gray scales, 85 lines per inch and a pixel size of 0.3mm for high resolution viewing.

Babcock President Dan Boyd stated: ''We see this agreement as laying the groundwork for some very exciting developments in the display industry. This information exchange program is the beginning of a long-term relationship that will lead to other similar projects.''

Babcock Display Products, a subsidiary of Babcock Inc., has been a leader in dc plasma technology and offers a variety of vacuum fluorescent displays subsystems as well.

Until recently, Babcock has offered several configurations of ''partial page'' raised cathode and screened image dc plasma displays ranging from one digit up to 12 lines of 40 characters. Babcock will soon be offering a wide range of ''full page'' flat panels in several sizes including the 640 by 480 pixel configuration mentioned above.

Samsung is one of Korea's best known corporations and is a world leader in consumer and industrial electronics, with sales exceeding the $25 billion level.

LEMOUNE, PA (JAN. 31) BUSINESS WIRE - CareerCom Corp. (NYSE:PTA) announced Wednesday that Steven B. King has assumed his new positions as chairman of the board of directors and as a full-time senior executive

officer of the company, effective Feb. 1, 1990.

In conjunction with his election, King has resigned as a partner in the Philadelphia-based law firm of Wolf, Block, Schorr and Solis-Cohen, where he had been the company's principal outside counsel for approximately 10 years.

A graduate of Yale (B.A. 1971) and Harvard (J.D. 1974), King's primary areas of responsibility will be the creation and implementation of a strategic plan to diversify the CareerCom's operations, as well as the supervision of the legal and financial functions of the company.

In accepting the position, King expressed high praise for Robert A. Smith, the company's president and chief executive officer, for whom he stated he had enormous respect. King added, ''The goals which the company has established for itself over the next two years are many, varied and ambitious. I am confident, however, that each will be addressed in a manner which will permit CareerCom to achieve all of its principal objectives.''

Commenting on King's election, Smith stated, ''Mr. King brings to the company an in-depth knowledge of CareerCom's business and affairs, a strategic vision for the future development of the Company's business, and a conservative managerial point of view, all of which will be of great benefit to the company. We have an excellent working relationship, and I look forward to his coming aboard.''

CareerCom Corp. is a leading owner and operator of career training institutes located throughout the United States. The Company currently maintains 74 proprietary, accredited, and post-secondary schools offering programs of study in a variety of career oriented disciplines.

#90031b0626 01/31/1990 ~Business Wire

KENT, WA (JAN. 31) BUSINESS WIRE - FlowMole Corp. (NASDAQ: MOLE), the leader in trenchless technology for underground utility installation, Wednesday reported strong third quarter results and a record performance for the first nine months of fiscal 1990.

Net income was $965,000 or $.14 per share on revenues of $10.1 million for the third quarter ended Dec. 31, 1989, compared to net income of $263,000 or $.04 per share on revenues of $9.5 million in the like quarter of fiscal 1989.

Nine month net income reached a record $2,775,000 or $.41 per share on record revenues of $31.0 million compared to net income of $772,000 or $.11 per share on revenues of $24.8 million in the first nine months of fiscal 1989.

''Domestic operations were exceptionally strong during October and November. However, operations in December were slowed by the severe cold weather that blanketed most of the country. The extremely low temperatures that registered as far south as Texas and Florida adversely impacted December's performance,'' said John R. Potter, president. ''European operations turned in their second consecutive profitable quarter, as well.

''We've seen an increase in activity from December to January though not to the record levels reported last fall. This is consistent with the seasonal nature of our business. We expect to have a good fourth quarter, but not set records,'' Potter added.

FlowMole Corp. installs and replaces underground utility cable and pipe with minimal surface disruption using proprietary high-pressure fluidjet cutting and electromagnetic guidance techniques to accurately bore small diameter tunnels up to 400 feet in length.

Currently there are 63 FlowMole units operating worldwide, 37 of which are operated by the company in North America. FlowMole uses its proprietary GuideDril system to provide services to utilities in the United States and Canada through 15 regional sales and service centers. It also conducts operations in Europe through its wholly owned subsidiary in the United Kingdom and through business associates in England, The Netherlands,

Denmark, West Germany, France, Belgium, Austria, and Switzerland.

#90031b0628 01/31/1990 ~Business Wire

KENT, WA (JAN. 31) BUSINESS WIRE - FlowMole Corp. (NASDAQ:MOLE), the leader in trenchless technology for underground utility installation, Wednesday announced that on or before Feb. 22, 1990, its $5 million, 12 percent Convertible Subordinated Note due Dec. 15, 1992, held by Bridge Capital Investors II of Teaneck, N.J., will be converted into 1,000,000 shares of unregistered common stock.

''The conversion will have no impact on reported earnings per share, as FlowMole has reported its earnings on a fully-diluted basis that assumes conversion of this debt,'' said John R. Potter, president. ''This conversion further strengthens our balance sheet and improves pre-tax cash flow by $600,000 annually in reduced interest payments.''

The company also announced the resignation of J. Barton Goodwin from its board of directors. Goodwin, who joined the board in connection with Bridge Capital's venture capital investment in the company three years ago

indicated that, ''the change is part of the evolution of FlowMole from a start up effort to a successful growing publicly held business. It has generally been the policy and practice of Bridge to move out of board participation in companies in which we have invested once this stage has been achieved. We continue to be pleased with our investment in FlowMole, and, while we may from time to time sell a portion of our position, we would expect to remain a significant shareholder in the future.''

''Bridge Capital's support of FlowMole before it went public is greatly appreciated. All of us on FlowMole's board of directors will miss Bart's many thoughtful contributions,'' Potter added.

FlowMole Corp. installs and replaces underground utility cable and pipe with minimal surface disruption using proprietary high-pressure fluidjet cutting and electromagnetic guidance techniques to accurately bore small diameter tunnels up to 400 feet in length.

Currently there are 63 FlowMole units operating worldwide, 37 of which are operated by the company in North America. FlowMole uses its proprietary GuideDril system to provide services to utilities in the U.S. and Canada through 15 regional sales and service centers. It also conducts operations in Europe through its wholly owned subsidiary in the U.K. and through business associates in England, The Netherlands, Denmark, West Germany, France, Belgium, Austria, and Switzerland.

LONG BEACH, CA (JAN. 31) BUSINESS WIRE - A leading tire distributor appealed Wednesday to consumers to protest withdrawl of the Michelin Tire Corp. from selling motorcycle tires in this country.

Nate Jones, who operates Nate Jones Tire Co. and International Cycle Racing Tires in Long Beach, urged that motorcyclists write or call Michelin headquarters in the United States at:

Michelin Tire Corp.

Attention: Public Relations Department

P.O. Box 19001

Greenville, S.C. 29602

(Telephone: 803/458-5000)

Jones commented: ''This is a serious consumer issue. There are only a few distributors in this country who will be affected, and we can all find other products to sell to our customers. But Michelin is the world's largest tire company, it makes a great product that has wide consumer acceptance and its faithful customers are owed something besides a curt announcement that the company will no longer make its products available to them.''

Jones recently supplied Michelin tires and Mousse fillers to all the six motorcycle class winners of the Presidente SCORE Baja 1000, including the overall winners, Larry Roeseler, Danny LaPorte and Ted Hunnicutt Jr.

Michelin also provides tires for Eddie Lawson, current four-time world 500 cc formula one road racing champion, and a team operated by all-time great Kenny Roberts on the world championship circuit.

LENEXA, Kan. (JAN. 31) BUSINESS WIRE - Syntro Corp. (NASDAQ:SYNT) reported at its annual meeting on Jan. 30 that the first quarter of fiscal 1990 was its best quarter in over two years.

The company reported revenues of $717,490 for the quarter ended Dec. 31, 1989, an increase of 91 percent over revenues of $376,375 for the like quarter last year and 11 percent over the prior quarter.

Expenses were $1,281,413, down 22 percent from last year's first quarter. Net loss for the quarter was $563,923, or 6 cents per share, a 56 percent improvement from the first quarter loss of $1,273,052, or 14 cents per share, in fiscal 1989.

The company reports cash, cash equivalents and short-term investments of $5,206,862, total assets of $9,507,306 and a debt-to-equity ratio of 1:7.

''We're extremely pleased with our first quarter performance,'' said Dr. J. Donald Todd, Syntro's president and chief executive officer. ''It's our best quarter in the last 10 and the fifth consecutive quarter in which revenues have increased 11 percent or more.

''SyntroVet sales of the PRV/Marker line of vaccines continue to grow, having achieved the second largest share of the swine pseudorabies market. Product sales contributed 58 percent of revenues for the quarter, demonstrating that Syntro's transition from a research organization to a fully integrated business operation is proceeding as planned.

''During the quarter, we also began to realize, through our product development and marketing agreements with Nippon Zeon and Schering-Plough, the fulfillment of our goal to develop mutually beneficial alliances with large corporate partners. This first quarter represents strong progress toward reducing our break-even point.''

It was also announced at the meeting that shareholders had approved the election of Dr. James L. Bittle, Patrick Owen Burns, Stephen E. O'Neil, Russell T. Stern Jr. and Dr. J. Donald Todd as directors of Syntro's board for the coming year.

Syntro Corp., founded in 1981, is a Lenexa and San Diego based biotechnology company engaged in the development and commercialization of animal health products utilizing technology the company believes has future applications in the human health sector.

Its current strategy is focused on achieving rapid revenue growth and profitability by penetration of the animal health market while pursuing corporate alliances that will broaden its product line in the future. SyntroVet, the company's animal health subsidiary, was established in 1985 to register, manufacture and market products resulting from Syntro's research.

BOULDER, CO (JAN. 31) BUSINESS WIRE - Johnson Publishing Co. Wednesday announced the acquisition of The Type Galley, a full-service typesetting firm located in Boulder.

The Type Galley's operation will move from its present location at 921 Walnut St. to the JP facility at 1880 S. 57th Court, also in Boulder.

The move will take place immediately, and The Type Galley will be integrated into JP's existing composition department. Financial terms of the acquisition were not disclosed.

According to JP President Jerry Johnson, ''This acquisition gives us the

opportunity to enter new geographic markets for our typesetting, printing, binding, and fulfillment services. It also enhances the capabilities we offer to our existing markets.

''Further we have been setting type since our founding in 1946 and welcome the opportunity to expand our capabilities by adding experienced professionals such as these to our staff.''

Ken Martin, who was a partner and founder of The Type Galley, will join JP as an account executive. Typesetter Claudia Previn and proofreader Kevin Frazzini will join the JP composition department.

JP, and its JL Printing division, located in Loveland, Colo., provide commercial printing, binding and fulfillment services to computer software and hardware firms, publishers, associations, institutions, and other service and manufacturing concerns.

Key markets are located along the Front Range of Colorado, the San Francisco Bay Area, and the Pacific Northwest. Primary products include one-, two- and four-color technical manuals, documentation, directories, catalogs, books and promotional literature.

Johnson Publishing was established by Ray and Ada Johnson in Boulder in 1946 and is one of the oldest family owned enterprises in the city. The JL Printing division was established in Loveland in 1962 as a satellite facility. The Johnson Books division was established in 1979 and publishes trade books, primarily in the natural history, archaeology, guidebook and travel categories.

DENVER (JAN. 31) BUSINESS WIRE - Crown Resources Corp. Wednesday announced a four-fold increase in their gold reserve/resource base during 1989 to 10.7 million tons containing 1,268,000 ounces of gold at a grade of 0.119 oz./ton gold.

Most of this increase is directly attributable to the 1989 discovery of the Crown Jewel gold deposit (formerly called Buckhorn) on Crown's 100 percent owned Buckhorn Mountain property in northeastern Washington.

Crown recently received the results of a detailed ore reserve estimate from the independent engineering firm, James Askew Associates Inc.

At the beginning of 1989 Crown had reserves and resources totaling 2.3

million tons containing 293,000 ounces of gold at a grade of 0.126 oz./ton gold. By year end reserves and resources had been increased as follows:

	Tons (Millions)	Contained Grade	Oz. Gold (Thousands)
Mineable Proven & Probable Reserves			
Kettle River Project (Crown's Share)	1.1	.194	224
Buckhorn Mountain (Open Pit/Uncut)	5.5	.106	580
	6.6	.121	804
Geologic Reserves (Not included above)			
Kettle River Project (Crown's Share)	0.2	.107	20
Buckhorn Mountain (Uncut)	2.8	.095	262
	3.0	.096	282
Geologic Resources			
Klondike	0.4	.250	100
Manhattan	0.1	.500	50
South Penn (Crown's Share)	0.2	.080	16
Divide	0.4	.040	16
	1.1	.165	182
Grand Total	10.7	.119	1,268

Crown is listed on the NASDAQ National Market System under the trading symbol CRRS and on the Vancouver Stock Exchange under the symbol CRO.

MADISON, GA (JAN. 31) BUSINESS WIRE - Wellington Leisure Products Inc. (NASDAQ/NMS:WLPI) Wednesday announced results for its second quarter and six months ended Dec. 31, 1989.

For the second quarter, net sales were $16,126,000 compared with $15,274,000 a year ago. Net income was $753,000, or 17 cents per share, up 24.7 percent compared with $604,000, or 16 cents per share, in the prior-year period.

For the six months ended Dec. 31, 1989, net sales were $33,337,000 compared with $30,384,000 in the year-earlier period. Net income was $1,735,000, or 38 cents per share, up 27.0 percent compared with $1,366,000, or 37 cents per share, last year.

Commenting on the results, William R. O'Dell, chairman of the board and president, said, ''Results for our second quarter and year to date were in line with our expectations. The improved results mainly reflect better overall margins and product mix.

''We have made excellent progress in consolidating our recent acquisitions into our product lines and, for the balance of the fiscal year, we look for favorable sales and earnings comparisons with those of a year ago.''

Wellington Leisure Products Inc. is a leading U.S. manufacturer of leisure activity products, water recreational products and cordage.

The company's products include Maxwell handicrafts; Plantation Works hammocks, lawn, garden and patio accessories; Tink's Safariland Hunting Scents, York Sports and Ol' Timer's hunting and fishing equipment; Taperflex , Cut 'N Jump and Ski-Master water skis and related accessories; boating and swimming pool accessories; Wellington Puritan rope and twine for retail consumers; and Rhino Ropes cordage products for industrial and commercial users.

Wellington's common stock is traded on the National Market System under the NASDAQ Symbol WLPI.

#90031b0655 01/31/1990 ~Business Wire

RANCHO CUCAMONGA, CA (JAN. 31) BUSINESS WIRE - Data-Design Laboratories Inc. (NYSE:DDL) announced Wednesday results for the second quarter ended Dec. 31, 1989.

Sales for the quarter were $26,919,000 compared with $26,508,000 in last year's second quarter. A net profit of $251,000, or 4 cents per share, was realized in 1990, compared with a loss of $473,000, or 7 cents per share, last year.

The 1990 income included a gain of $1,941,000 from the sale of the remainder of DDL's portfolio of preferred stocks, and a gain of $920,000 from the repurchase of $3.43 million par value of its 8.5 percent convertible subordinated debentures.

For the six months ended Dec. 31, 1989, sales were $52,048,000 and the net loss was $529,000, or 8 cents per share. Results for the same period last year were sales of $51,613,000 and a net loss of $113,000 or 2 cents per share.

Subsequent to Dec. 31, DDL completed the sale of its Sierra Precision subsidiary to Sensor Control Corp. resulting in a gain of approximately $1.2 million.

DDL is primarily engaged in the manufacture and assembly of printed circuit boards for computer, communications and instrumentation industries. Other segments of the company's business include the manufacture of signal transmission equipment for cable television and other communications applications and engineering services for the Defense Department.

#90031b0659 01/31/1990 ~Business Wire

NEW YORK (JAN. 31) BUSINESS WIRE - ASARCO Incorporated (NYSE:AR) Wednesday reported net earnings of $59,113,000 or $1.42 per common share, for the fourth quarter ended December 31, 1989, compared with net earnings of $73,120,000, or $1.74 per share, for the fourth quarter of 1988.

Sales of products and services were $531,012,000 in the fourth quarter of 1989, compared with $599,254,000 in the same period of 1988.

For the year ended December 31, 1989, Asarco reported net earnings of $231,165,000, or $5.50 per share, compared with net earnings of $207,244,000, or $4.92 per share, in 1988

Sales of products and services for the full year 1989 were $2,210,759,000, compared with 1988 product and service sales of $1,988,087,000.

The decline in net earnings and sales for the 1989 fourth quarter was due primarily to lower copper prices.

The increase in net earnings for the year 1989, compared with 1988, was due to higher average selling prices for copper and zinc offset by lower prices for silver, and to an improved contribution to equity earnings from Asarco's associated company Mexico Desarrollo Industrial Minero, S. A., (MEDIMSA), reflecting the November 1988 acquisition of Mexicana de Cobre. Sales in 1989 were higher due to improved copper and zinc prices and the effect of acquisitions made during 1988 and 1989.

Results for 1989 also included previously reported items of a nonrecurring nature which had the net effect of lowering 1989 earnings by $20.3 million after-tax, or 48 cents per share. The items comprised a first quarter after-tax charge of $3.1 million to cover remediation costs at a Colorado Superfund site, a third quarter after-tax charge of $22.7 million related

to the company's decision to get out of asbestos and coal mining, and a credit of $5.5 million as a result of a favorable Canadian tax decision.

Commenting on the company's results, Richard de J. Osborne, chairman, president and chief executive officer said, "1989 was an excellent year for the company, and while prices for one of the company's principal products - copper - has declined in recent months, it is at a level that is quite satisfactory. While there are signs of a slowdown for certain domestic capital goods such as automobiles and housing, other domestic market segments and overseas markets remain firm. On balance, current demand for Asarco's products is strong and the outlook for 1990 is good.

#90031b0661 01/31/1990 ~Business Wire

SAN FRANCISCO (JAN. 31) BUSINESS WIRE - Vivra Inc. (NYSE:V) Wednesday announced it earned $1.50 per share for the fiscal year ended Nov. 30, 1989.

This is after a charge in the fourth quarter of 32 cents per share to provide an adequate allowance for doubtful accounts.

It is also after a charge in the fourth quarter of 23 cents per share for legal, accounting and other expenses incurred in connection with the tax-free distribution on Aug. 31, 1989, by Community Psychiatric Centers (NYSE/BSE/MSE/ PSE:CMY) of 100 percent of the common stock of Vivra to its shareholders.

Operating revenues increased by $11,877,000 or 14.5 percent. Of this increase, $11,273,000 was attributable to dialysis and $604,000 to home health care. The dialysis revenue increase represented a 14.1 percent increase in the number of treatments. This increase resulted from the addition of 187 new dialysis stations during 1989, a 15.3 percent increase.

Costs and expenses increased by $18,955,000, or 29.4 percent. Of this increase, $16,087,000 was attributable to dialysis and $1,155,000 to home health care. The dialysis cost increases were due to increased volume of business, expenses associated with the operation of new dialysis centers, as well as the need to set up an adequate allowance for doubtful accounts.

During 1989, Vivra increased its allowance for doubtful accounts by $4,600,000 ($4,256,000 charged to dialysis and $344,000 charged to home health care) over the amount customarily provided. Of this amount, $2,100,000 was recorded prior to the spinoff on Aug. 31, 1989, and $2,500,000 in the fourth quarter, after the spinoff.

In the fourth quarter of 1989, Vivra incurred a one-time expense of $1,074,000 for legal, accounting, printing and investment banking costs in connection with the spinoff. Most of this expense is not tax deductible.

The impact on net earnings of $1,600,000 of the increased allowance for doubtful accounts incurred in the third quarter was fully offset by a reduction of an excess current income tax liability of approximately $1,000,000. This excess liability accumulated over time principally from estimating state income taxes at amounts higher than actually paid.

As a result of increased costs, particularly the added allowance for doubtful accounts, dialysis operating profits declined $4,814,000 or 24.2 percent, and operating profit margins declined 10.7 percent, from 30.2 percent to 19.5 percent.

#90031b0663 01/31/1990 ~Business Wire

NEW YORK (JAN. 31) BUSINESS WIRE - Enzo Biochem Inc. (ASE:ENZ) Wednesday announced five new EnzoLabs Inc. vice presidents.

The appointments -- four promotions and one newcomer -- are expected to position the diagnostic service subsidiary for major growth in the greater metropolitan New York area as well as for longer-term national expansion.

The newly named vice presidents are (alphabetically): Tillman Eddy, vice president -- operations; David C. Goldberg, vice president -- marketing and corporate development; Daniel M. Jacobs, M.D., vice president -- medical director; newcomer Donald J. Nickdow, vice president -- finance; and Daniel O'Gara, vice president -- sales.

Commenting on EnzoLabs' new lineup, President Stuart A. Seidman noted: ''We now have the appropriate leadership in place to accomplish our two goals -- to soon become the leading clinical reference laboratory in the New York metropolitan area, and then to expand nationally throughout the 1990s. Each of these individuals brings in-depth experience to his respective functional area.

''Mr. Eddy has 20 years of clinical laboratory general management experience; Mr. Goldberg, seven years of sales and marketing experience in the health care field; Dr. Jacobs was formerly director of cytopathology and clinical chemistry at a major New York medical center; Mr. Nickdow, nine years of finance experience, most recently as controller of a public health care management company; and Mr. O'Gara, eight years of sales and

sales management experience in the clinical laboratory field.''

Enzo Biochem Inc. is an established New York City-based biotechnology company engaged both in the research, development and manufacture of innovative health care products based on molecular biology and genetic engineering techniques and in providing diagnostic services to the medical community.

#90031b0664 01/31/1990 ~Business Wire

RALEIGH, NC (JAN. 31) BUSINESS WIRE - Ron E. Doggett, chairman and chief executive officer of GoodMark Foods Inc. (NASDAQ/NMS:GDMK) Wednesday announced that sales and earnings for the third quarter ending Feb. 25, 1990, are not going to reach previously expected levels.

Doggett said: ''Preliminary figures for December and January indicate that sales and earnings are not yet reaching budget levels. Margins have also remained under heavy pressure due to higher raw material costs.

''Instead of peaking in November as we had expected, beef prices climbed to record highs in January. Overall higher meat prices had a particularly negative effect on earnings from our Jesse Jones packaged meat business.''

Doggett indicated that final figures for the third quarter and the nine months of fiscal 1990 are expected to be released in mid-March. For the year-earlier third quarter, GoodMark reported net sales of $29.7 million and net income of $1 million, or 23 cents per share. For the first nine months of fiscal 1989, the company reported net sales of $95.7 million and net income of $3.6 million, or 81 cents per share.

''The third quarter figures are disappointing and occur at a time when we are investing more heavily in research and development and market expansion. We remain optimistic that the sales and earnings trends will improve in the fourth quarter.

''Our snack business remains in a strong market position. Recent price increases, cuts in overhead expense, and a heavier schedule of selling and marketing activities should produce more positive results during the final three months of fiscal 1990,'' Doggett concluded.

GoodMark Foods is the nation's leading producer and marketer of meat

snacks. The company is also a regional producer of packaged meat products cookies, crackers, brownies and other snacks. Its principal brands include Slim Jim, Penrose, and Pemmican meat snacks; Jesse Jones packaged meats; and Andy Capp's snacks.

CONCORD, NC (JAN. 31) BUSINESS WIRE - Cabarrus Savings Bank (OTC: CASB) reported year end earnings of $287,485, or 41 cents a share for Dec. 31, 1989 compared to $406,613, or 58 cents a share for 1988 adjusted for the 20 percent stock dividend paid in August 1989.

Total assets on Dec. 31, 1989 were $95.5 million, an increase of 5.2 percent over year end 1988.

It was the seventh consecutive profitable year for the savings bank and came during a time the thrift industry was subject to much adverse media attention and speculation about its future.

The decrease in 1989 earnings was attributable to a specific allocation, during the fourth quarter, to loan loss reserves of $355,000 for a commercial loan secured by properties located in the savings bank's trade area.

Cabarrus Savings net worth exceeds all new regulatory minimum capital requirements at Dec. 31, 1989.

Cabarrus Savings Bank, chartered in 1898, operates full service offices in Concord and Kannapolis and mortgage loan production offices in Charlotte's University City area and Rock Hill, S.C.

#90031b0675 01/31/1990 ~Business Wire

ELMSFORD, N.Y. (JAN. 31) BUSINESS WIRE - The Computer Factory Inc. (NYSE:CFA) Wednesday reported operating results for the fiscal 1990 first quarter ended Dec. 31, 1989.

Net sales for the first quarter increased 23 percent to $126,073,000, from the $102,783,000 reported for the same period in fiscal 1989, setting a new single quarter sales record for the company.

Net income for the first quarter amounted to $2,003,000, or 23 cents per share, as compared to the $3,978,000, or 45 cents per share, earned in the fiscal 1989 first quarter.

President Jay Gottlieb noted that while earnings for the 1990 first quarter were below those of the prior year's first quarter, the company had experienced some margin improvement over fiscal 1989 fourth quarter results.

''Our first quarter reflected higher margins typically associated with the Christmas retail season, however, we also recorded margin improvement in the corporate marketplace,'' said Gottlieb.

He further noted that the company opened three new sales units during the first quarter - in Manhasset, N.Y., Seattle, Wash. and Milwaukee, Wis. - and closed one of its seven sales locations in the Washington D.C. area.

On Jan. 22, The Computer Factory announced to its personnel a restructuring of its sales and service operations designed to concentrate value added services in regional hub centers.

The restructuring will reduce operating expenses while increaseing services to the end user.

The Computer Factory is engaged in the sale and service of personal computers, business computer systems, peripherals, software, training, computer rental and computer networking through its network of 68 company-owned stores.

#90031b0678 01/31/1990 ~Business Wire

IRVINE, CA (JAN. 31) BUSINESS WIRE - CORTEX Pharmaceuticals Inc. (NASDAQ:CORX/CORXU/CORXW) Wednesday announced an agreement whereby Georgia Tech Research Corp. will synthesize several classes of inhibitors of the brain enzyme calpain for development by CORTEX as potential drugs to limit the brain damage associated with stroke, head injury and similar acute disorders.

Dr. Harold R. Hutchings, CORTEX president and chief executive officer, described the agreement as ''a very significant augmentation of our effort to discover and develop neuroprotective drugs.''

Hutchings noted that in testing of the compounds, several appear to be

excellent inhibitors of calpain and also offer protection against neurological damage in the company's model systems. CORTEX has a right of first refusal to commercialize any calpain inhibitors which appear effective.

Dr. Gary S. Lynch, a CORTEX founder and professor at the Bonney Center for the Neurobiology of Learning and Memory at the University of California, Irvine, is widely recognized as a pioneer in the study of the critical role of calpain in normal learning and memory. Calpain is key to Lynch's biochemical explanation of how long-term human memories are formed.

CORTEX is studying several classes of potential drugs that are designed to work by blocking one or more steps in the neurotoxic cascade, thus limiting the extent of brain damage and memory loss following a stroke or similar event. If effective, they will give clinicians the ability to actively intervene, rather than simply waiting for the damage to run its course.

According to the National Institute of Neurological and Communicative Disorders and Stroke, over 400,000 people suffer strokes each year. Of these, 150,000 die, making stroke the third leading cause of death in the United States. Another 500,000 people sustain disabling injuries to the brain each year.

Hutchings indicates that neuroprotective drugs ''would be a major medical breakthrough for a large category of these patients who at present receive minimal assistance for what is often devastating neurological damage. Such drugs could mean a great deal in terms of quality of life for those afflicted with such disorders.''

CORTEX Pharmaceuticals Inc., with laboratories in Irvine, is focused on discovery and development of therapeutics for age-related neurodegenerative disorders.

CALGARY, Alberta (JAN. 31) BUSINESS WIRE - Homer L. Spencer Jr., chief executive officer of ORS Corp. (NASDAQ:ORSC), an enhanced oil recovery technology company, Wednesday announced that ORS's operating affiliate, EOR International Inc., had signed a memorandum of understanding with Norsk Bronnservice A.S.

Spencer indicated that Norsk Bronnservice (NBS) is a Norwegian oil well service company providing fracturing, sand control and well-testing services to European oil and gas operators.

NBS recently concluded the formation of a joint venture with VNIGNI, a Russian acronym for the Soviet Ministry of Geology. The joint venture will operate in the Soviet Union to provide western oil well service technology to their industry including electromagnetic stimulation.

Under terms of the agreement with NBS, EOR International will provide its Electromagnetic Stimulation Process and services to NBS for use in the Soviet Union. NBS has advised the company that plans are set to commence work on a three- to five-well pilot test of the EM Process in a Russian field with a potential for 1,500 to 2,000 installations if the pilot is

successful.

With the recently widely publicized productivity problems with the Soviet oil industry and the importance of oil exports to their economy, the company sees its entry into operations there as an enormous opportunity, Spencer said.

ORS Corp.'s operating affiliate, EOR International Inc., markets services and systems for electromagnetic stimulation of oil and gas wells from its head office in Calgary.

LAGUNA HILLS, CA (JAN. 31) BUSINESS WIRE - Hill & Knowlton, the world's largest P.R. firm, has been retained by Advantage Life Products, exclusive retail distributors of CigArrest Smoking Cessation and Alternative products, to implement a major national CigArrest Gum P.R. and product awareness blitz for the upcoming Airline Smoking Ban, Feb. 25.

CigArrest Gum is the only over-the-counter smoking alternative available to help smokers relieve temporary withdrawal when they can't or choose not to smoke. In addition to national drug and mass retailer distribution, CigArrest Gum is now available in many airport gift shops for smoking travelers who may soon be experiencing ''High Anxiety.''

Charles Sleichter, Advantage president and chief executive officer believes ''The domestic airline smoking ban will be the most impactful of all the smoking restrictions. CigArrest Gum is positioned perfectly to satisfy the demand driven by the ban.''

And at retail, Pay Less Drug Stores, the nation's 10th largest drug store chain, has placed a $105,000 reorder for all CigArrest products into their more than 275 stores. ''Pay Less placed an initial order in November and results prompted the chain to reorder CigArrest Kits, Gum, Tablets and Vitamins chainwide,'' said Steve Tye, Advantage's western regional sales manager.

MECHANICSBURG, PA (JAN. 31) BUSINESS WIRE - Continental Medical Systems Inc. (NASDAQ: CONT) has announced results for the second quarter and the six months ended Dec. 31, 1989.

Second quarter net operating revenues of $55,805,000 represents a 40 percent increase over last year's second quarter net operating revenues of $39,890,000.

Net income rose to $1,990,000 or 14 cents per share, reflecting a 21 percent increase over last year's second quarter results of $1,638,000 or 11 cents per share.

For the first six months of Fiscal Year 1990, net operating revenues rose 46 percent to $108,153,000 as compared to $74,285,000 for the first half of Fiscal Year 1989.

Net income likewise increased to $3,432,000 or 24 cents per share, a 21 percent increase over the $2,834,000 or 20 cents per share for the first six months of the prior year.

Exclusive of the $580,000 cumulative effect of accounting change, or four cents per share reflected in the prior year's results, net income per share remained constant.

Results for last year's second quarter and first six months have been restated to reflect the results of RehabWorks Inc., a contract therapy company which was acquired Sept. 29, 1989, in a transaction accounted for as a pooling-of-interests. The results are also restated to reflect the retroactive application and effect of an accounting change made during the year ended June 30, 1989.

The increases in revenues for both the second quarter and six-month periods were attributable primarily to the new hospitals opened during Fiscal Year 1989, continued growth of the company's other rehabilitation hospital and contract therapy operations, and the additional development projects begun during the past twelve months. The increases more than offset the reduction in revenues attributable to the sale of three long-term care facilities during October 1989.

Notwithstanding the increased revenues, net income before cumulative effect of an accounting change for the first six months of Fiscal Year 1990 increased only slightly over the results for the first half of Fiscal Year 1989 due to the initial operating losses incurred during the quarter ended Sept. 30, 1989, by the three hospitals which opened in June 1989.

In addition the company incurred a loss from its longterm care operations.

Income before income taxes and cumulative effect of accounting change for the six months, excluding the initial operating losses at the three hospitals opened in June 1989, would have totaled $7,142,000, a 15 percent increase over the $6,223,000 posted for the first half of Fiscal Year 1990.

SCOTTSDALE, AZ (JAN. 31) BUSINESS WIRE - Interactive Media Technologies Inc. (NASDAQ:IMTX) and Teleste Communication, a $100 million publicly traded company, located in Turku, Finland, jointly announced Wednesday the signing of an agreement in principle, whereby IMT will grant to Teleste, and its affiliates, a non-exclusive world-wide license to manufacture, distribute and sell IMT's recently announced MutliLink product.

In addition, the agreement in principle calls for both companies to jointly develop the MultiLink technology for use in multi-media learning systems, worldwide. The agreement also calls for the joint development of undisclosed application software in connection with the MultiLink product.

R. Glenn Williamson, chairman and chief executive officer of Interactive Media Technologies said, ''Teleste is one of the largest communication and educational companies in the world. Through their wholly owned subsidiary Tandberg Educational, the company has a current installed base of 300,000 student workstations in more than 90 countries world-wide.

''Their products range from special classroom recorders and language laboratories to multi-media systems, including interactive audio, video distribution systems and educational computer network.''

''This agreement in principle now provides IMT the capability to move into the world marketplace and to provide the ''missing link'' technology which offers solutions to many of the world's educational problems. The MultiLink system connects a computer with a VCR, CD ROM, Laser Disc or almost any other type of audio and video equipment available. The end result is the quick and inexpensive development of multi-media for the educational and corporate marketplace.''

According to Pekka Lehtio, director of Teleste, ''The working relationship that has been developed between the two companies will permit the accelerated development of exciting new software, providing a new level of educational and corporate audio/visual material for the multi-media marketplace.

Interactive Media Technology is a full-spectrum communications company specializing in multi-media development of computer-based interactive video products, including proprietary hardware and software systems.

SAN ANSELMO, CA (JAN. 31) BUSINESS WIRE - A new Marin County company has announced plans for the statewide marketing of a unique line of light fresh pasta and light sauces with the full flavor of the traditional Italian cuisine but significantly fewer calories.

The light pasta and sauce products are the creation of The California Pasta Company of San Anselmo, founded last year by two Marin businessmen, Arturo Rovo and John Magine, who believe gourmet Italian food with slimming appeal puts them a long jump ahead of the competition on the refrigerated take-out shelves.

The California Pasta Company has combined its light products with a traditional line of fresh, packaged pasta and sauces and has established a distribution network to supply 1,200 supermarkets and other outlets around the state within 90 days.

The California Pasta Company already supplies leading Bay Area stores, including Petrini's, Guasco's, Blackhawk Market, Diablo Foods and Village Market.

Magine said the category of fresh refrigerated pasta and sauces has exploded in recent years and is ripe for segmentation with low-calorie products. ''The sales response in Northern California is so tremendous it convinced us to market statewide,'' he said.

Magine, a former advertising account executive for J. Walter Thompson, said the recipe for successful low-calorie pasta products eluded the food industry until The California Pasta Company came along.

The creator of the light product recipes -- company-held secrets -- is Magine's partner, Rovo, a specialty pasta maker who was the first in the Bay Area to supply stores with fresh pasta and sauces for the refrigerated shelves.

Magine said he called Rovo's San Anselmo store at random from a Marin

telephone listing last year and tried out his untested idea of making and marketing low-calorie pasta dishes. ''I called out of the blue but Arturo caught on right away,'' he said.

The California Pasta Company is a subsidiary of Ro.Ma Foods International Inc., 754 Sir Francis Drake Blvd., San Anselmo. Magine is chief executive officer and Rovo is president of Ro.Ma.

SAN RAFAEL, CA (JAN. 31) BUSINESS WIRE - Good reception in Marin County to First National Bank of Marin's new banking services contributed to the bank's 11 percent growth in assets and net income of $160,000 for 1989.

The profitable year is in contrast to a loss of $402,000 in 1988.

The community bank's innovative new professional banking services, its insurance premiums' finance program, its credit card operation, mortgage loan services and special financing for small business all contributed to First of Marin's $23.6 million year-end assets, up from $21.2 million the year before.

Rice added that the bank is embarking on yet another new program in 1990 designed to put longer-term capital in the hands of small and mid-sized businesses. This Small Business Administration-backed loan program is aimed at slashing the red tape that proves daunting to so many applicants.

The bank's affinity credit card program grew to 5,000 cards after introducing the program in May. Commercial loans were up 18.2 percent.

Rice attributed the bank's ''full range'' financial services packages for professional firms as another earnings leader, as more lawyers, doctors,

dentists and accountants turned to First of Marin for all their financial needs.

Also, the Federal Reserve Board has authorized an increase in the bank's capital through the issuance of additional shares of common stock. The new capital will be available to the bank by Feb. 28.

NEW YORK (JAN. 31) BUSINESS WIRE - Philip Morris Companies Inc. Wednesday announced financial results as follows:

Philip Morris Companies Inc. today announced that consolidated operating revenues for the year ended December 31, 1989, increased 41.0% to $44.8 billion from $31.7 billion in 1988. Operating companies income increased 41.2% to $7.2 billion. Earnings before income taxes were up 35.7% to $5.1 billion. Net earnings were up 26.1% to $2.9 billion from the prior year's net earnings of $2.3 billion. Net earnings per share were $3.18, up 26.7% from $2.51 in 1988.

Kraft, Inc. became a wholly-owned subsidiary on December 7, 1988. Accordingly, consolidated results of the company include the operating results of Kraft, Inc. for the full year 1989 and the 1988 period after acquisition.

Consolidated operating revenues for the fourth quarter of 1989 were $11.1 billion, an increase of 29.0% over the $8.6 billion for the fourth quarter

of 1988. Operating companies income increased 33.0% to $1.7 billion. Earnings before income taxes rose 100.0%+ to $1.5 billion. Net earnings increased 100.0%+ to $863 million, compared with $342 million in 1988. Net earnings per share were $.93, up 100.0%+ from 1988's fourth quarter.

In 1989 General Foods Corporation was combined with Kraft, Inc. to form Kraft General Foods, Inc. The company charged $179 million against pretax income, which was primarily for costs of this merger. In addition, the company sold its equity investment in Rothmans International p.l.c. for 610 million 10-1/4% notes maturing in 1994, generating a pretax gain of $455 million. These notes were subsequently sold with recourse for approximately $850 million. The net impact of these items was an increase in earnings before income taxes, net earnings and earnings per share of $276 million, $152 million and $.16, respectively.

SEBRING, FL (JAN. 31) BUSINESS WIRE - First Home Federal Savings and Loan Association reported that net earnings for the year ended Dec. 31, 1989 were $1,864,581 or $1.28 per share compared to net earnings for the year ended Dec. 31, 1988 of $2,169,927 or $1.49 per share.

For the fourth quarter ended Dec. 31, 1989, net earnings were $492,655 or 34 cents per share compared to net earnings of $516,529 or 35 cents per share for the fourth quarter ended Dec. 31, 1988.

The decrease in earnings for the year ended Dec. 31, 1989 was primarily due to a decrease in net interest income, a decrease in other income and to a lesser extent an increase in operating expenses.

The decrease in net earnings for the quarter ended Dec. 31, 1989 was primarily due to a decrease in net interest income.

At Dec. 31, 1989 First Home Federal had regulatory captial of approximately $23,696,000, which exceeded all the current minimum regulatory capital requirements by approximately $17,463,000.

Stockholder's equity at Dec. 31, 1989 gives effect to a $1.3 million unrealized net loss on marketable equity securities reflecting the effect of higher interest rates on the Association's portfolio of mutual funds at that date. Such funds are accounted for at the lower of cost or market value.

Continued changes in market interest rates will affect the market value of these funds. The unrealized net loss at Jan. 26 was $1.8 million.

At Dec. 31, 1989 and 1988, the Association's ratio of non-performing loans and real estate owned to total assets was 2.05 percent and 1.54 percent, respectively. A significant portion of these assets consisted of a Hillsborough County apartment project acquired through foreclosure.

The Association, which had assets of $207,826,804 at Dec. 31, 1989, conducts operations through eight offices located in Highlands and Hillsborough Counties in south central and the west coast of Florida.

The common stock of the Association is traded in the over-the-counter

market and is quoted on the NASDAQ system under the symbol ''FSEB.''

CINCINNATI (JAN. 31) BUSINESS WIRE - Cincinnati Bell Inc, (NYSE:CSN) announced Wednesday it has purchased CTI Telecommunications Inc. of South Bend, Ind.

CTI Telecommunications is a long distance reseller primarily serving northern Indiana and southwestern Michigan. CTI's 8,500 customers generated $8 million in revenues in 1989. Terms of the transaction were not disclosed.

CTI Telecommunications will operate as a separate subsidiary of CBI. The current president, Tim Shindeldecker will retain control of operations. The new subsidiary will report to L.L. Hendrickson, CBI vice president for market development.

No changes are anticipated in CTI Telecommunications' 43 employees.

CBI already operates a long distance subsidiary, Cincinnati Bell Long Distance (CBLD) which provides discounted long distance and 800 service throughout the southern half of Ohio and northern Kentucky. CBLD has received tentative approval to operate in Central Indiana and expects to begin offering its services on March 1, when its new Indianapolis branch office opens.

CTI Telecommunications Inc., formerly Clark Telecommunications, a subsidiary of Clark Equipment Co., was purchased from Allnet Communication Services Inc.

CBI supplies telecommunications, information and telemarketing services.

Services include information systems, data processing and systems consulting, discount long distance telecommunications, market research, electronic database services.

In addition, telecommunications equipment supply and repair, inbound, business-to-business and outbound consumer-relations telemarketing as well as a full range of telecommunications services in the Cincinnati metropolitan market.

GALVESTON, TX (JAN. 31) BUSINESS WIRE - Hornbeck Offshore Services Inc. announced that it has acquired 100 percent of the outstanding common stock of Point Marine, Inc. headquartered in Morgan City, Louisiana.

Larry D. Hornbeck, chairman of the board and president of Hornbeck Offshore Services, Inc., stated that Arthur I. Levy Jr., the former president of Point Marine, will serve as a consultant to Hornbeck Offshore Services and be appointed to Hornbeck's board of directors at its next meeting. The existing operating management of Point Marine will remain in place in Morgan City.

Hornbeck stated that the acquisition is a major step forward for the company, adding 13 vessels to the company's current fleet of 16 vessels and positioning it as one of the largest supply vessel operators in the Gulf of Mexico. It also gives the company the ''critical mass'' necessary to better serve its base of nationally-recognized customers with a greater diversity of equipment and two bases of operations on the Gulf Coast.

The assets represented by the acquisition have a gross value of approximately $35 million and consist of approximately $5 million of cash and other current assets, and $30 million attributable to 13 vessels, related equipment and other assets.

The acquisition involves the assumption within the Point Marine subsidiary of the existing current liabilities and debt of approximately $17 million, the issuance of a $5 million convertible subordinated note to the seller and approximately $10 million in cash.

The cash portion is being financed by institutional investors through the acquisition of a package of Hornbeck securities consisting of 500,000 shares of common stock, 1,000 shares of series one preferred stock, 1,000 shares of series two preferred stock and warrants to purchase one million shares of common stock at $7.50 each.

Hornbeck Offshore Services, Inc., through its subsidiaries, is engaged in the ownership and operation of offshore service vessels primarily operating in the offshore oil service industry. The company's stock is traded on the NASDAQ Over-the-Counter market under the symbol HOSS.

NEW YORK (JAN. 31) BUSINESS WIRE - Ark Restaurants Corp. reported net sales increased to $9,273,000 for the first fiscal quarter ended Dec. 30, 1989 compared with $6,932,000 for the fiscal quarter ended Dec. 31, 1988. Net income for the latest quarter was $254,000, or eight cents per share as compared with $278,000, or 8 cents per share, in the prior year's quarter.

Sales at the company's managed, but not owned, restaurants and bars, which are not included in the net sales, were $1,990,000 for the latest quarter as compared with $2,421,000 in the prior year's quarter. From these managed restaurants and bars the company earned a pre-tax management fee of $114,000 during the latest quarter as compared with $161,000 in the prior year's quarter.

In commenting on the results, Michael Weinstein, president, said, "Although the softness in the New York City restaurant business continues, we believe we are creating assets that will have long-term benefits for our shareholders. We expect our operating results in the balance of fiscal 1990 to compare favorably to the prior year."

Ark Restaurants owns and operates 15 restaurants and bars and manages five restaurants and bars in New York City, Boston, and Washington, D.C.

ELGIN, IL (JAN. 31) BUSINESS WIRE - Jacob Saliba, chairman of Katy Industries Inc. (NYSE) announced that Katy expects to sell 25 percent of its Schon & Cie AG subsidiary next month.

The sale is expected to be accomplished by means of an initial public offering of Schon shares in Germany, scheduled to commence on or about Feb. 14, 1990. Katy has entered into an agreement with Commerzbank AG to act as lead manager of the offering.

Based on the anticipated offering price for the Schon shares and estimated transaction expenses, Katy presently expects to realize net proceeds of approximately 44,000,000 DM. At current exchange rates, this would result in a gain to Katy of approximately $12,000,000 after taxes.

Completion of the offering is subject to various conditions, including conditions which may affect the pricing of the shares to be sold.

Saliba also noted that Katy is reviewing certain other of its international activities and may consider establishing reserves relating to those activities if warranted by the results of such reviews. Any such reserves could partially offset the gains from the sale of Schon shares.

Schon, a wholly owned subsidiary of Katy based in Pirmasens, West Germany, is a leading manufacturer of shoe lasting and die cutting machinery. Katy will retain ownership of the remaining 75 percent of Schon shares, which will be listed in the ''Geregelter Markt'' (regulated market) on the Frankfurt Stock Exchange.

Saliba commented that the offering will give recognition to the outstanding performance of the management of Schon, and will provide Katy a vehicle to expand its European operations in anticipation of the economic integration of the European Community in 1992.

Katy Industries Inc. is a major diversified corporation with interests in consumer products, industrial machinery, industrial components and energy resources. Katy common and preferred shares (Class B) are listed on the New York Stock Exchange.

NEW YORK (JAN. 31) BUSINESS WIRE - The board of directors of ASARCO Inc. Wednesday declared a regular quarterly dividend on the common stock of 40 cents per share payable March 1, 1990, to stockholders of record on February 15, 1990.

Asarco increased its quarterly dividend to 40 cents per share on April 1, 1989, after paying 30 cents in the first quarter of 1989 and 20 cents in each of the previous three quarters.

The dividend on common stock was restored in November, 1987, at 10 cents per share after not having been paid since the third quarter of 1984. It was increased to 20 cents per share in the second quarter of 1988.

#90031b0739 01/31/1990 ~Business Wire

INDIANAPOLIS (JAN. 31) BUSINESS WIRE - Retirement Living Tax Exempt Mortgage Fund Limited Partnership (Retirement Living) announced Wednesday that it will not make a cash distribution to the holders of its beneficial unit certificates (BUCS) with respect to the fourth quarter of 1989.

Retirement Living relies upon interest from its portfolio of federally tax-exempt mortgage loans to provide funds for cash distributions to BUC holders.

As previously reported, four of Retirement Living's five mortgage loans have been in default since June 30, 1989. Because it received none of the interest due Dec. 31, 1989, on the defaulted mortgage loans and because additional expenses have been incurred in connection with those mortgage loans, Retirement Living has determined that it is not feasible to make any cash distribution to the BUC holders at this time. No decision has been made with respect to possible future cash distributions.

The mortgage loans are secured by one residential apartment project (Village Green-Phase II) and four retirement living projects (Canton Regency, Town Centre, Cottonwood Village and The Harrison). Retirement Living received the $59,500 base interest, together with $20,648 of contingent interest, due Dec. 31, 1989, on the loan secured by the apartment project, which is not in default.

Although the project owners have agreed to pay at least the aggregate combined net cash flow available to them from the four retirement living project mortgage loans that are in default, Retirement Living has been advised that there was no aggregate combined net cash flow available to them for such projects during the fourth quarter of 1989. The unpaid base interest on the four defaulted mortgage loans aggregated $1,582,776 at Dec. 31, 1989.

As previously reported, Retirement Living, in cooperation with Crestar Bank, its independent real estate consultant, engaged Van Scoyoc

Associates Inc. (Van Scoyoc), a retirement housing consultant, to perform feasibility studies on the four retirement living projects and to recommend a course of action with respect to those projects.

Van Scoyoc was also requested to provide an independent opinion regarding what actions would be in the best interests of the BUC holders. The partners of the project owners are all partners of Retirement Living Communities (RLC), the general partner of Retirement Living.

RLC has authority over and responsibility for the overall management and control of Retirement Living. Retirement Living and Crestar Bank, its independent real estate consultant, are evaluating the recommendations of Van Scoyoc that were recently submitted to Retirement Living.

The final report of Van Scoyoc recommends that Retirement Living should continue to hold the mortgage loans secured by the Town Centre (Merrillville, Ind.) and Canton Regency (Canton, Ohio) retirement living projects.

Van Scoyoc believes that value to the BUC holders will be maximized by holding those two mortgages and allowing the project owners to continue operating those projects with existing program components.

Van Scoyoc's report has projected that Canton Regency should be able to cover its full base interest obligations by 1991 and that Towne Centre should be able to cover its full base interest obligations by 1992. Such projections may be affected by events and conditions, many of which are beyond the control of Retirement Living and the project owners and, therefore, may vary materially from actual results.

Van Scoyoc's report also recommends that The Harrison (Indianapolis) and Cottonwood Village (Cottonwood, Ariz.) be sold. Van Scoyoc's report indicates that it is unlikely that these two projects will ever be able to meet their debt service obligations and that neither project has any current value based on the present value of projected future cash flows.

Accordingly, Van Scoyoc believes that, although a sale would achieve maximum value for the BUC holders, the expected sale proceeds would be substantially less than the aggregate $7.4 million principal balance of those mortgage loans.

#90031b0740 01/31/1990 ~Business Wire

KENOSHA, WI (JAN. 31) BUSINESS WIRE - Snap-on Tools Corp. said Wednesday

that despite continued declines in new-car sales and a generally soft U.S. economy, net sales improved to record levels for the fourth quarter and fully year 1989, increasing 4.0 percent and 4.2 percent, respectively.

Lower unit sales volume led to earnings declines of 16.6 percent and 7.6 percent for the quarter and year.

Net sales for the quarter were $219.7 million, an increase of $8.4 million over the fourth quarter of 1988.

Net earnings were $22.7 million, or 55 cents per share, compared with $27.2 million, or 66 cents per share a year ago.

For the full year, net sales were $890.8 million, an increase of $36.2 million over the $854.6 million in 1988. Net earnings were $104.7 million a decrease of $8.6 million from $113.3 million. Net earnings were $2.55 per share, compared with $2.72.

Also affecting sales and earnings during the year was an estimated $18 million in inventory consigned rather than sold to new dealers. Consignments, an important dealer recruiting tool, reduce the capital requirements and fixed costs of dealer start-ups.

Sales from international and U.S. industrial segments offset the soft sales in the United States dealer-served market. International sales improved 16.2 percent for the year, led by a gain of 17.4 percent in Canada.

International sales outside this largest market benefited from strong improvements from the comapny's two-year-old operation in Australia and from its distributor in Japan.

U.S. industrial sales improved 5.8 percent for the year, and were aided by major government contracts, the expansion of the industrial sales force, and new products for industrial applications.

Gross profit margins for the year slipped 1.1 percentage points to 49.4 percent, due to the more rapid sales growth of lower margin products such as electronic test equipment, power-assisted tools, and tool storage units.

Operating expenses increased to 30.6 percent of sales from 29.2 percent, due to reduced unit sales volume coupled with the additional costs related to developing new marketing programs including the support of the company's our newer businesses in Australia and The Netherlands.

Snap-on Tools Corp. (NYSE:SNA) is the world's largest manufacturer and distributor of hand tools, storage units, electronic test equipment, and power-assisted tools for professional mechanics.

#90031b0741 01/31/1990 ~Business Wire

SOUTH NORWALK, CT (JAN. 31) BUSINESS WIRE - The Union Corp. (NYSE:UCO) announced Wednesday its revenues and earnings for the second quarter and six months ended Dec. 31, 1989.

Operating revenues for the second quarter were $16,322,000 compared to $13,597,00 reported for the second quarter of fiscal 1989, an increase of 20 percent.

Income from continuing operations after income taxes and before extraordinary item was $1,779,000, or 23 cents per share, vs. $468,000 or 6 cents per share last year. Net income (after extraordinary item and discontinued operations) was $1,779,000, or 23 cents per share compared with $1,994,000, or 28 cents per share in the prior year.

Net income for the second quarter ended Dec. 31, 1988 included income from discontinued operations of $759,000 (net of tax), or 11 cents per share, related to the results of operations of the GichnerSystems Group.

Net income for the second quarter ended Dec. 31, 1988 also included an extraordinary tax credit of $767,000, or 11 cents per share, which resulted from the utilization of tax loss carryforwards. The company had no tax loss carryforwards remaining subsequent to June 30, 1989.

Interest income increased $263,000 and $843,000 for the second quarter and six months ended Dec. 31, 1989, respectively, compared to the prior year periods. These increases were due to higher average short-term investment balances which primarily resulted from the cash received from the sale of the Gichner Systems Group in fiscal 1989.

The company provides accounts receivable management and debt collection services on a fixed rate and contingency fee basis to a wide range of institutional, commerical and government customers through its Transworld Systems Inc., and Capital Credit Corp. subsidiaries.

BOSTON (JAN. 31) BUSINESS WIRE - Keane Inc. (AMEX:KEA) reported unaudited earnings and revenues Wednesday for the fourth quarter and fiscal year ending Dec. 31, 1989.

Revenues for the fourth quarter were $23,644,000. Pretax income rose to $1,594,000, and net income rose to $948,000, or 36 cents-(a) per share, an increase of 19 percent, from $798,000 and 32 cents-(b) per share last year.

Revenues for the year 1989 were $77,196,000, up 29 percent from $60,038,000 a year ago. Pretax income for the year 1989 increased to $6,015,000 vs. $4,832,000 a year ago, and net income rose to $3,557,000, or $1.37-(a) per share, up 24 percent as compared to $2,866,000, or $1.12-(b) per share a year ago.

According to company President John F. Keane, ''The increase in revenues and earnings is the result of a growing market for the company's services and Keane's continuing strategy to acquire smaller information services companies.''

Keane Inc. is a $77 million company which designs, develops, and maintains business application software for Fortune 1000 corporations and hospitals. Headquartered in Boston, the company markets its services through a network of 22 branch offices located in major metropolitan offices.

#90031b0748 01/31/1990 ~Business Wire

DALLAS (JAN. 31) BUSINESS WIRE - Southwest Airlines' (NYSE:LUV) net income for the fourth quarter ended Dec. 31, 1989, was $8.1 million, down 49.5 percent from the fourth quarter 1988 earnings of $16.1 million, and represents earnings per share of 27 cents compared to 51 cents reported in the fourth quarter of 1988.

The decrease in net income is principally attributable to a 37 percent increase in jet fuel cost per gallon in fourth quarter 1989 and the inclusion of $4.2 million of nonoperating gains in fourth quarter 1988.

Revenues for fourth quarter 1989 increased 13.2 percent to $255.6 million compared to $225.8 million for fourth quarter 1988. The increase in revenue is primarily attributable to a 5.5 percent increase in revenue passenger miles (RPMs) and a 6.7 percent increase in passenger revenue yield per RPM. The load factor declined 2.8 points, from 61.5 percent to 58.7 percent.

Operating expenses for fourth quarter 1989 increased 18.1 percent to $241.3 million, or $.0638 per available seat mile (ASM), compared to $204.4 million, or $.0598 per ASM for fourth quarter 1988. The 18.1 percent increase in expenses is primarily attributable to the 37.0 percent increase in jet fuel cost per gallon and increases in various maintenance costs.

Southwest Airlines' net income for the year 1989 was a record $71.6 million ($2.37 per share) compared to $58.0 million ($1.84 per share) for 1988, an increase of 23.5 percent. Revenues increased 18.0 percent in 1989 to $1.015 billion from $860.4 million in 1988 due primarily to a 20.9 percent increase in RPMs in 1989.

The increase in passenger traffic exceeded the 11.2 percent increase in ASMs, resulting in a 5.0 point increase in passenger load factor from 57.7 percent to 62.7 percent. As compared to 1988, the 1989 traffic increases were in part achieved by incrementally carrying a greater proportion of lower-yielding leisure class passengers, resulting in a slight decrease in the passenger revenue yield per RPM of 2.8 percent to $.1049.

Operating expenses increased 18.5 percent in 1989 to $917.4 million from $774.5 million in 1988. This represents an increase in operating expenses per ASM of 6.5 percent to $.0620 due primarily to increaes in jet fuel and maintenance costs. Both 1989 and 1988 were favorably affected by nonoperating gains.

ATLANTA (JAN. 31) BUSINESS WIRE - Advanced Telecommunications Corp. (NASDAQ/NMS:ATEL) Wednesday announced earnings for the third fiscal quarter ended Dec. 31, 1989.

All financial results have been restated to reflect the pooling of interests accounting method used to report the acquisition of Galesi Telecommunications Inc. (GTI) in November 1989.

Revenues for the three month period ended Dec. 31, 1989, were $82.2 million compared with $63.1 million for the like period last year, an increase of 30 percent. Net income was $5.2 million compared with $5.9 million for the year-earlier period.

The reduction was due primarily to a $1.9 million charge for acquisition costs and the impact of an increased effective income tax of 43.1 percent compared to 28.5 percent for the prior year.

For the nine months ended Dec. 31, 1989, revenues were $249 million compared with $181 million for the like period last year. Net income was $17.6 million compared with $17.2 million a year ago.

ATC, headquartered in Atlanta, is one of the largest, publicly held long distance carriers in the United States. It provides domestic and international long distance telephone services to business and residential customers in the Southwest and Southeast regions of the country.

The company's strategy has been and continues to be one of strengthening its position as one of the country's leading regional long distance carriers.

BURLINGTON, MA (JAN. 31) BUSINESS WIRE - Semicon Inc. (NASDAQ:SEME) announced today a net loss for the second quarter ended Dec. 31, 1989 of $527,000 from net sales of $2,516,000.

In the same quarter last year, Semicon reported net income of $644,000, or 22 cents per share, on sales of $3,981,000, including an extraordinary gain of $100,000, or 3 cents per share, from the repurchase of debentures.

For the first half of fiscal 1990, the loss was $221,000 on net sales of $4,901,000, compared to net income of $842,000, or 28 cents per share, from sales of $7,870,000 in the like period last year. Results for the first three months of fiscal 1990 included a gain of $820,000 on the sale of real estate.

Semicon's backlog of unfilled orders at Dec. 31, 1989 was $5,070,000 compared to $5,400,000 at Dec. 31, 1988.

Semicon Inc. through its operating subsidiary, Semicon Components Inc., is a leading supplier of rectifiers, zener diodes, transient voltage suppressors and custom assemblies for the military-aerospace, computer and telecommunications markets.

#90031b0768 01/31/1990 ~Business Wire

NEW YORK (JAN. 31) BUSINESS WIRE - National Fuel Gas Co. Wednesday announced earnings of $24,398,000 or 86 cents per common share for the first quarter of fiscal 1990.

The quarter ended Dec. 31, 1989. This compares to $19,324,000 or 74 cents in fiscal 1989. Share amounts reflect a greater number of shares outstanding incurrent periods resulting mainly from the sale of 2 million shares of new common stock in March 1989.

Revenues for the quarter were $291,061,000 this year compared to $251,462,000 last year.

The 12 month period ended Dec. 31 produced earnings of $57,494,000 or $2.07 per share compared to $47,009,000 or $1.81 per share a year ago.

Although he was optimistic about the first quarter's earnings, Bernard J. Kennedy, chairman, president and chief executive officer of National Fuel Gas Co., cautioned that the weather in January has been extremely warm.

''While the weather normalization clause in our New York utility area will help to alleviate the impact, there can be no doubt that this warm weather will have a negative effect on the second quarter's earnings.''

He continued, ''The improvement in first quarter earnings is largely a reflection of the vagaries of weather. While to date the winter of 1989-90 has been only 9 percent colder than the winter of 1988-89, the first quarter months of October-December were 17 percent colder and then were offset by a January which was 9.5 percent warmer.

''Much of the weather-sensitive increase in earnings was lost in January; however, there were fundamental improvements in each of our business segments.''

Earnings from pipeline operations were up mainly because of increased sales and transportation of natural gas coupled with a rate increase that was effective July 1. Wholesale sales to nonaffiliates increased by 2 BCF and transportation for nonaffiliates increased 1.9 BCF.

Also, the utility subsidiary had a rate increase effective in New York on July 22 plus an increase in sales beyond what would be expected from the effect of the cold weather.

Kennedy noted that the business strategy of diversification within the natural gas industry is having a positive impact on the company's performance.

''We are not as dependent as we once were on utility sales which can be dramatically impacted by the local economy and area weather conditions. We are continuing to develop our off-system markets for sales, transportation and storage service and also to emphasize the acquisition and development of oil and gas reserves.''

National Fuel's earnings report represents the total performance of National Fuel Gas Co. and its subsidiaries including National Fuel Gas Supply Corp. (oil and gas production, pipeline, and natural gas storage), National Fuel Gas Distribution Corp. (utility), Penn-York Energy Corp. (natural gas storage), Seneca Resources Corp. (exploration and production) Empire Exploration Inc. (exploration and production), and Utility Constructors Inc. (pipeline construction and well-drilling and service).

TALLAHASSEE, FL. (JAN. 31) BUSINESS WIRE - Education Commissioner Betty Castor presented her top education awards Wednesday to Harris Corp. of Melbourne, Fla., and C.V. Williams, Director of Information Technology Programs for Harris, for outstanding contributions to education, at the 10th Annual Florida Educational Technology Conference in Daytona Beach.

''Harris Corp. supports education in a myriad of ways, and is committed to the critical need of developing and using technology in education to better teach our children,'' said Castor.

The Commissioner's Award of Excellence for leadership in education was presented to Harris Corp. for their support of educational technology, and continuing support of C.V. Williams' involvement in educational technology.

In addition, Harris Corp. was cited for their outstanding business partnerships with Brevard County Schools. The corporation works closely with the school district to provide teachers' seminars, together with scholarships and work-study opportunities for outstanding students from area high schools.

C.V. Williams was honored by the Commissioner for his current leadership in serving on the Florida Model Technology Schools Consortia Planning Committee. In addition, he is sub-committee chairman for Mainland High School Model Technology School in Daytona Beach.

''C.V. Williams is committed to the future of this state and to the development of technology necessary to move Florida into the 21st century '' said Castor.

The awards were presented at an early morning ceremony at the Daytona Beach Marriott Hotel, where the conference will continue until Feb. 2.

#90031b0779 01/31/1990 ~Business Wire

CAMBRIDGE, MA (JAN. 31) BUSINESS WIRE - Lotus Development Corp. Wednesday announced that it will extend its 1-2-3 Perfect Fit Offer through Dec. 31, 1990.

The offer entitles customers who purchase or upgrade to 1-2-3 Release 3 or 1-2-3 Release 2.2 to a $100 rebate directly from Lotus if they buy Freelance Plus 3.01 or Manuscript 2.1. The offer is valid for any

purchases made between June 15, 1989 and Dec. 31, 1990. All coupons marked ''Offer valid through Dec. 31, 1989'' will be honored through Dec. 31, 1990.

Lotus' 1-2-3 Perfect Fit Offer, which began in July of 1989, was designed to offer customers who upgrade to or buy either of the new versions of 1-2-3 an opportunity to purchase Freelance Plus and Manuscript at a substantial savings. The 1-2-3 Perfect Fit Offer was originally scheduled to expire on Dec. 31, 1989.

''Strong response to the original program combined with an increased customer interest in Freelance Plus' and Manuscript's unique links to 1-2-3 have motivated us to extend the offer,'' said Woody Benson, Lotus' director of reseller marketing.

''Freelance Plus and Manuscript are outstanding products in the business graphics and document processing categories, respectively, as well as the best choices in those categories for 1-2-3 users. In addition, the offer makes the products' superior levels of functionality and integration available at one of the most cost-effective price points possible.''

Freelance Plus 3.01, Lotus' top-rated business graphics software package, offers users full-featured charting and drawing capabilities, complete presentation tools and the ability to easily create a wide range of business graphics with a minimum investment of time. In addition, it provides the best fit with 1-2-3 of any PC-based business graphics package.

According to PC World, ''Freelance Plus fits hand in glove with 1-2-3. You can hotlink charts, specify ranges for several data types, and even view a 1-2-3 worksheet (without leaving the product).'' The product has recently received the number-one rating in independent, competitive software evaluations conducted by PC World, Software Digest Ratings Report Infoworld, PC Week and Publish!.

Manuscript 2.1, Lotus' advanced word processing software program, allows users to import spreadsheet data from 1-2-3 and graphics from either 1-2-3 or Freelance Plus directly into their documents. Manuscript's ''hot-linking'' feature updates spreadsheet data or graphics that have changed in 1-2-3, insuring accruacy of data in documents.

To receive a rebate check, customers must purchase or upgrade to 1-2-3 Release 3 or 1-2-3 Release 2.2 and buy a copy of Freelance Plus 3.0/3.01 or Manuscript 2.1 by Dec. 31, 1990. Customers who purchased Freelance Plus 3.0 or Manuscript 2.1 after June 15, 1989, are eligible for the rebate, as are customers who receive a free upgrade to 1-2-3 Release 3 and 2.2.

The original proof-of-purchase coupons from the Freelance Plus 3.0/3.01 or

Manuscript 2.1 packages must be returned to Lotus along with the reseller sales receipts and their rebate certificates (included in both versions of 1-2-3). Corporations may submit coupons in bulk with a copy of a purchase order a sales receipt. Lotus will then issue customers a check for $100 per completed coupon pair.

Lotus Development Corp. is the leading developer of applications software for personal computers and the leading provider of information services delivered on compact disk.

CLIFTON and LIVINGSTON, NJ (JAN. 31) BUSINESS WIRE - Valley National Bancorp (''VNB'') and Mayflower Financial Corp. (''MFC''), announced Wednesday that they have signed a letter of intent providing for the acquisition by VNB of all the issued and outstanding shares of the common stock (1.15 million) of MFC.

Upon consummation of the proposed transaction, MFC's wholly owned thrift subsidiary, Mayflower Savings Bank, SLA, would be operated as a separate subsidiary of VNB.

Under the terms of the proposed transaction, each share of MFC would be converted into the right to receive $15.75 cash plus a fraction of a warrant (.3605 warrants per share) to purchase VNB common stock at an exercise price of $27.50 per share for a period of five years.

The warrants are intended to have, as of the date of the letter of intent, a value of $1.25 per MFC share. However, there can be no assurance as to the market value of the warrants.

Gerald Lipkin, vice chairman and chief executive officer of VNB, said, ''Mayflower Savings is a well managed and profitable institution which fits precisely with our acquisition strategy of broadening our franchise in attractive markets.

Norman Goldfarb, president and chief executive officer of MFC said, ''The proposed transaction with VNB will be advantageous to all of our constituencies - our shareholders, our employees, and the market that we serve. We bring to Valley a very strong customer following and a solid earnings record.''

The execution of a defintive agreement is subject to prior regulatory approval. Consummation of the transaction is subject to approval of a

definitive agreement by both boards of directors, the shareholders of MFC and approvals of New Jersey and federal regulators.

VNB is a bank holding company with assets with totaling $1.82 billion and shareholders' equity of $172 million on Dec. 31, 1989. VNB conducts a commercial and retail banking business primarily within Bergen, Passaic, Essex, Hudson and Morris counties, New Jersey.

MFC is the holding company of Mayflower Savings Bank, SLA, which has two branch offices in Livingston. As of Dec. 31, 1989, MFC had total assets of $122.7 million and shareholders' equity of $17.5 million.

#90031b0784 01/31/1990 ~Business Wire

NEW YORK (JAN. 31) BUSINESS WIRE - General American Investors Co. Inc., a publicly traded investment fund listed on the New York Stock Exchange (GAM), Wednesday reported total net assets as of Dec. 31, 1989, of $381,932,574, as compared with $301,791,485 at Dec. 31, 1988.

Net asset value per share at Dec. 31, 1989, was $21.41, an increase of 34.8 percent for the year. Net asset value is after the deduction of dividends paid on Dec. 27, 1989, consisting of $1.46 per share from long-term capital gains realized during the period Jan. 1 - Oct. 31, 1989 and 22 cents per share from ordinary net income and short-term gain estimate for the full year 1989.

The net asset value per share at Dec. 31, 1988, was $16.98, after adjustment for that portion (5 cents per share) of the 1988 year-end dividends paid in February 1989.

The percentage increase indicated above is after adjustments for the capital gain distribution in 1989, the dilutive effect of issuance of shares in payment of dividends at market value (which was less than net asset value) and the beneficial effect of repurchases of shares of the company's common stock at market value (at a discount from net asset value) and to exclude the 1989 undistributed income.

In its 1989 annual report, the company recorded investment and other income - net for the year of $3,370,927, a decrease of 31 percent from 1988.

The drop was due to a reduction in advisory fee revenues resulting from a

decline in the number of outside client accounts, partially offset by an increase in interest income attributable to higher interest rates on short-term investments.

As indicated in the report, on Jan. 10, 1990, General American Investors declared an income dividend of 1 cent per share, representing a distribution of the balance of the income earned in 1989 and not distributed in that year, and, in addition, a distribution of 10 cents per share from long-term capital gains realized during the period Nov. 1, 1989 through Dec. 31, 1989.

General American Investors and its wholly owned subsidiary, General American Advisors Inc., are registered investment advisers and provide investment management services to corporate and public pension plans and to endowment funds of educational institutions.

#90031b0785 01/31/1990 ~Business Wire

BOSTON (JAN. 31) BUSINESS WIRE - Consolidated earnings of Eastern Utilities Associates (NYSE:EUA) for the 12 months ended Dec. 31, 1989, were $40.9 million, or $2.95 per share, on operating revenues of $408.6 million, President and Chief Executive Officer Donald G. Pardus, announced Wednesday.

This compares with consolidated earnings of $37.5 million, or $2.85 per share, on operating revenues of $374.1 million for the comparable 12 months a year earlier.

Earnings for the fourth quarter of 1989 of $11.1 million, or 75 cents per share, were higher than the $8.7 million or 66 cents per share during the same period of 1988.

Per share earnings for 1989 were impacted by the issue of an additional 1.5 million common shares in October.

According to Pardus, consolidated earnings for 1989 increased primarily as a result of the increase in the non-cash Allowance For Funds Used During Construction (AFUDC) associated with our 15 percent ownership interest in the Seabrook nuclear project. In addition, increased sales of electricity and new rates charged by our Massachusetts retail subsidiary since January 1989, had a positive impact on earnings.

He also noted that deferral from earnings of a portion of AFUDC continued to impact EUA's earnings figures. As mandated by Financial Accounting

Standards No. 90, the deferral of AFUDC totaled $27.4 million or $1.93 per share for the 12 months ended Dec. 31, 1989.

EUA is a Boston-based investor-owned holding company whose shares are traded on the New York and Pacific Stock Exchanges. Subsidiaries are Blackstone Valley Electric Co., Eastern Edison Co., EUA Cogenex Corp., EUA Energy Investment Corp., EUA Ocean State Corp., EUA Power Corp., EUA Service Corp. and Montaup Electric Co. Together, the companies are known as the EUA System.

PLAINFIELD, NJ (JAN. 31) BUSINESS WIRE - BARRINGER RESOURCES INC. (BRI) (NASDAQ: BARR) Wednesday announced they have signed a letter of intent to acquire Intex Inc., of Laurel, Md. The founder of Intex Inc. using BARRINGER technology was the largest supplier of the walkthrough metal detectors found in U.S. airports. It also supplied such devices for White House security as well as other government buildings and many public places.

Intex, has developed unique non destructive test instruments for detection of microscopic cracks in aircrafts. Such cracks are a major cause of many plane disasters, including the recent one that happened in Iowa. The Intex system is used by Bendix, Rolls Royce and other aircraft service companies. Intex will also act as the U.S. agent and distributor for Ionscan products.

BARRINGER RESOURCES INC., also announced today that they have received three important contracts from the Canadian government, the United Kingdom and the United States for the application of its Ion Mobility Spectrometer (Ionscan) for chemical warfare agent detection and measurement, and for future development of its Laser Fluorosensor system for the environmental monitoring of offshore oil spills. This system will be the first step in the construction of an environmental catastrophe response network to be used in such accidents as the Exxon Valdez oil spill. These contracts total in excess of $500,000.

Stanley Binder, President of BARRINGER RESOURCES INC. stated, ''These contracts are of great significance and gives confirmation to the fact that we are in the forefront in the development of important products to meet major problems of the environment, terrorism and drug trafficking through detection of heroin and cocaine and various types of explosives including plastiques.''

MELBOURNE, FL. (JAN. 31) BUSINESS WIRE - Harris Corp. this week hosted the X/Open Technical Managers Meeting, a three-day meeting of senior technical managers from 20 of the world's largest computer manufacturers.

The technology experts represent the members of X/Open, an international consortium dedicated to open computing environments based on international standards. The X/Open 20 member companies are based in the United States, Britian, France, Italy, The Netherlands, West Germany and Japan.

The meeting,, which ran from Jan. 29 through Jan. 31, will set the technical agenda for X/Open in 1990, determining activities of various working groups.

X/Open's corporate members are computer manufacturers who work closely with major users of computers and with software vendors through user and independent software vendor councils. Harris Corp. is a member of the X/Open User Council.

Herbert N. McCauley, Harris vice president - information management, said, ''We are pleased to be the first member of the User Council to host a technical manager meeting of X/Open. Harris is honored to be part of the international standards setting process being achieved through an open exchange of information among vendors.''

Harris Corp., with worldwide sales of more than $3 billion, is focused on four major businesses: advanced electronic systems, communications, semiconductors, and an office-equipment distribution network.

JACKSONVILLE, FL (JAN. 31) BUSINESS WIRE - The Koger Partnership Ltd. reported gross rents of $31,379,000 for the year ended Dec. 31, 1989, up from $30,397,000 for the comparable period last year.

Cash flow from rents was $16,785,000 for 1989, compared to $16,402,000 for

1988. For the quarter ended Dec. 31, 1989, cash flow from rents was $4,379,000, compared to $4,336,000 for 1988.

During the quarter, the Partnership purchased a fully leased office building from the Managing General Partner, Koger Properties, for an appraised fair market value of $6 million. The building is located in Koger's office park in Miami.

The Partnership now owns 88 office buildings in five cities: Miami and Tampa, Fla.; Raleigh, N.C.; and Richmond and Norfolk, Va. These properties are 96 percent leased.

Distributions paid for the quarter were $14.00 per unit.

The Koger Partnership Ltd., a Florida limited partnership, has 4,300 partners.

BEDMINSTER, NJ (JAN. 31) BUSINESS WIRE - NUI Corp. (NYSE:NUI) Wednesday reported net income for the three months ended Dec. 31, 1989 of $6,159,000 or $1.02 per share.

This compares with income a year ago of $4,129,000, or 84 cents per share, excluding a one time change in accounting for unbilled revenues.

Operating revenues for the quarter rose 28 percent from $68.7 million in the year ago quarter to $88.1 million.

John Kean, NUI president, said, ''Both of our divisions are reporting record revenues and earnings for the quarter due to the unusually cold weather experienced both in New Jersey and Florida. In addition, customer growth on both systems improved operating results.

''I am particularly pleased to report that increased activity in the New Jersey cogeneration market has had a marked increase on long term gas sales as well.''

NUI Corp., headquartered in Bedminster, is an exempt public utility holding company engaged in the distribution of natural gas to approximately 300,000 customers in New Jersey and Florida.

ENGLEWOOD, CO (JAN. 31) BUSINESS WIRE - Nu-West Industries Inc. (NASDAQ: FERT) announced Wednesday the sale of its subsidiary, Nu-Gulf Industries Inc. to Gulf Atlantic Corp. for approximately $17 million in cash, debt assumption and long-term notes.

The principal assets of Nu-Gulf are a phosphate rock mining operation, a beneficiation plant and a long-term lease for related dock facilities in Manatee County, Fla.

Compensation for the sale of the stock included $13.5 million in subordinated long-term notes. In addition, Gulf Atlantic through its newly acquired subsidiary has indemnified Nu-West for all reclamation obligations at the mine and will continue the port lease.

Gulf Atlantic is a new company formed by Harry Risinger, president and chief executive officer, and other investors. Risinger was previously CEO of Seminole Fertilizer Corp., which operated a fertilizer production facility in Polk County, Fla.

Nu-West also disclosed that recent negotiations toward the sale of another subsidiary, Nu-South Industries Inc. have been unsuccessful. The company has continued to discuss the potential sale of Nu-South with interested parties although no substantive offers are pending.

The company restated its objective of limiting future financial risk to Nu-West, particularly in light of senior lender restrictions on cash advances to its Gulf Coast subsidiaries, and is considering its options, including bankruptcy protection for Nu-South. Nu-West confirmed that it plans to resolve the future of its's Nu-South subsidiary soon.

''The sale of Nu-Gulf and a resolution of the status of Nu-South will allow Nu-West to focus on its core business and to strengthen its successful phospate fertilizer operation in Conda, Idaho,'' said Craig Harlen, president and chief executive officer of Nu-West.

Nu-West is engaged in the manufacture and sale of phospate fertilizer products.

#90031b0813 01/31/1990 ~Business Wire

LA BELLE, FL. (JAN. 31) BUSINESS WIRE - Mr. B.H. Griffin Jr., chairman of Alico Inc., a La Belle, Fla. agribusiness company announced that net earnings for September-November 1989, the first quarter of the 1990 fiscal year, were $410,000 or six cents per share compared to $1.2 million or 17 cents per share for the like quarter a year ago.

Total revenues for the period were $3.7 million compared to $5.0 million for the like quarter a year ago.

Stockholders' equity at the end of November was $44.5 million compared to $41.1 million a year ago.

Griffin stated that the reduced revenue for the first quarter of the fiscal year resulted from fewer citrus sales at lower prices than occurred during the like quarter last year. The volume of citrus available for sale during the quarter was less than the prior fiscal year's first quarter due to the freezing weather which occurred during February 1989.

The timing of the freeze reduced the developing citrus for the 1989-90 crop. Prices were lower during the quarter as a result of expected increased imports of orange juice from Brazil. Griffin noted that subsequent to the end of the quarter, the Florida citrus industry experienced a freeze during the period of Dec. 24-25, 1989.

''It is premature to estimate the impact of the recent freeze,'' Griffin stated. ''A number of months must pass before an accurate evaluation of the freeze's impact on the Company's groves can be made. Alico is

fortunate in that approximately one-half of our citrus groves are located in South Florida and experienced very little damage during the recent freeze.

''Furthermore, if we do not have any additional freezing weather this winter, we can expect a good crop next year from the groves which received damage during the recent freeze.''

#90031b0831 01/31/1990 ~Business Wire

LEXINGTON, MA (JAN. 31) BUSINESS WIRE - Lexington Savings Bank (NASDAQ:LEXB) Wednesday announced its fourth quarter and year-end results.

Net income for the year ended Dec. 31, 1989, was $455,000, or 20 cents per share, a decrease of $717,000, or 61 percent from 1988 net income of $1,172,000, or 51 cents per share. For the fourth quarter net income was $66,000, or 3 cents per share, in comparison to $270,000, or 12 cents per share, for the comparable 1988 period.

Operating results for both the year ended Dec. 31, 1989, and the fourth quarter was negatively impacted by a continuing deterioration in the real estate market. For the year the provison for possible loan losses was $1,285,000 vs. $216,000 in 1988, and for the fourth quarter the provision was $275,000 vs. $14,000 in 1988.

William Gothorpe, president of Lexington Savings Bank, stated, ''The increases in provisions for loan losses only seems prudent in light of the uncertainty associated with the current real estate market.'' Nonperforming assets at Dec. 31, 1989 amounted to $11.1 million compared to $5.0 million at year end 1988.

Other operating income for 1989 was $445,000 compared with $253,000 reported in 1988. Other operating income reflects write-downs of other real estate owned of $407,000 in 1989 and $113,000 in 1988. The increase in other operating income is chiefly due to gains on sales of loans of $214,000, higher fee income and securities transactions which produced a net gain of $38,000 for 1989 vs. a $171,000 net loss in 1988.

For the year ended Dec. 31, 1989 other opeating expenses were $4,932,000 vs. $5,018,000 reported for 1988. The decrease in operating expenses is attributed to on-going containment measures instituted by management during the year.

Total assets at Dec. 31, 1989 were $222.6 million versus $234.9 million at Dec. 31, 1988. As of Dec. 31, 1989 total loans amounted to $170.0 million and total deposits were $184.6 million compared with $187.9 million and $194.4 million at Dec. 31, 1988, respectively. Book value

per share at Dec. 31, 1989 was $15.03 versus $15.25 per share at Dec. 31, 1988.

Lexington Savings Bank is a FDIC/DIFM insured, full-service financial institution servicing the suburban Boston metropolitan area.

SOUTHBOROUGH, MA. (JAN. 31) BUSINESS WIRE - Bytex Corp., based here, the leading supplier of network switching and control systems, reports a record year of revenues and earnings, fueled by its UNITY product lines.

The expansive growth -- which has taken the company from revenues of $34 million in 1988 to almost $40 million in 1989 -- is directly attributable to UNITY systems, unveiled in late 1988.

Since the introduction of the UNITY platform architecture and UNITY 50 Network Switching System in September 1988, Bytex has added an array of products to the line.

These additions include smaller remote switching systems, T1/CEPT trunk management with Digital Access and Cross Connect (DACS) capabilities and large channel switches. Also, new multi-vendor management capabilities were added as well as an exclusive linkage to IBM's NetView.

The UNITY 50 Network Switching System boasts a fully distributed, fault-tolerant architecture with a capacity of more than 4,000 ports. With a UNITY 50 System, no single point of failure will effect more than eight ports. The Extended Fiber Optic interface allows port concentration from front-end processors, modems and multiplexers to be up to 30,000 feet apart, or 5-1/2 miles, to serve campus and metropolitan areas.

Smaller UNITY 10 and UNITY 30 switches, for the first time, allow network operators to control remote data centers by extending benefits of centralized switching systems to the entire network.

A broad spectrum of remote test and monitoring capabilities, also introduced in 1989, will be capped off witb the ComNet introduction of the UNITY Test Facility (UTF). With UTF, Bytex will provide customized test functionality to manage remote data centers. Bytex has combined these features with the UNITY 10 Network Switch under its Remote Center Management (RCM) program. RCM assists data communications managers to monitor and control their distributed networks.

Bytex designs, manufactures, markets and supports fault tolerant electronic matrix switching systems and related data communications products. Bytex is the leading worldwide supplier with an installed base of more than 4,000 switches.

NEW YORK (JAN. 31) BUSINESS WIRE - Deepika Finch recently joined Fitch as an analyst in the Financial Institutions Group, announced Joseph J. Labriola, senior vice president.

In that capacity Finch will be involved in assessing the credit quality of banks, thrifts and financial companies.

Finch comes to Fitch after three years at Merrill Lynch & Co., Inc., where she was Senior Analyst for the Broker Dealer/Mortgage Banker Group. Her responsibility was analyzing credit at product, client, and industry levels.

Finch began her career as a pension administrator with Prudential Insurance Company of America. She later became an assistant analyst in Prudential's Treasury Division before moving to Donaldson, Lufkin & Jenrette Inc. as a financial analyst.

Finch earned an undergraduate degree in biology from Rutgers University and an M.B.A in finance from Fairleigh Dickinson University.

MONTGOMERY, AL. (JAN. 31) BUSINESS WIRE - Alfa Corp. (NASDAQ/NMS:ALFA) Wednesday announced results for the year ended Dec. 31, 1989.

Net income for 1989 was $22,856,363, compared with 1988 net income of $22,847,202, a slight increase of 0.1 percent. The earnings per share comparison was $1.09 versus $1.16, down 6.2 percent. Operating income for 1989, excluding net realized investment gains was $20,954,511, or $1 per share, compared with 1988 operating income of $21,524,186, or $1.10 per share.

Net income for the fourth quarter of 1989 was $3,347,867, or 16 cents per

share, compared with 1988 fourth quarter net income of $6,655,429, or 32 cents per share. Operating income before realized investment gains or losses for the fourth quarter of 1989 was $3,625,076, or 17 cents per share, compared with fourth quarter 1988 operating income of $6,553,559, or 31 cents per share.

Commenting on the results, Alfa Corp.'s President, Goodwin L. Myrick, said: ''The past year will be remembered for its devastating weather. Claims from the April tornadoes and hail in Central Alabama were $3.6 million, the Huntsville and Decatur tornado and hail claims in November were $5.1 million and claims from the record freeze in late December were $1.3 million for a total of $10 million in catastrophe claims in 1989.

''After reinsurance recoveries and taxes, the net cost was $4.6 million, or 22 cents per share. We at Alfa are proud to have had the opportunity to assist the people of Alabama in recovering from these catastrophes.

''These catastrophic losses overshadowed an otherwise normal year of progress for Alfa. The performance of Alfa's entire organization during a very difficult 1989 gives us great confidence in the future of our Company. Alfa finished 1989 with a strong balance sheet and equity position. We fully expect to resume a pattern of consistent earnings improvement in 1990,'' Myrick concluded.

Alfa Corp. is engaged in insurance and financial activities through its subsidiaries.

STAMFORD, CT. (JAN. 31) BUSINESS WIRE - CUC International Inc. (NYSE:CU) announced Wednesday that during the fourth quarter ended Jan. 31, 1990 it had paid $20.3 million of the $100 million loan facility used to finance the company's recapitalization last June.

CUC's outstanding balance on the loan facility with General Electric Credit Corp. as of Jan. 31, 1990 was $57 million.

The fourth quarter payments of $20.3 million exceeded the mandatory quarterly installment payment of $1.5 million by $18.8 million.

Walter A. Forbes, chairman and CEO of CUC International, said, ''In the last two quarters of fiscal year 1990, because of our strong operating cash flow, we were able to reduce our recapitalization debt by $29.7 million, or $26.7 million more than mandatory payments.

''This very favorable cash generation is the direct result of a larger portion of our membership base renewing memberships in our various services. This trend should lead to further significant reductions in our recapitalization debt in the coming year.''

The loan facility, from General Electric Credit Corp., expires on June 1, 1994 and was initiated June 6, 1989 to finance the recapitalization approved by shareholders on May 25, 1989.

CUC International is a leading membership services company, providing more than 13 million consumers with access to a variety of services including home shopping, travel, insurance, auto, dining, checking account enhancements, and extended warranties.

#90031b0841 01/31/1990 ~Business Wire

DOVER, NH (JAN. 31) BUSINESS WIRE - Seacoast Savings Bank (NASDAQ:SSBA), a $110 million savings bank in Dover, Wednesday reported a loss for the second quarter ending Dec. 31, 1989, of $940,000, or 79 cents per share, as compared with a profit of $27,000, or 1 cent per share, for the quarter ended Dec. 31, 1988.

The loss for the six months ended Dec. 31, 1989, was $926,000, or 77 cents per share, which compares to a profit of $276,000, or 23 cents per share, for the six months ended Dec. 31, 1988. The loss is the direct result of a provision to loan loss reserves of $1.2 million in the second quarter. As of Dec. 31, 1989, the loan loss reserves totaled $1.7 million, or 1.75 percent of total loans outstanding.

The provision was made as part of the bank's ongoing internal review of its loan portfolio and reflects the current level and composition of non-performing assets in view of prevailing economic conditions. Non-performing assets amounted to $3.9 milion, or 3.5 percent of total assets, at Dec. 31, 1989, up slightly from $3.6 million at Sept. 30, 1989.

John T. Guy, president and CEO of the bank, noting the well-publicized and continuing softness of the New England real estate market, reported, ''Since June 30, 1989, the end of the last fiscal year, the bank has doubled its loan loss reserves. We feel that the $1.2 million increase in reserves and the resulting 44 percent coverage of reserves to non-performing assets to be both conservative and appropriate given today's economic climate.''

Guy further stated that the focus of the company's strategy would remain on increasing liquidity while closely monitoring loans and controlling overhead expenses until favorable economic trends are evident.

Guy concluded by noting that, after the increase in the provision for loan losses, the total stockholders' equity ratio of 12.9 percent of total assets puts the bank in a strong position during these difficult times.

Seacoast Savings Bank is an FDIC-insured financial institution headquartered in Dover.

#90031b0846 01/31/1990 ~Business Wire

BOSTON (JAN. 31) BUSINESS WIRE - The Pioneer Group, Inc. (NASDAQ:PIOG), advisor to the Pioneer Mutual Funds and other accounts, Wednesday reported fourth quarter 1989 earnings of 61 cents per share, a 13 cents per share or 27% increase over fourth quarter 1988 earnings of 48 cents. Fourth quarter 1989 revenues of $15.5 million exceeded the fourth quarter 1988 revenues of $13.9 million by $1.6 million or 11% primarily reflecting increased investment management fees.

The Company reported earnings of $2.32 for 1989, 5 cents per share or 2% higher than 1988 earnings of $2.27. Revenues of $60.7 million in 1989 were $5.6 million or 10% higher than revenues of $55.1 million in 1988 again reflecting increased investment management fees. The Company decreased the valuation of its venture capital investment portfolio by 5 cents per share in 1989 as compared to a 17 1/2 cents per share increase in 1988.

On January 22, 1990, the Company's Board of Directors declared a quarterly dividend of 20 cents per share, payable on March 15, 1990, to shareholders of record on March 1, 1990.

Net income for the fourth quarter of 1989 was $3.7 million versus $2.9 million for the fourth quarter of 1988. Net income for 1989 was $14.1 million versus $13.8 million for 1988.

On December 31, 1989, assets under management were $7.5 billion, an increase of $1.1 billion or 17% since December 31, 1988.

Mutual fund sales (including reinvested dividends) of $260 million in the fourth quarter of 1989 exceeded the fourth quarter of 1988 by 26%. Mutual fund sales of $834 million in 1989 exceeded the comparable 1988 period by 23%.

The Company's 90% owned subsidiary, Teberebie Goldfields, Ltd. (''TGL''), has made substantial progress toward the commencement of gold mining operations in Ghana. Mining has begun, with ore being laid on leaching pads, and gold production is scheduled to commence in the Spring. Although it is difficult to predict production during the start-up phase, at this time we estimate production during 1990 to be approximately 20,000 ounces of gold with no material impact on The Pioneer Group's earnings. However, we do expect production to eventually increase to an annual rate of 100,000 ounces, probably for the second half of 1991. Ongoing geological testing continues to increase the proven reserves on the TGL concession.

Through December 31, 1989, TGL had invested a total of $27 million in the development of mining operations which was funded by $18 million of TGL debt and $9 million of direct investment by the Company. The Company estimates that TGL will expend an additional $7 million in 1990 to complete the development phase of this project.

The increase in the project cost, compared to previous estimates, is primarily the result of TGL's decision to acquire its own equipment to perform the drilling, blasting, and hauling of ore. TGL had originally contracted for these services with a contractor which had agreed to provide approximately $10 million of necessary equipment, maintenance facility, and spare parts for such services, but following the untimely death of its principal, the contractor defaulted on its contract with TGL. After considering other mining arrangements, TGL decided to undertake these operations directly. Since it will not be paying fees for the contractor's services, TGL expects to recoup its additional capital expenditures from mining operations.

EL DORADO, AR (JAN. 31) BUSINESS WIRE - First United Bancshares Inc. (NASDAQ/NMS:UNTD) (''First United'') has reported amended and restated financial results for the year ended Dec. 31, 1989.

James V. Kelley, president and chief executive officer of First United announced Wednesday that previously reported financial results for the year ended Dec. 31, 1989, are being amended in order to reflect an additional provision of $0.7 million to First United's reserve for

possible loan losses.

President Kelley stated that ''subsequent to the release of First United's financial results, a certain credit in the loan portfolio experienced further deterioration with a portion of such credit deemed as uncollectible.

It is our opinion that the recognition of an additional provision for possible loan losses of $0.7 million will serve to insure that First United's financial condition and results of operations as of Dec. 31, 1989 are fairly stated.''

First United views the reserve for possible loan losses as a source of financial strength to provide for potential loan losses which in turn provides for more stable earnings. Additional provisions over and above the normal monthly provisions for 1990 are not anticipated at the present time.

Amended and restated financial results for the year ended Dec. 31, 1989, are as follows.

Net income for the year ended Dec. 31, 1989, was $6.2 million or $2.90 per share as compared to $6.9 million or $3.21 per share for the like period in 1988. During the fourth quarter of 1989, First United had net income of $1.6 million or 76 cents per share as compared to $1.8 million or 83 cents per share for the fourth quarter of 1988.

Total assets at the end of the period were $765.3 million as compared with $747.6 million at Dec. 31, 1988.

Stockholders' equity rose 7.14 percent for the 12 month period ended Dec. 31, 1989, to $61 million from $57 million.

Book value per share at Dec. 31, 1989, was $28.57 as compared with $26.67 at Dec. 31, 1988.

#90031b0854 01/31/1990 ~Business Wire
WOBURN, MA. (JAN. 31) BUSINESS WIRE - First Woburn Bancorp Inc., (NASDAQ:WOBS) Wednesday reported a net loss for the second quarter of fiscal 1990 of $2,552,000, or 80 cents per share.

In the second quarter of fiscal 1989, First Woburn reported net income of $298,000, or 8 cents per share.

For the six months ended Dec. 31, 1989, the company reported a net loss of $2,506,000, or 78 cents per share, as compared to net income of $1,290,000 or 34 cents per share, for the same period in the prior year.

Commenting on the results, Frank J. Porcaro, president and chief executive officer of First Woburn, said, ''The company's operating results for the quarter are attributable to a $2,058,000 provision for possible loan losses and a $356,000 loss on real estate development.''

Porcaro continued, ''During the quarter, loans on non-accrual status were transferred to real estate owned at an accelerated rate. The transfers of such properties net of specific loan loss reserves has resulted in a reduction in the overall loan loss reserve of approximately $4,000,000.''

Non-performing loans totaled $13,909,000, at Dec. 31, 1989, or 6.96 percent of total loans. The company's total real estate owned or substantively repossessed was $21,463,000 at Dec. 31, 1989. At the end of the second quarter, First Woburn's reserve for possible loan losses was $3,829,000.

Total assets at Dec. 31, 1989 were $302,635,000, as compared with $312,317,000 at Dec. 31, 1988. Stockholders' equity at Dec. 31, 1989 was $29,391,000, equivalent to $9.17 per share or 9.71 percent of assets.

First Woburn Bancorp is the holding company for Woburn Five Cents Savings Bank. Established in 1854, Woburn Five conducts operations through five full-service banking offices located in Middlesex County, Massachusetts.

STAMFORD, CT (JAN. 31) BUSINESS WIRE - Pitney Bowes Inc. Wednesday announced that it has reached an agreement to sell, for cash, its Data Documents Systems (DDS) subsidiary, to Graphic Technology Inc. (GTI).

Terms of the sale were not disclosed.

GTI, a maker of vinyl bar-coded shelf labels read by computerized scanning devices in retail operations, is based in Olathe, Kan.

DDS, based in Industrial Airport, Kan., produces high quality bar-coded shelf-labeling for retail, industrial, government and service industries.

Pitney Bowes officials said the decision to sell DDS was based on a long-term strategic analysis of investment priorities, and the compatibility of DDS's business with Pitney Bowes other businesses.

Pitney Bowes is a $2.6 billion multinational manufacturing and marketing company which provides mailing, shipping, copying, dictating and facsimile systems; item identification and tracking systems and supplies; mailroom, reprographics and related management services; and product financing.

#90031b0868 01/31/1990 ~Business Wire

GREENVILLE, S.C. (JAN. 31) BUSINESS WIRE - American Federal Bank (NASDAQ:AMFB) on Wednesday reported higher net income for 1989 of $4.1 million compared with $2.6 million for 1988.

The $4.1 million includes $412,000 for the fourth quarter compared to $558,000 in the like period a year ago.

Earnings per share for the period from Jan. 26 to Dec. 31, 1989, were 85 cents. Jan. 26, 1989, was the date the bank successfully completed its conversion to a stock savings bank. No comparable per share figure is applicable for 1988 because American Federal was not a stock company at that time.

Roy Abercrombie, president and chief executive officer of the bank, said, ''We are pleased with the bank's performance during its first year as a publicly held stock company. The proceeds from our stock offering enabled us to increase earning assets and contributed to $108.2 million in interest income during 1989, an increase of 13.2 percent over 1988.

''Higher market interest rates this year also contibuted to interest income. However, their impact on interest expense was even greater, resulting in net interest income of $30.1 million, an increase of 1.5 percent over the previous year.

''Our sale of 51,076 shares of Federal Home Loan Mortgage Corp. preferred stock in the second quarter resulted in an after tax gain of approximately $2.7 million. As a result, net income increased by $1.5 million over 1988, despite greater health care costs, increased goodwill amortization and higher income tax expense. The bank also increased its provision for

possible loan losses by $725,000 in 1989.

''At Dec. 31, 1989, deposits were $850 million, or $15.7 million higher than at the end of 1988. Loans receivable were $873.6 million, an increase of $81.0 million. This growth in loans demonstrates that we are committed to meet the steady growth of our primary market, the Upstate.

''The bank's equity at Dec. 31, under generally accepted accounting principles was $35.9 million. This represents a capital-to-assets ratio of 3.2 percent, and an increase of $25.5 million in capital since Dec. 31, 1988.''

Abercrombie said, ''During 1989, President Bush signed into law the Financial Institutions Reform, Recovery, and Enforcement Act (FIRREA) of 1989. This law revamped the insurance, supervisory and regulatory structure of the savings industry. Accounts previously insured by FSLIC are now insured by FDIC under a separate fund for savings institutions.

''FIRREA also significantly changed capital requirements for the savings industry,'' he said. ''There are three separate measurements: tangible capital, core capital and risk-based capital. Each focuses on different methods of assessing capital adequacy. With $35.9 million in equity, our current capital levels should be adequate for continued profitable operations,'' Abercrombie said.

''However, under FIRREA, which excludes goodwill from capital computations American Federal does not initially meet the new requirements. We have developed a business plan which provides for full compliance and submitted that plan to the Office of Thrift Supervision, the bank's chief regulator.''

American Federal, whose common stock is traded on the over-the-counter market under the NASDAQ symbol AMFB, has $1.1 billion in assets and 34 branch offices covering eight counties in the northwestern region of the state. It also owns Finance South, a consumer finance company with 26 branch offices through South Carolina.

#90031b0870 01/31/1990 ~Business Wire
SOUTHBOROUGH, MA (JAN. 31) BUSINESS WIRE - Bytex Corp., based here, the leading supplier of network switching and control systems, reports a record year of revenues and earnings, fueled by its UNITY product lines.

The expansive growth -- which has taken the company from revenues of $34

million in 1988 to almost $40 million in 1989 -- is directly attributable to UNITY systems, unveiled in late 1988.

''The introduction of UNITY,'' says George R. Kushin, Bytex vice president of marketing, ''has broadened Bytex beyond matrix switching and positioned it as the company that helps clients manage their growing and complex networks.''

Since the introduction of the UNITY platform architecture and UNITY 50 Network Switching System in September 1988, Bytex has added an array of products to the line.

These additions include smaller remote switching systems, T1/CEPT trunk management with Digital Access and Cross Connect (DACS) capabilities and large channel switches. Also, new multi-vendor management capabilities were added as well as an exclusive linkage to IBM's NetView.

The UNITY 50 Network Switching System boasts a fully distributed, fault-tolerant architecture with a capacity of more than 4,000 ports. With a UNITY 50 System, no single point of failure will effect more than eight ports. The Extended Fiber Optic interface allows port concentration from front-end processors, modems and multiplexers to be up to 30,000 feet apart, or 5-1/2 miles, to serve campus and metropolitan areas.

''The field proven reliability and broad functionality of UNITY 50 make it ideally suited to disaster recovery applications. UNITY 50 systems play a key role in the disaster recovery plans of companies much as AT&T, SIAC, Bank of America and VISA.''

Smaller UNITY 10 and UNITY 30 switches, for the first time, allow network operators to control remote data centers by extending benefits of centralized switching systems to the entire network.

A broad spectrum of remote test and monitoring capabilities, also introduced in 1989, will be capped off witb the ComNet introduction of the UNITY Test Facility (UTF). With UTF, Bytex will provide customized test functionality to manage remote data centers. Bytex has combined these features with the UNITY 10 Network Switch under its Remote Center Management (RCM) program. RCM assists data communications managers to monitor and control their distributed networks.

RCM systems have already been delivered to several clients, including a regional telephone company and a credit card service bureau.

Network management and control for the UNITY family is offered through both the company's own UNITY Management System (UMS) and the UNITY NetWork Link, which provides a unique host interface to IBM's NetView. UMS supports the entire range of UNITY switching and test products with

automated functionality, consolidates control of other vendors' equipment and provides a window into NetView through its 3274 emulation capability.

Through joint development with IBM, Bytex's UNITY NetWork Link leads the industry to offer true bi-directional control and integration with NetView. ''Network managers particularly like the ability to fully automate network restoration using C-Lists which directly control UNITY 50.

''From our clients' prospective, the most significant aspect of the UNITY architecture is the investment protection it offers. UNITY ensures clients a path toward future functionality, and we have provided full upgrade capabilities for our extensive installed base. We've even extended the UNITY NetWork Link capability to the original AS240 matrix switches via a UNITY 30 upgrade program.''

Looking back on 1989, Kushin reflects, ''UNITY was developed in response to our clients' needs. We are gratified with its enthusiastic reception in the marketplace.''

Bytex UNITY products are being displayed and demonstrated at ComNet '90 now through Feb. 8 in Bytex Booth No. 1320.

Bytex designs, manufactures, markets and supports fault tolerant electronic matrix switching systems and related data communications products. Bytex is the leading worldwide supplier with an installed base of more than 4,000 switches. According to International Data Corp., Bytex has approximately 36 percent of the U.S. market. Bytex is traded on the NASDAQ National Market System under the symbol BYTX.

#90031b0874 01/31/1990 ~Business Wire

SHEFFIELD, AL (JAN. 31) BUSINESS WIRE - The following is to the stockholders of Valley Federal Savings Bank (NASDAQ/NMS:VAFD). The bank held an Annual Stockholders Meeting earlier this month at its corporate headquarters in Sheffield, Ala. Two directors were re-elected each for 3 year terms. Deloitte & Touche was approved as the bank's audit firm for the ensuing year. It was reported that the new office building in Muscle Shoals should be ready for occupancy within 30 days.

Operations for the first quarter of fiscal 1990 revealed an increase of 18.7 percent in Interest Income. However, the increased loan production that attributed to this increase still required borrowed funds. Consequently, Interest Expense stripped away such gains when compared to the first quarter of 1989. Cost of funds when compared to the same

quarter a year ago shows some increase. However, the bank is beginning to experience a decrease in cost of funds on a current basis.

There was no significant dollar change in Other Income. There was an increase in Other Expense of $65,477 from a year ago due to compensation and employee related expense, professional fees and excelerated advertising costs. The above circumstances resulted in a $60,306 decrease in net earnings when compared to the same quarter last year.

The bank's mortgage loan portfolio increased almost $10M from the first quarter of 1989. As stated in the Annual Report, 80 percent of these loans were adjustable rate mortgages enhancing the bank's gap position. Consumer loan demand continues to improve with personnel experience.

Shareholders equity remains virtually unchanged with a bank value of $20.16 per share.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 2

ANNOUNCEMENT:

ASFAG and Harrier (TICKER: HARE) have amended a purchase agreement between them relating to the purchase of Harrier's series A stock and series A warrants.

According to the amended agreement, instead of purchasing 1.12 million series A shares at the first closing, ASFAG will purchase 466,665 shares between Dec. 15, 1989, and Feb. 15, 1990, and then will purchase an additional 653,335 shares on Feb. 28.

Harrier will issue 31,876 series A warrants at closings between Dec. 15 and Feb. 15 plus 223,132 warrants on Feb. 28.

ASFAG's obligation to purchase any shares is subject to its satisfaction with the status of a matter under inquiry with the SEC.

ASFAG has agreed to purchase series A shares acquired by Martin J. Wohnlich in the event his employment is terminated before July 1, 1990.

LATEST TRANSACTION:

On Dec. 31, 1989, ASFAG purchased 93,333 series A shares for $233,333.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 3

ANNOUNCEMENT:

On Jan. 10, 1990, Cororocs and HCS Technology amended the stock purchase agreement with Savin Corp. (TICKER: SVB) to change the date of the commencement of the exercise period.

The exercise period for the option will now begin with the delivery of the seller's notice between March 15, 1990 and Feb. 15, 1991 Mar. 15, 1990 and before Feb. 5, 1991, or Feb. 15, 1991, whichever is earlier.

The date on which HCS or its affiliates may, without approval of Savin's board, make an all cash tender offer for outstanding shares has been changed from June 30, 1990 to Aug. 15, 1990 and the termination dated was changed from June 30, 1991 to Aug. 15, 1991.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 3

GROUP LED BY DUANE A MARKUS OF WAYZATA, MN, OWNS 405,558 SHARES (24.97%) OF TECHNOLOGY 80 INC (TICKER: TKAT) OF MINNEAPOLIS, MN.

ANNOUNCEMENT:

On Jan. 11, 1990, Markus, Pagel and Gould served a written demand on Technology 80 to call a special meeting of its shareholders in order to change the company's restated bylaws to reduce the number of directors to three from eight and to elect the above-mentioned persons as directors.

Technology 80's legal counsel has informed Markus that, in his opinion, the group formed by these individuals includes others whose identities have not been disclosed on previous filings and that the group has made a "control share acquisition" for the purposes of Minnesota business law.

Markus denies the existence of a group which includes others not named in previous filings.

#90031d5970 01/31/1990 ~French/German News Agency
LONDON (JAN. 31) - The British government faced continuing industrial unrest Thursday, in spite of a controversial agreement which headed off a full-scale strike by workers at Ford, the country's biggest carmaker.

Although union members among Ford's 32,000 workers on Wednesday voted 59 per cent in favour of a deal giving them a basic 10.2-per-cent pay rise, workers at one plant making Ford utility vehicles continued an unofficial strike Thursday, and a partial strike stopped all work at the giant Halewood car plant.

The government's and employers' fears that the Ford agreement could now be seen as a benchmark for other industries were reinforced when unions for

the 45,000 workers of the privatized British Gas company put in a demand for a "substantial" raise.

"By substantial we mean a settlement in double figures," said union negotiator Dave Stirzaker, adding: "We want... a share of the huge profits of British Gas."

Rail, electricity and local government workers were all expected to follow suit with similar demands, ignoring a warning by the Confederation of British Industry, which said on Wednesday that the Ford deal could not be seen as a "benchmark."

In the public sector, meanwhile, a 20-week-old fight for better pay by ambulance workers was becoming increasingly bitter.

Chief union negotiator Roger Poole pleaded with crews at several stations in the London area who started an all-out strike - threatening key emergency services - from early on Thursday.

Union leaders feared that the ambulance workers, who have so far enjoyed massive public support by insisting on maintaining emergency cover even while their pay has been cut by their employers, could forfeit that popularity if members of the public die for lack of help.

Ambulance workers have been fighting to improve a government pay offer of 6.5 percent - one percentage point below Britain's current inflation rate - and to win similar pay arrangements to those enjoyed by police and firefighters.

#90031d6000 01/31/1990 ~French/German News Agency

BERLIN (JAN. 31) - An extraordinary congress of East Germany's only trades union was suspended in disarray shortly after it opened Wednesday as delegates engaged in shouting matches, the ADN news agency said.

The two-day meeting was suspended 40 minutes after it began as almost half of the 2,512 delegates called for the union's officials to be deprived of their voting rights because they formed part of the communist era "old guard," ADN said.

The FDGB union is facing grass roots demands for its independence after 40 years of being a Communist Party creature ahd has said it has lost more than a million of its 9.6 million members since the middle of last year, and now counts only some 8.5 million.

There are also moves to create independent union branches in many factories and businesses across the country.

The two-day FDGB congress is to elect a new governing committee and secretariat, after the previous ones resigned in early November.

The committee and secretariat had succeeded a team led by Harry Tisch, 62, who had headed the union for 14 years.

A close associate of disgraced East German communist leader Erich Honecker,

Mr. Tisch has been arrested and charged with abuse of power and corruption.

MADRID (JAN. 31) - Spain's current balance of payments deficit quadrupled in 1989 over the previous year's level to 11.6 billion dollars, officials said here Wednesday.

The government had been expecting a deficit of some 10.5 billion dollars, or three percent of gross domestic product, after a deficit of 2.9 billion dollars in 1988.

The sharp increase was largely due to a worsening of the trade deficit, up 36 percent over the 1988 level to 29.6 billion dollars.

-30- 659

#90031d6260 01/31/1990 ~French/German News Agency

DUBLIN (JAN. 31) - An Irish car importer has found a way around the heavy tax imposed here on new imported cars - by importing second hand Japanese vehicles direct from Japan.

International Vehicle Imports (IVI) was set up here in August specifically to import Japanese cars between four and six years old with between 10,000 and 20,000 miles (16,000 to 32,000 kilometres) on the clock.

The tax on new imported cars here is 21.7 percent, which on top of 25 per cent value added tax (VAT) makes new imports prohibitively expensive.

But on a four- to five-year-old import there is a 50 percent discount on that duty (although the tax is still paid on the value of a new vehicle regardless of the older car's market value, and VAT is still payable on its retail price).

IVI's Chief of Operations, Colm O'Herlihy, said: "This year we hope to be importing 5,000 second hand Japanese cars across a range of vehicles already known here."

Some 40,000 new cars were imported from Japan last year, accounting for about half the Republic's market.

IVI also runs an after sales service, with a six months' parts and labour guarantee on all its sales, and rust warranties taking each vehicle up to the end of its seventh year.

#90031d6290 01/31/1990 ~French/German News Agency

TOKYO (JAN. 31) - Polly Peck International plc chairman Asil Nadir on Wednesday defended the British group's purchase of 51 percent of troubled Japanese audio maker Sansui Electric Co. Ltd. as a long-term investment.

Mr. Nadir also dismissed suggestions that the 15.6 billion yen (108 million U.S. dollar) deal, the biggest foreign takeover of a Japanese company, was allowed to proceed only because Sansui was unable to find a partner in Japan.

"We have the ability and expertise to recognise prospects however under-used," he told a news conference in Tokyo. "We don't refuse to buy something because nobody else wants to buy it."

Sansui, which specialises in high-quality audio components such as amplifiers, has accumulated losses of around 15 billion yen (103 million dollars) and has failed to pay a dividend for several years.

The British food, electronics and leisure concern announced the takeover in October. Although hailed at the time as a breakthrough for foreign investment in Japan, where company takeovers are largely seen as closed to outsiders, many Japanese and foreign analysts questioned the move.

Some expressed surprise given Sansui's weak marketing capabilities while others merely noted that companies left unsold at home get sold abroad.

Polly Peck's purchase was completed on January 6 and the company says it now plans to concentrate on the joint development of new products in the fields of consumer electronics and office automation equipment.

Norbert Wirsching, chief executive of Polly Peck's electronics division, told the news conference that 40 new products were planned for the second half of this year with up to 19 of the group's factories involved in development.

Polly Peck's electronics activities include plants in Taiwan, Hong Kong, Malaysia, China, the United States, Italy and Turkey.

In October, when the agreement was announced, Sansui said its facilities

would be integrated "as far as possible" with Polly Peck's plants in Taiwan, Malaysia and Turkey.

In addition to its Sansui purchase, Polly Peck bought the fruit division of Del Monte Corp. of the United States last year for 875 million dollars, making it the world's biggest pineapple and third-biggest banana distributor.

#90031d6340 01/31/1990 ~French/German News Agency

NEW YORK (JAN. 31) - A man and his two-year-old son who survived the crash of an Avianca jetliner last week have filed a $202.5 million lawsuit against the Colombian airline.

Their lawyer, Robert Solomon, filed the suit Tuesday in U.S. District Court alleging that the airline failed to provide a competent crew and a safe and airworthy aircraft.

The suit was believed to be the first filed since the jetliner crashed Thursday in suburban Long Island.

Mr. Solomon said his client, Jesus Manuel Pinzon, a 31-year-old Colombian, was hospitalized with broken bones, cuts and internal injuries while his son Brian, was released after being treated for minor head injuries and cuts on his back.

#90031d6600 01/31/1990 ~French/German News Agency

BONN (JAN. 31) - Defecting East German army officers have been applying to join the West German armed forces, but Bonn cannot make up its mind about whether to take them on.

A west German defence ministry spokesman said both formal and verbal applications had come from serving East German officers, non-commissioned officers and other ranks, with some even using the newly opened border to visit recruitment centres in the west.

The Bonn government has yet to decide in principle if it should take on soldiers from an army once sworn to communism. While the West German armed forces have worried about recruiting enough other ranks, the spokesman said they already had plenty of officers.

-30- 891

#90031d6630 01/31/1990 ~French/German News Agency

Stockholm (JAN. 31) - The Swedish car manufacturer Volvo is negotiating with Mitsubishi on an agreement for their joint production of cars in Europe, it was reported here Wednesday.

The daily Svenska Dagbladet newspaper, citing industry sources, said the talks were focusing on the possible production of Mitsubishi cars at a Volvo factory in Ghent, Belgium.

The paper cited a Volvo official, Roger Holtback as saying that the company was ''naturally watching the Japanese invasion in Europe. It is part of a trend to bring production closer to the market, something which all car manufacturers are following''.

The Svenska Dagbladet report followed recent Japanese press reports of a possible Volvo-Mitsubishi linkup.

In recent years there had been rumours about Volvo cooperating with the French firm Renault, something which both firms declined to confirm or deny.

#90031d6640 01/31/1990 ~French/German News Agency

TOKYO (JAN. 31) - Indian business leaders said Wednesday that the country would continue to be open to Japanese investment under its new leadership following the ouster of former Premier Rajiv Gandhi in elections in November.

At a news conference at the conclusion of the 22nd joint meeting of the Japan-India Business Cooperation Committee, R.P. Goenka, head of the Indian delegation, said that India would continue to seek increased Japanese investment in his country,

Mr. Goenka, chairman of the India-Japan Economic Committe, said that India

was a "good place for Japanese companies to set up manufacturing footholds."

His remark was an answer to concern expressed during the meeting by Rokuro Ishikawa, chief of the Japanese delegation and president of the Japan Chamber of Commerce and Industry that the new Indian Government of V.P. Singh might abandon the policy of liberalized foreign investment advocated by Mr. Gandhi, sources here said.

President of the Federation of Indian Chamber of Commerce and Industry Raunaq Singh said "Japan should shift its overseas investment to India from Southeast Asian nations. These smaller nations have no more room for Japanese investment."

He also said "India is a huge market with 160 million potential buyers among a population of more than 800 million."

During the two-day meeting, the two sides agreed to further boost bilateral trade, a joint statement said.

Trade between the two countries has almost doubled in the six years between 1984 and 1989, rising to some four billion dollars in 1989 from 2.3 billion in 1984.

Japan's exports to India totaled 2.02 billion dollars in 1989 while imports came to 1.97 billion dollars, according to the Finance Ministry through customs statistics.

#90031d6730 01/31/1990 ~French/German News Agency

CANBERRA (JAN. 31) - Australia's inflation rate was 7.8 percent for 1989, a shade worse than the 7.7 percent result of the previous calendar year, the Bureau of Statistics reported here Wednesday.

But Treasurer Paul Keating said the Australian Government was not considering any immediate further easing of monetary policy following its move last week to cut interest rates.

The bureau said the Consumer Price Index (CPI), which measures inflation, rose 1.9 percent in the three months to the end of December, against a 2.3 per cent rise in the September quarter.

On an annualised basis, Australia's inflation rate was 7.8 percent for calendar 1989, against 7.7 percent for 1988.

The Treasurer's comments gave confidence to the Australian dollar, which put on nearly half a U.S. cent to close at 76.98 U.S. cents, up from 76.53 at Tuesday's finish.

Financial analysts had forecast a rise of between 1.5 percent and 2.2 per cent for the December quarter.

Westpac Banking Corp. said the dollar was trading at 76.60 U.S. cents immediately before the CPI release but "there was very little reaction to the number itself."

Shortcovering pushed it up to around 76.85 U.S. cents, "but the market is not very much encouraged by the figure," a Westpac foreign exchange dealer said.

Mr. Keating reiterated that the decision last week to let interest rates fall by up to one percent - widely intepreted as a prelude to general elections - was a "first initial step."

"We will wait until we see enough further evidence which would support a further easing," he said.

Mr. Keating said the government should still meet its budget forecast for 7.5 percent inflation for the year ending June 30 and Wednesday's figures showed welcome signs that the growth in domestic demand was slowing.

London (JAN. 31) - A serious fire broke out Wednesday in the engine room of a ferry plying the Irish Sea between Wales and Ireland with 285 people on board.

Firefighters were flown to the ferry St. Columba by helicopter. The captain had sent an Sos as the ship was about 10 nautical miles west of the coast of northern Wales. Three ships waited nearby in case the passengers had to be evacuated.

WARSAW (JAN. 31) - President Wojciech Jaruzelski of Poland on Wednesday called on Cardinal Jozef Glemp who was in "serious condition" after undergoing surgery for internal bleeding at a hospital here, PAP press agency said.

Cardinal Glemp, 61, was attended by "the most prominent Polish surgeons", the agency added.

Mr. Jaruzelski was unable to talk to the cardinal, who was recovering from the operation, but spoke to representatives of the Polish episcopate, according to PAP.

The relationship between the communist president and the cardinal has reportedly been cordial for many years. Mr. Jaruzelski was confident that all will be done to save the cardinal's life and was "constantly in touch with doctors", PAP added.

Church sources said it was "too early for a prognosis" on the cardinal's recovery. "The patient's condition is still serious," they said.

"The cardinal needs to rest and doctors are doing all they can to stop the bleeding from affecting the pancreas," sources added.

DUSSELDORF, West Germany (JAN. 31) - West German steelmaker Thyssen said its turnover fell 0.9 percent in the last three months of 1989 over the same period in 1988, to 7.9 billion Deutsche marks (4.9 billion U.S. dollars).

Profit for the period was statisfactory, the group said, but give no

figures.

New orders were down 0.6 percent on the same period of 1988 to 8.37 billion Deutsche marks (5.2 billion dollars), Thyssen said in a statement.

The order book stood at 14.93 billion Deutsche marks in December, up 1.6 per cent on the end of the previous quarter.

Thyssen employed 137,592 people at the end of last year.

Thyssen had a record year in the year ended September 30, with turnover up 17 percent at 34.2 billion Deutsche marks and net consolidated profits up 21.3 per cent at 825 million Deutsche marks.

Board chairman Dieter Spethmann told a press conference the group was on the point of concluding agreements to acquire three foundries, two in West Germany and one in Britain, the Birmid company.

Thyssen was also holding talks on some 30 projects for cooperation with East Germany, but it was unlikely that all of them would go ahead.

London (JAN. 31) - The 12-week-old strike at British Aerospace (Bae) so far has cost the Airbus consortium at least 180 million dollars in terms of delays and lost production, reports said here Wednesday.

The reports attributed the estimate to French Transportaiton Minister Michel Delebarre. The figure does not include the potential losses at Airbus production facilities in France, Spain, West Germany and elsewhere in Britain, he said.

Airbus is now completing just two planes per month, compared to the pre-strike average of eleven planes monthly, the reports said. If the strikes continue, then production could grind to a complete halt by early March at the latest.

Britain's metalworking union has staged the strikes to push demands for a reduction in the work week to 37 hours, from the current 39 hours.

The strikes have mainly affected Bae's plant at Chester, which is responsible for manufacturing the Airbus plane's wings.

KUALA LUMPUR (JAN. 31) - A Malaysian company Wednesday signed an

agreement to take a 51 percent stake in the French leasing company Sogelease (Malaysia) Bhd, officials said.

The company, Arab-Malaysian Development Bhd (AMDB), took over the stake held by a Malaysian company, Syarikat Maluri Sdn Bhd.

The remaining 49 per cent is held by Genefitec, a subsidiary of Societe Generale, the largest bank in France.

Managing director Azlan Hashim, who signed on behalf of AMD, said the agreement involved the purchase of 2.55 million shares for 3.57 million Malaysian dollars (1.32 million U.S.), at 1.40 Malaysian dollars (0.5 U.S. cents) per share.

Sogelease Malaysia was represented by Jean-Paul Roy, senior vice-president of Sogelease Network.

Sogelease Malaysia, founded in 1984, made a pretax profit of 1.2 million Malaysian dollars (440,000 U.S.) last year despite a generally poor year.

Managing director Jean-Pierre Frebault said the company signed contracts worth 80 million Malaysian dollars (29.6 million U.S.) in 1989 and that the firm was expected to sign 110 million Malaysian dollars (40.7 million U.S.) in contracts this year.

NAIROBI (JAN. 31) - A father is to take court action against a school which sent his 14-year-old daughter home for wearing a Moslem headscarf to class, the semi-official Kenya Times reported here Wednesday.

Shamta Juma was refused admission earlier this month when she arrived at Nairobi's Khalsa school for boys and girls, built by the Sikh community, whose children make up most of the pupils.

The headmistress told her father Khamis Ramadhan to take his daughter to an Islamic school, the newspaper reported.

"If I allow the girl to put on her headscarf, tomorrow the Gujarati, Hindus and other faiths will come and make their demands," she told him.

Around 20 per cent of Kenya's estimated 23 million population is Moslem.

The case follows similar recent incidents in France and in England, which gave rise to heated political debate.

BONN (JAN. 31) - West Germany's leading computer group Siemens said Wednesday it doubled personal computer sales last year to almost 75,000, some 70 percent of them in West Germany.

The group said in a statement it was hoping to boost this to 100,000 this year.

The figures do not include sales of Nixdorf personal computers. Siemens is awaiting the green light from the West German authorities for its agreement to take control of Nixdorf.

CAPE TOWN (JAN. 31) - President Frederik de Klerk's crucial speech to parliament Friday will not signal Nelson Mandela's release at the weekend, judging by a prison department decision Wednesday to postpone one of Mr. Mandela's visits.

The Reverend Allan Boesak, President of the World Alliance of Reformed Churches, had been due to visit Mr. Mandela at the Victor Verster prison, Paarl, east of here on Friday.

But Mr. Boesak told Agence France-Presse he returned from a protest march in the city on Wednesday to find a message asking him to ring the prisons department.

The officer he spoke to told him "something had come up" to prevent Friday's visit, which would have to be postponed until Tuesday morning. A disappointed Mr. Boesak said no other reason had been given.

The visit, at Mr. Mandela's request, will be the latest in a series of talks he has held with his colleagues in the banned African National Congress, unionists and lawyers.

The aim was to discuss the role of the church in the struggle against apartheid.

Government sources have been at pains this week to pour cold water on the idea that Mr. De Klerk might set a date for the release when he opens parliament, and a Mandela family lawyer, Omar Dullah, has said Mr. Mandela would not want to be released before the ANC is unbanned.

But some observers have speculated that the government might be preparing the ground for a surprise release to wrongfoot its opponents.

LONDON (JAN. 31) - The International Aero Engines consortium (IAE) has received orders worth 890 million dollars for its V-2500 aircraft jet engines in the past week, Rolls Royce, a partner in the consortium, said Wednesday.

The engines were ordered by McDonnell Douglas for its MD90-30 planes after the U.S. company International Lease Finance Corporation (ILFC) and Japan's Japan Air System placed large orders with the U.S. planemaker.

ILFC, the largest U.S. aircraft leasing concern, last week placed 15 firm orders for the MD90-30 plus 15 options.

Japan Air Systems ordered 10 of the planes last week and Alaska Airlines placed 20 firm orders with a further 20 options.

Rolls Royce has a 30 percent stake in IAE, which also includes Pratt and Whitney of the United States with 30 percent, Japanese Aero Engines with 23 per cent, MTU of West Germany with 11 percent and Fiat Aviazone of Italy with six per cent.

TEL AVIV (JAN. 31) - An investigation by the Israeli army has found that young recruits were mistreated by their superiors, it was disclosed Wednesday.

The Jerusalem Post newspaper quoted general chief of staff Dan Shomron as saying the maltreatment occurred at three army camps.

The probe was ordered following complaints that instructors had beaten recruits. A series of suicides in recent months focussed public attention on the issue.

'The situation is unbearable,' the Ma'ariv daily said. 'Parents of Israeli recruits are permanently concerned about their sons not only because of (possible) terror attacks but also because they are being humiliated and at times are even mentally mistreated.'

#90031d7920 01/31/1990 ~French/German News Agency

WEST GERMANY (JAN. 31) - Momentum for German reunification gained strength Wednesday as both Bonn and East Berlin praised Soviet President Mikhail Gorbachev's admission that a single German state could again exist and called for practical steps forward.

Mr. Gorbachev has "once again shown himself to be a realistic politician" and one anxious to ensure that the reunification process takes place within a "stable framework," West German Foreign Minister Hans Dietrich Genscher said.

But in an interview with West German radio Wednesday, Mr. Genscher reaffirmed Bonn's commitment to the North Atlantic Treaty Organization (NATO) and added: "A neutral Germany would be a factor of instability in Europe" and "is not the aim of the Soviet Union."

Mr. Genscher's remarks were the first official West German comment on Moscow's turnabout on the question of German reunification.

East German Prime Minister Hans Modrow, who met with Mr. Gorbachev at the Kremlin Tuesday, told reporters afterwards that the Soviet leader "did not rule out the prospect in the future" of a single German state.

Mr. Gorbachev had said in an interview earlier with East German television that no one casts doubt on the process of reunification but added that it was essential to act responsibly.

Mr. Gorbachev's remarks marked the first time a Soviet leader had acknowledged the possibility of German reunification, a highly sensitive subject in the Soviet Union, which suffered 20 million dead in World War II.

"Gorbachev has said yes," proclaimed Wednesday's front page banner

headline, set in the black, red and gold colors of both German flags, which appeared Wednesday in the West German mass-circulation daily Bild Zeitung.

"The Soviet Union was the last of the four allied powers victorious over Germany to oppose in principle German unity," Bild said.

Virtually all of the West German press and political figures reacted to Mr. Gorbachev's comments with similar enthusiasm.

"The stronger and stronger appeals in East Germany for a 'united German fatherland' apparently convinced him that Soviet resistance could only be counter-productive," the conservative West German daily Die Welt said.

Media reaction in East Germany was similar, with the communist party daily Berliner Zeitung stating that Mr. Gorbachev's remarks were proof of improving ties between East Berlin and Moscow.

"The dialogue with Modrow opened at the request of the Soviet Union which, along with the three western allies, is responsible as in the past for 'Germany in its entirety' and of closer relations between the states if that is the wish of the German people," Berliner Zeitung said.

After his talks with Mr. Gorbachev, Mr. Modrow said that "the perspective of unification is before us," adding: "I think it will now be necessary to confront the queston of a united German fatherland with determination."

Mr. Modrow's remarks stood in sharp contrast to those made by ephemeral former East German leader Egon Krenz, who visited Moscow in November shortly after taking over from the ousted East German leader Erich Honecker.

Mr. Krenz spoke at the time of the "unrealistic demand" for German reunification and insisted, as did his Soviet hosts, that the issue was not on the international agenda.

He stated that the main task for the East German communist part was to "make socialism more attractive" to ensure the survival of East Germany.

Despite the turnaround by Mr. Gorbachev and East German leaders on the reunification issue, East Berlin remains more cautious on the question that West Germany.

Mr. Modrow stressed that the two governments are in the process of forming a "contractual community" to pave the way for a "confederation" between the two Germanies.

West German Chancellor Helmut Kohl, under pressure from all sides to speed

up the reunification process, has carefully avoided using the word "confederation."

He has instead spoken of "confederal structures" aimed at paving the way for a German "federation" -- diplomatic parlance for a single country.

#90031d7970 01/31/1990 ~French/German News Agency

TOKYO (JAN. 31) - Japanese worked less but were paid more last year, the Labor Ministry said in a report Wednesday.

Regular monthly work hours of Japanese in all industries dropped 1.3 per cent from 1988 to an average of 158.2 last year, while average monthly wages rose 3.6 per cent to 238,230 yen (1,654 dollars), the ministry said.

Japanese workers put in an average 15.8 hours overtime a month, up one per cent from 1988. With overtime pay included, their wages averaged 357,286 yen (2,481 dollars) a month, up 4.8 per cent, it said.

In addition to regular monthly pay checks, Japanese workers were paid bonuses averaging 92,839 yen (645 dollars) a month last year, up 7.7 per cent from 1988, the ministry report said.

Japan's traditional bonuses are paid in a lump sum twice a year -- in the mid-summer and at year's end.

Japanese workers' overall monthly work hours, including overtime, dropped 1.1 per cent to 174.0 last year, while the average overall annual figure went down 23 hours from 1988 to 2,088 hours, the report said.

The ministry report did not provide figures for Japanese workers' 1989 annual incomes.

Japan's longer work hours have been the target of criticism by foreign countries, particularly the United States and European Economic Community members, which are seeking to slash Japan's huge trade surplus.

TOKYO (JAN 31) - Officials from 17 Asian and European nations ended a three-day roundtable session on industrial patent rights here Wednesday with a call for closer cooperation in the sharing of information on patent systems in the Asia-Pacific Region.

A spokesman for the meeting said the participants agreed to have Japan conduct a feasibility study on the collection of data on patenting

conditions in each country.

Details of the feasibility study have yet to to be worked out, but Japan is expected to finish the study before the next round of talks, due to be held in 1991, the spokesman said.

The venue for the 1991 meeting is to be decided later. The Tokyo meeting was the first of its kind.

The spokesman said the Japanese study would be assisted by the World Intellectual Property Organization.

The participants discussed, among other things, effective use of industrial patent systems and computerization of standards to enable developing nations to easily access information held by advanced nations, the spokesman said.

The meeting was attended by the Philippines, China, South Korea, India, the United States and Japan.

LONDON (JAN. 31) - Powergen, the smaller of the two divisions of the state-owned British Central Electricity Generating Board (CEGB), said Wednesday it had received the go-ahead to build a new 900 megawatt combined cycle gas turbine power station.

Powergen is due to be privatised in early 1991 along with the rest of the electricity industry, and will be responsible for 30 percent of power generation in Britain. National Power will provide the other 70 percent.

Permission for the two 450 metawatt module plant, to be built at Killinghome in North East England, was granted by the Secretary of State for Energy Mr. John Wakeham.

At the same time Powergen announced that it had reached agreement for the supply of gas from the Pickerill field in the North Sea, which is operarated by Arco British Limited, for use as a the initial fuel source for the plant.

WASHINGTON (JAN 31) - The International Finance Corporation (IFC) announced Wednesday that it would invest 17.5 million dollars in Pakistan's Pak-Suzuki Motor Company Limited.

The investment is to support the expansion of the company's production of vehicles by about 30,000 a year, said the IFC, an affiliate of the World Bank.

Pak-Suzuki, a joint venture between the Pakistan Automobile Corporation and Suzuki Motor Company of Japan, is Pakistan's only domestic assembler of automobiles.

The IFC is the largest source of direct project financing for private sector ventures in developing countries and holds more than 77 million dollars in investments in a wide range of sectors in Pakistan.

#90031d8270 01/31/1990 ~French/German News Agency

LONDON (JAN. 31) - Emissions of carbon monoxide should be reduced by 30 per cent around the world by the year 2000 to curtail global warming, according to a study at the center of a Greenpeace campaign launched here Wednesday.

"The needs of the environment must come first. Business as usual is not a viable option," said Steve Elsworth who is heading the Greenpeace campaign.

The campaign, coming a week ahead of a meeting in Washington of the United Nations' Intergovernmental Panel on Climate Change, is based on a report prepared by British scientist Mick Kelly entitled "Halting Global Warming."

In addition to the cutback in emissions of carbon monoxide, the study calls for an end to production and use of chlorofluorocarbons (CFC) which damage the earth's protective ozone layer and for halting the practice of deforestation.

"These are difficult objectives but not impossible to achieve," Mr. Elsworth said.

The Association for the Conservation of Energy meanwhile released its own study Wednesday on global warming, calling for a 40 per cent reduction in carbon monoxide emissions over the next 15 years.

BRUSSELS (JAN. 31) - Deputies of the Soviet parliament, the Supreme Soviet, will visit Brussels next month for their first meeting with a NATO secretary-general, the North Atlantic Assembly announced here Wednesday.

The 10-member delegation will meet with North Atlantic Treaty Organisation (NATO) chief Manfred Woerner on February 14 and hold talks and a round-table debate on February 15 and 16 with the assembly's committees for political affairs and defence and security.

The North Atlantic Assembly is an organisation grouping parliamentary representatives of the 16 NATO countries.

The meeting reciprocates a visit to Moscow by assembly members last July,

when they met with Soviet Prime Minister Nikolai Ryzhkov and Defence Minister Dmitri Yazov.

Eduard Shevardnadze last December 19 became the first Soviet foreign minister to visit NATO's Brussels headquarters.
